THE LABOUR GAZETTE

THE JOURNAL OF THE DEPARTMENT OF LABOUR

Vol. IV—No. 1.

JULY, 1903

Price Three Cents

The **LABOUR GAZETTE** wishes to draw the attention of its readers to the fact that, while every care will be taken to have information as complete and impartial as possible, it does not in its accounts of proceedings, abstracts of reports, legal decisions, quotations or other records of matters of concern to labour, necessarily endorse any of the views or opinions which may be expressed therein.

DEPARTMENT OF LABOUR, CANADA,
July 15, 1903.

A considerable portion of the present issue of the *Labour Gazette* is again devoted to tables relating to the subject of cost of living in Canada, retail prices of dry goods being dealt with, following the returns which have previously appeared relating to provisions and groceries. The subject will be again continued in the August *Gazette*, with tables showing prices of ready-made clothing, returns on rents being reserved for a still later issue. As has been pointed out previously, these returns are derived from sources wholly outside of the department, and their value consists largely in the fact that they constitute a body of wholly original material presented to the public in as nearly as possible the identical form in which it has reached the department.

Another prominent feature of the present *Gazette* is the table in which a full list is presented, by localities and classes of trades, of the various labour organizations of the Dominion as at present known to the department. Embracing as it does

over 1,550 organizations, the enumeration is easily the most comprehensive of the kind which has yet appeared in Canada. It may be stated that the department is constantly receiving additional returns on this subject, and that still further and more complete information regarding it will be published from time to time. As explained in the article which accompanies the table, the list of unions contained in the present table is presented largely by way of supplement to the series of articles relating to the growth and present position of labour organizations in Canada which have been appearing periodically in the *Gazette* during the past ten months.

It will be seen that the subject of legislation affecting labour and industry in Canada receives special notice in the present issue under two headings referring respectively to Acts passed during the recent sessions of the legislatures of British Columbia and of Manitoba. In the former article it will be observed that the bills of this class which finally received official sanction were largely in the way of re-enacting the legislation of previous sessions having reference to Chinese and Japanese labour.

Subjects of considerable interest to the industrial and labouring classes are those referred to in the special articles on the settlement of the strike of the Canadian Pacific Railway Company's employees in Western Canada, and the arrangement by arbitration at Halifax, N.S., of the dispute between the master builders and the Carpenters' Union of that city. In the former, the full text of the statements presented by the company and its employees

before the Royal Labour Commission which sat at Vancouver, B.C., during the early portion of the month, are quoted as of special interest in view of the fact that the full terms of the settlement have not been given to the public. The Halifax arbitration award, involving as it does the adoption of a sliding scale of wages according to the competency of the workman, is quoted *in extenso*.

The proceedings of the first annual conference of the Bricklayers and Masons'

Unions of Ontario are referred to in a special report.

A brief statement relating to the sittings of the British Columbia Labour Commission, above mentioned, is also included in the present issue. There are also the usual articles covering the trade disputes of the month, recent reports of departments and bureaux, formation of new unions, government contracts, industrial inventions and recent legal decisions.

INDUSTRIAL AND LABOUR CONDITIONS DURING THE MONTH OF JUNE.

I. GENERAL SUMMARY.

A distinct improvement is, on the whole, noticeable in the *Gazette* correspondents' reports for June over conditions in the general labour market of the Dominion as reported for the preceding month. Two leading developments were in the main accountable for this, namely, the relief towards the middle of the month of the dry weather which had prevailed almost without break in eastern and central Canada since April, and the gradual improvement in the strike situation throughout the Dominion. The former of these agencies, from its marked effect upon the agricultural and lumbering industries, was felt over a considerable area, and imparted a marked impetus to trade and industry generally. In connection with the trade disputes of the month, though but 16 of the 44 disputes reported as in existence during June, were settled, and though the month ended with 28 strikes still undetermined, as against only 22 reported on June 1, it will be seen by reference to the trade disputes article on another page of the *Gazette* that the situation in other important features shows the alleviation above remarked upon. For example, only 6,872 employees were involved in labour disputes during June as against 11,564 in May. Wages, as will be seen from the paragraph below in which the various changes reported to the department during June are recorded, maintained an upward

tendency, while the customary large influx of immigrants was satisfactorily absorbed. A general expansion of industry was, in fact, noted in almost all sections of Canada and the number of new and important enterprises being placed in operation continued to grow. Building operations were on an exceptionally large scale during June. More particular references to these and other features of the industrial chronology of the month will be found in the course of the following paragraphs, and in the correspondents' reports.

Increases in Wages During June.

The following instances of increases in wages granted during June were reported to the department.

Nova Scotia, *Halifax*.—Printers from \$10 to \$11 per week.

New Brunswick, *Moncton*.—Intercolonial Railway clerks, 20, 15 and 10 per cent, according to grade. *St. John*.—Freight porters, freight checkers, car cleaners, and carpenters in the employment of the Intercolonial Railway.

Quebec, *Montreal*.—Bricklayers from 35c. to 40c. per hour; builders' labourers, from 12½c. to 16c. per hour with a reduction in hours from 10 to 9 per day.—*St. Hyacinthe*.—Labourers from .90-\$1.00 to \$1.25-\$1.35 per day; bricklayers from \$1.00 to

\$1.50 per day ; carpenters, from \$1.75 to \$2.00 per day.

Ontario, *Berlin*.—Cigarmakers, to a minimum rate of \$7.00 per thousand ; *Brantford* : bakers, 20 per cent and change from night to day work ; *Chatham* : civic labourers, reduction in hours from 10 to 9 per day and increase of wage scale to 19c., 17c. and 15c. per hour according to age and ability ; *Guelph* : bakers, to minimum rate of \$13 per week for foreman, \$11 per week for journeymen, and \$6 for helpers with a change of system from night to day work ; *Hamilton* : plumbers, from 25c. to 27½c. per hour ; wholesale clothing operatives, 5 per cent ; *London* : city firemen, first, second and third year men, \$25 per year, foreman, \$75 per year ; assistant foreman, \$50.00 per year ; chief, \$100 per year ; hand compositors on newspapers, from \$10 to \$12 day work, \$11 to \$13 night work, with a reduction of six hours per week ; machine operators on newspapers, from \$13 to \$14 per week, day work, and \$14 to \$15 per week, night work ; job compositors, from \$10 to \$10.50 per week ; *Niagara Falls* : employees of G.T.R. car shops, chain and trap makers, reduction in hours ; *Kingston* : painters, from \$1.60 to \$2.00 per day ; longshoremen, from 15c. to 23c. per ton for handling iron or feldspar ; *Toronto* : garment pressers, to a minimum of 25c. per hour with nine hour day ; moulders, reduction to nine hour day ; bakers, to \$15 per week for foremen, \$13 for journeymen, and \$9 for helpers ; *Windsor* : retail clerks, reduction in hours from 75 to 65 per week ; civic employees, from \$1.25 to \$1.50 per day.

British Columbia, *Vancouver*.—Printers, minimum of \$21 per week of 51 hours ; *Victoria* : carpenters and joiners, from 37½c. to 40c. per hour with reduction of hours from 48 to 44 per week.

The Crop Outlook.

As stated above, a feature of the month was the marked improvement in the crop outlook in central and eastern Canada, and in certain sections of the west as well, which followed the plentiful rains of the

third and fourth weeks of the month. In Manitoba, according to a crop bulletin issued by the Provincial Department of Agriculture, an immense increase in acreage, satisfactory growth of the dairying industry, and greater interest in mixed farming on the part of agriculturists were recorded. The same authority reports 3,757,173 acres at present under crop in Manitoba, of which 2,442,873 acres are under wheat, 855,431 under oats, and 55,900 under flax. Barley alone of the coarse grains shows a decrease of 3,253 acres, largely due to the increased production of spelts. Some 13,986 head of fat cattle and 126,846 milch cows were wintered by the farmers, and indications point to a profitable dairying season and a large output of butter. It is estimated that the amount of extra farm hands required for the harvest this year will be less than before owing to the early engagement of help by the farmers and the unusually large numbers already in the field. About 5,158 men, supplemented by 3,153 female servants, according to the bulletin, will be required. Up to the end of the month reports from all sections of the province were to the effect that growth and other conditions were very favourable. In Ontario, crops, it is expected, will be generally satisfactory, though the scarcity of help on the farms is still complained of. It is reported that in Quebec and the maritime provinces hay, will be a light crop in a few localities, but that the general situation at the close of the month was very favourable.

Conditions in the Other Industries.

In the other leading industries of the Dominion generally satisfactory conditions prevailed. The lobster fishing season in the maritime provinces has been exceptionally good, and from Prince Edward Island, Cape Breton and the Nova Scotia coast reports of excellent catches were received. On the great lakes conditions were fair. In British Columbia preparations for the salmon run were completed and one of the features of the month was the discussion

attending the settlement of the wage scale of the fishermen for the present season.

In *mining* favourable reports were received, especially from the coal mining districts of Nova Scotia where the activity of the earlier months of the year was maintained. In British Columbia conditions remained with little change from last month, the mines on Vancouver Island suffering considerably from labour troubles over the entire month. In the boundary country, however returns for the year showed a total shipment of over one quarter of a million tons, and an almost equal total was reported from the Grandby smelters. A scarcity of coke was complained of at a few points. Reports received by the Bureau of Mines, Ontario, indicate activity in mining in both the eastern and northern districts of the province.

Bush fires did some damage to standing timber and to logs remaining in the woods in Quebec and New Brunswick. Other reports, however, in the *lumbering* industry were of a generally favourable character. Sales of limits and the organization of new companies were recorded on a large scale, and still further indication of the prevailing prosperity was the beginning at least three weeks earlier than last year of preparations for the coming season's work in the woods. The heavy rains of the last half of the month were of material assistance in bringing logs to the mills.

The Transportation Problem.

The transportation companies continued very active during June, the volume of freight traffic being maintained and that of the passenger trade increased by the advent of the excursionist and tourist season and the maintenance of the immigration and other movements of general business. A scarcity of freight cars was still complained of, varying in intensity according to locality.

The traffic through Canadian canals was particularly heavy during June especially in grain shipments, a result attributed to the recent abolition of tolls. During the

months of April and May the total freight carried through the two canals at Sault Ste. Marie was 6,039,856 tons, which is 74,963 tons more than the quantity carried last year, and over 4,500,000 tons more than recorded for the same two months of 1901. The quantity carried through the Canadian canal was 796,510 as against 532,188 tons in 1902, and 151,679 tons in 1901. During April and May the Canadian canal carried 11.64 per cent of the total, in 1902 only about 8 per cent, and in 1901 only 6.8 per cent. The opening two months of the season therefore show an increase of 264,322 tons in the quantity carried by the Canadian canal, and an increase of 3.65 per cent in the proportion carried by it. There were decreases in the quantity of wheat, flour, iron ore and lumber carried by the canal, but large increases in grains other than wheat and in general merchandise. The registered tonnage going through the Canadian canal was 14.53 per cent of the total for the two canals in 1903, 9.98 per cent for 1902, and 8.28 per cent for 1901, showing a steady gain by the Canadian canal in proportion of the tonnage using the canals. Of east-bound freight 12.10 per cent went through the Canadian canal in 1903, 7.96 per cent in 1902, and 6.85 per cent in 1901. West bound freight for the same canal was 10.20 per cent in 1903, 7.40 per cent in 1902 and 6.85 per cent in 1901, showing a great gain in the business of the canal both absolutely and relatively.

Reports of projected railway extensions, as well as improvements on an extensive scale on lines already in existence, continued to receive a large share of public attention during the month. In this connection mention might be made of a resolution to aid the extension of the Canadian Northern line from Grandview, Man., to Edmonton, N.W.T., a distance of 620 miles, and from a point on the Prince Albert branch to Prince Albert, a distance of 100 miles, of which notice was given in the House of Commons, the government proposing to guarantee the principal and interest upon debentures to the extent of \$13,000 per

mile, interest to be at the rate of three per cent and the principal to be payable in 50 years. Rates on the line are subject to regulations; the line cannot be leased or sold without permission; and the government may grant other railways running rights over the line under equitable arrangements.

Two tenders were received by the government during the month in connection with the fast Atlantic service.

Dominion Revenue.

The statement of revenue issued by the Department of Finance in the first week of the month shows the total revenue for Canada for the eleven months ending May 31, to have been \$57,725,393, an increase of \$6,446,031 over the corresponding period of last year. The increase of revenue over expenditure on Consolidated Fund amounted to \$18,765,412. The Customs revenue for the eleven months ending May 31, was \$33,039,974, an increase of \$3,874,397, compared with 1902. For the month of May alone Customs' receipts aggregated \$3,051,272, a gain of \$274,281 over the same month last year.

Canadian Foreign Trade.

The aggregate foreign trade of Canada for the eleven months ending May 31, amounted to \$386,337,277, an increase of \$37,632,192 over 1902. These totals comprise only imports for consumption and exports of domestic products, omitting coin and bullion and foreign goods exported from Canada. The exports for the eleven months show a gain of \$16,449,679 as compared with the preceding year. In imports an increase of \$21,182,513 is indicated. For the month of May alone the increase in exports was \$2,781,832 and in imports, \$2,977,194.

The following table shows the exports and imports for the eleven months in detail:—

| | IMPORTS. | |
|------------------------|---------------|---------------|
| | 1902. | 1903. |
| Dutiable goods.. . . . | \$105,727,749 | \$120,599,959 |
| Free goods | 70,051,391 | 76,361,694 |
| Total.. . . . | \$175,779,140 | \$196,961,653 |
| Duty | 28,954,796 | 32,804,094 |

DOMESTIC EXPORTS.

| Products— | 1902. | 1903. |
|------------------------|---------------|---------------|
| Mine.. . . . | \$ 29,617,478 | \$ 27,265,319 |
| Fisheries | 12,825,414 | 10,122,285 |
| Forest.. . . . | 26,894,315 | 31,067,102 |
| Animals and produce .. | 53,887,109 | 62,674,272 |
| Agriculture.. . . . | 33,209,478 | 39,878,792 |
| Manufactures.. . . . | 14,462,051 | 18,289,140 |
| Miscellaneous.. . . . | 30,100 | 78,714 |
| Total.. . . . | \$172,925,945 | \$189,375,624 |

Montreal Port Returns.

Regarding the returns of the Port of Montreal since the opening of navigation as a criterion of the present status of the export trade of the Dominion, a very satisfactory result is obtained. Though exports of wheat, oats and butter show decreases, large increases are shown in corn, barley, rye, cattle, cheese and meats. Thus from the opening of navigation to the end of June the exports of corn totalled 1,647,000 bushels as compared with 17,000 bushels for the same period of last year, a result largely attributed to the failure of the crop in the United States. In cheese, in spite of the high prices ruling, the exports are fully 60,000 boxes ahead of last year. In cattle the season is 100 per cent better than 1902. Butter has decreased by 50,000 packages, wheat by 850,000 bushels and oats by 300,000 bushels.

The detailed returns are as follows:—

| | 1903. | 1902. |
|---------------------|-----------|-----------|
| Wheat.. . . . | 5,259,360 | 6,111,468 |
| Corn.. . . . | 1,647,574 | 17,150 |
| Oats.. . . . | 239,612 | 562,332 |
| Barley.. . . . | 140,419 | 65,563 |
| Rye.. . . . | 350,123 | 240,645 |
| Butter.. . . . | 30,123 | 82,241 |
| Cheese.. . . . | 399,880 | 330,561 |
| Cattle | 36,303 | 15,956 |
| Boxed meats.. . . . | 33,706 | 28,090 |

Imperial Trade Returns.

Returns for the five months ending May 31 show the following increases in the principal British imports from Canada:

Wheat, £198,000; oats, £18,000; cattle, £406,000; sheep and lambs, £13,000; bacon, £149,000; cheese, £58,000; eggs, £11,000; canned lobsters, £4,000; hewn wood, £3,000. The decreases were:—Wheat, flour, £37,000; peas, £37,000; butter, £29,000; sawn wood, £66,000; hams, £11,000; canned salmon,

£166,000. The imports of maize totalled £50,000. British exports to Canada during the same period increased as follows : Salt, £5,000 ; spirits, £28,000 ; oil seed, £1,000 ; galvanized sheets, £18,000 ; tinned sheets, £60,000 ; tin plates, £31,000 ; cutlery, £7,000 ; cotton piece goods, £6,000 ; jute piece goods, £23,000 ; woollen tissues, £63,000 ; worsted tissues, £80,000 ; carpets, £45,000 ; haberdashery, £42,000 ; lace, £3,000 ; apparel and slops, water-proofed, £20,000 ; apparel and slops, not water-proofed, £12,000 ; earthenware, £15,000 ; cement, £20,000. The decreases in British exports to Canada were : Silk, £4,000. The exports of railway iron totalled £125,000, of iron bars £75,000, and of sheets and plates, £64,000.

British official returns relating to trade between Great Britain and the colonies report that India's total trade with Great Britain during the past year was £73,000,000, Australia's £50,000,000, and Canada's £30,000,000.

Attention was directed during the month to the prospect of an increased trade between Jamaica and the Dominion. Fruit exports from Jamaica to Canada showed a large development last season, amounting in some lines to 600 per cent. Improved shipping facilities between the colonies were discussed in this connection during June.

Domestic Trade.

With the advance of the summer season a slight lessening of wholesale activity was evidenced in the larger trade centres, and the dry weather of the early part of the month in eastern Canada had a similar effect in certain sections on retail sales. In the west, however, and in central and eastern Canada as well, after the relief of the drought, business was very active and collections, considering the late season, exceptionally good. The demand for autumn staple goods set in briskly throughout Canada, and the number of failures in June was small. The second half of the month, on the whole, owing to the favourable crop

outlook, and the active conditions of employment, showed a much freer movement of goods, and shipments of merchandize were unprecedentedly high for the season. Considerable depression prevailed during the earlier part of the month in Canadian securities and some heavy suspensions of payment ensued. Recoveries, however, were on the whole satisfactory.

Canadian Bank Reports.

A feature of the past month was the number of annual reports of Canadian banks presented, and the uniformly good showing of the record of the past year in this connection may be regarded as reliable evidence of the general prosperity prevailing throughout the Dominion. Of these the following may be mentioned in the order of the holding of the meetings :

Bank of Montreal.—The 85th Annual Report of the directors held on June 1 showed a net profit for the year ending April 30, of \$1,813,483.66. An additional \$1,000,000 was credited to rest account. Five new branches of the bank have been opened since the holding of the last general meeting on January 7, 1903. On that occasion, it may be recalled, the bank's capital was increased by \$2,000,000, bringing it up to \$14,000,000.

Eastern Townships Bank.—The 44th Annual meeting of the Eastern Townships Bank was held at Sherbrooke, Que., on June 3. The earnings of the bank were reported larger than ever in previous years and a larger balance than usual was carried forward to meet possible depreciation in the value of securities. The reserve fund of the bank has now reached the sum of \$1,318,442.50. It was reported that the deposits had increased nearly \$750,000 during the year, and that the circulation has also been in excess of last year. Ten new branches were established and a number of important improvements to various properties carried out. The following paragraph from the report may be quoted in full :

Business throughout the country on the whole has been prosperous, and manufacturing enterprises fairly successful. Lumber and pulp

wood, etc., has been in good demand and at satisfactory prices. Mining in the province has been carried on steadily, and it is believed with good results. In British Columbia labour disturbances have seriously crippled operations in the mines, but the outlook is now much better and greater developments may be looked for. The dairy industry, so important in this province, continues to prosper and is increasing year by year. Due care, however, must be exercised to manufacture the higher grades.

Bank of Hamilton.—At the meeting held on June 15, the profits of the year were reported to have been of a very gratifying and satisfactory nature; considerably exceeding those of the previous year, as well as those of any previous period. A net profit of \$335,389 was declared, which, with \$44,732 at the credit of profit and loss on May 31, 1902, made a total of \$380,122. From this \$200,000 was paid in dividends, \$100,000 was carried to reserve fund, \$5,000 was carried to rebate on current discounts, and \$50,000 was written off bank premises, leaving \$70,122 to be carried forward to profit and loss. Deposits largely increased during the year.

The Union Bank of Canada.—The 38th Annual Meeting of the shareholders of the Union Bank of Canada was held on June 15. Of a total profit and loss account of \$529,381.92 \$350,000 were transferred to the reserve fund; \$24,117.20 carried forward, and the balance appropriated to the payment of dividends. The net earnings of the bank amounted to \$360,482.57 or 16½ per cent of the paid-up capital. During the year the subscribed capital was increased from \$2,000,000 to \$2,500,000. Twenty-seven new branches were opened in Ontario, Manitoba and the North-west Territories.

The Traders Bank of Canada.—Continued prosperity and increasing business were reported at the annual meeting, on June 16. The increase in deposits during the year exceeded 22 per cent, or in round numbers \$2,000,000, bringing the total deposits held by the bank for the year ended May 31, 1903, up to \$10,881,652.06. Eleven new branches were opened during the year and a recommendation was made that power be given to increase the capital stock to the extent of \$500,000, making the total

capital \$2,000,000. In the opinion of the directors the profits of the bank warranted an increase in dividends and the placing of the stock on a 7 per cent basis.

Merchants' Bank of Canada.—At the annual meeting held on June 17, satisfactory profits for the year were reported. A further sum of \$50,000 was written off bank premises account, \$15,000 was transferred to the officers' pension fund, and \$200,000 added to rest account, leaving \$74,245.15 to be carried forward to next year at the credit of profit and loss account.

Ontario Bank.—Business, according to the annual report, continued to show satisfactory increases and four new branches were opened during the year. Loans on current account amounted to over \$10,000,000, and the rest fund with the addition of \$75,000 this year amounts to \$500,000.

Banque d'Hochelaga.—The 29th general meeting was held on June 17. A total net profit of \$258,014.68 was shown for the year, of which \$100,000 was carried to the reserve fund, \$10,000 carried to officers' pension fund and the balance paid in dividends or placed to the credit of profit and loss. Two new branches were opened. The bank has now upwards of \$8,000,000 on deposit.

Imperial Bank of Canada.—The 28th Annual Meeting was held on June 17. Out of the net profits dividends have been paid at the rate of 10 per cent amounting to \$285,237.37; bank premises account has been credited with \$20,000; rest account was increased by \$100,000, and profit and loss account by \$76,890.75. The premium received upon new capital stock amounting to \$311,312 was also added to the rest account, making that account \$2,636,312 or 88½ per cent of the paid-up capital. Six new branches were opened during the year and the capital stock increased by \$1,500,000, of which \$500,000 has been allotted to shareholders.

Notes of the Month.

The formation of a threshers' association was the occasion of considerable discussion during the month in certain sec-

tions of Ontario, meetings of farmers having been held in several counties to protest against the advance in rates alleged to be in contemplation by the association.

On June 25 assent was given to some 94 bills which had passed both Houses of the Dominion Parliament during the present session. The number of acts relating to the transportation industry was noticeable among these, no less than 42 having direct reference to the subject. Six of the bills were for the incorporation of new banks.

Negotiations were in progress during June, looking to the organization of a mutual benefit association of the Montreal Street Railway Company's employees. In a communication addressed to its employees on June 4, the company reiterated its statement of May 23, to the effect that it favoured the formation of a mutual benefit association among its employees. The company further stated that it had the organization of such an association under consideration and was in communication with other companies having successful benefit associations in operation among their employees. The employees, it was stated, would be consulted in the establishment of this scheme, the object of which was asserted to be the bringing of the men into closer touch with the management and the creation of a fund for the relief of the sick and injured, for the assistance of widows and children, and for pensioning those who had grown old in the service. It was announced that the scheme would be formulated in all probability within the next sixty days, and the company requested that no action on the part of the employees in the same direction be taken during the interval. A substantial contribution to the funds of the association was promised by the company. At the end of the month no further definite announcement had been made.

Preparations in connection with the meeting in Montreal from August 17 to 20, of the Fifth Congress of the Chambers of Commerce of the Empire, made considerable progress during June. Amongst other

matters the itinerary of the Canadian tours of the delegates was settled upon.

The Canadian Electrical Association held its thirteenth annual convention at Toronto, beginning on June 10. Delegates were present from many sections of the Dominion and a prominent subject under discussion was the growth of the feeling for municipal ownership, especially in the towns of Ontario, the address of the president being largely occupied with this question. The membership of the association, according to the secretary treasurer, is at present 344, an increase during the year of 38. The organization of local branches in Toronto, Montreal, Ottawa and other large cities was recommended. Receipts for the year were \$1,398.11, with disbursements of \$488.94.

Among industrial disasters of the month mention may be made of the fire which occurred in Ottawa on June 4, destroying property estimated at upwards of \$250,000 and throwing some 300 employees temporarily out of work.

The formation of an employer's association, at Vancouver, B.C., was reported during the month. The official statement of the purposes of the organization was given out as follows :

The organization of the employers in and around Vancouver has been successfully effected under the title of the Employers' Association of Vancouver, B.C. The situation which has led to the formation of this association is well known. Hitherto organized labour has locally dealt entirely with individual employers or with sectional associations of employers. It is reasonable to believe that the meeting of two thoroughly organized bodies representing labour on the one hand and the investor on the other, will result in a fair and amicable adjustment of any misunderstandings and differences of opinion which may arise.

The members of this association, feeling assured that the existence of such an organization as this will go far towards the avoidance of disputes and individual irritation leading up to strikes (admitted as they are to be most detrimental to the common interests of all residents of the province), believe that the establishment of a responsible comprehensive body, thoroughly representative of the capital invested in this neighbourhood, will be welcomed by the intelligent and practical main body of the members of the labour unions.

The Canadian Cannery Consolidated Company, Limited, held its first general meeting at Hamilton, Ont., on June 12,

when organization was completed and directors and officers were elected. The consolidated company has taken over in the neighbourhood of 40 factories and is capitalized at \$2,500,000.

A conference was held in Montreal early in the month between members of the Montreal Produce Merchants' Association and a number of cheese and butter buyers and makers of the provinces of Quebec and Ontario. The meeting was called for the purpose of directing attention to the necessity of a higher and more uniform standard in the making and handling of these products, and the session was chiefly devoted to a discussion of the list of requirements drawn up by the local Produce Merchants' Association, as necessary, in order that cheese or butter might be classed as 'finest'. There was practical unanimity between both the buyers and makers in accepting the following definition of terms both in butter and cheese :

Butter.—Finest creamery butter shall be butter made in a creamery under the system known as the centrifugal or separator process.

Flavour.—Sweet, clean and fresh.

Body.—Good and uniform and not loose made or watery ; must contain less than 16 per cent moisture to conform to the law in England. With proper care none of our Canadian butter should contain more than 13 per cent moisture.

Colour.—Even and uniform ; should be straw coloured or pale, but not white or lardy.

Salt.—Must not be over three per cent, unless specially arranged for.

Package.—Boxes must be strong, well made, of well seasoned wood, properly paraffined ;

of the uniform capacity of 56 lbs., clean and in good condition for shipping. When hooks are used, four hooks in each box. Tubs must be strong, neat and of uniform size. Pure vegetable parchment paper of not less than forty pounds to the ream must be used for lining all packages.

Cheese.—Flavour, clean and pure.

Body.—Close, good and well cured.

Texture.—Silky, solid and meaty.

Colour.—Good and uniform.

Finish.—Of good shape and fairly uniform in size, neat in finish, with good rinds and clean surfaces.

Boxes.—Must be strong and close fitting.

The American Association of Farmer's Institute Workers held its eighth annual convention in Toronto during June, in response to an invitation extended by the Ontario Department of Agriculture. The association, which is international in character, exists for the purpose of developing the latest ideas in the practice and theory of agriculture and the best means to educate the farmer to scientific methods. Papers on various subjects including the Ontario organization of a farmer's institute were read.

During the month of June three appointments of correspondents to the *Labour Gazette* were made, namely : Mr. Joseph T. Carlin for the city of Stratford, Ont., and district, in place of Mr. M. H. Westbrook, resigned ; Mr. Gustave Audet for the city of Montreal, Que., and district ; and Mr. Ernest Green, for the city of Niagara Falls and district.

II. REPORTS OF LOCAL CORRESPONDENTS.

HALIFAX, N.S., AND DISTRICT.

Mr. F. W. Smith, Correspondent, reports as follows :—

GENERAL CONDITION OF THE LABOUR MARKET.

The general activity of labour during May continued through the month just past, and all branches of labour have been well employed. The activity in the building trades has been very pronounced. Commercial activity was also very manifest during the present month, and wholesale and retail trades were busy. An important event in the labour market of this

city during June was the settlement by arbitration of the Carpenters' dispute with the Master Builders' Association. The Carpenters' Union asked for an increase of 3 cents per hour on the minimum rate of 22 cents, which was refused by the Master Builders' Association, and was referred for settlement to a board of arbitrators under the terms of an agreement previously entered into by the two parties involved. The case occupied considerable time, and the award was arrived at and presented on the 26th instant.*

* A full copy of the award appears on another page of the present issue of the *Gazette*.

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—In some districts hay is reported to be very plentiful, but other branches of the agricultural industry have not done well, the weather being most unseasonable, and frost having prevailed up to the present month.

Fishing.—The industry has been normal during the past month.

Mining.—The great activity in coal and gold mining throughout Nova Scotia still continues, and its prospects for further development are bright.

CONDITION OF PARTICULAR TRADES.

Building trades.—All branches of the building trades are exceptionally busy, including bricklayers and masons, carpenters and joiners, lathers and plasterers, painters and decorators, stone cutters, and builders' labourers.

Metal, engineering and shipbuilding trades.—Iron moulders are busy, and iron workers and helpers are also well employed. Machinists and engineers report work normal. Boilermakers are fairly busy, as are horseshoers.

Woodworking and furnishing trades.—Woodworkers and upholsterers are moderately busy. Carriage and wagon makers, and carriage painters are satisfactorily employed. Coopers report work fairly brisk.

Printers and allied trades.—Printers and pressmen are well employed.

Miscellaneous.—Retail clerks report employment as being steady. Delivery employees are kept busy.

Transport.—Railroad and steamboat employees are well employed, and freight-handlers are also busy. Ship labourers and longshoremen find work very fair. Teamsters and expressmen are very busy.

Unskilled labour.—This class of labour has been very much in evidence during the past month.

CHARLOTTETOWN, P.E.I., AND DISTRICT.

Mr. F. J. Nash, Correspondent, reports as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

The labour market during June showed little change from May, demand and supply being well balanced with a slight shortage in the supply of skilled labour. Contractors were somewhat hampered by the scarcity of lumber, which is obtained almost exclusively from the other provinces. Building operations were brisker throughout the country than in the city. Farmers are in better circumstances and are consequently devoting more attention to the improvement of their dwellings, by repairing or rebuilding. In the city the contract was let for a \$35,000 market house and work commenced at the excavation of the cellar. Shipping of produce was quieter in June than in May, but wholesale and retail men report favourably as to condition of trade. There have been no changes in the rates of wages or hours of labour and the harmonious relation between employer and employees continues undisturbed.

CONDITION OF LOCAL INDUSTRIES.

The long continued drought, broken by showers only at the close of the month, had a bad effect on the hay crop, which will be short this year. The same cause by affecting the pasture will lessen the production of milk, and consequently the cheese output will be diminished, although the increased number of milch cows may prove a compensation.

Lobster fishing was not so good as earlier in the season but high prices still prevail.

The construction of the Murray Harbour Railway and the Hillsborough Bridge kept several hundred men employed, but the substructure of the latter is nearing completion.

CONDITION OF PARTICULAR TRADES.

Building trades.—Bricklayers and masons have been fairly busy, and carpenters and joiners were steadily employed. Lathers, plasterers, painters, decorators and paperhangers, plumbers, gas and steam-fitters and builders' labourers report a busy month with a fair demand for the latter.

Metal, engineering and shipbuilding trades.—Iron moulders, iron workers, machinists and engineers are reported to have been busy. Steam engineers had a good month. Bicycle workers were all steadily employed.

Woodworking and furnishing trades.—Woodworkers were busy.

Printing and allied trades.—Printers were busy and bookbinders had a fairly good month.

Clothing trades.—All classes are reported to have been fairly busy.

Food and tobacco preparation.—Bakers and confectioners, butchers and meatcutters were busy.

Miscellaneous.—Barbers had a good month.

Transport.—Ship labourers and long-shoremen report work brisk.

ST. JOHN, N.B., AND DISTRICT.

Mr. W. H. Coates, Correspondent, reports as follows :—

GENERAL CONDITION OF THE LABOUR MARKET.

A marked improvement took place in the labour market during the month of June, all branches being fully employed except the ship labourers. Carpenters and bricklayers are scarce. The contractors for the I.C.R. round-house have been advertising for men and offering \$4 per day. The Eastbrook's tea warehouse is well advanced; excavation for the new public library has been started; the new I.C.R., round-house is under way; T. S. Simms & Co. Limited, are erecting a lumber shed in rear of their factory on Union Street; the Street Railway Company will begin extending and improving its lines after July 1; and the several transportation companies are doing a large business as tourist traffic has already set in and is daily increasing. Bank clearings for the four weeks ending June 25, were \$3,933,995, as against \$3,698,238 during the same period in 1902, being \$237,757 greater than last year, and \$583,516 less than the five weeks ending May 28, of the

present year. Great activity prevailed in wholesale and retail trades showing a marked improvement over the month of May. A majority of the merchants and others have agreed to close their places of business during the months of July and August at one o'clock on Saturdays. The I.C.R., employees received word on June 10 that increases in pay have been granted as follows :—Freight porters, \$1.40 per day; freight checkers, by from \$4 to \$6 per month, bringing the minimum pay up to \$45 and the maximum to \$55; male car cleaners, 13 cents per hour; first class carpenters, first year, 18 cents per hour, second year, 19 cents, third year, 20 cents; second class carpenters, first year, 15 cents per hour, second year, 16 cents, third year, 17 cents; lamp trimmers received no increase; car inspectors will not be paid for overtime and no pay will be given for statutory holidays to men who are not working.

CONDITION OF LOCAL INDUSTRIES.

Farmers report that crops are improving since the recent rains, but owing to the long continuance of the dry weather it is thought that the hay crop will be poor.

The *fishing* season has been a very successful one. Large catches of gaspereaux were taken, the shad fishing was good and great numbers of salmon have been captured, the latter retailing at from 18 cents to 22 cents per pound.

Lumbering.—About 40,000,000 feet of logs have been hung up on the various rivers and streams on account of the low water, which compelled some of the mills to close down for want of logs. Several mills have since started and it is thought that the danger of further suspension will be averted. The recent forest fires destroyed large areas of forest lands, that on the Ste. Croix being totalled at 50,000 acres.

CONDITION OF PARTICULAR TRADES.

Building trades.—Bricklayers and masons are all employed and men are scarce. Carpenters and joiners have not been so

busy for years. Painters and decorators are busy. Plumbers, gas and steamfitters are well employed. Stone-cutters are active. Builders' labourers (hod carriers and mormarmen) are kept busy and men are scarce.

Metal, engineering and shipbuilding trades.—Iron moulders report work brisk. Machinists and engineers are well employed. Steam engineers, electrical workers and linemen continue busy, Boilermakers and sheet metal workers report work plentiful. Horseshoers are well employed.

Woodworking and furnishing trades.—Woodworkers, carriage and waggon makers are busy. Shingle weavers report work good.

Printing and allied trades.—Printers report work better than for some years at this season. Pressmen also report plenty of work and are talking about organizing a union. Bookbinders continue busy.

Clothing trades.—Journeyman tailors are busy.

Food and tobacco preparation.—Cigar-makers say business is only fair.

Miscellaneous.—Broom and brush makers still continue busy. Bartenders report all members of the union except one employed.

Transport.—Freight-handlers and trackmen have all the work they can attend to. Ship labourers report business only fair. Street railway employees, teamsters and expressmen are kept busy.

Unskilled labour.—Unskilled labour is well employed and men are scarce.

District Notes.

Campbellton.—The Shives Lumber Company has nearing completion above this town the largest reputed saw-mill in the maritime provinces. The building is 285 x 63 feet, and will be equipped with all modern machinery. The sawdust burner is about 23 feet in diameter and will be 138 feet high.

Fredericton.—The city council decided to undertake the operation of the street lights. It is estimated that the cost of installation of the plant and lights is about

\$18,000 and that it will take \$7,000 a year to operate.

Woodstock.—Hayden's mill was destroyed by fire June 9. The direct loss was \$7,000 and it is said that it will take \$15,000 to replace the mill and put it in as good running order as before the fire. It is intended to rebuild at once.

QUEBEC, QUE., AND DISTRICT.

Messrs. P. J. Jobin and E. Little, Correspondents, report as follows :—

GENERAL CONDITION OF THE LABOUR MARKET.

Labour, on the whole, has been very well employed during June, the only exception to the general rule occurring with ship labourers. The supply of men, however, has been equal to the demand. The transport branches have been particularly busy owing to the arrivals of immigrants. Some interference in the trades was caused by the burning of a portion of the Great Northern railway bridge at Grand'Mère. There have been no strikes or changes in wages to report during the month. Meetings, addressed by members of the International unions, Montreal, were held during the month.

CONDITION OF LOCAL INDUSTRIES.

The want of rain was felt by *agriculturists* in the district during the earlier half of June, but conditions were greatly improved in this respect before the close of the month. The ordinary type will not be up to the standard, but all other crops promise very favourably.

In the *lumbering industry* the rain also assisted in the floating of the logs to the mills and the prospects are for a larger cut than last year. Forest fires did some damage to logs and pulp wood in the earlier part of the month, and two large saw mills were also destroyed by fire.

CONDITION OF PARTICULAR TRADES.

Building trades.—Employment has been active in these branches and little time was lost on account of bad weather.

Metal, engineering and shipbuilding trades.—Conditions were reported favourable. Iron moulders, machinists, engineers, electrical workers and linemen had a busy month. In the iron ship-building branch labour was well employed, there being several vessels repaired, and though the repairs were in no case of an extensive character they were sufficient to afford continuity of employment.

Woodworking and furnishing trades.—The branches of these trades connected with the building trades were well employed.

Printing and allied trades.—Printers and pressmen had plenty of work. Bookbinders were also busy.

Clothing trades.—Boot and shoe workers have not found the month a good one, although some of the factories have worked full time and with a full staff of employees.

Leather trades.—Tanners and curriers report conditions somewhat similar to those stated above for boot and shoe workers.

Food and tobacco preparation.—Cigar-makers were well employed.

Transport.—The beginning of the summer and suburban train service has greatly increased employment in the transport branches. The tourist trade has also begun and the holding of a number of annual conventions of labour organizations in this city has given increased employment to cab drivers, hackmen and hotel employees.

Unskilled labour.—Ship labourers have had a slack month. General labour has been well employed with little lost time on account of weather conditions.

DISTRICT NOTES.

The Levis County Railway Company has awarded the contract for building a bridge over the Chaudière River. The bridge will cost \$11,000.

The first section of cribwork in connection with the construction of the new dock in extension of the breakwater, which is being erected as a part of the Louise dock

improvements, was towed from Russell's ship yard, Point Levis, to the Quebec side of the river on the 18th instant. The work is over 200 feet in length and two more sections are in course of construction.

The large coal pockets in course of erection by the Dominion Iron and Steel Company, at the west end of the Louise embankment, are approaching completion and will be in operation shortly. Some 47,000 tons of iron and steel have been used in the construction work and the capacity is estimated at over 5,000 tons. Coal will be transferred from steamships into the pockets at the rate of six tons per minute and there are 34 shutes for loading cars and carts which can be simultaneously operated by one man. The structure will cost \$95,000 and will be the means of a large saving of labour.

THREE RIVERS, QUE., AND DISTRICT.

Mr. John Ryan, Sr., correspondent, reports as follows :—

GENERAL CONDITION OF THE LABOUR MARKET.

Labour conditions during the past month have been very satisfactory. There was a scarcity of unskilled labour felt at times, but all present demands are supplied. Supply and demand in the various trades and industries is well balanced, and good relations between employer and employee prevail. Work continues especially active in the building trades. In each of the branches, with the exception of plumbing and gas-fitting, mechanics are fully employed, and the prospects for a good season are favourable. There has been exceptional activity in the building trades, particularly in the country, where the farmers have made extensive improvements to their dwelling houses and barns. In the city a number of woodworkers have been employed overtime. Commercial activity was greater in June than in May. The boot and shoe dealers and the dry goods dealers have decided to close their stores three times a week at six o'clock p.m.

CONDITION OF LOCAL INDUSTRIES.

Agriculturists report that crops are pretty well advanced, notwithstanding the scarcity of rain.

Saw-mills are now in full operation, and the cut is expected to be larger than last year.

Manufacturing establishments are all running to their full capacity.

CONDITION OF PARTICULAR TRADES.

Bricklayers and masons are very busy, and good men can obtain from 25 cents to 28 cents per hour. Carpenters and joiners are also well occupied, but at present all the men required are on hand; wages are 15 cents to 20 cents per hour. Painters had a fair month's work. Stone-cutters report work fair.

Metal, engineering and shipbuilding trades.—No blacksmiths are out of work. Bicycle workers report fair conditions.

Printing and allied trades.—Printers report business very good.

Clothing trades.—Journeyman tailors are busier than usual for the month of June. The factories have plenty of orders ahead. Glovemakers have had a satisfactory month. Boot and shoe workers have been busy.

Food and tobacco preparations.—Cigar-makers report fair conditions.

SHERBROOKE, QUE., AND DISTRICT.

Mr. H. Logie, correspondent, reports as follows:

GENERAL CONDITION OF THE LABOUR MARKET.

Labour generally maintained during June the healthy condition which has characterized all branches of industry in this section for some time past. There was a good demand still for unskilled labour. The machine shops also continued very busy, and overtime was still the order in two large shops. The building trades report work good. During the past few

months a large number of summer cottages have been erected at North Hatley, and there are several yet in course of erection, giving employment to many carpenters and joiners. Representatives of a large pulp machinery concern in Pittsburg, Mass., visited the city about the third week in the month, looking for available sites with a view of locating a branch here. They are in negotiation with the city council. Retail merchants report business as being very good.

The strike of plumbers reported on the first of the month has not yet been declared off, but the men employed by the firms granting the demand of the men have been re-employed. During the month a meeting of the carpenters and joiners of the city was called, when about fifty attended. A representative of the Carpenters' Association of America was present, and all those in attendance favoured the formation of a union. It was decided to proceed with the formation of the same, and a meeting will be held shortly to complete the organization.

CONDITION OF LOCAL INDUSTRIES.

The continued dry weather was broken by a much needed rain which in many sections saved the farmers from serious loss. In this section the hay crop may be a little lighter, and it will also be late. Other crops are reported very promising.

The bush fires of the latter part of May and the first of June did much damage to standing timber, and also to logs which were lying in the woods cut. The loss in this section alone will be considerable.

All lines of manufacture are reported to be busy.

The Black Lake Chrome and Asbestos Co., Montreal, has been incorporated with a capital of \$200,000 to work the chrome and asbestos mines at Broughton and Black.

The Sherbrooks Street Railway Co. has been repairing the track between Sherbrooke and Lennoxville. The same company is asking permission to double track Bridge street.

CONDITION OF PARTICULAR TRADES.

Building Trades.—The building trades have been well employed, and there is sufficient work ahead to keep all branches busy. In addition to new work there has been a great deal of re-modelling and enlarging of dwelling houses and stores.

Metal, engineering and shipbuilding trades.—Iron moulders report work very plentiful. Machinists and boilermakers are also busy.

Woodworking and furnishing trades.—Woodworkers say work is brisk. The sash and door factory employees report trade very good.

Printing and allied trades.—Printers report trade very good.

Clothing trades.—Custom tailors complain of scarcity of men.

Food and tobacco preparation.—Bakers and confectioners report a good month. Cigarmakers report orders plentiful.

ST. HYACINTHE, QUE., AND DISTRICT.

Mr. Napoleon Samson, correspondent, reports as follows :—

GENERAL CONDITION OF THE LABOUR MARKET.

June has been a satisfactory month for labour generally in so far as this city is concerned. Work has been plentiful and wages, outside of factories, have been better than usual. Last year day labourers received from 90c. to \$1 per day, while this year they are being paid from \$1.25 to \$1.35 per day. There is an abundance of work for bricklayers and in the building trades, many of those who were burnt out at the fire rebuilding. The school commissioners have purchased from different owners the portion of the land which did not belong to the commission on the square where the Girouard Academy was destroyed on the 20th May last, so that this construction will be very much more spacious, and will be situated on ground the exclusive boundaries of which are streets. The erection of Larmoureux & Co.'s foundry is

complete, and it is again in full operation as before; Messrs. L. Côté et frère have also begun to rebuild their flour mill on the ground formerly occupied by the J. A. M. Côté boot and shoe factory, which is owned by Mr. Côté. Bricklayers' wages have increased since the fire; this class of labour is very scarce in this city, and the wages are from \$3 to \$4 per day, or an increase of \$1 to \$1.50 per day. Carpenters working outside of the shops have also received an increase. They are now paid from \$1.75 to \$2, and even some private individuals are paying \$2.25 per day. A strike was declared on the 22nd June in the cigar factory of which Messrs. R. Deschene & Son are the owners. The reason is that the union refused to grant him the blue label to be affixed to boxes of cigars sold to a dealer in Quebec City. The union alleged that this dealer was a manufacturer who was not recognized by their union, that is to say, by the International Cigarmakers' Union of America. The business agent came here on the 23rd June and approved of the decision of the strikers. Notwithstanding this, however, the factory in question continues operations as heretofore. The same wages will be paid to all cigarmakers who may apply for work and are competent men in the trade. The strikers number 21 journeymen. At the present moment about 38 hands are at work, the apprentices and tobacco strippers who were in the employ of the company before the strike continue to work, as do also several journeymen. The reconstruction of the J. A. M. Côté boot and shoe factory on the site formerly occupied by the Hamel manufactory on Condor street is being seriously considered. On the 15th of June, after being many months closed, the Seguin-Lalime boot and shoe factory, owned by the Ames-Holden Company, was re-opened.

CONDITION OF PARTICULAR TRADES.

Building trades.—Bricklayers and carpenters have had a successful month, and prospects are very favourable to these

trades, as also to plasterers and painters. Plumbers are very busy.

Metal and engineering trades.—Machinists report plenty of work. Blacksmiths are well satisfied with their month.

Woodworking and furnishing trades.—Workmen in these trades say that work is abundant and the shops expect a busy season.

Printing and allied trades.—Business has been good and the number employed has been greater than for some time.

Clothing trades.—Journeymen tailors are well employed.

HULL, QUE., AND DISTRICT.

Mr. Rudolphe Laferriere, Correspondent, reports as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

There was a marked depression in the labour market in Hull as compared with June, 1902. The expected activity of trade usual at this season did not materialize, and it was all the more noticeable on account of the good wages paid last winter and this spring in shantying operations. The circulation of money in the trades is fair, and manufacturers are very busy, yet there are more people idle now than at the corresponding period last year. There is not any more population, but there is less work. The immediate and exact cause cannot be pointed out, but reference may be made to the facts that building operations are at a standstill, and that the corporation is not employing any one this summer.

Operations on the construction of the cement works are now begun, and some fifty hands are busy. It is expected that the company will be able to carry the enterprise as outlined in the daily press to a successful issue within two years. The firm is advertised to have a million dollars capital. The machinery alone, which is said to have been contracted for, is estimated to cost over \$300,000. The works, when completed, will employ 150 hands all told. An interesting event in connection

with this proposition was that the first block of cement turned out in Hull for the construction of the works was made on the 9th of June, 1903. The wages paid to the labourers at that place range from \$1.25 to \$1.50 per ten hour day. A half dozen experts, architects, chemists and engineers, are also employed at special wages.

The new Fraser saw mill at Deschenes is now ready to start operations, and will employ some 125 hands.

It has been reported that a Belgian syndicate intended establishing a linen factory in Hull. The city council has made overtures to the company, and a citizen has offered a free site. The enterprise, it is said, will employ 250 or 300 people.

CONDITION OF LOCAL INDUSTRIES.

Paper and pulp making, and the Eddy mills generally, the lumber business, the axe and woollen factories are kept as busy as ever. The Damour large sash and door factory has not been reopened.

The Canadian Pacific Railway is spending about \$13,000 laying side tracks and switches into the cement works in Hull. Similar work will be started soon into the Fraser's saw mills.

The wage schedule is unchanged from last month, but the following items may be added. Cutters, \$12 to \$18 per week in tailor shops, seamsters, \$8 to \$10; seamstresses, \$2 to \$4; dry goods clerks, \$10 to \$12. Coal shovellers are paid \$1.50 per day of ten hours. Common labour is obtaining \$1.25 to \$1.35.

OTTAWA, ONT., AND DISTRICT.

Mr. T. W. Quayle, Correspondent, reports as follows—

GENERAL CONDITION OF THE LABOUR MARKET.

Labour was generally well employed during June, with the exception of the building trades and others working at outdoor employment, who were interfered with by heavy rains which followed a lengthy period of drought. Commercial activity was greater towards the end of the month owing to the brightened prospects for the har-

vest, as a result of the abundant rainfall. The depression caused by weeks of dry weather with its possible effect on the harvest had a decidedly weakening tendency on the markets, and the wholesale trade felt its effect in the placing of smaller orders by retailers.

The tone of the labour market was improved during the month by the settlement of the strike of the Canada Atlantic trackmen, and by the abandonment by the Typographical Union of the scale of wages drawn some three months ago. The only labour trouble existing at the end of the month was the strike of the plasterers and this was not seriously affecting the building trades. The Canada Atlantic Trackmen, after being out eighty-one days including Sundays, called off the strike unconditionally, although the company's officials promised not to discriminate against any of the men in giving employment. The Typographical Union withdrew its scale for increased wages, in the case of the Government Printing Bureau, although it is understood that in the city offices hand compositors are to receive twenty-five cents a week increased pay, and in 1904 will be given a nine-hour day.

CONDITION OF LOCAL INDUSTRIES.

Agricultural prospects improved greatly by the breaking of the drought, and indications point to a good average yield, with the possible exception of some of the root crops.

Lumbering operations were brisk and the great bulk of last winter's cut in the shanties was well on its way to the mills, the drives having made exceptional progress.

KINGSTON, ONT., AND DISTRICT.

Mr. William Kelly, Correspondent, reports as follows :—

GENERAL CONDITION OF THE LABOUR MARKET.

As during the month of May, labour generally was well employed during June, in many branches the supply being scarcely equal to the demand.

On June 22, a compromise was affected between the master painters and their striking employees. Instead of the minimum rate of \$2 per day of eight hours, as originally demanded, the men agreed, through the effects of the Building Trades Council, to accept \$2 for nine hours, and grant other minor considerations. This settlement had the effect of infusing new activity into the building operations, which were practically suspended before. It has also been decided to proceed with several buildings which it was felt would have to be abandoned for this season.

There has not been any diminution in the extent of the transportation and shipping business; on the contrary, it has rather increased, the amount of grain, ore, &c., handled being unprecedented in many years past. The wholesale and retail trade has also been quite up to the average.

During the latter part of the month of June for twelve days there were upwards of twenty-one hundred officers and men from the surrounding district encamped on Barrifield Commons, adjacent to the city. This alone gave employment and revenue to citizens of various classes.

CONDITION OF LOCAL INDUSTRIES.

The past month was exceptionally favourable to *agriculturists*. The abundant rainfalls have done much good. It is now felt that hay, roots and grain of nearly every description will give good returns.

Manufacturers of cotton, hosiery, iron and steel products, &c., are running full time, and are very busy.

Mining continues very brisk.

Railway employees engaged in the work of construction, &c., are fully employed.

CONDITION OF PARTICULAR TRADES.

Building trades.—With the exception of stonecutters, those engaged in the building trades are fully employed.

Metal, Engineering and Shipbuilding trades.—There is no dearth of employment in the metal, engineering and shipbuilding trades.

Woodworking and furnishing trades.—Woodworkers and furnishers are also very busy.

Printing and allied trades.—The printing and allied trades report good business.

Clothing trades.—Tailors, boot and shoe workers report fair business.

Food and tobacco preparation.—Bakers and confectioners, butchers, icemen, cigar-makers, &c., are very busy.

Leather trades.—Tanners and curriers are not fully employed. Business is rather dull.

Miscellaneous.—Barbers, delivery employees, hotel and laundry workers are rushed.

Transport.—Railroad workers, freight handlers, steamboatmen, longshoremen, street railway employees, hackmen, teamsters, &c., report business very brisk.

BELLEVILLE, ONT., AND DISTRICT.

Mr. W. S. Macdiarmid, correspondent, reports as follows :—

GENERAL CONDITION OF THE LABOUR MARKET.

June has been a busy month for all classes of labour, both skilled and unskilled, and there are few idle men to be found. In the building trades the month has been an exceptionally good one, and contractors say that they are unable to get enough men. Merchants report that the month's business will exceed the corresponding month of last year. Barbers also report a good month. The cheese industry is now in full operation, and there are large shipments being made weekly. There have been no strikes or lockouts during the month, and the best of feeling exists at present between employers and employees.

CONDITION OF LOCAL INDUSTRIES.

Farmers are very busy cutting hay and gathering the strawberry crop. Owing to May being a dry month, the hay crop will not be as large as last year.

Fishermen report good catches this month and large shipments have been made to Buffalo.

Lumbering operations are now in full progress, and large gangs of men are running the logs down the Trent and Moira rivers. Wages are better than last year.

Mining operations in North Hastings are very active at present, and a number of new properties are being developed.

The *Grand Trunk Railway Co.* is making some important changes at Belleville. The yard at the depot is being enlarged and another new track is to be put down. A new iron and steel bridge is being built over the Moira river, a large number of men being employed on the work.

CONDITION OF PARTICULAR TRADES.

Building trades.—In the building trades bricklayers and masons, carpenters and joiners, lathers and plasterers report a busy month. Painters report more work than they can handle. Plumbers, gas and steamfitters also report a good month. Stonecutters are very busy. One firm is advertising for quarrymen and offering \$1.75 a day wages.

Metal, engineering and shipbuilding trades.—In these trades the month has been a good one. Iron moulders have had a very busy month, with plenty of work on hand. Machinists have also had a satisfactory month. Electrical workers report a good month. Metal polishers, buffers, platers and brass workers report plenty of work on hand. Blacksmiths and boilermakers have been very busy. Bicycle workers are satisfied with the month.

Woodworking and furnishing trades.—In the woodworking and furnishing trades the month has been satisfactory. Local factories report a great many orders on hand.

Printing and allied trades.—There are no idle printers and a sufficiency of work is reported.

Clothing trades.—Many merchant tailors state that they have difficulty in keeping up with their orders.

Food and tobacco preparations.—Bakers and confectioners have had a satisfactory

month. Butchers report a good trade. Ice dealers are in their busiest season. Cigar-makers report satisfactory conditions.

Leather trades.—In the leather trades the month has been a profitable one.

Miscellaneous.—Barbers report a busy month.

Transport.—The month has been a good one. Steamboat employees say they have done well.

Unskilled labour.—Unskilled labour has been fully employed and wages are as high as \$1.50 per day.

DISTRICT NOTES.

Work at the Belleville Portland Cement Company's property at Point Ann in Thurlow is rapidly going ahead, and a number of buildings are now in course of erection. About 150 men will be employed in a short time.

TORONTO, ONT., AND DISTRICT.

Mr. Philips Thompson, correspondent, reports as follows :—

GENERAL CONDITION OF THE LABOUR MARKET.

There is little change in the situation as compared with last month. Nearly all trades report favourable conditions and plenty of employment, excepting in those departments where strikes are still unsettled. British immigrants continue to arrive, though in considerably smaller numbers than earlier in the season, and most of them find employment. On the other hand, many workingmen on strike have left Toronto. The heavy rains during the month have been favourable to agriculture, and the prospects of a bountiful harvest, now regarded as almost assured, have given a decided stimulus to business. The Toronto home-comers' festival, which will be held for several days, commencing with Dominion Day, and is expected to attract large numbers to the city, has imparted a good deal of activity to local trade.

Printing and bookbinding have been notably active for the season, owing to the protracted session of the legislature and

the general expansion of trade. A record piece of workmanship in this line was the completion of the volume comprising the proceedings in the Gamey case, including the evidence, arguments of counsel and commissioners' report, in six working days. The volume embraces 1098 pages of small type; the typesetting amounted to over 4,000,000 'ems,' and the presswork consisted of upwards of seventy forms.

CONDITION OF LOCAL INDUSTRIES.

Manufacturers are busy, and in many lines find it difficult to overtake orders, which are coming in freely owing to the prospects of a brisk fall trade. There is a gratifying increase in the demand for domestic goods, and shipments have been extensive during the month.

Agricultural work is pressing, as is usual at this season. The demand for labourers under engagement by the year has somewhat slackened, but positions can still be found for applicants. The principal requisition among the farmers at present is for extra help for the busy season.

CONDITION OF PARTICULAR TRADES.

Building trades.—The building trades continue very unsettled, with only partial employment, owing to the continuance of the builders' labourers and carpenters' strikes, and the outbreak of a strike among the painters, who went out on the first of the month on account of the determination of the employers to revert to the former rate of 30c. per hour. The latter difficulty, however, is not serious. The builders' labourers have reduced their demand to 28c. per hour, and a considerable percentage have obtained work from employers who are willing to give that figure. About half of the union carpenters are also working on permits at 35c. per hour, and the great majority of the painters have obtained their demand for the same rate. The extreme measure of insisting upon the enforcement of the union card, by which men of all trades affiliated with the Building Trades Council would have been called out in cases where non-union men were em-

ployed, was not carried out. Negotiations looking to the settlement of the strikes by arbitration have proved fruitless. The carpenters accepted an offer made by Architect J. E. Lennox to act as mediator, but the Builders' Exchange have declined all overtures. The employers claim to be obtaining plenty of non-union men, both as carpenters and builders' labourers. The Master Painters' Association on the 23rd adopted a resolution declaring that hereafter their shops would be 'open shops.' The builders' labourers have received considerable donations to the strike funds from other unions.

Metal, engineering and shipbuilding trades.—Trade is active in all these departments and men well employed, except where disputes prevail. The iron moulders, to the number of about 400, having been unable to reach a satisfactory settlement as to a reduction of hours, went out on the 12th. Most of the employers have since granted their demands for a nine-hour day, but the men are still out in a few shops. The structural iron workers' strike is still on, though a compromise has been effected with the Canadian Construction Company, securing to the men 80c. per hour and recognition of the union. Only a few men remain out. The brass workers have demanded a nine-hour day with the same wages as at present, averaging from \$2 to \$2.25 per day. The employers have promised to investigate the conditions of the trade elsewhere and to summon the union committee to a conference, when, if the matter cannot be arranged between them, it is to be submitted to arbitration.

Woodworking and furnishing trades.—The men in these lines are well employed. Considerable increases in the membership of the unions affiliated with the Amalgamated Woodworkers are reported. The small strike of carriage and wagon workers in one shop is still on.

Printing and allied trades.—Printers and bookbinders report trade good and prospects satisfactory.

Clothing trades.—Tailors are nearly all employed, both in the custom and ready-made departments. Garment pressers have secured a minimum rate of 25c. per hour, with a nine-hour day and Saturday half-holiday. The rates previously paid varied from 18c. to 25c., with 10 hours' work. Boot and shoe workers are well employed.

Food and tobacco preparations.—The bakers have secured a satisfactory settlement of their long-standing dispute, on the lines indicated in last report. Trade is especially brisk just now, in view of the home-comers' festival. Cigarmakers are well employed.

Miscellaneous.—Sixty marble workers are on strike owing to the failure of protracted negotiations with employers for more pay. The present scale is : for polishers, 20 cents per hour ; cutters, 25c., and setters, 27½c. The men demand, for polishers, 25c. ; cutters, 35c., and setters, 40c. City scavengers have asked for a nine-hour day.

Transportation.—All classes of workers engaged in transportation are rushed with work, the volume of railway traffic this season being considerably in advance of last year. The influx of American tourists during the remainder of the summer is likely to be unprecedented.

HAMILTON, ONT., AND DISTRICT.

Mr. S. Landers, correspondent, reports as follows :—

GENERAL CONDITION OF THE LABOUR MARKET.

Labour of all classes is as well employed as in the previous month, with the exception of unskilled and female labour. The demand for workers, however, is not great, except in the outlying districts, though industrial activity is at its height in all branches. Conditions have taken a very decided change in the clothing trades, and the wholesale trade is very active, one of the largest firms in the city being taxed to its fullest capacity. The labour market generally has been undisturbed by strikes, lockouts, &c., with the exception

of the existing bakers' strike for day work. The plumbers and gasfitters have reached an agreement at 27½ cents an hour, with time and a half for overtime.

CONDITION OF LOCAL INDUSTRIES.

Manufacturing.—The establishment of new plants and the installing of new and improved machinery are still in progress. A large number of employees of the Deering Harvester Company of Chicago have made a request to be removed to the Hamilton branch. The new addition of the Hamilton Bridge and Tool Works is finished, and is 140 by 200, all steel. Seventy-five additional hands will be employed. A fire at the Hamilton facing mills caused a loss of \$6,000.

Railway construction.—The Grand Trunk Railway Company has let the contract for the double-tracking of the road between Hamilton and Sarnia, and the Hamilton, Berlin and Collingwood Railway Company was given a charter to build from Hamilton to Collingwood, via Galt and Berlin. The new steel bridge of the Grand Trunk Railway across the canal at Hamilton beach is finished. The bridge, which is the largest swing bridge on this division of the Grand Trunk Railway, has been built by the Canadian Bridge Company, Walkerville. It is 372 feet long. Its weight is between 800 and 900 tons, about three times as much as the old swing bridge, and its breaking strain is about 5,000 tons. It cost in the neighbourhood of \$80,000.

CONDITION OF PARTICULAR TRADES.

Building trades.—The building trades are still very busy, and, with the exception of a few unskilled labourers, the trade is fairly supplied with workingmen. Bricklayers and masons are working steadily, although having lost considerable time during the month, owing to continuous rains. Carpenters, lathers and plasterers, &c., are all busy. Plumbers are the only members of the building trades who work 10 hours per day. Recently a building trades council was formed. Painters are fairly well employed; many manufacturing firms are hav-

ing their premises painted both inside and out.

Metal, engineering and shipbuilding trades.—Iron, stove plate and machinery moulders are fairly busy, and thus far have lost little time through excessive heat. Machinists are well employed. Electrical workers are not over-rushed with work. Stove mounters, sheet metal workers, horse-shoers and jewellers are all enjoying plenty of work.

Woodworking and furnishing trades.—The woodworking trades are running about normal. Furniture workers have plenty to do, as have also carriage workers and coopers.

Printing and allied trades.—The printing and allied trades are busy, and idle men are few.

Clothing trades.—The rush in the clothing trades is about over, but the season for ready-made clothing is at its height. In one establishment, where military uniforms are made, all hands are very busy, both on the premises and outside. The independent garment workers have settled their trouble by accepting 10 per cent increase in wages and a 52 hour week, instead of a 55 hour week. Hatters are fairly busy, while boot and shoemakers are working steadily.

Food and tobacco preparation.—Bakers are still out on strike for day work; 19 men are still out. Six shops have signed the agreement, and the men are at work. Cigarmakers and tobacco workers are enjoying a busy season, two large manufacturers employing a large number of men.

Miscellaneous.—Broom-makers are well employed, and the trade is constantly increasing.

Transport.—All railway employees are well employed, as summer transportation has begun. A complaint against a steam railway of overworking its engineers has been lodged with the Minister of Labour, who has promised an investigation. On the Hamilton, Grimsby and Beamsville electric road a collision between a passen-

ger and freight caused the death of a conductor, and several others were severely injured. Longshoremen and steamboat men are fairly busy.

Unskilled labour.—This class of labour is very busy. The City Council has decided to construct the new reservoir by day labour instead of by contract system.

DISTRICT NOTES.

St. Catharines.—Labour in all its branches is well employed. Wholesale and retail trades are good, and in the agricultural lines there is a decided improvement over last month. The loss by the fire in the Empire Carpet Works is stated at \$45,000, with \$28,000 or \$30,000 insurance.

Dundas.—Trade and labour are very busy, unskilled labour and building material being very scarce. The several factories are busy and houses are at a premium. Garment workers recently received a shorter working day, beginning now at 7.30 in the morning, instead of 7 o'clock, without a corresponding decrease in wages. Cutters and trimmers received a 10 per cent increase in wages. The high and public school teachers of the town have had their salaries increased. The Dominion Felt Company, which suffered loss in the recent fire, is making good progress rebuilding, and in a short time will have its new roof completed.

Niagara Falls.—The Toronto and Niagara Power Company called for bids on what will be the largest power wheel pit in the world. It is to be 480 feet long, 180 feet deep and 27 feet wide, cut through the solid rock. The work will cost \$1,250,000, and will develop 225,000 horse power.

Port Colborne.—The fishing tug *Kitty D.*, of Dunkirk, with fish and nets, was seized off Port Maitland and brought to Port Colborne by the revenue cutter *Petrel*. Several boats were lifting nets when the *Petrel* came upon them. They all escaped but the *Kitty D.* She is owned in Buffalo.

Grimsbey.—The berry yield has been the greatest in the history of the Niagara

Peninsula. Thousands of tons of strawberries were shipped to all parts of the Dominion. Berry-pickers were so scarce that in some instances as high as two cents per box was paid, and the Indian pickers reaped a very profitable harvest.

BRANTFORD, ONT. AND DISTRICT.

Mr. J. C. Watt, correspondent, reports as follows :

GENERAL CONDITION OF THE LABOUR MARKET.

Nearly all classes of labour have been fully employed during the month, any lost time being due to inclement weather or lack of building material. In the building trades a few have been idle on this account, but shipments of material were received during the latter part of the month. In the iron trades the activity reported during the preceding month has continued, much overtime being worked and large shipments from all the factories characterizing the month. At the woollen mills a night gang has been added, and there is a demand for operatives. Merchants, wholesale and retail, have had a satisfactory month. About the first of the month the painters in the employ of the Brantford Carriage Company quit work because an American labourer was employed on part of their work. The management refused to remove the American and in a few days the men returned to work.

CONDITION OF LOCAL INDUSTRIES.

In the rural districts *market gardeners and farmers* are having their busy season. The strawberry crop has been large, and considerable difficulty was experienced by many in securing sufficient pickers. Haying commenced toward the close of the month.

The *Electric Railroad* between Brantford and Paris is completed and fully equipped with modern cars. On the Grand Trunk Railway extensive changes have afforded employment to a large force of men.

CONDITION OF PARTICULAR TRADES.

Building trades.—Bricklayers, masons, carpenters and joiners have been actively

engaged, inclement weather and a shortage in material occasionally interrupting the month's work. Lathers, plasterers and all those engaged in the painting and plumbing trades have been steadily employed.

Metal, engineering and shipbuilding trades.—All those engaged in the iron trades continue to be busy, and steady employment is assured for some time to come. Iron and brass moulders find ready employment. Coremakers have been working overtime. Machinists and all engaged in the erection of machinery have been fully employed, and many have been working overtime. Linemen, owing to the many changes being made in and about the city, have been very active. Blacksmiths and boilermakers, polishers and buffers, bicycle workers, sheet metal workers and horse-shoers all report steady employment and bright prospects for the immediate future.

Woodworking and furnishing trades.—Carriage and wagon makers report plenty of work. Patternmakers, millwrights and coopers have had a satisfactory month.

Printing and allied trades.—Printers and pressmen have had a busy month. The daily papers are issued at noon on Saturday in order that the employees may enjoy the half holiday.

Clothing trades.—Custom tailors report a good month for June.

Food and tobacco preparation.—Bakers and confectioners are having their busy season. Cigarmakers and tobacco workers report steady employment for all local men.

Leather trades.—Saddlers and leather workers have experienced a successful month.

Miscellaneous.—Barbers have been fully employed and are agitating for a half holiday each Wednesday during the hot weather. Clerks and delivery employees are all engaged and will enjoy the half holiday each Wednesday during July and August. Hotel employees and laundry workers report a good month. There is a demand for domestic servants.

Transport.—Freight handlers and street railway employees report plenty of work. Carters, teamsters and expressmen, particularly the former, have been very busy.

Unskilled labour is fully employed, and in some quarters the demand for more men continues.

DISTRICT NOTES.

Paris.—The woollen mills and the plough factory are rushed with work, and overtime has been worked. The erection of the new public library has commenced. There are no idle men upon the market.

GUELPH, ONT., AND DISTRICT.

Mr. O. R. Wallace, Correspondant, reports as follows :—

GENERAL CONDITION OF THE LABOUR MARKET.

All classes of labour have been fully employed during the month, and, with the exception of a small amount of time lost to outdoor workers by wet weather, there has been very steady employment in all lines of trade. The scarcity of unskilled labour noticed last month has been partially met. The building trades are fully employed, but a local scarcity of brick has enabled the present staff of men to keep up with the supplies available; otherwise there would have been a demand for some classes of builders. The presence of about 35,000 excursionists at the Model Farm during the month has helped some lines of retail trade and given extra employment to some classes. Bakers have been granted a new schedule of \$13 for foremen, \$11 for journeymen, and \$6 for helpers. After August 1, only day work will prevail in this trade, the delay being necessary to make alterations in some plants. A buildings trade council has been under formation during the month. There is a general feeling of satisfaction with present rates of wages and conditions among all classes of wage-earners.

CONDITION OF LOCAL INDUSTRIES.

Crops promise well in this section. Recent rains have helped hay and roots.

Not nearly so large an acreage of sugar beets is being grown this year, owing to the disappointing results of last year.

Work on the sewerage system is progressing rapidly with large gangs of men employed.

CONDITION OF PARTICULAR TRADES.

Building trades.—The building trades report a scarcity of brick, which is holding them back somewhat, but employment is full and steady for all lines. Bricklayers and stonemasons are fully employed, with the prospects of employment for additional men. Carpenters and joiners have had a steady month. Painters are almost all employed, but there are some out of work owing to the strike in this trade being unsettled. Men from other cities have found employment here at this line during the month. Stonecutters are fully employed. Builders' labourers are all employed, with a scarcity of experienced men.

Metal, engineering and shipbuilding trades.—Machinists and iron workers have had a steady month with a demand for men in some lines. Mill workers are steadily employed with a demand for men. Moulders are busy.

Woodworking and furnishing trades.—Woodworkers are fully employed, with no idle men. Upholsterers have had a very busy month, with a demand for men. Organ and piano workers have had a good month. Carriage workers report trade as good. Carriage trimmers have put in some overtime. Coopers have only had a fair month.

Printing and allied trades.—The printing trades report trade as fair, with no idle men.

Clothing trades.—Tailors have had a good month.

Food and tobacco preparation.—Bakers have been granted a new scale of \$13 for foremen, \$11 for journeymen and \$6 for helpers, with all day work after August 1. Employment has been very good during the month. Cigarmakers have resumed work

and report a fair month. Butchers have had a busy month.

Miscellaneous.—Brussels and Ingrain carpet weavers have had a good month, but there is now a shortage of supplies owing to the strike in Philadelphia, as well as a scarcity of girls to do winding. At the end of the month mills are shut down from these causes, but it is expected it will only be for a few days. Hotel employees, as well as street car employees and clerks, have been affected by the excursion season to the O.A.C., and have had a very busy month.

Unskilled labour.—Unskilled labour is in good demand at the rates quoted last month.

DISTRICT NOTES.

Berlin.—Employment in all lines is steady. The building trades have obtained the following increases: Stonemasons and bricklayers 30 to 35 cents an hour, nine hours a day; carpenters, 20 to 22½ cents an hour, 10 hours a day. Cigarmakers have obtained a new schedule of rates, which makes \$7 per thousand the maximum. Fifteen men out of thirty-eight employed were on strike for one day, when an agreement to this effect was signed.

Elmira.—The woodworkers who have been on strike in Berlin are building a co-operative factory here of 100 x 50 feet, and 3 stories high, with engine-room and dry kiln annexed. An addition is also being built to the felt factory as well as a large number of new houses.

STRATFORD, ONT., AND DISTRICT.

Mr. M. H. Westbrook, correspondent, reports as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

The condition of the labour market during the month has been very satisfactory, all departments of trade being busy, especially the building trades. The McLagan Furniture Co. is putting up 18 houses for its employees, and a number of private dwellings are also being erected. The Cardigan Overshoe Co. has found its pre-

sent quarters too small for its increasing business, and has commenced operations on a new factory. The Stratford Clothing Co. is also enlarging its factory. A provincial charter is being applied for to enable the formation of a wholesale grocery company in Stratford, to be capitalized at \$100,000, one thousand shares of \$100 each. The machinists in the Grand Trunk Railway shops have received an increase of rates of wages during the month from 17-19 cents an hour to 22 cents per hour. Other increases are from 22 to 24 cents per hour, and from 23 to 25 cents per hour. There are no labour troubles here at the present time.

CONDITION OF LOCAL INDUSTRIES.

The recent rains have done much good and the prospects are for a good crop.

Manufacturing.—Industries of all classes are at present rushed with work, and several are working overtime.

CONDITION OF PARTICULAR TRADES.

Building trades.—Bricklayers and masons have had a good month, all being actively employed. The brickwork on the new biscuit factory was completed during the month and will soon be ready for operations. Carpenters and joiners are all well employed and good men are scarce. Lathers and plasterers report plenty of work on hand. Painters and paper-hangers are rushed with work. Plumbers, gas and steamfitters are all well employed. Machinists are very busy and report no difficulty in securing all the men required. Blacksmiths and horse shoers are exceptionally busy. Builders' labourers are scarce. General activity prevails in all iron working establishments.

Woodworking and furnishing trades.—The woodworking trades are in a flourishing condition. Some of the factories are working overtime to fill orders. Wood carvers are well employed.

Printing and allied trades.—Printers report plenty of work.

Clothing trades.—Journeyman tailors are fairly well employed. Garment workers are very busy.

Food and tobacco preparation.—Bakers and confectioners have had a good month. Butchers and meat cutters are all well employed. Cigarmakers report trade very good.

Miscellaneous.—Barbers, clerks and delivery employees report business to be satisfactory.

Transport.—All trades engaged in transportation have all the work they can do.

Unskilled labour.—All kinds of unskilled labour is in demand.

LONDON, ONT. AND DISTRICT.

Mr. A. Woonton, correspondent, reports as follows :

GENERAL CONDITION OF THE LABOUR MARKET.

The industrial conditions of the past month compare favorably with those of the preceding month, and exceed those of the same month last year. One of the features since the advent of spring has been the number of mechanics who have arrived from Great Britain, it having been stated that not less than 200 compositors have left Scotland for America this spring. The demand for men, however, continues, and the McClary Co. find it difficult to obtain sufficient help to man its new stove foundry, which was formally opened this month. Exceptional activity, confined to no particular trade, prevails. The wholesale houses are active, their fall goods are arriving from the manufacturers, but the rain has caused a slackening in the retail trade, it having rained three Saturdays in succession. The most important change in regard to wages took place with the printers, their old scale called for \$13 for machine composition of 48 hours per week, \$10 for hand composition of 54 hours per week, day work ; and \$14 for machine composition of 42 hours per week ; and \$11 for hand composition, with 45 hours per week, night work. Their new scale,

which was granted by the three city dailies, is as follows :

MACHINE COMPOSITION.

Under this heading is included the product of all kinds of type-setting or type-casting machines.

1. No person will be allowed to operate a type-setting machine who is not a member in good standing of London Typographical Union, No. 133. A probationary member of this Union shall be allowed to learn machine composition during the last year of his apprenticeship; but he shall in no case displace a regular operator. Provided he has not attained a speed of 4,000 on a Linotype or 2,800 on a Monoline or Typograph per hour, he shall be allowed to continue his apprenticeship until he has attained such speed, the time in no case to exceed four months; the judges as to competency being the chapel, and at the rate of wages as laid down in section 9.

2. An operator shall be considered competent who shall set 4,000 ems per hour on the Linotype; or 2,800 ems per hour on the Monoline or Typograph.

3. Competent operators shall receive \$14.00 per week, day work; and \$15.00 per week, night work;

4. All stoppages on the machine, from whatever cause other than oiling or cleaning Monoline or Typograph, shall be allowed for at the rate of 4,000 ems per hour on Linotype, and 2,800 ems per hour on the Monoline or Typograph.

5. An operator capable of setting 3,500 ems on Linotype, or 2,500 ems on Monoline or Typograph, per hour, shall be eligible to "sub."

6. An employee who desires to lay off shall not be compelled to work when a competent substitute can be had. Men may put on their own substitutes from the floor of the office, but shall give the foreman fair notice of such intention, except in case of sickness or emergency.

7. The apprenticeship for journeymen printers on machines shall consist of four months, to be paid for at the rate of \$12.00 per week day work, and \$13.00 per week night work; provided he is not already competent, after which time he shall receive the rate provided for in section 3. Provided also that a journeyman who has had experience similar to apprentices, and shall attain competence before the four months' limit, he shall be paid the full scale.

8. Overtime, which shall apply to work done before as well as work done after the hours specified, shall be charged for at the rate of one hour and a half for every hour so employed. This section shall apply to all branches of the trade working at machines for setting or casting type.

9. In offices where both machine composition and hand composition are done, there shall be no culling of "phat," such as leaded matter, poetry, matter with a great many quads in it, or "phat" tables. All matter must be given out in a fair manner.

10. In no case can a member working on a typesetting machine receive less than a day's pay.

11. All operators shall work under this scale.

MACHINE TENDERS' SCALE.

The wage scale for Machine Tenders shall be as follows :

12. For day work \$15.00 and for night work \$16.00; Assistant Machinist, day work, \$12.00, night work, \$12.00.

13. Machine Tenders shall be required to work on but six (6) days—or nights—of the week.

14. Machine Tenders employed in any office as regulars shall under no consideration be permitted to attend to machines in another establishment.

15. Machine Tenders' Assistants—engaged at any time subsequent to this scale going into effect—must be members of the International Typographical Union.

16. Machine Tenders shall have jurisdiction over their assistants, but shall have no control over operators.

FLOOR MEN.

17. "Ad" men, Make-ups, Bank Men, Heading Men and head Proofreaders shall receive not less than 12.00 per week for day work, and \$13.00 per week for night work. Overtime price and one-half. In no case can a member working on the floor receive less than a day's pay.

FOREMEN.

18. Foremen shall receive not less than \$17.00 per week for day work, and \$18.00 per week for night work.

19. Assistant Foremen shall receive not less than \$14.00 per week for day work, and \$15.00 per week for night work.

GENERAL.

20. The hours of work for all employees shall be : Day work, eight hours per day, and night work, seven hours per night.

21. Night work shall be between six o'clock p.m., and seven o'clock a.m., and day work between seven o'clock a.m., and six o'clock p.m. Where an office works three shifts, two of them shall be considered night work.

22. Foremen and Assistant Foremen appointed after this scale goes into effect must be active members of this union, but existing conditions not to be interfered with.

23. Only Journeymen members of this Union in good standing shall be employed in the composing room.

24. The Foreman shall have full control of Operators, Machinists and other employees.

25. No member of this Union shall act as operator-machinist in an office where three or more Linotype machines are run.

26. It shall be the duty of Foremen and members to teach apprentices the printing business, and the duty of the Chairman to see that this is done; and an apprentice may appeal to the Executive Committee if he deem an injustice is done him.

27. That the proportion of apprentices to Journeymen employed, or regulars, shall be as follows : 1 to 4, 2 to 8, 3 to 12, 4 to 18, 5 to 24, and in no case shall more than five apprentices be employed in any office.

28. In cases where men absent themselves from their regular situations without permission, except in cases of sickness, said employee shall be fined whatever the Chapel considers just.

29. This scale shall in no wise interfere with any employee at present receiving over and above same.

The first provincial conference of the Bricklayers & Masons' Unions of the province of Ontario, was held in this city, commencing Monday, June 29th. The most

important questions dealt with were the referendum, mortuary fund, affiliation with the American Federation of Labour, the International Union headquarters, and the certificates of membership which have no Canadian emblem on them. Delegates from all parts of the province of Ontario were in attendance.*

A brick-making war has commenced here, owing to the opening of the Builders' Supply Co. brick yard. The former manufacturers, who were combined into a ring, and charged, through their selling agent, \$8 to \$8.50 per thousand last year, have now dropped their price to \$6.50. To relieve the situation regarding domestic help, a canvass has been made of the city and the number of servants required has been found, and they are to be imported from the old country.

CONDITION OF LOCAL INDUSTRIES.

The question of radial railways is before the public, and a large number of men will be engaged in their construction almost immediately. The London, Aylmer & Port Burwell line has bonded some property just outside of the city limits for terminals, and considerable of the overhead work for the London and South-Western has arrived, and will be put in position at once.

CONDITION OF PARTICULAR TRADES.

Building trades.—Bricklayers and masons are exceptionally busy, and a few more men could procure work at the new armoury. Carpenters are all engaged. In fact all branches of the building trades have more than they can do; this being brought about partly by the shortening of the hours.

Metal, engineering and shipbuilding trades.—Iron moulders on jobbing work are very busy, and the stove moulders at McClary's have had to lay off while the machinery, etc., was moved to the new foundry. The machinists at Léonard's did not

receive the other $7\frac{1}{2}$ per cent increase promised to them on the 16th of June. The firm is refusing the increase. Metal polishers, buffers, brass workers and boilermakers are very busy.

Woodworking and furnishing trades.—Carriage and wagon workers report trade as being brisk. Car builders have plenty to do, and coopers are exceptionally busy.

Printing and allied trades.—The printing trades continue active. The news printers secured a substantial increase, and a number of job offices in the city gave their employees a five per cent increase.

Clothing trades.—This has been a good year for the clothing trade, but work is beginning to slacken off now.

Food and tobacco preparation.—The holding of the military camp here, and the advent of the strawberry season have made this an exceptionally busy month for bakers. Cigarmakers have not been very busy during the month. New licenses are being taken out by the manufacturers, and they are also stock-taking, necessitating the lay-off of the men for a while. The cigarmakers' strike is at a standstill for the present, but quite a number of the original strikers have secured employment in other shops.

Leather trades.—Tanners and curriers are busy. At Hyman's the new building has been fitted up, and is in use. Saddlers report business as being good. Fur workers are in demand.

Transport.—In railway circles a great activity is being displayed, and considerable work in the ballasting line is being done in the yard. On the Canadian Pacific Railway, a shortage of engines still exists, and the gravel trains have been taken off, so as to get the engines for other work.

ST. THOMAS, ONT., AND DISTRICT.

Mr. A. Roberts, correspondent, reports as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

Labour continued in good demand generally, and there are no idle workmen at

* A full report of the conference appears on another page of the present issue.

present. Industrial and commercial activity is normal, while business activity is temporarily relaxed owing to financial depression caused by the failure and suspension of two local loan and savings companies, the Atlas Loan Company on June 2nd, and the Elgin Loan Co. on June 15. The former company dealt in stocks and the continued depression in the stock market coupled with the failure of the A. E. Ames Co. of Toronto, with which it was closely allied, was the cause of suspension. The latter company's failure is said to be largely due to its connection with the Atlas Company, and also to the alleged defalcations of the manager. The affairs of both companies are in course of liquidation. The effect of the large amounts of money involved in these failures is being felt in business and industry in an indirect way. There were no changes in the rates of wages reported, and peaceful relations existed between employer and employed.

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—The abundant rains during the past month have made a great change in crop prospects, and a good harvest is now anticipated. Farm labour continues scarce, and farmers are offering as high as \$80 and board for two months' work.

Manufacturing.—All lines of manufacture report a good demand for products and are actively employed. The Sutherland-Innes Co. stave and hoop factory, which started about May 1st, is now in full running order, and is employing about eighty hands, with a weekly pay roll of nearly \$800. The firm reports that timber is much advanced in price. The local broom and brush factory, which has been handicapped for months past by shortage of labour, reports a larger supply of boys and girls available, but the demand for skilled hands continues.

Railway employment continues very steady. A few train crews have been laid off, but the traffic for the time of year is unprecedented.

CONDITION OF PARTICULAR TRADES.

Building trades.—The building trades for this season show signs of relaxation. Some prospected buildings have been abandoned on account of the lock-up of funds above mentioned. No workmen are idle, but some local residents are working at outside points of greater building activity.

Metal and engineering trades.—Iron moulders, iron workers, helpers, machinists, blacksmiths and boilermakers are steadily employed.

Woodworking and furnishing trades.—Woodworkers, stave makers, wood turners and benders and coopers are busy.

Printing and allied trades.—Printers, pressmen and bookbinders report no change of conditions, all being busy.

Clothing trades.—Journeyman tailors report a slackening of trade. Garment workers in the mantle-making line are busy at the new factory of the John Northway Co.

Food and tobacco preparation.—Bakers and confectioners, butchers, ice drivers and cigarmakers report a steady trade.

Miscellaneous.—Broom-makers are in demand at the local factory. Laundry workers report an increase in trade, as a result of warm weather.

CHATHAM, ONT., AND DISTRICT.

GENERAL CONDITION OF THE LABOUR MARKET.

Mr. John R. Snell, Correspondent, reports as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

The rainfall of the last three weeks has seriously interfered with outside work, and the building trades and civic work, such as paving and sidewalk construction, drains, and water pipe extension have been almost stopped for the time being. Although there is plenty of work, much less has been done this month than last. The supply and demand for labour is about equal. If better weather conditions ensue there will likely be a demand for labour owing to the amount of civic work to be done. At the

present time there is no exceptional activity in any particular trade. Transportation on the different railways is fairly active. Wholesale and retail trade is about normal. Early in the month the corporation employees made a demand for an increase of pay and shorter hours, which, after an interview with the members of the Board of Works and city engineer, was granted, the new rates being from 15 to 19 cents per hour, the men to work 9 hours. This is the only change in the rate of wages in any trade since January last, except the Canadian Pacific Railway trackmen, who received an increase of 5 cents per day on June 1, i.e., from \$1.45 per day of 10 hours to \$1.50, with same hours.

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—Farmers report that owing to the rainfall of the last three weeks the crop will be a failure, and that damage has been done to the sugar beets. Wheat and beans do not appear to have suffered much, and if the weather should turn fine soon there will be a good yield of those crops. Hay is looking rather thin.

Manufacturing continues fairly active, all factory employees being fully employed.

CONDITION OF PARTICULAR TRADES.

Building trades.—Masons, bricklayers, carpenters and painters report a quiet month. Gasfitters have been well employed.

Metal, and engineering trades.—Those employed in these trades report a fairly busy month with no idle men. Blacksmiths and boilermakers have plenty of work.

Woodworking and furnishing trades.—Carriage and wagon makers are all well employed, with coopers fairly busy.

Printing and allied trades.—Printers, pressmen and bookbinders are fairly active.

Clothing trades.—Journeyman tailors report trade fairly good for the time of year.

Food and tobacco preparation.—Bakers, confectioners and cigarmakers are busy, and all hands employed.

Miscellaneous.—Barbers are satisfactorily employed. Clerks and delivery employees are fairly busy.

Transport.—All railway employees are working. Teamsters and expressmen have had a busy month.

Unskilled labour.—There is a good demand for farm hands.

WINDSOR, ONT., AND DISTRICT.

Mr. David Mitchell, correspondent, reports as follows :—

GENERAL CONDITION OF THE LABOUR MARKET.

Satisfactory conditions in the labour market still continue, and there is a demand for carpenters, machinists, railway men and unskilled labour for construction work. Activity prevails in Windsor, Walkerville and Sandwich, and manufacturers and contractors have all the business they can attend to. During June a noticeable feature was the activity on the river front, and longshoremen have all the work they can handle. Wholesale and retail merchants report that business has largely increased from last year.

The strike on the Michigan Central cars is practically over, as the company has the strikers' places filled and a number of the strikers have asked to be taken back. The street cleaners have won their strike, and are getting what they asked for, viz., \$1.50 per day of nine hours.

CONDITION OF LOCAL INDUSTRIES.

Farmers are complaining of the wet weather. It has rained more or less every day this month, and the peaches are suffering through want of sun. The strawberry season is about over; it has been the most bountiful the district ever experienced. Prices were good; the lowest paid was five cents a box, and the berries found a ready market.

Factories are all running full time with a full staff and some of them have had to run over-time to fill orders.

CONDITION OF PARTICULAR TRADES.

Building trades.—Bricklayers and masons have plenty of work on hand, but have lost a lot of time this month on account of the wet weather. Carpenters are all fully employed, and there is a demand for good men. Lathers, plasterers, painters, plumbers and steamfitters have all the work they can do. Some of the shops are employing from two to five more men than they had a year ago. The wet weather has interfered somewhat with the builders' labourers.

Metal, engineering and shipbuilding trades.—All the iron workers are very busy, and most of them are working over-time to fill orders.

Woodworking and furnishing trades.—Carriage, wagon makers and coopers are all fully employed.

Printing and allied trades.—The allied printing trades are fairly busy. They asked the Trades and Labour Council to intercede for them, as some of the civic printing has been going outside of the city.

Clothing trades.—The custom trade is good and all hands are busy.

Food and tobacco preparation.—Bakers and confectioners report business good, and on the increase on account of the opening of the pic-nic season. Cigarmakers and tobacco workers are working full time.

Miscellaneous.—The barbers report a splendid month's trade, and no objection is made to the charge of 25c. for a haircut. There is a demand here for hotel employees, who are difficult to obtain at any price.

Transport.—Railway men generally are well employed. Steamboat men are all working, and steamboat firemen are in demand and are being looked for every day. It is hard to hire a team in Windsor at present, as they are all engaged ahead.

Unskilled labour is fully employed.

WINNIPEG, MAN., AND DISTRICT.

Mr. John Appleton, Correspondent, reports as follows :

GENERAL CONDITION OF THE LABOUR MARKET.

The labour market for unskilled labour is in a fairly satisfactory condition, supply and demand being about balanced. The demand for labourers for railway construction, however, is not so great here as was expected, as the immigrants have dispersed over the country in search of employment, and are there where the work is going on. Civic work is now in full operation, viz., road making, boulevarding, sewer laying, etc. The building trades are active, and skilled labourers busy. There is an exceptionally large amount of building going on here this season, with prospects of increased activity next month. This is not a city of manufactories, but is almost wholly dependent on the grain crops of the country for its prosperity; consequently any weather unfavourable to the development of the crops has a depressing effect. The long continuance of dry weather during the latter part of May and the early part of June made citizens anxious, but as the rains came most opportunely everyone again feels hopeful. Business is active in view of the prospect of an abundant harvest. Commercial activity, as evidenced by bank clearings, etc., and, as reported by the daily press, is still maintaining its increase of 50 per cent over last year. The figures for the current week are \$4,642,012, showing an increase of 59.7 per cent over the corresponding period of a year ago. The financial business of the city this week was two and one half times larger in volume than it was two years ago. Wholesale and retail merchants report business as being particularly active this month, the activity being the legitimate result of the general prosperity of the country.

A large number of men in connection with the building trades were out of employment for some days, such as bricklayers, plasterers, teamsters and labourers, some 400 or 500 in all, because of a shortage in the supply of brick. This shortage in material is largely the result of the very great activity in the building trades this season, and because of a disagreement that

has arisen between certain builders called the 'Manitoba Construction Company,' and the 'Bricklayers' Association.' It would appear that early in the year the 'Construction Company' realizing that it was going to be a busy season, entered into a contract with the 'Brickmakers' Association' for the supply of brick for the work. The Construction Company agreed to take all the brickmakers' season's output of brick to a maximum of 20,000,000 brick, the brickmakers agreeing to furnish not less than 12,000,000. The price agreed upon was \$9.50 per M. Lately, however, it is stated the brickmakers have been supplying brick to contractors who are not members of the construction company, and as the company is in need of 9,000,000 bricks at once, it objects to brick being delivered to others, considering it a violation of the contract. The construction company has, accordingly, secured an injunction to restrain the brickmakers from delivering brick to those outside the company. Pending the decision of the court on the injunction an agreement has been made between the company and the brickmakers whereby contractors who are unable to continue their work for want of brick will be supplied.

The disagreement between the master plumbers and the plumbers has been settled and the announcement is made that a basis of agreement has been arrived at, and that the rate of wages for first class men shall be 50 cents an hour, for second class 25 cents and upwards. Second class men who have been employed in the city for the past year are to get not less than the present rate of wages. Nine hours are to constitute a day's work; overtime is to count as time and a quarter till ten o'clock p.m., and after that hour time and a half. Sundays and legal holidays are to count double time.

The strike between the Canadian Pacific Railway and the U.B. of R.E. is practically ended. The company does not recognize the U.B. of R.E. in the settlement. The company re-affirms its practice of not objecting to class organization of its employees, if properly constituted. The Gen-

eral Superintendent and heads of departments will receive committees from employees at any time they may have any grievance to submit, as has been the custom of the company in the past. All strikers shall be paid for time worked before going on strike. The company also agrees not to discriminate against union men. Preference will be given to former employees when places can be made for them at rates of pay governing such positions.

BRANDON, MAN., AND DISTRICT.

Mr. S. P. Stringer, Correspondent, reports as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

The condition of the labour market in this city and district has shown a marked improvement during the past month. All classes of labour have been well employed, particularly skilled labour in all branches. Owing to the large increase in building operations men engaged in that line of trade are very scarce, and the supply is not equal to the demand. Owing to the great demand for dwellings, capitalists are erecting a large number of houses, some of which are being purchased by new-comers, yet the supply of houses is not equal to the demand. Business firms are also spending large sums in improving their premises. A new cigar factory is being erected, and large additions are about to be made to one of the flour mills. A large wholesale company is building premises for the purpose of carrying on business. Additions are also being built to several hotels, also to the Brandon hospital. The city will also have a woollen factory in operation in a few weeks, as well as a new steam laundry. Contractors complain that work has been somewhat retarded owing to the scarcity of skilled labour. Architects are calling for tenders for buildings, but contractors claim that they have all that they can attend to at present. Transportation companies are doing a heavy business. Wholesale and retail merchants report trade satisfactory. There have been no changes in rates of wages.

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—In no previous year have the crop reports been more encouraging than they are at present. Reports from the district state that the crops are at least two weeks more ahead in growth than they were at this particular time last year. With favourable conditions continued the anticipation is that the yield of grain a few months hence will far exceed that of last year. According to one of the latest local government reports of the five districts of Manitoba, the total acreage under crop is as follows : Wheat, 2,442,873 acres ; oats, 855,431 acres, and barley, 326,537 acres. With the exception of barley this shows a considerable increase over that of other years. The live stock report of the five districts shows that cattle fattened during the winter were 13,983, and milch cows were 126,816. Judging from the increase of all other crops, the people of this province are looking forward to increased prosperity in agricultural and commercial lines.

Lumbering.—The Handbury lumber firm has received five million feet of logs from the Shell river district *via* the Assiniboine. There never has been a greater demand for lumber than there is at present.

CONDITION OF PARTICULAR TRADES.

Building trades.—Bricklayers and masons are fully employed. There are no idle carpenters or joiners. Lathers and plasterers are very busy. Painters and decorators have an abundance of work ; there are some openings in these lines. Plumbers report trade very good. Stonecutters are exceptionally busy. Builders' labourers have plenty of work.

Metal and engineering trades.—Iron moulders are fully employed. Machinists have their hands full, and there are openings in this trade for good men. Blacksmiths report trade fairly good. With boilermakers trade was never better, the supply not equalling the demand.

Woodworking and furnishing trades.—With upholsterers trade is very good.

Printing and allied trades.—Printers report trade very good.

Clothing trades.—Journeymen tailors report conditions satisfactory, with some openings. Boot and shoe workers report trade fairly good.

Food and tobacco preparation.—Butchers and meat cutters say trade is somewhat slack. Cigarmakers report very good trade.

Transport.—Men engaged in all branches of railway service are exceptionally busy at present. Teamsters and expressmen are very busy.

Unskilled labour.—There were a number of idle men in this city during May, but at present there are very few. The new arrivals seem to have succeeded in getting employment, principally with farmers, who are offering \$25 per month and board, and in some cases giving experienced hands \$30 and board.

DISTRICT NOTES.

Reports from outlying districts are very encouraging, particularly those from the towns and villages. A large number of farms have changed hands and new farms have been opened on a large scale throughout the district. The building trade was never better, but great difficulty is being experienced in securing skilled labour. There are a large number of new elevators going up on the various branch lines of the railways, to be ready for this year's crop. Quite a number of men are employed on the construction work of the Arcola and Kirkella extension branch of the Canadian Pacific Railway. These are the only lines that are being extended this summer ; when these are completed they will open up a large territory.

CALGARY, N. W. T., AND DISTRICT.

Mr. S. D. Milliken, Correspondent, reports as follows :—

GENERAL CONDITION OF THE LABOUR MARKET.

The demand for men continues to keep pace with the supply, many arriving from

the east, and generally* finding employment easily to be secured. There is, in consequence, not the usual large number of idle men about, that is, in most centrally located towns. The Employers' Association is advertising in eastern papers for one hundred carpenters at from 25 to 35 cents per hour, but this is the result of special trouble in the building trades. The Great West Saddlery Co. has secured an exemption from taxation, or a 50 per cent reduction, for ten years, on condition that the company guarantees to erect a factory to cost not less than \$35,000, and employ not less than 50 men, work to begin at once.

At no period in the history of Calgary has the labour problem held the attention of citizens as during the current month. The teamsters are on strike, and the carpenters locked-out. Owing to the unprecedented activity in building and the inability of employers to secure other hands, the tie-up is either complete or work is going on under conditions that are not satisfactory either to the contractors or men engaged. It is difficult to secure exact information, as neither employers nor men have as yet given out much to the public.*

CONDITION OF PARTICULAR TRADES.

Building trades.—The building trades are affected by the strike and lockout of teamsters and carpenters, and there are plenty of men in all lines to handle the work on hand, and what is being done by the small force of carpenters at work.

Printing and allied trades.—Printers are fully employed, both offices having plenty of work.

Leather trades.—The leather workers on horse goods are steadily employed. All of the four manufacturing firms having large orders on hand; there will likely be openings in this line for competent men when the Great West Saddlery Co. has put up its new factory.

Transport.—The railroad men are all busy and having a good season. Large shipments of stock and settlers' effects arrive daily, and with the usual traffic makes up the limit of what can be carried with present number of engines and rolling stock.

DISTRICT NOTES.

The demand for labour in the north is good, but no mechanics outside of the *building trades* are needed. The recent fire in Wetaskiwin destroyed a large amount of property, which will be rebuilt. There is a good market in and around Edmonton at present for labourers, also in other towns along the Calgary and Edmonton Railway north of here. The demand for ranch hands from now until after haying will be heavy, and all available men will be wanted.

ROSSLAND, B.C., AND DISTRICT.

Mr. Roland A. Laird, correspondent, reports as follows :—

DISTRICT NOTES.

There was a marked improvement in the demand for labour throughout the Kootenays during June, especially in the building trades. From all sides reports are to the effect that carpenters and other tradesmen are required, while the demand for common labour is also excellent. In Rossland City, for instance, a well known contractor is quoted as saying: 'There is work here all summer for fifty carpenters and little more than half that number are available. It is important to note also that in the course of a few weeks more men will be required here than at the present time by reason of additional building shortly to be started. In East Kootenay the demand for carpenters is also active. Labourers and coal miners readily secure employment throughout the East Kootenay coal fields, while in the lumbering camps that are growing in number weekly many men are wanted constantly. It is confidently expected that the Rossland mines will, at a comparatively early date, be employing a couple of hundred miners in

*A full report of the disturbances is included in the article on the Trade Disputes of the month in the present issue of the *Gazette*.

excess of the number now on the pay rolls. Matters are shaping themselves in this direction, and the approaching fall should see bigger crews in this camp than has been the case for at least a couple of years.

NEW WESTMINSTER, B.C., AND DISTRICT.

Mr. Geo. Hargreaves, Correspondent, reports as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

General activity has prevailed in the labour market during the past month. In many branches the demand has been good, especially for carpenters, machinists, railroad men and labourers. Construction work on the railroad from this city to Vancouver is being pushed with a view of completing the same by January next. Nine camps are established, and 450 men find steady employment. The pay roll for last month totalled \$25,000. The surveying staff on the proposed Trans-Canada railway line between Port Simpson and points east, has been withdrawn. The engineers and staff have returned. It is expected that the Grand Trunk Pacific will continue the work that has been started. Owing to the high water in the Fraser River, work on the new bridge is stopped. The arrangement entered into by the hardware merchants to close their places of business on Saturdays has been broken. The blacksmiths and carriage makers have agreed to close their places of business every Saturday at 12 o'clock. Six firms have signed an agreement to that effect. The journey-men being paid by the hour reduces the week's earnings from 60 to 55 hours. There is no settlement yet of the strike of the factory hands of the Royal City Planing mills. The men asked for a reduction of 5 hours per week with the same rate of pay. The fishermen refused to accept the cannery's offer of 15 and 16 cents per fish; they ask for 17 and 18 cents per fish, and as a consequence, they decided to strike. Many of the logging camps have closed down for four or five weeks owing, it is said, to a

surplus of logs. Market prices of the month are as follows:—

Beef, hindquarters, 8 to 9 cents per pound.
Beef, forequarters, 6 to 7 cents per pound.
Mutton, whole, 10½ to 11½ cents per pound.
Pork, whole, 8 to 9 cents per pound.
Veal, small, 7 to 8 cents per pound.
Veal, large, 8½ to 10 cents per pound.
Eggs, per dozen, 25 to 30 cents.
Potatoes, \$8 to \$10 per ton; 60 cents per sack.
Onions, \$1.50 per sack.
Butter, dairy, 25 to 30 cents per pound.
Fowls, \$7 to \$8 per dozen.
Broilers, \$3.50 to \$4.50 per dozen.
Ducks, \$6.50 to \$7.50 per dozen.
Fish: Red spring salmon, 10 cents per pound; white spring salmon, 7 cents per pound; halibut, 8 cents per pound.

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—Owing to the high freshet some few farms bordering on the Fraser River have been flooded. This only applies to farms on low lands and not dyked. A large number of settlers have gone into the Fraser River district this spring; it is estimated that in one section alone 100 families have settled. The majority of these settlers are well to do people from the State of Washington, and as a class are highly desirable.

Fishing.—There are very few men engaged in the fishing of spring salmon. The season for sockeye salmon commences on July 1, and if some terms of agreement can be arrived at between the cannery and fishermen a large number of men will at once commence operations.

Lumbering.—A good trade is being carried on in export lumber. The local market is affected by labour disputes. In the manufacturing of fruit packages and boxes a large trade is being done.

CONDITION OF PARTICULAR TRADES.

Building trades.—The several lines in the building trades are fully employed, with a demand for carpenters, painters and labourers.

Metal, engineering and shipbuilding trades.—In the iron trades there is a demand for men, especially for machinists, blacksmiths and steam engineers. A large amount of repair work is being carried on by shipwrights and caulkers. New work is well advanced.

Woodworking and furnishing trades.—Upholsterers—A demand for men has been made, but there being only two shops in town, it was soon supplied. Car builders report work brisk, still there is no demand for additional help. Shingle weavers have plenty work, but owing to high water the mills have not been running full time.

Printing and allied trades.—Printers report work good, the local shops working extra time to fill orders.

DISTRICT NOTES.

Chilliwack.—The Royal Bank of Canada is to open a branch here.

Abbotsford.—The Victoria, Vancouver and Eastern Railway, which is being built practically for the Great Northern, has made good progress in securing the right of way. The settlers through whose farms the railway will pass, are dealing liberally with the company. The Abbotsford Lumber Company have secured a large timber limit along the line of the railway, and will at once establish camps to market the lumber.

The fruit growers of this district have formed a combine to keep up the price of strawberries during the coming season to \$2 per crate as the lowest price.

VANCOUVER, B.C., AND DISTRICT.

Mr. George Bartley, Correspondent, reports as follows :—

GENERAL CONDITION OF THE LABOUR MARKET.

The labour market has been unsettled during the month, because of the numerous strikes in the different parts of the province and the neighbouring state of Washington, as well as in Vancouver itself. There has been a considerable influx of idle men in consequence, principally of unskilled labour. Work has been very fair considering everything, but prospects are doubtful. The building trades are at present hampered for the want of doors, sashes, &c., on account of the strike of the factory woodworkers, which has been on since June 1st. In this connection, it may

be stated that the factory men decided early in May to give notice to their employers that on and after June 1 they would request a nine-hour instead of a ten-hour day, without reduction in wages. The factories involved are : Vancouver Sash and Door Factory, 27 men ; Robertson & Hackett's, 19 ; Royal City Planing Mill, 24 ; Heaps & Co., 20 ; and Royal City at New Westminster, 57 men. The latter total includes some 38 whites, the balance being Orientals. The wages paid before the strike averaged about 30c. an hour.

The Royal Labour Commission has been hearing evidence, and a great deal of interest was taken at the sessions.

There have been no changes in wages since the first of last April.

In consequence of the strike of factory workers at the local mills a large amount of work is being sent out of the city. J. McLuckie, who has the contract for the new city hall and the sugar refinery's big warehouse, has sent to Victoria for door and window frames. Several other contractors have also purchased from outside points.

CONDITION OF LOCAL INDUSTRIES.

The lumbering business is active.

CONDITION OF PARTICULAR TRADES.

Building trades.—The following is a brief reference to local working conditions in the different branches :

Carpenters work eight hours a day 8 a.m. to 5 p.m., and four hours on Saturday, 8 to 12 M. Wages are 40c. an hour ; overtime, 60c. ; legal holidays, 80c. ! Not more than two working employers are allowed in any firm of contractors. Bricklayers and masons receive 50c. an hour and have the same hours as carpenters. Overtime is counted time and a half and double time for holidays. On excavation work, where teams are engaged, diggers are allowed to work the nine-hour day. No member of this union will be allowed to make mortar or cement by the barrel, or take a contract to either make or carry by the yard. Lath-

ers work 8 hours a day. Lathing being done by piecework, there is no special rate for overtime. Legal holidays are rigidly observed. Painters receive \$3 per day of eight hours. Time and a half for overtime, double time for holidays. Wages paid weekly. Only two working employers allowed. Plasterers are paid \$5 a day, with hours the same as carpenters. No union plasterer is allowed to work for any firm in which there is more than one practical working plasterer. A master plasterer is not allowed to work more than eight hours, nor to work without a journeyman plasterer on any job exceeding one day's work. Working on Saturday afternoon is strictly forbidden. Plumbers are paid 50c. per hour, with the same hours as carpenters. Overtime, time and a half till 10 p.m.; double time after 10 p.m. and on legal holidays. Only one master plumber is allowed to work on a building at one time. Apprentices are prohibited by by-law to work without a qualified plumber. Stonecutters have hours the same as carpenters at wages of \$4.50 a day. Overtime is only permitted in exceptional cases. Lathers receive \$2.50 per 1,000 laths. Builders' labourers are paid from \$2.50 to \$3.50 per day.

Metal, engineering and shipbuilding trades.—Sheet metal workers work 48 hours a week, the eight or nine hour day being optional. Eight-hour day men work Saturday afternoon, while the nine-hour day men take Saturday afternoon off. One apprentice to every three men. One helper allowed to two journeymen. Moulders work 50 hours a week; trade is good with them, likewise prospects. Electrical workers are paid \$3.25 per day, with same hours as carpenters, and time and a half for overtime, double time being allowed for legal holidays. By an agreement with the employers, no boss electrician does any mechanical work whatever.

Printing and allied trades.—Work is good for machine operators, but not for job men.

Food and tobacco preparation.—Bakers report work dull and poor prospects. There is no demand for men.

Miscellaneous.—Union barbers have plenty to do.

Transport.—The freight handlers who went out in sympathy with the late U. B. of R. E. strike are returning to their former places. Freight handlers are not in demand.

VICTORIA, B.C., AND DISTRICT.

Mr. J. D. McNiven, Correspondent, reports as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

The general condition of the labour market has been very satisfactory throughout the month. While there was no marked activity in any particular line of industry, nearly all were in a healthy condition. The city has a staff of about 200 men employed on sewer extension, macadamizing of roads and laying concrete sidewalks. A large gang of men are also at work on the substructure of Point Ellis bridge, which is being done by day labour. The Canadian Pacific Railway Company has acquired water front property on James Bay, and will erect a new wharf, offices and sheds to meet the requirements of the company's business. Early in the month large shipments of merchandise were sent to points in northern British Columbia and the Yukon. The City Council is negotiating with the directors of the Canadian Pacific Railway with the object of inducing the company to erect a tourist hotel in this city, and a by-law authorizing the council to grant a free site and other inducements will soon be submitted to the ratepayers for approval. If the required conditions are conceded the company will erect a building to cost not less than \$300,000. Tourist travel has commenced and the local steamship agents report business brisk. Since the commencement of the trouble at the coal mines, 13,733 tons of coal, valued at \$62,659, have been imported, principally from Japan, and the United States.

The carpenters' strike, which commenced on the 1st of May, was declared off on June 8th, the men accepting the terms offered by the Builders' Association. The rate agreed upon was 40 cents an hour, 44 hours to constitute a week's work. Saturday afternoon is declared a holiday between April and September, and if work is required during Saturday afternoon 50 cents an hour is to be paid, time and a-half to be allowed for overtime. The demand made by the carpenters was for \$3.50 per day of 8 hours for five days, with four hours on Saturday, making the week 44 hours, and the weekly wages \$19.25. Previous to the strike carpenters were paid at the rate of 37½ cents an hour.

The strike of the British Columbia Steamshipmen's Society in sympathy with the Brotherhood of Railway Employees, inaugurated on March 18th, was declared off on June 9th, when a representative of the society interviewed the superintendent of the Canadian Pacific Railway coast service with the object of having the men reinstated in their former positions. The result of the interview elicited the information that in future the society would not be recognized by the company, but that members who would leave it would be given employment when vacancies occurred.

The early closing by-law, affecting gents' furnishers, has been changed, making the closing hours 6 p.m. instead of 7, as formerly.

CONDITION OF PARTICULAR TRADES.

Building trades.—Bricklayers are fully employed. Since the settlement of the carpenters' strike trade has been more active, but the prospects for the season are not encouraging. There is still a surplus of carpenters, many who left the city last month having returned. Lathers and plasterers have fair employment. Painters and decorators report trade as still brisk and all hands working full time. The extension of the sewerage system has given the plumbing trade an impetus, consequently but few plumbers are out of employment.

Metal, engineering and shipbuilding trades.—Iron moulders and machinists are well employed. Electrical workers report fair employment, and linemen have had a very busy month. With blacksmiths work is fair, but a few idle men are reported. Boilermakers while busy in some shops are idle in others; employment on the whole, however, is fair. Shipwrights and caulkers report a dull month.

Printing and allied trades.—Printers, pressmen and bookbinders are fully employed.

Clothing trades.—Journeyman tailors report trade as dull. Garment workers are still busy.

Food and tobacco preparation.—Bakers are well employed, and cigarmakers report an improvement in trade since last month.

Transport.—Street railway employees report all hands fully employed. Teamsters and expressmen have had all the work they could attend to.

Unskilled labour.—There is a large amount of work offered and no one need be idle who wants work. This condition of affairs prevails only for a few months during the summer. The rest of the year there is usually a surplus of unskilled labour.

DISTRICT NOTES.

Chemainus.—The Victoria Lumber Co. is installing new machinery for the new planing mill which is being added to its plant.

Crofton.—The smelter was closed down the first half of the month on account of a shortage of coke. The American coal and coke has been found much inferior to the local product, and the supply was inadequate to keep the smelter running. About the middle of the month a supply was received from the island collieries, and as the conditions of some of the mines are more settled it is thought no further trouble will result from this cause.

NANAIMO, B.C., AND DISTRICT.

Mr. A. E. H. Spencer, Correspondent, reports as follows :—

GENERAL CONDITION OF THE LABOUR MARKET.

The general condition of the labour market is unsatisfactory owing to labour troubles in the district, there being a large number of men out of employment. There are prospects for improvement in the near future, however. Work has been started in a sandstone quarry, and, as soon as the required machinery is in place, it is expected to employ a large force of men, but there are plenty of men waiting for the work. In commercial circles business is quiet and very uncertain; business men are very careful of their credits and the banks are also withholding loans until the strikes now on in the district are settled. The only business that is active is the lumber industry, there being a demand for logs and lumber for export. The labour market is very unsettled in this branch also, owing to the strikes.

CONDITION OF LOCAL INDUSTRIES.

The *fishing industry* is quiet at present, waiting returns from a trial shipment of halibut.

Lumbering is still active, with prospects of continuing so for some time.

In the *coal mining industry* the mines in this town are working to their full extent, but the men in the other collieries in the

district are on strike and it is hard to tell when conditions will be settled as the facts of the dispute are unknown outside of those actually concerned.

In the *quartz mining branches* conditions are quiet, some of the largest mines being closed down, but there are prospects of their being reopened soon. On Texada Island the mines are fairly active, some good prospects being developed, but no very large number of men is employed as yet.

CONDITION OF PARTICULAR TRADES.

In the *building trades* there is very little doing, there being hardly any new buildings going up, and in the surrounding district there is practically no work for builders of any kind. Among plumbers the local trade is fair but no extra demand as is usual at this time of the year.

Metal, engineering and shipbuilding trades.—Blacksmiths and carriage makers report business as fair but there are plenty of men to meet all requirements.

Unskilled labour.—There is hardly any demand for unskilled labour.

DISTRICT NOTES.

In the district there is not much doing owing to the strikes, but the smelters are working steadily as they are getting their coke from the American side.

LABOUR ORGANIZATION IN CANADA—ITS GROWTH AND PRESENT POSITION.

VI.—SUMMARY.

On the establishment of the Department of Labour in August, 1900, the work of collecting information and statistics relating to the extent and development of labour organization in Canada was immediately begun and has been steadily continued since with the object of obtaining as complete details as possible relating to the subject from whatever point of view. Prior to the establishment of the Department the field had been covered only in a

desultory manner, with no attempt to secure complete or detailed information, and the process of arriving at any definite or accurate result has been necessarily a slow one. From time to time, however, the department has found itself in a position to issue statements of more or less value from both a general and a particular standpoint with regard to trade unionism in Canada, and the publication of the same, accordingly,

has been a feature periodically of the issues of the *Labour Gazette*.

Trade Union Directory.

The earliest of the statements in question took the form of a directory of the labour organizations of the Dominion, the publication of which was begun in the September, 1901, issue of the *Gazette*, and continued through succeeding numbers until its completion in the issue for May, 1902.

Descriptive and Statistical Tables.

In the September issue following that on which the final instalment of the directory appeared, a work of a distinctly different character, though referring to the same subject, was begun. This was a series of articles containing statistical and descriptive tables in which an attempt was made to show the present extent of labour organization in Canada, as well as to give an idea of the leading features of its growth and history. The continuation of these articles, with one or two interruptions, has been a feature of the various issues of the *Gazette* since the date named, the Dominion being covered by provinces, or groups of provinces, and the concluding article of the series, relating to British Columbia, having appeared in the June issue of the *Gazette*.

For the purpose of securing unity in the result, and thus rendering possible a proper basis of comparison of the different features of the labour organization movement in the several provinces, it was thought best, in the preparation of the articles just named, that they should all be made to refer to the situation in respect to labour organization as it existed at one particular date, the close of the summer season of 1902, and immediately prior to the issue of the first article of the series being the time selected, and the information at the disposal of the department on the date named being embodied in the articles.

Table of Unions in Canada.

Since August, 1902, however, a considerable amount of important information

relating to the subject has reached the department, and it is in view of this fact that the accompanying table, which contains a list, by localities and classes of unions, of the various organizations whose existence has been reported to the department up to the closing day of the month just passed, is published by way of supplement to the descriptive and statistical tables above referred to. Account is, of course, taken in the table of the unions included in the series of articles mentioned above, and also of those which may have gone out of existence within the period named. The table, accordingly, may be regarded as affording a criterion of the amount of information on the subject of trade unions at present available to the public through the agency of the Department of Labour. By a comparison of the statistics of the present table with those which have appeared during the past year in the *Labour Gazette* some idea may be formed of the growth of organization during the interim, though allowance must be made in this connection for the fact that the department has secured information during the past nine months from a considerable number of unions which were in existence prior to August, 1902.*

Analysis of the Table.

A number of interesting facts with regard to labour organization in Canada may be learned at a glance from the accompanying table. Ontario heads the list of provinces in respect of the number of labour unions, with 853, British Columbia follows with 216, Quebec coming third with 202. Nova Scotia has 93, New Brunswick 56, Prince Edward Island 14, Manitoba 63, the North-west Territories 46, and the Yukon 13. The grand total for the Dominion is accordingly 1551. Reckoned by cities, Toronto with 134 unions contains the highest number of labour organizations, Montreal standing second with 102, and

* The growth of labour organization in Canada during the calendar year 1902 was the subject of a special article in the January issue of the *Gazette*.

Vancouver third with 61. Hamilton with 58, Ottawa with 49, Winnipeg with 48, London with 47, Quebec with 42, Victoria with 34, Kingston with 31, Halifax with 31 and St. John, N.B., with 30, are the other prominent centres of trade unionism in Canada. With regard to the particular classes of organization which chiefly contribute to the above totals it will be seen that the 23 unions reported in the metal, engineering and shipbuilding trades for Toronto is the highest number of unions in any one branch of trade in any one locality. The transport branches in the same city number 22 unions, the building trades 17, and the woodworking trades 15. In Montreal the transport trades number 18, metal trades 15, clothing trades 13, building trades 11,

and Knights of Labour 10. In Hamilton, the metal and transport trades have 10 unions each, and in London the figures for the same callings are 10 and 12 respectively. The building trades have 10 unions in Ottawa and transport 12. In Winnipeg the building trades with 11 unions and the transport branches with 10 are the most prominent from the point of view of numbers of organizations. Vancouver has 11 unions in the metal trades, and St. John, N.B., the same number in the transport trades.

Further information of a similar nature and bearing will be easily obtainable by reference to the table, and the above is given only as indicating the varied nature of the facts that may be deduced.

ARBITRATION BETWEEN MASTER BUILDERS OF HALIFAX, N.S., AND LOCAL CARPENTERS.

In the month of June, 1901, a strike of carpenters occurred in the city of Halifax, the cause being a demand on the part of the men for an increase of 7c. on the then prevailing wage of 18c. per hour. The matter, after 19 days continuance of the

strike, was referred to a board of arbitrators, consisting of a representative of the union, a representative of the master builders and nominees of the provincial government. By the award of the board thus constituted the wage scale was raised from

18c. to 22c. per hour and an agreement made that in the event of future difficulties or disputes arising between the carpenters and master builders of Halifax, and a settlement by the parties themselves proving impossible, such dispute or difficulty should be immediately submitted to arbitration without suspension of work.

The wage scale of 22c. per hour for carpenters as thus determined upon remained without proposed alteration until the opening of the present season, when a demand was presented by the union for an increase in the rate of payment to 25c. per hour, with a nine-hour day. The demand was at first refused by the employing builders, and a threat of a general strike on June 1st followed. Ultimately, however, recourse was had to the method of arbitration according to the agreement of two years ago. As the occurrence of a strike in this connection would have involved not only the throwing out of work of about 300 carpenters, but would have been the cause of rendering nearly an equal number of bricklayers, masons and labourers idle, the recourse to the conciliatory method of arbitration was very generally acceptable.

The Hearing of Evidence.

The board of arbitrators chosen consisted of Mr. G. S. Campbell, representing the builders, Mr. F. W. Smith, representing the men, Judge Wallace and Mr. R. T. MacIlreith, nominated by the provincial government, and a fifth arbitrator, the Rev. Dr. Forrest, president of Dalhousie College, named by the four preceding. The builders submitted their case in writing, while the members of the union testified orally. The chief points adduced by the latter were in reference to the increased cost of living in relation to the wages paid to carpenters in Halifax. The uncertain length of the season of employment was also referred to. From the standpoint of the builders, it was chiefly insisted upon that the wages of workmen should not be uniform, but should vary according to the skill of the employed. While willing to pay 25c. per hour or even more to first-class

men, the builders objected to pay a level rate of 25c. to all-comers, and they contended that the employers should be at liberty to employ those whom they chose and to judge of the value of individual workmen to them. The wages of carpenters in other towns and cities of Canada were cited, as follows:—

Truro, N.S., 20c. per hour for 9 hours.
Windsor, N.S., \$10 and \$12 per week, 10-hour day.
Amherst, N.S., \$1.40 and \$2.10, 10-hour day.
St. John, N.B., formerly 20c. per hour, but since April 22½c. per hour, 9-hour day.
Montreal, Que., 22½c. per hour for 9-hour day.
Quebec, Que., \$1.50, \$1.60 and \$2.00, for 10-hour day, according to ability.

Other branches of the building trades in Halifax are paid as follows:—

Bricklayers, 36c. per hour.
Masons, 36c. per hour.
Freestone cutters, 36c. per hour.
Granite cutters, 33½c. per hour.
Plasterers, 30c. per hour.
Carpenters, 22c. per hour.

Text of the Award.

After full discussion of the evidence, the award of the board of arbitrators was handed out on June 26th, as quoted in full below. It will be noted that the principle of a sliding scale of wages within certain limits, according to the competency of individual workmen, is allowed:

The Local Carpenters' Union (No. 83) having asked that the minimum rate of wages for carpenters should be increased from the present rate of 22 cents per hour to 25 cents, and the master builders having declined to grant such demand, the question of the justice of granting such request was submitted to the undersigned arbitrators, who, after hearing considerable evidence, have come to the following decision:

1. The arbitrators are of the opinion that an increase to 25 cents per hour would be justifiable in regard to all members of the Carpenters' Union who are skilled and experienced mechanics.

2. The arbitrators find from the evidence taken that there are a large number of carpenters in the said union who by reason of their skill and experience are entitled to be paid at the rate of at least 25 cents per hour.

3. It has been alleged, however, that there are some carpenters belonging to the Union who have not the necessary skill and training to entitle them to this higher rate of 25 cents per hour, and the arbitrators therefore recommend that wherever any difference of opinion may exist between any employer and any carpenter in his employ as to the skill of the said employee the question of his skill shall be determined by a reference to the foreman under whose immediate supervision the carpenter may be working, or in the case of further applicants for work by any foreman of an employer who may be in charge of the particular branch of

work at which the applicant desires to be engaged, the decision of such foreman in all cases to be given promptly and to be accepted as final while the man continues in that employment. Said foreman in deciding such matter must be free from interference by either of the parties to this arbitration. Any such interference will be considered a violation of the terms of this decision. Said foreman must not be a member of the Carpenters' Union. In the event of any foreman declining to decide the question of the skill of the workman, then such foreman and his employer shall mutually agree upon a competent third person, whose decision must be accepted as conclusive.

If a foreman decides that a carpenter is entitled to the increased rate of 25 cents per hour, such decision shall apply to all work done by him from and after the 1st day of June, 1903. If the foreman decides that the workman does not possess sufficient skill to entitle him to the higher wage, such workman shall be paid at the rate of at least 22 cents per hour.

That all other difficulties or disputes which may arise in the future between the union and the Master Builders' Association which cannot be settled by the parties themselves, shall be promptly submitted to arbitration without suspension of work.

That the foregoing provisions shall be considered as binding upon the parties to this arbitration until the 31st May, 1904, and that before any demand for a change in such provisions or for increased wages is made, the Master Builders must be notified of such proposed demand before the first of March of the year when such change is desired.

(Signed)

JOHN FORREST,
W. B. WALLACE,
R. T. MACILREITH,
F. W. SMITH,
G. S. CAMPBELL.

Halifax, N.S., June 24, 1903.

BRITISH COLUMBIA LEGISLATION AFFECTING LABOUR, 1903.

The legislature of the province of British Columbia was dissolved on June 4, when the final instalment of bills passed during the session received the Lieutenant-Governor's assent. Among these, in conjunction with others which had been assented to previously on May 4, were a number having more or less direct bearing upon labour and industrial conditions in the province, and a reference to their leading provisions is herewith appended. It might be stated that on account of the early termination of the session in consequence of the dissolution of the legislature, there were a number of bills, having immediate reference to the condition of labour, the further discussion of which was indefinitely postponed.

Regulation of Immigration.

An Act to regulate immigration into British Columbia was again placed on the statute-book under the section of the British North America Act which delegates to the several provinces of the Dominion the right to make laws in relation to agriculture and immigration not repugnant to legislation on that subject passed by the parliament of Canada. The Act is substantially similar to that passed last year and subsequently disallowed. Its leading in-

tention is to enforce an educational test on immigrants coming into British Columbia. Any person, it is provided, who, when requested by a duly accredited officer, is unable to write out and sign, in the characters of some European language, an application, the form of which is appended, to the Provincial Secretary of the province, claiming to be exempt from the operation of the Act, is not to be allowed to enter the province. A reading test is also to be submitted by the officer in question to intending immigrants, and a fine of \$500 is imposed on an immigrant guilty of breaking the Act, with an alternative of imprisonment for a time not to exceed twelve months. Imprisonment, however, for this offence will be allowed to cease upon the offender finding two securities each in the amount of \$250 that he will leave the province within one month. Further, no immigrant making his way into or found in British Columbia in contravention of the Act, is to be entitled to a license to carry on any trade or calling subject to the legislative authority of the province, neither is he to be entitled to acquire and hold land, or to any of the rights and privileges of a free miner, or to exercise the franchise. Persons or corporations assisting an immigrant to contravene the Act render themselves liable to

the same penalty as the immigrant. The appointment of officers for the purpose of carrying out the Act is vested in the Lieutenant Governor in Council, who may also define the duties of such officers, and from time to time make or amend the regulations governing them. A provision of the Act limits its application to certain defined cases.

Further Regulation of Labour.

An Act of somewhat similar tendency to that just quoted is that which appears under the heading of 'An Act relating to employment on works carried on under franchises granted by private Acts.' This Act, which is to be cited as the 'Labour Regulation Act, 1903,' provides that no employer shall engage, in connection with any work carried on under franchise allowed by the legislature subsequent to the 1st August, 1900, a workman who is unable to conform with an educational test, the specified test being his ability to read the Act in a language of Europe. The penalty for contravention of the Act by employers is not to exceed \$25 or to be less than \$10 for every workman engaged, with the alternative of imprisonment for any term not exceeding 30 days. If the work is being done by contract, the contractor or sub-contractor who contravenes the Act is liable to a similar penalty, as is also any member, director or agent of a corporation who permits or connives at the employment of workmen unable to pass the test mentioned. Offenders are also to be liable to separate and successive penalties for every day during which such person shall be employed, and the burden of disproof in any case is thrown upon the employer. Any contract which omits to provide for the performance of works carried on under private Acts in conformity with this Act it to be illegal and void. The appointment of officers for the carrying out and enforcement of the Act is vested in the Lieutenant Governor in Council.

Coal Mines Regulation.

The rule of the Revised Statutes defin-

ing the positions in or about coal mines, which must not be filled by Chinese or persons unable to speak English, is repealed and re-enacted with an addition preventing the employment of such persons 'below ground' in any capacity. In the Revised Statutes the prohibition extended only to the employment of such persons in the capacity of 'banksmen, onsetter, signalmen, brakemen, furnacemen, engineer, or to be employed at the windlass of a sinking pit.'

It should be stated that the two last mentioned acts, like the Immigration Act above, were passed in practically similar form at the session of the Legislature of 1902.

Protection of Children.

The Act for the reformation and protection of neglected and dependent children, which appears as No. 45 of the Provincial Statutes of 1901, was amended during the session in the clause relating to the circumstances under which children may be apprehended as neglected. In the original Act 15 years was the prescribed age under which any children falling within certain descriptions might be so arrested without warrant. This limit is now raised to 16 and an additional subsection is inserted in further definition of the term 'neglected children,' a child who is found wandering about at late hours and not having any home or settled place of abode, or proper guardianship, being now regarded as falling within the term.

Railway Company Injunction.

An amendment to the Supreme Court Act of the Revised Statutes adds provisions in the matter of the issuing of restraining orders against railway companies. By the new subsections no restraining order or injunction may be granted against any railway under construction, or operating within the province, whereby the work of actual construction or operation is impeded or delayed, except in case it is reasonably apparent that irreparable damage will ensue. The company, however, may be ordered, in lieu of an injunction and in cases where the judge on hear-

ing the application is convinced that the case is a proper one for the granting of an injunction, to pay into court a sum of money sufficient to compensate the applicant against any loss that may be sustained by him by reason of the cause complained of. The judge, at the same time, may order the applicant for an injunction also to furnish security sufficient to indemnify the railway from any loss which it may sustain by reason of the injunction.

Obstruction on Lakes and Water Courses.

A 'Water course obstruction Act,' passed during the recent session, makes it unlawful for owners or occupiers of mills, &c., to throw sawdust, bark, or other refuse or waste wood into lakes, rivers or water courses. The felling of a tree across lakes or rivers is also forbidden, and a penalty not exceeding \$10, and not less than \$1 for each day during the time the contravention of the Act continues, is imposed in each case over and above all damages arising from the obstruction in question. The Act, it is specified, shall not apply to dams, bridges or to any tree cut down or felled across a lake or stream to be used as a bridge, provided the tree in question does not impede the flow of water or the passing of rafts.

Municipal Rights.

Three bills of the session may be cited as intimately affecting the rights of municipalities :

By bill No. 54, the city of New Westminster is empowered to purchase real estate at tax sales within the municipality when the price offered is less than the arrears, and to sell such property, if not redeemed within a certain period, at such price as the city council may specify.

The second Act gives the city of Victoria the right to grant a site for the erec-

tion of a tourists' hotel, together with exemption from taxation and water rates for 15 years. In this connection it may be stated that negotiations for the undertaking of the project have been already begun by the Canadian Pacific Railway Company, which proposes to erect a hotel valued at \$300,000 on a site of 4 acres granted by the city pending confirmation of the arrangement by by-law.

An Act to amend the Special Surveys Act of 1899 gives the Attorney-General of the province power to direct a special survey of lands in any city of the province for the purpose of correcting errors or of subdividing lots not before subdivided, or of surveying new lands, the cost thereof to be apportioned between the city and the owners of the land surveyed.

Other Legislation.

By 'an Act to amend the Benevolent Societies Act,' the purposes for which such societies may be incorporated are defined as the establishment of 'chambers of mines, chambers of commerce, tourists' associations, mining institutes and associations.' The first and last of this list alone were mentioned in the original section of 1898.

The 'Act to amend the Mutual Fire Insurance Company's Act' of last year redefines the conditions under which the corporate powers of such companies are to be liable to forfeiture. Contracts of insurance by mutual companies, it is further provided, shall not exceed a term of three years, and the maximum of any single risk that can be taken and held by a mutual company alone is placed at \$5,000. Risks larger than \$2,000 are forbidden unless the company has a guaranteed stock of not less than \$20,000, or a reserve fund of at least \$5,000, and premium notes to the amount of at least \$40,000.

MANITOBA LEGISLATION AFFECTING LABOUR, 1903.

THE legislation passed during the recent session of the Manitoba legislature had only indirect reference, and that in a

limited number of instances, to labour conditions prevailing in that province, though an Act respecting trade unions and an Act

to amend the mechanics and wage earner's lien Act were among measures discussed. Reference may be made, however, in this connection to the following measures which became law :—

Branding of Cattle.

'An Act respecting the branding of cattle' begins by defining the term 'cattle' as 'any bull, steer, ox, cow, heifer or calf' and provides for the registering of brands for the same with the Minister of Agriculture and Immigration, brands being allotted to any person whatever on application therefor in accordance with a prescribed schedule, and on the payment of a fee of \$1.00. A brand thus registered and its allotment recorded in the *Manitoba Gazette* constitutes prima facie evidence of the ownership of the person whose brand it is. Provisions for the transference of brands, penalties for their misuse and for sales of branded cattle are added. The Act went into force on June 1st, 1903.

Road Maintenance and Improvement.

By an amendment to the Municipal Act rural municipalities are given the right to borrow money for expenditure upon road-making and road improvement, or for the purchase of road-making or ditching machinery or implements. The sum thus borrowed must not, however, exceed \$4,000, and a provision is added that the by-law authorizing the expenditure be subject to the approval of the Lieutenant Governor in Council. Roads made and improved

and machinery purchased under the Act are to be controlled and maintained by the municipality, and the council must see that proper care is taken of such machinery when not in use.

Sanitation in Public Houses.

A 'Public House Sanitation Act,' enjoins strict requirements as to the cleanliness, ventilation and heating of public houses, the Act applying to all hotels, licensed or unlicensed, lodging houses, boarding houses, stopping places, and every house or part thereof where lodgings are furnished, with or without meals, for money or other consideration.' The chief license inspector of the province is given supervision of the administration of the Act, and has power to enter at all reasonable times any public house for the purpose of inspection. Special provisions are included to ensure a minimum amount of danger in cases where gas is used for lighting purposes. Gas meters in hotels, it is provided, are not to be turned off at night if gas is supplied therefrom for use in any bedroom, and all gas fixtures must be kept in a proper state of repair. Ventilators must be provided at or near the ceiling of bedrooms, and must be at all times kept open when the bedroom is in use so as to allow the escape of any gas which may collect. The penalty for violation of the Act is fixed at a minimum of \$10 and maximum of \$50, with the alternative of imprisonment for a period not to exceed thirty days.

THE COST OF LIVING IN CANADA.

III.—Retail Prices of Dry Goods.

The third series of statistical tables prepared in connection with the Department of Labour's special investigation (*) into

the subject of the cost of living in Canada, is published herewith, and has reference to retail prices of dry goods in the several provinces of the Dominion. As will be seen from the tables, some 15 staple

*For an account of the nature and extent of this investigation and the method by which it was conducted see article in April number of *Gazette*, page 778, on *Cost of Living in Canada*. Other articles on the subject have appeared in

the May and June issues of the *Gazette*, at pages 869 and 979, respectively, and have included tables on retail prices of provisions and groceries.

articles have been selected and the prices for the qualities of goods most commonly in demand are quoted in each case. The tables have been compiled by provinces, the localities within each province having been grouped into three divisions, alphabetically numbered, group A comprising localities having a population of 10,000 and over, group B, localities with a population of from 5,000 to 10,000, and group C, localities with a population of less than 5,000. Within these groups the localities have been tabulated alphabetically. The arrangement, accordingly, will afford at a glance a convenient basis for comparison of prevailing dry goods prices in the several provinces of the Dominion.

Sources of Information.

As in the tables relating to retail prices of provisions and groceries, which appeared in the May and June issues of the *Gazette*, the information set forth in the present article consists of returns obtained by the department from sources wholly

outside of the department. Retail dealers in the several localities represented in the tables were asked for a statement of actual prices averaged during the past year for the quality most in demand of the articles named in the tables, a blank schedule, a copy of which was published in the April *Gazette* (†) being furnished by the department for the purpose of making the return in question. The figures as thus forwarded to the department were transcribed without alteration into the columns of the present tables, no attempt being made by the department to reconcile variations in prices, whether appearing in any one schedule or as between the different schedules. In the case of articles of which the prices is commonly subject to seasonal variations, dealers were asked for a statement as to the lowest and highest selling rates which had existed at any time within the past year for a period of more than one or two weeks' duration, though wherever it was possible to give a fairly accurate average

price the latter was requested. The reference numbers which appears in the tables is inserted as an index to the files of the department in which the original tables are kept on record.

In addition to returns received from retail dealers, the present tables contain returns independently supplied by the correspondents of the *Labour Gazette* in the different cities of the Dominion in which the *Gazette* is represented. These statis-

tics have been distinguished from the other by the use of italics in the lettering and figuring.

No attempt at an analysis of the results herewith presented has been made by the department, this being reserved until the returns relating to rents and prices of clothing have also appeared.

Tables relating to retail prices of ready-made clothing will appear in the August issue of the *Gazette*.

ANNUAL CONFERENCE OF THE BRICKLAYERS AND MASONS' UNIONS OF ONTARIO.

THE first annual conference of the Bricklayers and Masons' Unions of Ontario met at London, Ont., on June 29, and continued in session over the two days following, making its final adjournment on July 1. The following is a report in brief of the more important of its proceedings :—

Opening Day's Session.

The conference opened its first session in the Knights of Pythias Hall on June 29, numbering some nineteen delegates from the various unions of the province. Representatives were present, according to the

roll-call, from Hamilton, Toronto, Guelph, St. Thomas, St. Catharines, Windsor, Brantford, Owen Sound, Berlin, Galt, Peterborough, Chatham, Collingwood and London. Communications were received from a number of unrepresented unions regretting their inability to send delegates while expressing willingness to abide by the decisions of the conference. Among the more important industrial centres included in this group were Woodstock, Sarnia, Stratford, Fort William, Smith's Falls, Midland, Sault Ste. Marie, Ottawa, Brockville and Kingston.

Temporary officers were elected for the conference and the question of the advisability of holding yearly conferences was at once taken up and decided in the affirmative. It was also decided that questions of an international character should in future be voted upon by a referendum vote instead of as formerly only by the delegates who attended the international convention of the B. and M. I. U. The appointment of committees on mortuary fund, ways and means, by-laws, emblems, &c., brought the first day's proceedings to a close.

Mortuary Fund.

The second day of the conference was largely devoted to discussion of the reports of the various committees above mentioned. Of these the first had reference to the establishment of a provincial mortuary fund of \$200, which was accepted by the conference in preference to the scheme submitted by the International Union.

Affiliation with A. F. of L.

The following resolution submitted by the committee delegated to deal with this question, was adopted :—

Whereas in this age of progress the general tendency is towards organization, and we see the capitalists of the country organizing; and whereas this concentration of wealth in the hands of capitalists has an injurious effect upon all branches of labour; and whereas we, the labouring class, realizing all this, deem it to be our right to enjoy the wealth created by our labour, and further realize that it is possible for wage-earners to obtain full reward for their labour only through united action, and that the only weapon to be used is the power of con-

centrated labour under one head, such as is fostered by the A. F. of Labour; and whereas we the delegates representing the various bricklayers and masons' unions throughout this province realize it is time that the B. & M. I. U. of America should break off its isolation and unite with other forces of national and international unions:

Be it resolved that we, the delegates of the subordinate unions of the B. & M. I. U., of Ontario, in conference assembled, believe it to be the duty of our parent body the B. & M. I. U., to unite with the A. F. of Labour; and be it further resolved that a copy of these resolutions be forwarded to the Executive Board of the B. & M. I. U., and also to the editor of our official journal.

Arbitration Committee.

An important decision of the conference was that relating to the appointment of an arbitration committee for the settlement of grievances that may occur in Canada. The appointment of the committee, according to the form of the request preferred to the International Union in this connection, was to be left in the hands of the Provincial Conference.

Further Proceedings of the Second Day's Session.

Various other matters of importance engaged the attention of the delegates during the second day's session. Among the more notable of these was the election of the officers, which resulted as follows :—

President—J. T. Laing, No. 1, Hamilton.

Vice-President—E. Chamberlain, No. 19, Collingwood.

Secretary—H. Rymill, No. 5, London.

Treasurer—W. Yates, No. 1, Hamilton.

It was also decided that the city of Brantford should be the next place of meeting and the date of the coming conference was fixed as December 1, of the present year. The Emblem Committee reported itself as favourable to the beaver and maple leaf being placed on certificates of membership as Canadian emblems, there being no Canadian emblem on such certificates at present. The committee's report was adopted with instructions to the secretary to forward the same to the executive board of the International Union. The Headquarters Committee expressed itself as unfavourable to the establishment of permanent headquarters,

and the suggestion received the assent of the meeting. It was also recommended by the eight-hour day committee that steps be taken to promote a universal eight-hour day throughout Canada.

Cement Blocks in Construction Work.

An addition made to the constitution relating to the use of cement blocks in construction work was as follows:—

That cement blocks used in the construction of buildings, where they take the place of brick work, or are used as trimmings on brick buildings, to be considered as bricklayers and masons' work, and to be performed by them.

Enforcement of Building Laws.

The following resolution relating to the inspection of bricklaying and masonry work and the proper enforcement of the building laws was passed unanimously:—

Whereas our constitution ordains that all subordinate unions shall take such action in their respective towns, cities, states, or pro-

vinces as shall secure the appointment of our members to supervise and inspect bricklaying and mason work, and it has been brought to our attention that in many places throughout the United States and Canada men are appointed to such positions who are not members of our craft, and who, although incompetent to judge the quality of work over which they have supervision, are retained in their positions notwithstanding the protests of our unions, and owing to the demands of many unscrupulous contractors work of an inferior quality is demanded of the workmen, which is not only harmful to members of our craft but is also a menace to the lives and interests of our citizens in general: therefore, be it resolved that the Bricklayers and Masons' International Union in convention assembled take this opportunity to attest its appreciation of those officials who exact a rigid enforcement of the building laws in the different towns, cities, states and provinces of the United States and Canada, and as a striking example of what can be accomplished by the officials who believe in skilled mechanics being employed in the inspection of the construction of buildings, we call attention to the rigid enforcement of the building law now being enacted by the Hon. Perry M. Stewart, Superintendent of Buildings of the Borough of Manhattan, City of New York.

The conference closed by the passing of a vote of thanks to the London union for its entertainment of the delegates.

THE IMMIGRATION AND COLONIZATION MOVEMENT.

The increased proportions which have characterized the immigration movement into Canada since the opening of the present season were continued during June, and though an accurate statement of arrivals was not obtainable on the closing day of the month, there was evidence to warrant the expectation that the month would show a heavier return than the corresponding period of 1902, or of any previous year. As a special feature, in addition to that just noted, the arrival of a considerable number of desirable immigrants from the West Indies may be mentioned. Special attention may also be made of the precautions taken to ensure the acceptance of perfectly healthy settlers only. As in May, the great majority of the month's arrivals proceeded directly to western Canada, though a considerable number remained in Ontario.

Reports concerning the quality of the immigrants arriving continue, as before, very favourable, and the number of im-

migrants having more or less independent means was noticeable. This was particularly the case with regard to the American farmers who are still passing into the Canadian North-west at a rate estimated at fifty per cent over last year. * British Columbia is also affected by this movement.

During the month the Toronto and Winnipeg district Trades and Labour Councils addressed open letters to the workingmen of the United Kingdom with reference to the demand for labourers in Canada..

The Barr Colonists.

Satisfactory reports were received during June from the Barr colonists. Of the original party which went direct to Saskatoon not more than one-third, it was stated, settled within the intended district. Of the balance a new colony has been established on the Saskatchewan, and settlements made at various points in the vicinity of Saskatoon, Battleford and other

cities, a number securing employment with farmers in the vicinity of Regina and Moose Jaw. The idea of an isolated colony has, accordingly, been very largely abandoned, there being nothing to compel the colonists to adhere to the original plan. Competent farm instructors have been placed at the disposal of those settled together on homesteads to exemplify the best methods of working the land, building houses, &c.

Rev. Mr. Barr disposed of his interests in the movement during the month to the people themselves, and the affairs of the colony are now in the hands of a committee of twelve. The organization of Mr. Barr, including the building of an hospital, stores &c., is being continued, much of the money advanced by the colonists under the original arrangement being refunded. In future it is announced that movements of the sort will be conducted through the Commissioner of Immigration and the officers of the Department of the Interior.

Immigration Returns for May.

According to a statement supplied by courtesy of the Department of the Interior, a total of 24,144 immigrant arrivals was reported in Canada during the month of May. Of these 18,620 were arrivals at ocean ports, and 5,524 were reported as arriving from the United States via Winnipeg. The total number, accordingly, of arrivals from the 1st of January to May 31st was 65,111. As the month of April showed only 21,549 arrivals, a substantial rate of progress is represented in the May returns. Of the May arrivals 7,833 were English, 1,478 Scotch, and 420 Irish, which, with 161 returned Canadians, 59 from Newfoundland and the number reported above as having entered Canada from the United States, brings the number of entries from English-speaking communities well over 15,000. Of the balance, 3,034 were Galicians, 962 were Russians, 699 were Norwegians, 628 Swedish, 618 Hungarians, 600 Italians, 517 Bukowinians, 335 Germans, and 118 Austrians.

Homestead Entries for May.

The following statement, published by courtesy of the Department of the Interior, shows the number of homestead entries, according to the various agencies, made during the month of May, 1903, as compared with the month of May, 1902 :

| Agency. | 1903. | 1902. | Increase. | Decrease. |
|-----------------------|-------|-------|-----------|-----------|
| Alameda | 211 | 467 | | 256 |
| Battleford | 344 | 20 | 324 | |
| Brandon | 49 | 77 | | 28 |
| Calgary | 237 | 208 | 29 | |
| Dauphin | 70 | 54 | 26 | |
| Edmonton | 343 | 248 | 95 | |
| Kamloops | 8 | 16 | | 8 |
| Lethbridge | 129 | 110 | 19 | |
| Minnedosa | 47 | 44 | 3 | |
| New Westminster | | 3 | | 3 |
| Prince Albert | 718 | 161 | 557 | |
| Regina | 1,134 | 334 | 800 | |
| Red Deer | 168 | 172 | | 4 |
| Winnipeg | 100 | 87 | 13 | |
| Yorkton | 551 | 201 | 350 | |
| Total | 4,109 | 2,202 | 2,216 | 299 |

It will be seen that the net increase in the number of entries during the month was 1,907.

The statement of entries made for the various months of the present year to date is as follows :—

| Month. | 1903. | 1902. | Increase. |
|----------------|--------|-------|-----------|
| January | 1,109 | 809 | 300 |
| February | 1,165 | 928 | 237 |
| March | 2,325 | 1,207 | 1,118 |
| April | 5,778 | 2,078 | 3,700 |
| May | 4,109 | 2,202 | 1,907 |
| June | | | |
| Total | 14,486 | 7,224 | 7,262 |

Nationalities of Homesteaders.

The nationalities of homesteaders, as reported by the several agencies of the Department of the Interior in Manitoba, the North-west Territories and British Columbia during the month of May, 1903, were as follows :—

No. of
Entries.

Nationalities.

| | |
|---|-------|
| Canadians from Ontario | 435 |
| " Quebec | 91 |
| " Nova Scotia | 22 |
| " New Brunswick | 6 |
| " Prince Edward Island | 11 |
| " Manitoba | 135 |
| " North-west Territories | 61 |
| " British Columbia | 5 |
| Persons who had previous entry | 265 |
| Canadians returned from the United States | 127 |
| Americans | 1,513 |
| Newfoundlanders | |
| English | 499 |
| Scotch | 100 |
| Irish | 35 |
| French | 30 |
| Belgians | 3 |
| Swiss | 2 |
| Italians | |
| Roumanians | |
| Greeks | 9 |
| Syrians | |
| Germans | 1 |
| Austro-Hungarians | 102 |
| Hollanders | 368 |
| Danes (other than Icelanders) | 4 |
| Icelanders | 4 |
| Swedo-Norwegians | 31 |
| Russians (other than Mennonites and Doukhobors) | 58 |
| Mennonites | 49 |
| Doukhobors | 33 |
| Chinese | 37 |
| Australians | 3 |
| Persians | 7 |
| | 13 |
| Total | 4,109 |

Of the total number of entries made during May by persons coming from the United States into Canada, 639 were from Minnesota, 471 from Dakota, 145 from Wisconsin, 60 from Iowa, 48 from Michigan, and 29 from Kansas and Nebraska.

Lands Patented in May.

The following is an abstract of letters patent covering Dominion lands situated in Manitoba, the North-west Territories, British Columbia and the Yukon Territory, issued from the Department of the Interior during the month of May, 1903 :

| Nature of Grant. | Number of Patents. | Number of Acres. |
|---|--------------------|------------------|
| British Columbia homesteads .. | 5 | 770·13 |
| British Columbia sales | 2 | 60·00 |
| Coal lands sales | 1 | 79·04 |
| Commutation grants | 2 | 231·64 |
| Homesteads | 223 | 35,125·98 |
| Hudson's Bay Co. | 4 | 10,408·40 |
| Military homesteads | 2 | 640·00 |
| Mineral rights | 1 | 20·00 |
| North-west Half-breed grants .. | 42 | 8,800·00 |
| Parish sales | 2 | 277·00 |
| Railways— | | |
| Canadian Northern Ry. Co. ... | 21 | 4,483·36 |
| Canadian Pacific Ry. grants .. | 43 | 45,906·44 |
| Canadian Pacific Ry. roadbed and station grounds .. | 1 | 59·35 |
| Manitoba North-western Ry. ... | 8 | 1,373·00 |

| School lands sales | 9 | 932·58 |
| Special grants | 3 | 342·37 |
| Yukon Territory sales | 6 | 220·00 |
| Total | 449 | 126,123·11 |

CONCLUSION OF SITTINGS OF ROYAL LABOUR COMMISSION IN B. C. AND SETTLEMENT OF U. B. R. E. AND SYMPATHETIC STRIKES.

The Royal Labour Commission appointed to investigate the nature and causes of industrial disputes between owners of coal and metalliferous mines and their employees and transportation companies and their employees in the province of British Columbia, concluded the taking of evidence on the 15th of June in the city of Vancouver. It had been the intention of the commissioners to hold sittings in the cities of Rossland and Fernie, but owing to the

limited time at the disposal of the commission, it became necessary to abandon the original intention in this regard. An account was given in the June number of the *Gazette* of the progress of the work of the commission during the month of May.

The sittings at different places on Vancouver Island were concluded during May, and the first two weeks of June were taken up by the commission in investigating the nature and causes of the strike of the

United Brotherhood of Railway Employees, which commenced in that city on the 27th of February last, and the sympathetic strikes which have arisen in consequence of the Brotherhood strike since that time. The commission required each of the parties to this dispute to file an affidavit of documents, which would cover the questions in any way relating to the strike, and in response to this direction, and the order made upon telegraph agents of the different companies in Vancouver for the production of all telegrams which had been sent or received by them during the course of the strike which in any way had a bearing on the matter, the commission was placed in possession of a mass of material which enabled it to become fully acquainted with all of the important details of the strike. Possession of this documentary evidence, and the admission of its genuineness by the parties effectually curtailed the taking of evidence under oath.

The parties to the strike took advantage of the presence of the commission, and the knowledge which it had of the facts of the situation, to seek its good offices in the matter of effecting a settlement of the sympathetic strikes to which it had given rise, and, with the assistance of counsel representing each of the parties, a satisfactory settlement was arranged. At the request of the parties the terms of this set-

tlement were not made public, but a signed agreement, containing their provisions, was filed with the commission, to be retained as a sealed document in the Department of Labour at Ottawa. This agreement was filed with the commission on the 13th of June. As, however, it was necessary that the nature of the settlement should be explained to all the parties concerned, and approved of by them, the formal declaration of the termination of the dispute was not made until a week or ten days later. In consequence of this settlement, the strike of the employees of the Canadian Pacific Railway, who were members of the Brotherhood at Vancouver, Nelson, Revelstoke, Calgary and Winnipeg, and the sympathetic strikes of the freight handlers, longshoremen, teamsters and steamshipmen, were all terminated, about 1,000 employees in all being affected.

During the latter half of the month of June the commissioners were engaged upon the preparation of a report based on the evidence taken in regard to the several disputes, and other matters which had been brought to the attention of the commission. At the close of the month the report was nearly completed, and it was expected that it would be received by the Minister of Labour at Ottawa early in the month of July.

TERMINATION OF THE STRIKE OF EMPLOYEES OF THE CANADIAN PACIFIC RAILWAY COMPANY.

TOWARDS the end of May, the United Brotherhood of Railway Employees renewed their efforts to effect a settlement of their dispute with the Canadian Pacific Railway Company, begun in February last, and by its long continuance and the number of men involved, constituting one of the most important industrial disputes of the present year. Six representative citizens of Vancouver were selected by the Brotherhood to act as a committee of con-

ciliation, and early in June the committee thus constituted succeeded in drawing up an agreement satisfactory to the Canadian Pacific Railway Company and to a committee of the strikers to whom negotiations had been intrusted. The agreement, however, was not approved by the United Brotherhood, but negotiations were continued by the conciliation committee, until on June 4th, the Royal Labour Commission, which had been holding sessions at

various points on Vancouver island, began at Vancouver an investigation of the dispute.* On the next day the following statements of the two parties were presented to the commission :—

STATEMENT of the case of the United Brotherhood of Railway Employees.

1. The United Brotherhood of Railway Employees is a fraternal as well as an industrial union, and has the following for its objects :

(a) To bring all classes of actual railway employees in closer contact with each other, for their mutual benefit and improvement, and to establish among them a fraternal society of the rail, binding all together for the purposes of friendship and mutual advancement, and to create among them more tolerance of the opinions, rights, duties, privileges and importance of each other in the world's transportation system, the accomplishment of which cannot fail to result in generally improved conditions for every railway employee.

(b) To encourage its membership, by every legitimate means, to attain a higher standard of morality, especially as regards gambling, the use of intoxicant beverages of every character, and all vicious habits.

(c) To urge its members to greater effort in fitting themselves for the situations they occupy in their several departments of railway labour, and in preparing themselves for advancement to higher and more responsible positions, that they may reach the highest planes possible in their special lines of endeavour.

(d) To assist its membership in sickness or distress, and to aid and comfort the families of members removed by death.

(e) To prepare and publish a weekly journal, for the full and free discussion of all technical and other questions pertaining to railway labour in its several branches, as an educational medium through which the membership may absorb special and general knowledge of railway matters, and of questions pertaining to the operations of this brotherhood.

(f) To provide a perfect and systematic insurance department, open to all railway employees, who are members of this brotherhood, and who pass the physical examination prescribed by the brotherhood, and their insurance against accident and death, and to administer the same economically, expeditiously and in accordance with the will of the majority participating therein.

(g) To promote, by every legitimate means in its power, favourable municipal, state and national legislation for railway employees, and, while not opposing wholesome regulations of railways by law, to resist unjust anti-railway legislation tending to cripple the transportation systems served by its membership, recognizing in such legislation an adverse movement which may be retailed injuriously to railway employees.

(h) To limit, in a reasonable and conservative manner, by precept, practice, organization, mandates, municipal, state and national regulations,

the supply of skilled railway operatives, in every branch of the service, for the purpose of alleviating the privations and sufferings which bear heavily on unemployed railway wage-earners, the dependent members of their families, and indirectly upon all engaged in transportation service, through the unnecessary overproduction of railway employees.

(i) To protect, by every legitimate means at its command, the interests of its members, under all conditions that may arise coming within the province of this brotherhood.

2. The said brotherhood is international in its organization.

3. At the time of the organization of the local division of the said Brotherhood in Vancouver, on June 24, 1902, the Brotherhood comprised a total membership of 25,000, of which there were approximately 300 in Winnipeg, Man.

4. The organization is planned after the scheme of the following industrial unions : The Amalgamated Society of Engineers, having a membership of about 100,000, the Amalgamated Society of Railway Servants of England, Ireland, Scotland and Wales, having about 65,000 members, and the United Mine Workers of the Eastern States, comprising about 147,000.

5. The local organization is composed of employees of the Canadian Pacific Railway, and the membership in Vancouver totals about 213.

6. On or about July 1, 1902, the local freight office employees, about twenty-five in number, all members of the said brotherhood, requested improvement in their conditions of employment and increases in the rates of their remuneration. The initial demand was for an increase of 25 per cent. Committees waited upon Mr. R. Marpole, general superintendent, and ultimately succeeded in obtaining an approximate increase of 13 per cent, although not evenly distributed. The wages theretofore received by these freight office employees had for a minimum been \$35 per month for men's wages. The increase of 13 per cent was accepted on the assurance of Mr. R. Marpole that the arrangement was agreeable to him.

7. The local organization thereafter employed one of their number, Mr. H. V. Poore, as organizer for British Columbia, and membership for the local organization was secured along the line of the Canadian Pacific Railway in British Columbia.

8. In January, 1903, Mr. Marpole, general superintendent at Vancouver, suggested and advised that the United Brotherhood of Railway Employees should organize and present a wage schedule to the Canadian Pacific Railway as other organizations had done, and immediately thereon Mr. H. V. Poore was appointed general organizer for Canada, and left Vancouver, proceeding to Revelstoke, Nelson, and, via Crow's Nest Pass line, to Calgary and Winnipeg.

9. Contrary to expectations induced by this request of Mr. Marpole, Mr. Poore found that his progress from place to place was embarrassed by the presence of special detectives, who by threats and promises attempted to prevent his obtaining members for the order.

10. About this date, Mr. Fred. J. Halton, chief clerk of the accountant's office of the Canadian Pacific Railway at Vancouver, was discharged for alleged breach of discipline. The United Brotherhood of Railway Employees unanimously resolved to wait upon the general superintendent in regard to the dismissal of Mr. Halton, and, with the assistance and co-operation of the president of the organization, reinstatement was secured for Mr. Halton.

*See special article on sittings of the Royal Commission on page 77 of the present issue in which a full account of procedure in this matter is given.

11. The Canadian Pacific Railway thereafter, on several occasions, discriminated against the members of the United Brotherhood of Railway Employees, and particularly against the committee and officers of the brotherhood, and employees who were members of the said brotherhood were frequently subjected to rigid examinations, accompanied with threats and intimidating suggestions.

12. A statement was made by the divisional superintendent, Mr. H. E. Beasley, to a member of the United Brotherhood of Railway Employees, that one million dollars would be spent by the Canadian Pacific Railway to kill the organization.

13. The Canadian Pacific Railway, on or about the 26th day of February, indefinitely suspended Mr. H. P. Forrest, the past manager of the brotherhood, on a charge of conspiring to defraud the company. The alleged misdemeanour consisted of the commission of an act of courtesy to one George Hamilton, such as is customary from railway employees, and similar acts have been recognized by general freight agents repeatedly. The act itself never having been considered a ground for dismissal or discipline.

14. The members of the United Brotherhood of Railway Employees thereafter held a meeting on account of the continued discrimination against their members and the dismissal of Mr. Forrest, and appointed a committee to call upon the general superintendent. This committee requested that the hostile policy that the company was pursuing should be discontinued, and, in conjunction therewith, that Mr. Forrest be reinstated.

15. The committee acting for the United Brotherhood of Railway Employees in this instance informed the general superintendent that they did not desire the reinstatement of Mr. Forrest if any breach of the rules and common usage of the company had been committed by him.

16. Matters having been gone into exhaustively by the committee and the general superintendent, the former was dismissed and positively told that the Canadian Pacific Railway would not listen to any request made by their organization.

17. The members of the said brotherhood thereupon ceased to work for the Canadian Pacific Railway Company.

18. The members of the United Brotherhood of Railway Employees made no demand upon the Canadian Pacific Railway other than the right to belong to the organization of their choice without interference.

Delivered pursuant to the order of the commissioners this second day of June, nineteen hundred and three, by

J. EDWARD BIRD.

Acting as solicitor for the United Brotherhood of Railway Employees.

REPLY OF THE CANADIAN PACIFIC RAILWAY COMPANY.

1. At the time of the making of the request referred to in paragraph 6 of the statement of case of the United Brotherhood of Railway Employees, none of the officials of the company in Vancouver were aware of the existence of such a body as the United Brotherhood of Railway Employees, and met the parties who made that request simply as a committee of the company's employees. The request for increased rates of wages was referred by agreement between Mr. Marpole and the committee to the consideration of Mr. Beasley, the company's superintendent at Vancouver, and Mr. F. W.

Peters, the general freight agent at Vancouver, and the settlement mentioned was arrived at by them.

2. Mr. Marpole did not either suggest or advise in any shape or manner whatsoever that the United Brotherhood of Railway Employees should organize or present a wage schedule to the Canadian Pacific Railway Company, as set out in paragraph 8 of the said statement of case.

3. As to paragraph 9 of the said statement of case the company admit that they exercised a certain surveillance over the movements of Mr. Poore, as they were entitled to do, but they deny all allegations of harassing the said Poore by coercion, threats or promises. The company requires particulars of the various acts of harassing, coercion, threats and promises referred to in said paragraph.

4. As to paragraph 10 of the said statement, the company says that the services of Mr. Halton were properly dispensed with by the company on account of a serious breach of discipline on his part, but the United Brotherhood of Railway Employees threatened an immediate strike without notice and at a time when a strike would be fatal to the interests of the company and the public at large, with the result that Mr. Marpole was forced against his will to reinstate Mr. Halton in spite of his breach of discipline.

5. The company deny the allegations set out in paragraph 11 of the said statement and ask for particulars of the same.

6. It is absolutely incorrect that Mr. Beasley made any such statement to anyone as that set out in paragraph 12 of the said statement.

7. With reference to paragraphs 13, 14 and 15 of the said statement, the facts are that Mr. H. P. Forrest was charged with defrauding the company by means of the position which he occupied with the company, a charge which the company then believed and still believes to be well-founded. Thereupon, in accordance with the well-recognized rules of the company, Mr. Forrest was suspended pending an investigation, at the end of which if found blameless he would in the ordinary course be reinstated and paid for all loss of time. Before, however, such investigation could take place, the committee acting for the United Brotherhood of Railway Employees insisted upon an immediate reinstatement of Mr. Forrest, irrespective of any investigation. At the time in question Mr. Marpole promised the committee that an investigation would be held and the usual practice of the company complied with. The committee left Mr. Marpole's office with the understanding that they were to return in the afternoon for further discussion, but, instead of returning within twenty minutes after leaving, the brotherhood inaugurated the strike in question.

8. As to paragraph 18 of said statement, the company say that at the time of the strike and long subsequent thereto the one principal demand made by the United Brotherhood of Railway Employees, and the one which they stated was vital to them and for which they would fight to the last, was recognition of their union by the company, and it is only within a very recent time that the said brotherhood have reduced their demand to that set out in said paragraph 18.

9. At the time the strike was inaugurated, Mr. Marpole could not recognize the union for the following reason:

(a) That as a local manager he could not deal with a union extending over the whole line

which had not received recognition at Montreal.

(b) That no union in any event was entitled to recognition by the company until it could satisfy the company that it controlled two-thirds or at any rate a majority of the employees who were entitled to become members of such union, as otherwise the recognition of such a union would lead to interminable conflicts with other unions which were already established and recognized and with which the company had contracts.

10. Since that time and during the progress of the strike, facts have come to the knowledge of the company which justify the company in refusing not only to recognize the union, but also to allow any of its employees to belong to such union. The following are some of the reasons:

(a) The United Brotherhood of Railway Employees is an organization whose headquarters are situated in the United States, its executive officers are residents of a foreign country, and the organization is of such a character that it could be used by transportation companies of the United States as a means of hampering the trade of Canada and injuring, if not altogether destroying, the usefulness of the Canadian Pacific Railway Company as a public institution.

(b) It has recognized as a part of its policy the principles of revolutionary socialism.

(c) While the company favours the organization of unions among different classes of its employees, it objects to the organization of one union which will comprise all the different classes of employees who are entitled to become members of this union on the ground that it is impossible to deal deal with them in a businesslike way, and that such an association is impracticable and would lead to endless discussions among the employees themselves.

11. The company's objections to this organization are good, as shown by the fact that it has never been able to obtain recognition in any other part of the world, not even in the United States itself.

12. The constitution of the United Brotherhood of Railway Employees shows that it intends to carry its objects into effect by means of sympathetic strikes, and that the circumstances in connection with this strike show that it intends to use as a weapon, in case of trouble with employees, boycott and intimidation.

The company submit the above as a preliminary statement and reserves to itself the right to amend or add to this statement from time to time, as the investigation proceeds.

Delivered at Vancouver this 3rd day of June, A.D., 1903.

DAVIS, MARSHALL & MACNEILL.

Solicitors for the Canadian Pacific Railway Company.

The Labour Commission concluded its investigations into the strike on June 13th, and at its final session an announcement was made by counsel representing the United Brotherhood and the Canadian Pacific Railway Company, that a satisfactory settlement had been reached by the two parties.* A few days later officers of the Brotherhood proceeded to Winnipeg and other points where the strike was in progress in order to obtain the ratification of the local unions to the agreement, and on June 27 the strike was officially declared off. As explained in the preceding article the terms of the settlement were not made public.

On June 9 the strike of the British Columbia Steamshipmen's Association, inaugurated in sympathy with the United Brotherhood of Railway Employees, was officially declared off. The dispute affected the coast service of the Canadian Pacific Railway Company. The company refused to recognize the association in future, but promised that members who left it would be given employment when vacancies occurred.

TRADE DISPUTES DURING THE MONTH OF JUNE.

IN the course of the month of June a number of important trade disputes of long-standing were brought to an end, and as the new ones reported were not so important or far-reaching in their effects, the situation shows an improvement over May. In Montreal the sash and door workers, who went out on April 23rd, returned to work on June 26th, after which building operations were generally resumed. Although the strikes in the building trades

in Toronto were not definitely settled at the end of June, a great improvement in conditions took place in the course of the month, and a large number of strikers obtained work at the wages demanded, the places of others being filled by non-union carpenters and labourers. Building operations were seriously affected in Calgary owing to a lockout of carpenters, and in Vancouver and Westminster on account of a strike of sash and door workers. On

* For an account of the previous events in connection with this dispute, see articles in the

April number of the *Labour Gazette*, page 796, and in the May number, page 922.

June 26th the strike of railway trackmen of the Canada Atlantic Railway Co. was officially declared off, after a conference between the president of the union and the general manager of the company. No definite agreement was made public, but the company promised not to discriminate against the strikers in re-employing them. No increase of wages was granted. The coal strikes at Ladysmith and Cumberland, B.C., continued throughout the month, and large quantities of fuel had to be imported from other countries on account of the shortage in the supply of coal. On June 6th the British Columbia Grand Union of Fishermen decided by vote to declare a strike owing to their failure in reaching an agreement with the cannerys regarding the price of the Fraser river salmon. The decision was reaffirmed on the 27th, and on the 29th the strike was officially declared, to take effect on July 1st, at the opening of the fishing season. The cannerys offered 15 cents per fish for July and 14 cents for August, and the fishermen asked 18 cents for July and 17 cents for August. The approximate number of fishermen affected was 4,100, including about 1,200 Japanese and 500 Indians.

Analysis of Trade Disputes during the Month.

Number and Magnitude.—The total number of disputes in existence during June was 47, an increase of one compared with the previous month, and an increase of fourteen over the corresponding month in 1902. As, however, two disputes affecting less than six employees were included in the report for June of last year, there is an actual increase of sixteen. Twenty-four of the June disputes began previous to the beginning of the month and 23 after. The approximate number of firms directly involved was 416, and of employees, 6,675. Eleven old disputes and seven new ones were settled during the month, leaving thirteen old and sixteen new ones still in existence at the end of June. Of those that were terminated, the employees were successful

in three cases, employers in four, and in five a compromise was effected. Three strikes which were sympathetic lapsed, and in one the agreement was not made public.

Loss of time in working days.—The approximate loss of time in working days by the men directly affected was 122,612, compared with 170,364 in May.

Trades affected by new disputes.—The building trades were affected by ten new disputes, including two of sash and door workers, two of plumbers and one of brick-makers. There were three strikes of iron moulders and two of civic labourers, and one each of teamsters, carriage painters, bakers, marble workers, coal miners, laundry workers, cigarmakers and saw-mill workers.

Causes of new disputes.—The following is a classification of the causes of the new disputes reported :—

| | |
|--|---|
| Demand for increase of wages.... | 4 |
| Demand for increase of wages and shorter hours | 1 |
| Demand for increase of wages and recognition of union..... | 1 |
| Demand for increase of wages, shorter hours and recognition of union | 1 |
| Demand for shorter hours .. | 3 |
| Demand for recognition of union | 4 |
| Reduction of wages | 1 |
| Employment of aliens | 2 |
| Demand for day work instead of night work | 1 |
| Lockout on account of men's sympathy with strikers | 1 |
| Sympathy with other strikers | 1 |
| Dismissal of foreman and objection to new one | 1 |
| Use of union label .. | 1 |

Disputes Commenced Prior to the Beginning of the Month.

A statement regarding the dispute between the United Brotherhood of Railway Employees and the Canadian Pacific Railway Company, which ended on June 27th, appears in a special article in the present number of the *Gazette*. A brief account of the strikes in the building trades at Toronto, and of the strike of coal miners at Ladysmith, B.C., is given below :—

Strikes in the Building Trades at Toronto.

The disputes in the building trades at Toronto were so closely connected with each other in their effects that a better

idea of the situation can be obtained by treating them as different phases of one movement than by giving a separate account of each. The strikes of carpenters and builders' labourers, which began on May 1st, continued throughout June. On the first of the month a strike was also declared by the painters' union. In January they had demanded an increase in wages from 30 to 35 cents an hour, to take effect on April 15th, and the new scale to be in force for two years. On that day they received a letter from the Master Painters' Association acceding to their demand, without mentioning definitely the length of time during which the new schedule would be in existence. Towards the end of May the master painters notified their employees that on the 1st of June they would revert to the former pay of 30 cents an hour. A strike was immediately declared by the painters' union as a protest against this reduction. Many employers, however, were willing to pay the amount demanded, and 230 permits were issued by the union, allowing their members to work in the shops paying 35 cents an hour. The total number of strikers in the building trades on June 1st was approximately as follows: Carpenters, 500; labourers, 640; and painters, 250. In addition to these, about 400 bricklayers were also out of work on account of the labourers' strike.

It was estimated that the sum of at least \$1,000,000 was tied up owing to the strikes in the building trades, and construction work was almost at a standstill.

On June 3rd, the bricklayers, who had shown their sympathy with the labourers in May, resolved to return to work, their own wages having been satisfactorily adjusted in April. As, however, they were dependent on labourers in their work, they were still indirectly affected by the strike.

Negotiations were continued from time to time throughout the month between the employers' association and the trades unions, but in no case was any general agreement reached. Many employers, how-

ever, made independent contracts with the unions, at the wages demanded, and others obtained new men from outside sources. On June 6th, about 400 union carpenters and 330 union painters were working at 35 cents an hour. The striking painters also succeeded in obtaining contracts by which a number of them secured employment, and about thirty-eight left town. Permits were issued daily by the labourers in favour of contractors willing to pay the stipulated wage, and on June 7th they claimed that one hundred members of their union were at work.

On June 5th, the carpenters unanimously refused an offer from the Builders' Exchange of a maximum of 30 cents an hour.

Although the labourers reduced their demand from 30 cents to 28 cents an hour, a settlement seemed as far off as ever at the end of the month, as the Builders' Exchange withdrew their offer of 27 cents, refusing to pay more than the former wage of 25 cents an hour.

An action against millmen, charged with refusing to supply lumber to a striking carpenter, was dismissed in the police court on the ground of insufficient evidence of conspiracy in restraint of trade.

On June 24th the Master Painters' Association claimed that they had over 250 men at work, and that they were taking on new men daily. At a general meeting, held a short time before, the following resolution was adopted by the association:

Believing it to be the right and privilege of every man to work for the support of himself and those dependent on him without fear of molestation, and recognizing this principle, we notify our applicants for work that hereafter our shops will be conducted as open shops and full protection will be given to all who wish to work regardless of their standing as union or non-union men.

On the 23rd of the month, Mr. E. J. Lennox, architect, tendered his services as arbitrator between the striking carpenters and their employers. The offer was accepted by the men, but refused by the employers, and no further steps toward a settlement were taken during the month.

TRADE DISPUTES OF THE MONTH OF JUNE.*

| Province. | Locality. | Occupation. | Alleged Cause or Object. | No of Firms or Establishments affected. | Approximate No. of Employees affected | Date of commencement. | Date of termination. | Result. |

| Cal. & Breton | Port Hood | Coal miners | Demand for increases in wages. | 1 | June | 2 | A compromise. |

*Considerable difficulty has been experienced by the Department of Labour in making an exact classification of existing trade disputes, particularly in cases where, after the declaration of a strike, some of the original strikers have returned to work, or have had their places filled with new hands, or where the establishments affected have found that for either of these reasons, or both, or for other causes, their business is no longer seriously affected. In such cases while, in one sense, it may be true that a strike may be regarded as still in existence because of no formal declaration by either of the parties of its termination, yet so far as the actual effect upon the business interests of the community is concerned a record of the continuance of such a dispute might be misleading. The list of trade disputes published in the present table, therefore, includes mention only of such disputes as during the month or at its termination affected to an appreciable degree the carrying on of the industrial or business operations of the firms or establishments concerned. mention, moreover, is not made of disputes involving less than six employees or of less duration than 24 hours.

† This strike afterwards spread to other districts, the following being the dates, places and approximate numbers involved: Feb. 27, Vancouver 151, New Westminster 3; March 5, Nelson 40, Rossland 3, Trail 1, Robson 4, Eholt 1; March 9, Winnipeg 16, Calgary 18.

+ This strike was omitted from previous tables as the Co. ceased to be greatly affected by it.

TRADE DISPUTES OF THE MONTH OF JUNE.

* Particulars were not obtainable.

Strike of Coal Miners at Ladysmith, B.C.

Owing to the inability of the Western Federation of Miners to supply the strikers at Ladysmith with the amount of funds which they requested, there were prospects of the dispute, which had lasted for four months on June 11, being brought to an end during the month, and negotiations were carried on for that purpose. No settlement, however, was reached. On June 10, Mr. Dunsmuir, the proprietor of the mines, made an offer to the men that they should return to work on the conditions prevailing before the strike, the only change being a slightly increased charge for coal supplied to them for their own consumption. A few days later the miners submitted a counter proposition, demanding an increase in wages to drivers and pushers of ten cents per day, to timbermen, twenty-five cents, and a corresponding increase to other miners. This proposal was rejected by the company. A petition was then circulated among the miners, to which a large number of signatures were obtained, requesting that they be allowed to return to work under the former conditions. This petition was destroyed at a meeting of the union on June 18, but a delegation of three was appointed to see Mr. Dunsmuir with a view to their resuming work on the old terms. An agreement was drawn up, which was accepted by the miners on June 23. However, when called upon to sign the contract individually on the 25th, they refused to do so, alleging that two new clauses had been inserted, of which they had not been aware when they had voted to accept it. The two clauses to which objection was taken stipulated that they should be charged \$1.50 per ton for coal for their own use, the former cost of which was \$1; and that there should be a decrease of twenty cents in the allowance for stringers. On the following day the manager of the company tried unsuccessfully to settle the points in dispute, and no agreement was reached at the close of the month.

Owing to the scarcity of fuel at Ladysmith, lumber operations were carried on

somewhat extensively in that neighbourhood, which gave employment to a number of men.

New Disputes.

The majority of the new disputes of the month were of slight importance with regard to their effect on industrial conditions, or to incidents connected with them. The most important was the strike of teamsters at Calgary, which resulted in a sympathetic strike of builders' labourers, and a lock-out of union carpenters, causing an almost complete suspension of building operations in that town. The following is a brief statement of the leading features of this dispute.

Strike of Teamsters at Calgary.

Last spring the teamsters' section of the General Labourers' Union at Calgary presented a new wage schedule to their employers, demanding a minimum rate of \$50 per month and a ten hour day, commencing on May 1. The average salary which they had been receiving was about \$42 per month. Several conferences were held between the two parties, and the teamsters finally requested that the schedule should be accepted not later than May 30. Four employers adopted the schedule, but the men to the number of thirty belonging to seven other firms declared a strike on June 1, and were still out at the end of the month.

On the first day of the strike, the Carpenters' Union resolved that after Thursday, June 4, they would only handle such material as was drawn to the buildings by the employers, their managers, foremen, or union teamsters. The building contractors, however, anticipated the strike by locking out the union carpenters on June 3, and advertising for non-union men to take their places.

On June 15, a conference was held between the council of the Board of Trade and delegates from the Trades and Labour Council. The latter offered to submit the dispute to arbitration, but the Board of Trade declined to take any action, and no

progress toward a settlement was made during the remainder of the month.

Building operations were further hampered by the refusal of labourers to handle material drawn by non-union teamsters, and consequently masons and bricklayers were also compelled to cease work.

The table published herewith is a compilation of the trade disputes of the Dominion of Canada which began or were in continuance during the month of June, and which have been reported to the department.

ENFORCEMENT OF FAIR WAGES RESOLUTION BY POST OFFICE DEPARTMENT, JUNE, 1903.

During the month of June the following orders were given by the Post Office Department for the supplies below mentioned. All were given subject to the regulations for the suppression of the sweating system, and securing payment to the working men and women of fair wages, and the performance of the work under proper sanitary conditions :—

| Nature of Order. | Amount of Order. | |
|---|------------------------|------|
| | \$ | cts. |
| Making and repairing metal dating and other hand stamps; also type and brass crown seals. | 452 | 86 |
| Making and repairing rubber dating and other hand stamps and type. | 111 | 20 |
| Supplying stamping material, inclusive of making and repairing pads, wooden boxes and stamping ink; also rubber stamping cushions. | 583 | 71 |
| Making and repairing post office scales.. | 154 | 20 |
| Supplying mail bags. | 52 | 00 |
| Repairing mail bags. | 657 | 09 |
| Repairing mail locks and supplying mail bag fittings. | 87 | 90 |
| Making letter boxes and repairing portable letter boxes and mail clerks' tin boxes. | 163 | 45 |
| Miscellaneous orders for making and repairing postal stores. | 62 | 20 |
| Making up and supplying articles of official uniform. | 11 | 00 |

UNIONS FORMED DURING THE MONTH OF JUNE, 1903.

The Department has received notice of the following organizations as having been formed during the month of June, 1903 :—

New Brunswick :

St. John—Street Labourers.

" Lime Burners.

" Bakers and Confectioners.

Quebec :

St. Hyacinthe—Textile Workers.

Ontario :

Alma—Threshers.

Cannington—Threshers.

Chatham—Retail Clerks.

Guelph—Machinists.

" Building Trades Council.

Hamilton—Building Trades Council.

Sydenham—Threshers.

Windsor—Journeyman Plumbers, Gas Fitters, Steam Fitters and Steam Fitters' Helpers; Marine Engineers; Garment Workers.

Manitoba :

Winnipeg—Barbers.

Brandon—Bartenders.

North-west Territories :

Regina—Retail Clerks and Salesmen's Association.

British Columbia :

New Westminster—Trades and Labour Council.

GOVERNMENT CONTRACTS FOR THE MONTH OF JUNE.

(Information supplied by the Department of Public Works.)

The following is a list of the contracts awarded by the Department of Public Works, and which received the signature of both parties to them, during the month of June, together with a minimum rate of wages to be paid to the labourers engaged upon the work, as set forth in the 'fair wages' schedule inserted in each contract:—

Masonry and roadway approaches of the proposed bridge across the north channel of the Ottawa River, Portage du Fort, Que.; date of contract, 22nd of June, 1903; amount of contract, \$10,797.

| Trade or Class of Labour. | Rate of Wages. | | |
|---|-------------------------------|----|----------------------|
| | Not less than the following : | | |
| Foreman for masonry work. | \$3 | 50 | per day of 10 hours. |
| Masons. | 3 | 25 | " 10 " |
| Stone cutters | 3 | 25 | " 10 " |
| Stone drillers. | 1 | 50 | " 10 " |
| Quarry men | 1 | 50 | " 10 " |
| Powder men. | 2 | 00 | " 10 " |
| Blacksmiths. | 2 | 25 | " 10 " |
| Blacksmiths' helpers. | 1 | 50 | " 10 " |
| Derrick men. | 1 | 75 | " 10 " |
| Ordinary labourers. | 1 | 30 | " 10 " |
| Driver with one horse and cart. | 2 | 00 | " 10 " |
| Driver with two horses and wagon. | 3 | 00 | " 10 " |
| Driver with one horse. | 2 | 00 | " 10 " |
| Driver with two horses. | 3 | 00 | " 10 " |
| Teamsters. | 1 | 30 | " 10 " |
| Timekeepers. | 1 | 50 | " 10 " |

Construction of a jail at Edmonton, N.W.T. Date of contract, 25th June, 1903.
Amount of contract, \$50,150.

FAIR WAGES SCHEDULE.

| Trade or Class of Labour. | Not less than the following : | |
|---|-------------------------------|-----------------------------------|
| | Rate of Wages. | |
| Bricklayers. | \$0.55 | per hour, 10 hours per day. |
| Stonecutters. | 0.55 | per hour, 10 hours per day. |
| Builders' labourers. | 2.00 | to 2.25 per day of 10 hours. |
| Excavators. | 2.00 | per day of 10 hours. |
| Carpenters. | 0.30 | per hour, 9 hours per day. |
| Carpenters' helpers. | 0.22 | per hour, 9 hours per day. |
| Joiners. | 3.50 | per day, 9 hours per day. |
| Stair builders. | 3.50 | per day, 9 hours per day. |
| Shinglers. | 0.85 | to 1.00 per M. |
| Lathers. | 0.04 | per yard, 10 hours per day. |
| Plasterers. | 0.50 | per hour, 10 hours per day. |
| Painters and glaziers. | 0.30 | per hour, 10 hours per day. |
| Ordinary labourers. | 1.75 | per day of 10 hours. |
| Plumbers. | 3.50 | per day, 9 hours per day. |
| Steamfitters. | 3.50 | per day, 9 hours per day. |
| Metal roofers. | 2.75 | per day, 9 hours per day. |
| Metal roofers' helpers. | 1.50 | to 1.75, 10 hours per day. |
| Tinsmiths. | 2.50 | to 2.75 per day, 9 hours per day. |
| Galvanized iron workers. | 2.50 | to 2.75 per day of 9 hours. |
| Teamsters, one horse. | 1.50 | per day of 10 hours. |
| Driver with one horse and cart. | 1.50 | per day of 10 hours. |
| Teamsters, with two horses. | 1.75 | per day of 10 hours. |
| Driver with two horses and wagon. | 1.75 | per day of 10 hours. |

RECENT INDUSTRIAL INVENTIONS.

The following particulars have been obtained from the latest numbers of the *Canadian Patent Office Record* issued by the Department of Agriculture.

During the month of March, 590 patents were issued by the Canadian Patent Office. Of these 16 were for electrical inventions, 16 for agricultural implements and machines, including four harvesters, two ploughs and two cultivators. There were 8 looms, and 10 machines for leather and shoe working, and 24 other industrial machines. Three metallurgical furnaces were patented, and three other inventions connected with metallurgy. Among those relating to transportation were two electric railways, two motor bicycles and one other

motor vehicle. The new industrial processes included two for the manufacture of paper pulp, one for making fabrics waterproof, and one for the manufacture of silica bricks.

In April, 610 patents were issued in Canada. Thirty-one were for industrial machines, 26 for inventions relating to agriculture, 13 for chemical processes and apparatus, and 13 for electrical discoveries. Among other patents there were 11 wrenches, 9 gas generators, 5 brakes, 2 electric and 4 railway switches, and 6 valves. Of the electrical inventions one was an apparatus for preventing railway accidents, and eight were for insulating processes.

REPORTS OF DEPARTMENTS AND BUREAUS.

The following reports of departments and bureaus were received at the Department of Labour during June, 1903 :—

CANADIAN REPORTS.

Colonial Conference.

Papers relating to a Conference between the Secretary of State for the Colonies and Prime Ministers of self-governing Colonies. Colonial Conference, 1902. King's Printer, Ottawa, 191 pages.

As it was decided that the proceedings of the Colonial Conference, which was held last year in London, should be regarded as confidential, the report which has just been issued contains only the statements made by His Majesty's ministers, in which they indicated generally the views of the Government on the various subjects, and a summary of the general results and the text of the various resolutions passed. The papers which were laid before the conference are published in full as appendices. These are divided into three parts, relating respectively to Imperial defence, trade and miscellaneous subjects. The three trade appendices are a memorandum of the Board of Trade on the effect of the Canadian Pre-

ferential tariff on trade between the United Kingdom and Canada, Canadian memorandum respecting the operation of the preferential tariff, and a Board of Trade memorandum on mutual protection of patents. The miscellaneous appendices contain a memorandum on Imperial stamp charges on colonial bonds, a memorandum on ocean cables by Sir Sandford Fleming, naturalization correspondence, and a precis of correspondence with reference to conditions under which surveyors, legal practitioners, doctors and chemists from Canada, Australia and New Zealand might be permitted to practise their professions in South Africa.

ONTARIO REPORT.

Factory Inspection in Ontario.

Fifteenth Annual Reports of the Inspectors of Factories for the Province of Ontario, 1902. King's Printer, Toronto, 46 pages.

A steady improvement in the conditions of work prevailing in the factories in Ontario is noted in the reports of the inspectors of factories for that province for 1902. During the year there were large

investments of capital, and skilled and unskilled labour were in great demand. Beet sugar factories were erected in Wallaceburg, Dresden, Berlin and Wiarton, and cement factories in Owen Sound, Shallow Lake, Hanover, Durham and Strathcona. One hundred and ninety-eight industrial accidents were reported, of which thirteen were fatal. In connection with the death of Dr. Horsey, M.P., who was killed by the bursting of a fly-wheel, the Inspector of Factories investigated the causes which led to the accident, and in his report he gives an illustrated account of important tests on small cast-iron fly-wheels which have been recently carried on at Case School of Applied Science, Cleveland, Ohio, with a view to ascertaining the strength of the different varieties.

A recommendation is made for an enactment of a law providing for the official inspection and testing of all boilers in the province, in order to prevent boiler explosions in case which are not covered by the Ontario Factories Act.

There were few cases in regard to children working under age, but great difficulty is experienced by the inspectors in verifying their ages.

The number of women employed in the various industries in Ontario, according to Miss. Carlyle, inspector of shops and factories, in 1902, is estimated to have been upwards of 50,000. The system of piece-work is becoming more generally adopted among them, and in the opinion of the Inspector a shorter working day for this class of operatives seems an imperative necessity, owing to the constant strain which they undergo in order to increase their wages. It is stated that the hours of employment for females are shorter in cities than elsewhere. In most industries a large percentage work from forty-five to fifty hours a week. In cotton, woolen and knitting factories they work sixty hours a week. Women employed in boot and shoe, tobacco and cigar, woolen and knitting factories receive better pay than those working in other industries.

BRITISH COLUMBIA REPORT.

Mining Statistics of British Columbia.

Annual Report of the Minister of Mines for the year ending 31st December, 1902, being an account of mining operations for gold, coal, &c., in the Province of British Columbia. King's Printer, Victoria, B.C. 320 pages.

The year 1902 was not a very prosperous one for the mining industries of British Columbia. In the report of the Minister of Mines for that province it is stated that the total value of the mineral production of British Columbia for the past year was \$17,486,550, compared with \$20,086,780 in 1901. This falling-off is attributed largely to the low market price of copper, silver and lead, which decreased in value 27.3 per cent, 11.5 per cent and 10.4 per cent respectively within a year. The coal industry of the coast also suffered through the introduction of fuel oil in California, which was their chief market. The output of the Crow's Nest Pass collieries was curtailed by an explosion which crippled their principal mine, followed by strikes which lessened the production of the other mines of the company. The placer mines in 1902 showed an increase of about 10½ per cent over the previous year. Hydraulic mining was greatly hampered by lack of water, owing to an insufficient rainfall. Notwithstanding the many drawbacks, however, the total mineral production of the province in 1902 was greater than in any previous year with the exception of 1901.

The volume contains the report of the special commission appointed to inquire into the causes of explosions in coal mines, in which many important recommendations are made for the prevention of explosions in the future.

BRITISH REPORT.

Factory Inspection in Great Britain.

Annual Report of the Chief Inspector of Factories and Workshops for the year 1902. Part 1.—Reports. Eyre & Spottiswoode, London, 389 pages. Price, 3s. 10d.

The annual report of the Factory Department of Great Britain for 1902 contains particulars of a great variety of in-

dustries which are subject to inspection under the Factory and Workshop Act of 1901, as well as reports of special investigations, including a summary of the laws regulating laundries in France, Belgium and Germany, and a synopsis of a report of the Medical Inspector of Belgium on conditions in linen factories, and a special report on shipbuilding accidents. At the close of the year there were 100,424 factories and 145,721 workshops on the registers of the department, and about 350,000 visits were paid by the inspectors. A number of new industrial developments were noted by them. There was a revival of pillow lace-making and glove-making as home industries, and the manufacture of motor cars and of liquid air were reported to have developed. Steam engines are being replaced to some extent by gas engines, and both by electric motors. Electricity is being used for sewing machines and heating irons. In the Midlands, a new source of power is being produced by the manufacture of Mond gas from slack coal, which had formerly been thrown away as useless. Large electric generating plants are also being erected in those regions.

UNITED STATES REPORTS.

Industrial Statistics of Virginia.

Fifth Annual Report of the Bureau of Labour and Industrial Statistics for the State of Virginia, 1902. Superintendent of Public Printing, Richmond. 203 pages.

The report of the Bureau of Labour and Industrial Statistics of Virginia for 1902 contains statistical tables of fourteen industries of the state, which give the value of manufactured product of each establishment, the total amount of wages paid, the average monthly or daily salaries and

wages for each class of employees, the capital invested, and the amount paid for rent, taxes and insurance. In almost every industry conditions had improved since the previous year, and in a large number of cases increases in wages were reported, varying from 5 to 25 per cent. The report also contains an analysis of accidents to railway employees, statistics of the mineral production of the state, decisions of courts affecting labour, laws of various states relating to labour, enacted since January 1, 1896, and statistics of trades unions in Virginia which reported to the Bureau of Labour.

Industrial Conditions in Massachusetts.

Labour and Industrial Chronology of the Commonwealth of Massachusetts, for the year ending September 30, 1902. State Printers, Boston. 102 pages.

The volume containing the labour and industrial chronology of Massachusetts for 1902 comprises portions of the thirty-third annual report of the Massachusetts Bureau of Statistics of Labour, and of the seventeenth report of the statistics of manufacture. The subjects dealt with in the first portion of the volume are a summary of the strikes and lock-outs of the year, changes in wages and hours of labour, a list of new trades unions formed during the year, and the principal transactions of unions, and an account of workingmen's social and industrial benefit associations in Massachusetts.

The second part, comprising the industrial chronology for the year ending September 30, 1902, contains a list of new firms and companies, with their authorized capital, changes which took place in old firms and companies, new buildings and additions to factories, stock price quotations, and industrial dividends.

RECENT LEGAL DECISIONS AFFECTING LABOUR.

QUEBEC CASES.

An Employee's Voluntary Risks.

P. was engaged in Montreal by a tractor to do work in either Quebec or

Ontario. Under this contract he was sent to Cardinal, Ont., to work in connection with a derrick upon a contract for the construction of a canal. The derrick

was moved upon rails which were placed along the bank of the canal upon sleepers made of pine wood. When the work was finished at one point the derrick had to be moved further up the bank, and, therefore, the sleepers and rails had to be moved from one side of the derrick to the other; for the purpose of thus moving the sleepers a post was fixed at a distance of some 50 feet ahead of the derrick; to it was attached a pulley, and through the pulley was strung a rope which went round the drum of the engine upon the derrick at one end, the other being carried back and attached to the sleepers. The sleepers could not come nearer than about 50 feet to the pulley, because that end of the rope had a chain which was too large to pass into the pulley; consequently P., while engaged in his work, could not come nearer than 50 feet to the pulley.

Some weeks after having commenced work P. fell and caught his hand in the pulley while it was in motion; four of his fingers were injured to such an extent that they were afterwards amputated.

The accident was not seen by any one, and P. could not explain exactly how it occurred; but he claimed that his employer was to blame, because the pulley should have been placed at a greater distance from his work; and also because the ground upon which he had to work was rough and rocky.

Some evidence was given as to whether or not the pulley should have been protected. The court, however, came to the conclusion that the employer had done all that he could reasonably have been required to do; and as regards the nature of the ground, that that was one of the ordinary risks which an employee took upon himself.

The action was, therefore, dismissed on that ground.

The employer also contended that the contract was made in Ontario, and that therefore, the employee should have given him notice of the accident and notice of his intention to bring an action within the

delays stated by the Ontario Workmen's Compensation Act.

The court held that, as a matter of fact, the contract had been made in Quebec; and that, in any event, as a matter of law, the question as to the time in which an action could be brought was governed by the law of the province where the action was actually taken, and that consequently the law of the province of Ontario did not apply on that point.

(Perras v. Davis. Judgment given by Mr. Justice Archibald in the Superior Court at Montreal, June 5, 1903.)

Dismissal Justified by Disobedience.

T. was engaged by the P. & H. Co. as a machinist, the contract calling for ten days' notice of dismissal. T. having been dismissed without such notice, brought an action for damages.

The evidence showed that T. had refused to do the work he was ordered to do, and particularly that he had refused to run a certain planing machine in addition to the one which was actually in his charge, although he was quite capable of running both machines. T. stated that he objected running two machines, both because it was contrary to the usage among machinists, and also because it was against the rules of the *Machinists' Union*, of which he was a member, for one man to run two machines.

The court held that the custom alleged was not established by the evidence, the superintendents of other machine shops having sworn that they had sometimes required one man to run two machines at the same time. Regarding the second ground set up as an excuse for T.'s refusal to obey his employers, the court held that the rules of the union had nothing whatever to do with the case; that the only contract made by the P. & H. Co., was with T. himself; and that such contract was not expressed to be subject to the rules of the Union.

This action was, therefore, dismissed with costs.

(Thomas v. The Pillow & Hersey Mfg. Co. Judgment given by Judge Champagne in the Circuit Court at Montreal, June 29, 1903.)

A Judgment Confirmed.

In the case of Scharkopsky vs. Wener, the employee appealed from the judgment dismissing his action, reported in the May number of the *Labour Gazette* at page 932.

The Court of Review unanimously dismissed his appeal, and confirmed the judgment given at the trial.

(Scharkopsky v. Wener. Judgment given by a Court of Review at Montreal, June 17, 1903.)

Effect of a Promise of Re-employment.

P. who was employed by the Royal Electric Co., was injured on November 10, 1900, while discharging a load of poles 30 to 40 feet long from a rail flat car. For some time he was paid a weekly allowance, which amounted in all to \$46.87; and finally he received \$16.78 and gave a written acknowledgment, declaring that he accepted the same as a final settlement of any claim he might have for damages resulting from the accident. There was also an understanding that he should be re-employed by the company. Some months later he was again injured, was laid up for some days, received a further payment, and again signed a receipt and discharge. In September, 1901, he brought an action for \$5,000 for injuries resulting from these two accidents. In December, 1901, he was discharged by the company.

The trial judge dismissed his action. An appeal having been taken, the majority of the Court of Review, held that P. was injured in November, 1900, through the negligence of the company's foremen; and that moreover the wire used in the work of unloading the poles was not sufficient, for which the company was responsible. It was also held that the discharge given by P. was without consideration, except as regards agreements on the part of the company to take him back into its employment; that this implied permanent employment, but that the company had committed a breach of this settlement by subsequently dismissing him without further notice.

P. was therefore, awarded \$750 damages.

(Paquette v. The Royal Electric Co. Judgment given by the Court of Review at Montreal, June 29, 1903.)

ONTARIO CASES.

An Alleged Conspiracy.

A charge of conspiracy against a number of lumber dealers, was recently investigated in the Toronto Police Court. The private prosecutor was a carpenter, who, some months before, had gone on strike by order of his Union. He took a contract to erect a building himself, and claimed that when he went to purchase the necessary materials from one of the lumber dealers, he was told that he would first have to go to the Builders' Exchange, where, if he could show that he employed no carpenters who were paid more than 30 cents an hour, he would be given a certificate allowing the dealers to sell him supplies. He also alleged that he went to the Builders' Exchange, and saw the secretary, who, however, never gave him any certificate, but put off doing so from day to day.

The evidence adduced, however, did not, in the opinion of the magistrate, support the charge. The secretary of the Builders' Exchange, swore that he had never heard of such certificate, and that he had no recollection of ever having seen the private prosecutor. Moreover, the manager of the company which, it was claimed, had refused to sell the lumber, swore that he had never ordered his foremen to send any one to the Builders' Exchange for a certificate before selling him supplies. The charge was, therefore, dismissed.

(Case heard in the Police Court, Toronto, June 1, 1903.)

This prosecution was brought under Section 520 of the Criminal Code, which came into force January 1, 1901. The section reads as follows:—

Combination in Restraint of Trade.—Every one is guilty of an indictable offence, and liable to a penalty not exceeding four thousand dollars and not less than two hundred dollars, or to two years' imprisonment, or, if a corporation, is liable to a penalty not exceeding ten thousand dollars and not less than one thousand dollars, who conspires, combines, agrees or arranges with any other person, or with a railway, steamship, steamboat or transportation company—

(a) to unduly limit the facilities for transporting, producing, manufacturing, supplying, storing or dealing in any article or commodity

which may be a subject of trade or commerce ; or

(b) to restrain or injure trade or commerce in relation to any article or commodity ; or

(c) to unduly prevent, limit or lessen the manufacture or production of any such article or commodity, or to unreasonably enhance the price thereof ; or

(d) to unduly prevent or lessen competition in the production, manufacture, purchase, barter, sale, transportation or supply of any such article or commodity, or in the price of insurance upon person or property.

(e) Nothing in this section shall be construed to apply to combinations of workmen or employees for their own reasonable protection as such workmen or employees.

Actions Against Trade Unions.

Two somewhat similar cases, settling a point of practice of interest to trade unions, were recently decided in Toronto.

In the first the action was brought by S. for an injunction to restrain certain members of the London Musical Protective Association, from doing any act which would induce C. to break his contract with S.

The motion was made on behalf of S. for an order authorizing and directing the defendants, who were members of the London Musical Protective Association, to defend the action on behalf of all the other members of that association, who had not been made special parties to the action.

The court refused this motion with costs.

(Small v. Hyttenrauch. Judgment given by Ferguson, J., at Toronto, April 16, 1903.)

In the second of these cases the action was being brought by a member of a trade union for an injunction to restrain the pretended dissolution of the union, the taking of any steps to substitute a new charter, and the conspiring in any way to exclude C., the plaintiff, from membership in the union.

The motion made on behalf of C. was similar to that made on behalf of S. in the preceding case. It was also dismissed with costs.

(Cresswell v. Hyttenrauch. Judgment given by MacLaren, J. A., at Toronto, May 14, 1903.)

The plaintiff in this case, Creswell, had been engaged by Small, the plaintiff in the preceding case, as an orchestra leader. Both actions arose out of alleged attempts on the part of members of the Musical Protective

Association to induce Creswell to break his contract with Small, who was under the ban of the association ; followed, on Creswell's refusal to do so, by certain steps taken to exclude him from further membership in the association.

Employer's Duty to Guard Dangerous Machinery.

P., a young woman, was employed in a laundry to work at a machine used for mangling and ironing clothes. While she was so engaged, her hand was caught between two of the rollers and was seriously injured. P. brought an action to recover damages, and the notice of the accident which she gave to her employers, as required by the statute, stated that it was caused by the absence of a guard to the machine. The statement of the claim also alleged that the machine was not properly guarded, and that it was of a dangerous nature.

At the trial the evidence was contradictory, as to whether or not it was guarded at the time of the accident. The machine itself, with the guard on, was shown to the jury, and it was contended on behalf of P. that even if the guard was on, (which was denied), it was not a proper and sufficient one.

The case was left to the jury without any written questions being put, and a verdict was brought in stating that the guard was insufficient, and awarding P. \$422.80 damages. Judgment was therefore entered for P. for this amount.

P.'s employers appealed, but the Divisional Court held that the verdict was justified by the evidence, and confirmed the judgment.

(Pearce v. Elwell. Judgment given by a Divisional Court at Toronto, June 13, 1903.)

ENGLISH CASES.

What Constitutes Restraint of Trade.

An English case of some general interest was lately decided by the Court of Appeal. C., who was a member of the Nottingham

branch of the Amalgamated Society of Tailors and Tailoresses, had, for some time prior to January, 1901, received from the society a superannuation allowance. In that month, however, the society, by a vote of its members, but without C.'s consent, abrogated the rule under which this allowance was paid, and refused to pay him anything further in respect of the same.

After a number of weeks had elapsed C. brought an action against the trustees of the society for the accumulated arrears, and recovered judgment for that amount. The trustees appealed, and set up, amongst other things, that the society was an illegal one, because among its rules was one in restraint of trade; and that therefore C., as a member of such illegal society, could not sue the other members.

The majority of the rules were those of an ordinary friendly society, but rule 34, which was chiefly relied on as being in restraint of trade, read as follows: 'Section 1. During the slack season a fair equitable division of trade shall be compulsory in all shops. That a fair equitable division of trade shall be understood to mean that each man shall get trade to the same value as his fellow-man, or as near it as possible. Section 2. In no shop shall the dual system of piecework and day wage be allowed to exist. Section 3. No member of this society shall in future be allowed to leave a workshop for the purpose of working out-doors or at home, except by the express permission of his branch committee, such permission only to be granted in case of physical inability to remain in the work-shop, and to be in all cases endorsed by a general meeting of the branch. Any member breaking the rules and allowing himself to run out of the society and still work for a society shop, the branch shall have full power to deal with the matter as they deem best, subject to rules 32 and 33. Section 4. That a working week shall not exceed 54 hours, each district or town to regulate its own time of starting in the morning and leaving off in the evening, and that no overtime be worked except in cases of necessity. Time

lost on one day cannot be made up on the following or any subsequent day. Members infringing the rule shall be dealt with as a branch directs, subject to rules 32 and 33.' Rules 32 and 33 dealt with the power of the society to fine or expel its members.

The Court of Appeal, held that this rule was certainly in restraint of trade thus making the society an illegal one, the appeal was therefore allowed on the ground that C. could not sue the other members of the illegal society.

(Cullen v. Elwin and others. Judgment given by the Court of Appeal, April 27, 1903.)

The Meaning of "Manual Labour".

Section 10 of the English Employers and Workmen's Act 1875, provides that 'The expression workmen does not include a domestic or menial servant, but, save as aforesaid, means any person who, being a labourer, servant in husbandry, journeyman, artificer, handicraftsman, miner or otherwise engaged in manual labour, enters into or works under a contract with an employer.'

The wording of subsection 3 of section 1, of the Ontario Workman's Compensation Act is exactly the same.

In a recent English case a seamstress who worked at a sewing machine and heated irons on a stove, and ironed the materials, brought an action against her employer for damages for an accident which she claimed was caused by reason of want of proper protection for the stove.

The trial judge dismissed the action on the ground that she was not a person 'engaged in manual labour' within the meaning of the definition given in the section of the Act above quoted. On appeal it was held that she was engaged in manual labour although she did not do her work merely by the strength of her hands.

(Maynard v. Robinson. Judgment given by King's Bench Division, May 14, 1903.)

In previous English cases it has been held, that neither an omnibus driver nor a conductor of a train car, was engaged in manual labour.

An Employer's Liability to Pay a Pension.

An employee having been injured, brought an action against his employers under the English Workmen's Compensation Act, 1897, and was awarded a weekly payment of 17 shillings during the period of his incapacity, the injury in question being to his hand. More than a year after this judgment the employer requested his former employee to submit to a surgical operation which might have the effect of putting his hand in such a condition that he would be able to use it as formerly. The employee refused, and the employer then commenced arbitration proceedings under

the above-mentioned Act. The medical evidence was to the effect that the proposed operation would probably be successful, but that it would be attended with a certain amount of risk.

The Court of Appeal held that there was nothing in the Act which imposed on an employee an obligation to submit to a surgical operation, and that it could not understand how any judge could possibly be expected to take upon himself the responsibility of ordering a man to undergo such an operation.

The employers' proceedings were dismissed with costs.

(*Rothwell v. Davies*. Judgment given by the Court of Appeal, April 24, 1903.)

THE LABOUR GAZETTE

THE JOURNAL OF THE DEPARTMENT OF LABOUR

Vol. IV—No. 2.

AUGUST, 1903

Price Three Cents

The **LABOUR GAZETTE** wishes to draw the attention of its readers to the fact that, while every care will be taken to have information as complete and impartial as possible, it does not in its accounts of proceedings, abstracts of reports, legal decisions, quotations or other records of matters of concern to labour, necessarily endorse any of the views or opinions which may be expressed therein.

DEPARTMENT OF LABOUR, CANADA,

August 15, 1903.

During the month of July the Royal Commission, appointed to enquire into the nature and causes of industrial disputes in the province of British Columbia, concluded its report, which was forwarded to the Minister of Labour. Time did not permit of the report being presented to parliament in printed form, but it was expected that the minister would lay it on the Table of the House early in August. The present number of the *Gazette* contains a resumé of the chief features of the report, and the report itself is being mailed to subscribers as a supplement to the present number.

The Railway Labour Disputes Bill, which was introduced by the Honourable the Minister of Labour during the present session of parliament, was assented to on the 10th of July, and is now law. A review of the most important features of this Act is given in the present number of the *Gazette*, a comparison is also made with the principal provisions of the Bill of 1902 and the reasons cited for the changes in the pre-

sent measure. The Act itself is printed in full as an appendix.

An account is also given of the Act respecting and restricting Chinese Immigration which was passed at the present session of Parliament, and the changes from previous legislation duly noted.

A lock-out which commenced early in the month of June, and which seriously embarrassed the building trades in Calgary, N.W.T., was settled on the 15th July by the intervention of the department under the Conciliation Act. The settlement is dealt with in a separate article in addition to the usual article reviewing the important industrial disputes of the month, and the statistical tables referring on the same. An account is given of current immigration and of the immigration and colonization movement of the past year.

In addition to the regular article on legal decisions affecting labour, a special account is given of important decisions rendered under the Alien Labour Act, and proceedings under the Act are illustrated by the cases referred to.

Owing to additional space required for the printing of the appendix the statistical tables on the cost of living in Canada are discontinued in the present number, but the series will be continued in a subsequent issue with tables relating to retail prices of ready-made clothing, underwear, boots and shoes.

There are also special articles relating to changes in rates of wages, strikes and lock-outs in Great Britain, and the usual reviews of reports of departments and bureaus and of industrial and labour conditions of the month.

INDUSTRIAL AND LABOUR CONDITIONS DURING THE MONTH OF JULY.

SATISFACTORY conditions on the whole were reported as prevailing in the labour and industrial market in Canada during July, and the general activity and prosperity of the working classes, as will be seen from the correspondents' reports in the present issue of the *Gazette*, show no sign of abatement. As the arrangement for the present season of wages scales in the various trades and branches of industry are now for the most part concluded, there has been a marked diminution in the number of strikes reported as arising or in continuance during the past month, and the number of increases granted in wages also showed a decided falling off, the new scale granted to the carmen on the Lake Superior, Eastern and Atlantic division of the Canadian Pacific Railway being the most noteworthy of the month. With the advance of the season the immigration movement slackened, though the supply of skilled labour is reported in western Canada as being still below the demand. The granting of the customary half holiday in various industries has affected the hours of labour during the month, chiefly among retail clerks and a limited number of manufacturing establishments. The restoration of comparative tranquility to the labour market, however, was, as above remarked, the most noteworthy feature of the month's developments.

Industrial and Labour Conditions.

The favourable weather which continued over the whole of July has ensured good crops in the *agricultural* industry, and, with the exception of some districts in the maritime provinces, prospects for the season are exceptionally bright. Haying was generally begun towards the end of the month, and the yield, even in the districts particularly affected by the dry weather of the early portion of the season, will be satisfactory. According to a bulletin issued on July 15 by the govern-

ment of the North-west Territories, there are 727,998, 365,719 and 42,445 acres in wheat, oats and barley this year, as compared with 625,758, 310,367, and 42,445 acres respectively, in 1902. The expected yields are 15,042,000, 11,803,000 and 1,116,300 bushels, respectively, as against 13,956,850, 10,661,295, and 870,417 bushels last year.

The *fishing* industry reports fair conditions in the maritime provinces and on the great lakes, though the salmon runs in British Columbia were in some cases below expectation.

Lumbering was active, and long hours were worked in the mills in eastern Canada. In British Columbia, however, the market was reported as suffering from an overstocking of logs, on account of which prices were diminished, and proposals made to close down some of the camps.

In *mining*, the resumption of work in the Ladysmith and Cumberland mines was a favourable development of the month, while at Fernie and throughout the Nova Scotia coal mines, increased outputs were reported. As will be seen from the report of the *Gazette* correspondent at Rossland, the granting of a bounty on silver lead ores by the Dominion government of \$15.00 per short ton has had a marked effect on the activity of the metalliferous mines in that locality.

Railway construction and employment, especially in western Canada, was unprecedentedly active, and in *manufacturing* generally the month has been exceptionally busy.

Among the several trades, the metal and engineering and the transport branches continued very active, while the building trades, with the conclusion of the Toronto strike, were also, with a few local exceptions, busy. In the clothing trades the advent of the slack season was noted. With these exceptions, employment in the trades generally was particularly satisfactory.

The Grand Trunk Pacific Contract.

On Thursday, July 30, the Right Honourable the Prime Minister introduced into the House of Commons a bill entitled 'An Act to provide for the construction of a Transcontinental Railway,' in which the government's proposal with regard to the construction and operation of the Grand Trunk Pacific Railway was embodied. A brief summary of the bill's provisions is as follows:—

The eastern division, between Moncton and Winnipeg, is to be constructed by the government through the agency of a commission of three, with a secretary, chief engineer, and staff of engineers and surveyors.

The work is to be let by tender and contract after public advertisement of plans and specifications, the lowest tender of any competent contractor to be accepted, all contracts for \$10,000 or upwards to be sanctioned by the Governor in Council, and no member or senator to be interested in any contract.

Claims and accounts for work done are to be paid on recommendation of the Minister of Railways from the proceeds of authorized loan, the interest on which is not to exceed $3\frac{1}{2}$ per cent. Debentures covering the cost are to be issued by the commissioners, the interest upon such debentures constituting a first lien upon any earnings of the road.

The commissioners are to make a yearly report to parliament during office, and their accounts of receipts and expenditures are to be audited by the Auditor General.

The Grand Trunk Pacific Company is to construct the western division, from Winnipeg to the Pacific coast, and lease from the government and operate the eastern division, the construction of which the government is to commence as soon as the surveys and plans have been made, and complete with all reasonable despatch.

The company is to commence location and construction of the western division immediately and complete it by December 1, 1903, putting up \$5,000,000 as security, the money to be returned when the division is opened in order to facilitate its complete equipment.

For seven years the company is to have the use of the eastern division free of charge, paying all operating expenses of maintenance. For the balance of the 50-year term of the lease it is to pay the government three per cent. annually as rental. If for the three years between the seventh and tenth years the earnings are not sufficient to pay the interest, the arrears of interest are to be capitalized and added to the total sum on which interest is to be paid for the remaining forty years.

The company is to have the right to renew the lease at the end of fifty years, for a further fifty-year term, provided the government does not wish to operate the road.

The company is to spend \$20,000,000 on rolling stock, of which \$5,000,000 worth shall be for the eastern division.

The eastern division is to be open to any railway company upon terms for running powers to be fixed by the government. Other companies are to have running powers over the western division on terms to be fixed by the Grand

Trunk Railway Company and the government, and the company is also to have running rights at reasonable rates, over the Intercolonial. The fixing of these rates, in case of disagreement, will be left to arbitration.

The capital stock of the company is to be \$45,000,000, twenty millions preferred and twenty-five millions common stock, the common stock to be taken by the old Grand Trunk Railway Company.

The government guarantees the bonds on the prairie section up to \$13,000 per mile, and on the mountain section up to \$30,000 per mile, the bonds to run for fifty years at three per cent interest. Interest on the bonds of the prairie section equal to the cost of construction is to be paid in the full by the company.

The government will for seven years pay interest on the cost of construction of the mountain section up to \$30,000 per mile. For the next three years, if the government continues to pay this interest on the bonds, the sum so paid is to be capitalized and repaid to the government with interest at three per cent per annum. For the remaining forty years, if the company defaults in paying interest on the whole of the bond issue, the government will pay it, taking up the coupons and ranking as a bondholder to the amount thus paid out as guarantor of the company.

The company is permitted to issue interim bonds, to be included in the authorized issue, during construction of the western section.

The company is bound to buy its material and supplies and equipment in Canada when they can be obtained as readily and cheaply here as abroad.

The company agrees that, when not specifically otherwise routed by the shipper, it shall carry freight through Canadian territory and to Canadian ocean ports, rates to be no higher than via United States ports.

The company is to provide ample shipping to take care of its through traffic inward and outward, and shall send all traffic which it can lawfully influence and control to and from Canadian ports.

The government is to furnish the company free right of way through government lands for its western division and is to have one representative on the company's board of directors.

Transportation Activity.

The activity of the transportation companies generally was very marked during July, and preparations were under way for the handling of the increase of business which is expected to follow the harvesting of the western crop. The car shops of the various railway companies are working in most instances to the utmost of their capacity. Traffic on the lakes was also very heavy. As an indication of the large business done by the railways during the past year, it may be stated that the traffic earnings of the Canadian Pacific Railway Company for the year ending June 30, 1903, were \$43,880,800, an increase of \$6,377,747,

or about 17 per cent over 1902. In June alone the increase in earnings amounted to almost \$1,000,000, being 31 per cent greater than last year. The final week of the year showed an increase of 37 per cent.

Dominion Revenue and Expenditure.

The total revenue of the Dominion, on account of consolidated revenue fund, for the year ended 30th June, 1903, was \$63,-739,271.89. For the month of June the returns were \$6,013,888.49. As compared with 1902, the returns show an increase on the total to 30th June, 1902, of \$56,303,-694.30, and for the month of June of \$5,-024,347.63. The total expenditure in 1903 was \$41,449,103.68, and in 1902, \$42,255,-216.11. For June the expenditure was \$2,-489,132.04, as against \$4,250,203.19 last year. On capital account there was an expenditure of \$7,230,093.04 for 1903, as against \$11,532,155.39 in 1902, and for June an expenditure of \$605,063.86, as against \$1,021,-937.05 in 1902.

Canadian and Foreign Trade.

The statistics of foreign trade for the fiscal year ending June 30, 1903, as published by the Department of Customs, show an enormous expansion in the trade and commerce of the Dominion, the total imports and exports of domestic and foreign produce amounting to \$467,637,049, an increase of \$43,750,000 over the trade of the fiscal year 1902. On the basis of imports which actually entered into consumption, and Canadian products only exported, the trade for the year amounted to \$448,188,999, as compared with \$398,811,358 for the previous year, or an increase of \$49,377,641. On this basis the trade of Canada has more than doubled in the last seven years, as appears from the following figures :—

| | |
|------------------|---------------|
| Trade of 1903... | \$448,188,999 |
| Trade of 1896... | 220,502,817 |

The foreign trade of Canada, in imports entered for consumption and domestic produce exported, amounted to about \$1,500,000 per working day last year, whereas in 1896 it was about \$730,000 per working day. The exports of domestic produce during the year totalled \$214,401,674, an increase of \$18,381,911 over the previous year, and nearly double the domestic exports for 1896. The exports of animals and their products and the produce of the farm (totalled \$114,441,863, as compared with \$96,313,897 for the previous year, whereas, in 1896, they amounted to \$50,591,002. Exports of the products of Canadian forests show an increase of \$4,000,000, the total amount being \$36,386,015. The increase in manufactured articles produced in Canada totalled \$20,624,967, as against \$18,462,970 for the previous year, and \$9,365,384 for 1896. The free list also showed an expansion amounting to \$88,023,738, an increase of \$10,000,000 over 1902. Imports of raw material showed large increases in several items: for example, the raw cotton imported in 1903 amounted to 67,652,145 pounds, as against 33,479,358 pounds in 1902.

The total trade of the Dominion may, accordingly, be estimated at about \$81 per head, whereas that of the United States in 1902 was \$31 per head. Exports of Canadian products were \$37 per head, whereas for the year 1902 the exports per head in the United States were only \$18. It has been pointed out that in 1850 the United States, with a population of 23,000,000, had a total foreign trade of \$320,000,000, whereas Canada, in 1903, with a population of less than 6,000,000, has a total trade of about \$470,000,000.

Trade Returns for June.

The following statement gives the returns of exports for the month of June, as compared with the same month last year :—

| | 1902. | | 1903. | |
|--------------------------------|------------|-----------|------------|-----------|
| | Domestic. | Foreign. | Domestic. | Foreign. |
| | \$ | \$ | \$ | \$ |
| The Mine..... | 5,330,096 | 10,030 | 3,799,542 | 12,468 |
| The Fisheries..... | 1,233,656 | 4,080 | 1,677,899 | 8,112 |
| The Forest..... | 5,225,114 | 2,035 | 5,318,913 | 23,684 |
| Animals and their produce..... | 5,358,324 | 86,411 | 7,143,270 | 66,955 |
| Agriculture..... | 3,943,210 | 1,828,708 | 4,745,529 | 984,829 |
| Manufactures..... | 2,000,919 | 369,988 | 2,335,827 | 259,249 |
| Miscellaneous..... | 2,499 | 32,455 | 5,070 | 50,912 |
| Total merchandise..... | 23,093,818 | 2,333,707 | 25,026,050 | 1,406,209 |
| Coin and bullion..... | | 33,998 | | 48,862 |
| Grand total, exports..... | 23,093,818 | 2,367,705 | 25,026,050 | 1,455,071 |

Montreal and other Port Returns.

An indication of the growth of the Canadian import trade is afforded by the customs returns of the port of Montreal, which in the past eight years have grown from somewhat less than \$6,000,000 to \$11,803,300 as the total collections for the year just closed. The gain in revenue over the preceding year was \$7,761,600, or 17 per cent. For each working day of the twelve months the receipts were \$38,700. The number of entries was 236,122, or a daily average of 774. The examining warehouse received 188,392 packages, whereas in 1896 the number received was 89,167. At the customs postal branch the revenue during the year increased from \$16,128 to \$26,494.

Toronto, the second largest port in the Dominion, collected about \$7,050,000 last year. The city of Winnipeg, which now displaces Halifax as occupying the third place, shows a revenue for the fiscal year ended June 30 of \$1,499,226, or an increase of \$433,856.04, the number of entries having grown from 30,818 in 1902 to 38,783 in 1903.

Domestic Trade.

The continued favourable weather has had a beneficial effect on domestic trade, and the excellent progress of the crops, not only in western Canada but in Ontario and the

east, make prospects for fall trade very bright.

The failure record of the Dominion for the first six months of the year, as shown by the financial reviews, was a most satisfactory one; insolvency returns totalling only 492, as compared with 610 for last year, and still higher figures in earlier years. The liabilities, namely, \$3,395,637, were much lighter than in 1902, when the total reached \$5,739,451, and the average of \$5,000,000 for the preceding five years. Manufacturing failures numbered 109, with liabilities of \$1,045,843, as against 109 failures last year, for \$1,281,866. The only unfavourable comparison was made by banking defaults, owing to two large suspensions in Ontario.

The following is the record by provinces:

| Provinces. | No. | Assets. | Liabilities. |
|--------------------|-----|-----------|--------------|
| | | \$ | \$ |
| Ontario..... | 207 | 865,134 | 1,272,394 |
| Quebec..... | 180 | 812,893 | 1,297,409 |
| British Columbia.. | 30 | 153,100 | 149,450 |
| Nova Scotia..... | 44 | 143,800 | 374,700 |
| Manitoba..... | 14 | 31,800 | 42,000 |
| New Brunswick.... | 11 | 70,350 | 177,684 |
| P. E. Island..... | 6 | 33,500 | 82,000 |
| Total..... | 492 | 2,110,737 | 3,395,637 |
| Total, 1902..... | 610 | 4,132,530 | 5,739,451 |

Municipal and Trade Conferences.

A delegation from the Union of Canadian Municipalities was received by representatives of the Dominion cabinet and of the House of Commons on Tuesday, July 14, when a protest was made against the principle involved in the application of the Toronto and Hamilton Railway Company for a Dominion charter for the construction of a line of electric railway between the cities named. The delegation announced itself as endorsing the following propositions :—

That undertakings entirely provincial and essentially for local or municipal purposes should not be removed from provincial and municipal control by the mere declaration that such works are for the general advantage of Canada.

That no such declaration should be made in any case until the government and parliament are satisfied by actual proof that the declaration is true.

That all street railways or tramways or electric railways constructed and operated wholly or in part through the streets or highways of a municipality are essentially of a local character and should be left under the jurisdiction of the local legislature and the municipalities.

That the local legislatures have hitherto dealt with the incorporation of such railway companies and have provided safeguards for the construction and operation of such railways, and their right so to do should not be interfered with.

On June 30 and July 1 a conference of representatives of various trade centres in western Ontario was held in Woodstock, Ont., and an organization to be known as an Educational Labour Association of Western Ontario established. The constitution as finally adopted stated its object to be the uniting of the various trade centres of western Ontario for the purpose of publishing a representative labour paper, and providing for other methods of disseminating information. The paper is to be independent in politics, and is to be conducted not as a financial but as an educational paper. Trades and labour councils are entitled to elect three representatives to the annual meeting of the association, and smaller centres may appoint one delegate from the local union or unions. London was selected as the headquarters of the association.

A conference of representatives of the Ontario municipalities interested in the

development of electrical power at Niagara Falls was held at Berlin, Ont., on July 9, when the action to be taken in the recently passed power Act was discussed. The bill, it was pointed out, gave three options to municipalities :

(1.) To develop, transmit and distribute power under a commission appointed by judges.

(2.) To buy the power at its source, to transmit and distribute it under similar conditions.

(3.) To buy power, transmit it to the several municipalities and distribute among consumers, the municipality electing its own commission.

A committee of seven was appointed to gather further information, and to take the necessary steps to form a union of the municipalities.

The Toronto branch of the Canadian Manufacturers' Association held its annual meeting and dinner on July 10. The annual report showed a membership of 331, an increase of 59. The subject of municipal government was discussed.

Conventions of Labour Organizations.

The official call for the annual convention of the Trades and Labour Congress of Canada was issued from the office of the secretary-treasurer on July 27. The call refers prominently to legislation introduced at the Dominion parliament, and its relation to international trade unionism. The convention will meet in Brockville on Tuesday, September 22, and all trades and labour councils and federal labour unions, national trades unions, and international local trades and labour unions in Canada, are invited to send delegates.

The union convention of the Brotherhood of Locomotive Engineers was held in Winnipeg, beginning on Tuesday, July 14. A deplorable incident of the convention was the sudden death of the Grand Chief of the Brotherhood, Mr. P. M. Arthur, who was struck down with heart failure while in the act of addressing the convention.

The National Association of Master Plumbers held its annual convocation in Montreal, opening on July 2. The delegates in attendance were principally from

the provinces of Ontario and Quebec. It was unanimously decided to appoint a permanent organizer for the Dominion, and that the ninth annual convention, in 1904, should be held in Toronto. The following officers were elected for the coming year:—

President—Mr. Joseph Thibault, Montreal, Que.

Vice-President—Mr. Robert Ross, Toronto, Ont.

Secretary—Mr. H. A. Knox, Toronto, Ont.

Treasurer—Mr. F. G. Johnson, Montreal, Que.

The official call of the National Trades and Labour Congress of Canada was issued during July to the trades and labour councils, national trades and labour unions, independent labour unions and knights of labour in Canada. The circumstances attending the organization of the congress in September last, and the progress of the congress since its formation, are briefly mentioned, and the subjects which it is intended specially to discuss at the coming convention are stated as follows:—

The legalizing of the Canadian Union Label.

Incorporation of Labour Unions.

The influence of traffic legislation on the labour market.

Child labour, prison labour, school legislation, &c., &c.

The congress will meet in the city of Quebec, commencing Tuesday morning, September 15.

Labour Conditions in British Columbia.

With regard to present conditions in the labour market of British Columbia, a communication recently received by the Department of Labour from a correspondent at Erie, B.C., stated that rates of wages and the general condition of labour in the various mining camps of the province were favourable, even making allowance for the comparatively high prices of commodities. A number of serious drawbacks to the prosperity of the labourer were mentioned, however, as modifying this aspect of the situation. In the first place, it was stated, the drinking habit is responsible for much of the lack of thrift among the working classes of British Columbia. The uncertainty and intermittent character of employment, by causing loss of time in the search for work,

was a second serious interference with the workingman's prosperity. The practice of discharging men on very brief notice was noted as a third. A fourth was the serious disadvantage arising out of the practice of compelling the workingman to wait from four to six weeks for his money, which causes him to go into debt for his supplies. The correspondent recommends in this connection that the weekly payment of labourers be made legal. The difficulty of collections was also stated as a still further set-back. The practical value of the Master and Workmen's Act, under which the jurisdiction of the justice is limited to \$50, according to the correspondent, is very slight, as it often happens that a man seeking redress must travel from twenty to fifty miles in order to sue his employer in the county court. The correspondent is strongly of the opinion that, while the first named of the above objectionable features alleged to be in existence in the labour market in British Columbia is perhaps beyond legislative control, the passing of laws giving the workmen right to reasonable notice of discharge, to a weekly pay day, and to bring suits before the justice for a more considerable sum than fifty dollars, would materially benefit conditions.

Notes of the Month.

An Act codifying and amending existing legislation with respect to immigration of aliens into the United States was recently approved by Congress, and some important changes restricting immigration were thereby carried into effect. The new Act raises the head tax on all passengers not citizens of the United States from \$1.00 to \$2.00, but excepts citizens from Canada, Cuba and Mexico from the payment of such tax, while extending the liability for payment so as to include persons coming in by railways from foreign contiguous territory, as well as those arriving by steam or sailing vessels. The money thus collected is to be used to defray the expenses of regulation of the immigration of aliens whose entry into the United States is prohibited, while extending the period in which persons

landed in violation of the law are to be deported to two years, or in some cases for three years, the previous law placing the limit at one year.

The judicial committee of the Imperial Privy Council on July 14 rendered a decision in the case of the appeal of the Attorney General of Ontario vs. The Hamilton Street Railway Company, according to which it was held that the Lord's Day Act, on which the appeal was based, was *ultra vires*.

Resolutions were introduced into the House of Commons during the month, recommending payment of bounties on certain specified articles manufactured in Canada out of steel produced in Canada from ingredients of which not less than

fifty per cent of the weight thereof consists of pig iron made in Canada.

On June 30 the term of three years during which Sir William McDonald has supported the manual training schools on Prince Edward Island came to an end, and on July 7 a new arrangement was adopted. The schools are five in number.

A disastrous explosion occurred at Cumberland, B.C., on Wednesday, July 15, in No. 6 mine of the Dunsmuir collieries, in which fifty Chinamen and four white men were employed. Twelve Chinese were killed and eight injured, though little damage was done to the mine. A rescue party at once penetrated to the scene of the disaster and effected the relief of the injured as fast as possible. An inquest was held on the arrival of the government inspector.

II. REPORTS FROM LOCAL CORRESPONDENTS.

During the month of July Mr. John Moffatt was appointed correspondent to the *Labour Gazette* for Sydney, N.S., and district.

HALIFAX, N.S., AND DISTRICT.

Mr. F. W. Smith, Correspondent, reports as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

The general condition of the labour market during the past month has been active, and was equally as brisk as during June. Work on the Southwestern Shore Railway, which was commenced early in the month, provided additional employment, and a large gang of men are working on it. Commercial activity was not so marked as in the previous month, but the tourist trade has been active, and passenger steamers are well engaged. The wholesale and retail trade has been up to the average. Considerable unrest, however, continues in this district. The carpenters are yet on strike, although quite a number have secured work at the advanced rate, while there have been many carpenters from outside districts engaged to take the place of the strikers. A strike also took place

on the 17th, among the labourers on the Imperial works. The men receive twelve cents per hour; the strike is for fifteen. Some sixty men are involved, and no settlement has yet been made.

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—The outlook is not at all good; potatoes will be a failure.

Mining.—The condition of the industry is still active, and very promising.

Railroad construction.—The starting in of work on the Southwestern Shore Railway and the double track construction work on the Intercolonial Railway from Halifax to Windsor Junction have provided much additional employment for many branches of labour.

CONDITION OF PARTICULAR TRADES.

Building trades.—All branches of the building trades are very busy.

Metal, engineering and shipbuilding trades.—Moulders are busy. Machinists are very brisk. Blacksmiths are fairly busy. Shipwrights and caulkers report work plenty. Horseshoers are dull.

Woodworking and furnishing trades.—Upholsterers are fairly busy. Carriage

workers are busy. Coopers are only partially employed.

Printing and allied trades.—Printers are only partially employed. Pressmen are fairly busy.

Transport.—All branches of railroad employees, freight handlers, &c., are busy. Longshoremen are fairly well employed. Teamsters and delivery drivers are busy.

Unskilled labour.—Unskilled labour is well employed.

CHARLOTTETOWN, P.E.I., AND DISTRICT.

Mr. F. J. Nash, Correspondent, reports as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

The labour market during July was in practically the same condition as in June, demand and supply being well balanced. The close of the lobster season caused a number of men to be thrown out of employment, but for a brief period only as other work was open to them. The beginning of the haying season in the latter part of the month caused an increase in the demand for farm labourers. In the city the first stone was laid for the new \$35,000 market house, which during the month gave employment to about forty men. Bankers, shippers, wholesale and retail men report business brisk during the month, and money plentiful.

CONDITION OF LOCAL INDUSTRIES.

The hay crop, injured at the first of the season by drought, improved considerably with rains during the month, and an average yield is expected. Grain and root crops promise well. The apple crop will be below that of last year, but prices will be much higher. The lobster season closed about the middle of the month; the aggregate catch this year will about equal that of last. The average catch per trap is smaller than last year. The closing down of one furniture factory threw about thirty men out of employment at carpenter work. The construction of the Hillsborough bridge and the Southern railway is still being carried

on. The masonry on the latter is completed, and a number of the masons are now employed at the market house cellar. The cheese factories are doing well, and the price is higher than at this season last year.

CONDITION OF PARTICULAR TRADES.

Building trades.—Carpenters and joiners were steadily employed. Bricklayers and masons, painters and decorators, plumbers and builders' labourers were only fairly busy. Plumbers were busy.

Metal, engineering and shipbuilding trades.—Iron moulders, iron workers and helpers, machinists and engineers, steam engineers, linemen, platers and brass workers, blacksmiths and bicycle workers were busy.

Woodworking trades.—Carriage and wagon makers, car builders and coopers had a good month.

Printing and allied trades.—Printers were steadily employed.

Clothing trades.—Journeyman tailors, garment workers and boot and shoe workers were busy.

Food and tobacco preparation.—Bakers and confectioners, butchers and meat cutters and tobacco workers were well employed.

Leather trades.—Tanners and curriers and saddlers were satisfactorily employed.

Miscellaneous.—Barbers had a good month's work.

Transport.—All engaged in transportation business enjoyed a good month. Teamsters and expressmen, freight handlers, steamboatmen and steamboat firemen, ship labourers and longshoremen report a busy month.

Unskilled labour.—The demand for unskilled labour was about equal to the supply.

ST. JOHN, N.B., AND DISTRICT.

Mr. W. H. Coates, Correspondent, reports as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

The labour market continued active during the month of July. Bricklayers are

scarce, and work on the Intercolonial Railway roundhouse is proceeding slowly in consequence. Stonecutters were also scarce, and a contractor had to secure ten men from Montreal to work on the new public library building. The foundation walls of the new brick structure being erected for the Canadian Drug Co. is well advanced, and the brick work will be pushed forward as rapidly as possible. The Street Railway Co. is double tracking Douglas avenue, about eighty men being employed. Other extensions will follow in rapid succession. Messrs. Murray & Gregory's saw mills, near the falls, were totally destroyed by fire on July 4, throwing 120 hands out of employment. The loss is estimated at from \$40,000 to \$50,000. A thoroughly up-to-date mill will be built on the site of the old mill. There were two strikes during the month. On July 3 one hundred and sixty street labourers struck for an increase of pay. The men had been receiving \$1.00 and \$1.20 per day, and after being out twelve days returned to work at an advanced scale, viz., \$1.10 and \$1.40 per day. The old men received an advance of 10 cents per day, and the others 20 cents. They had asked for \$1.25 and \$1.50. On the same day 54 men employed on the Douglas avenue extension, by the Street Railway Company, also struck for an advance; they had been getting \$1.35 and demanded \$1.50. Manager Nelson decided to give the \$1.50 to competent men.

CONDITION OF LOCAL INDUSTRIES.

Agriculturists are taking advantage of the fine weather, and reports to hand show that the hay crop will be an average one.

Building trades.—Bricklayers and masons, carpenters and joiners, painters and decorators, stonecutters and builders' labourers find business good. Plumbers are fairly well employed.

Metal, engineering and shipbuilding trades.—Iron moulders find work fairly satisfactory; with machinists, engineers, electrical workers, linemen, boilermakers, sheet metal workers and horseshoers employment is very satisfactory.

Woodworking and furnishing trades.—Carriage and waggon makers are actively employed. Shingle weavers find employment only fair.

Printing and allied trades.—Printers and bookbinders are enjoying a good business, as are the pressmen. The last named organized a union on July 9.

Clothing trades.—Journeymen tailors are satisfactorily employed.

Food and tobacco preparation.—Cigar-makers find work fair.

Miscellaneous.—Broommakers and brush-makers are fully employed.

Transport.—Railway trackmen, freight handlers, ship labourers, street railway employees, teamsters and expressmen are all satisfactorily employed.

Unskilled labour.—With this class of labour work is plentiful.

DISTRICT NOTES.

Dover.—On July 8 a big oil strike was made at this place in Albert county. At a depth of 300 feet oil was struck, and inside of an hour flowed into a ten inch hole to a depth of twelve feet.

QUEBEC, QUE., AND DISTRICT.

Messrs. Edward Little and P. J. Jobin, Correspondents, report as follows :—

GENERAL CONDITION OF THE LABOUR MARKET.

The month has been a good one for labour, the demand with only a few exceptions exceeding the supply. The Havana Cigar Company, a limited joint stock company, commenced operations on the 6th. The Bell Telephone Company has a large gang of men employed in laying wires underground. There have been no labour disturbances, but a request for an increase of wages and the readjustment of the scale was made by the lasters employed in the shoe factories and was submitted to the arbitration board for settlement. Representations were heard from both parties but no decision had been rendered at the close of the month. The meetings of the board were held in public and were largely attended.

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—Crops throughout the district give promise of an excellent yield. Hay making was commenced, but was delayed by the frequent rains.

Lumbering.—All the saw mills are working and conditions in about fifty per cent of them are exceptionally active, an attempt being made to make up for the time lost owing to the lateness of the drives.

CONDITION OF PARTICULAR TRADES.

Building trades.—These branches have made a good month.

Metal, engineering and shipbuilding trades.—In the iron trades the month has been a good one, the different shops working to their full capacity, and in some cases being unable to finish within contract time. Electrical workers and linemen have been busy. In the iron shipbuilding branches there has been continuous employment on minor repairs of a number of vessels, though no particularly heavy jobs have been undertaken during the month.

Printing and allied trades.—Printers and pressmen had plenty of work and the prospects are good. Bookbinders report a good month.

Clothing trades.—The boot and shoe workers have had a fair month's work, conditions though quiet being better than in June or July of last year.

Food and tobacco preparation.—Cigar-makers report plenty of work.

Miscellaneous.—Barbers had a good month. Broommakers have been dull. Laundry workers report a busy month. Hotel employees profited by the opening of the tourist trade.

Transport.—Traffic on the railways was exceptionally heavy owing to the influx of tourists; cab drivers, hackmen, &c., also profited by the same conditions. Longshoremen and ship labourers, however, had a rather slack month, though conditions had improved since June.

SHERBROOKE, QUE., AND DISTRICT

Mr. H. Logie, Correspondent, reports as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

Labour conditions during the month of July have been somewhat similar to those of the previous month, all classes of labour being fully employed. There is great activity in the machine shops, and in both the Canadian Rand Drill and Jenckes machine shops there are night gangs at work. Good machinists are in demand. The Jenckes Machine Company has secured a \$315,000 contract from the Ontario Power Company, at Niagara Falls, Ont., for the construction of a steel conduit pipe for the power works there. The company will erect temporary shops at Chippewa, near Niagara Falls, where several hands will be employed. The same company has also completed a large contract of mining machinery for the Dominion Iron and Steel Company, for its mines at Glace Bay, C.B. Wholesale and retail trade is reported to be very good.

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—The hay crop is much better than was anticipated, and in some sections it will be fully up to that of last year; the other crops will be fully up to the average. Farmers are complaining of the want of farm help.

Lumbering.—Lumbermen are beginning to make arrangements for the coming season. The Sherbrooke Lumber Company, with a capital of \$200,000, was organized during the month. The company own about 500 square miles of timber limits in the province.

Mining.—Men engaged in the mining business are looking forward to a period of renewed activity when the Sherbrooke Smelting Company has succeeded in completing arrangements for a smelter here.

CONDITION OF PARTICULAR TRADES.

Building trades.—The building and allied trades are very busy.

Metal, engineering and shipbuilding trades.—The metal and engineering trades are exceptionally busy, and there are orders ahead which will keep the trade in that condition for some time to come.

Woodworking and furnishing trades.—Work is not quite so brisk in the sash and door shops, but not to such an extent that men are laid off.

Printing and allied trades.—The printing trade is very busy, and extra help has been taken on.

Clothing trades.—The custom tailors report trade very good and a scarcity of hands.

Unskilled labour.—This class of labour is in good demand.

THREE RIVERS, QUE., AND DISTRICT.

Mr. John Ryan, Sr., Correspondent, reports as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

Business in this district has been very good during the month, and the various classes of labour have been working full time. The city and district has been happily free from any labour trouble. The demand for unskilled labour is very good, and skilled artisans need not be out of work. The building trades report a busy season with prospects that work will be carried on till late into the fall. *Merchants* report a fairly good trade, although the unseasonable weather told against the sale of summer goods.

CONDITION OF LOCAL INDUSTRIES.

Lumbering operations are active, and there is a market awaiting every piece of lumber piled in the yards.

Manufacturing in general is very brisk; stove, shoe, tobacco, cigar, and glove factories, and machinery shops, together with planing mills, are enjoying prosperity.

The *agricultural* industry, with the exception of hay, will be as good as last year.

CONDITION OF PARTICULAR TRADES.

Building trades.—Bricklayers and masons have had a good month. Carpenters and

joiners are very busy. Painters report business good. Stonecutters have plenty of work.

Metal, engineering and shipbuilding trades.—Blacksmiths are all employed and report business good. Bicycle workers are very dull for the season.

Printing and allied trades.—Business in these branches is very good, and some are working overtime.

Clothing trades.—Journeymen tailors are very active; the slack period, however, is now approaching. Glove makers and boot and shoe workers are doing a good business.

Food and tobacco preparation.—Cigar-makers and tobacco workers have had a fair month.

Miscellaneous.—Barbers are busy.

ST. HYACINTHE, QUE., AND DISTRICT.

Mr. Napoleon Samson, Correspondent, reports as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

The labour market has been favourable during the month, and work generally has been more plentiful than in June, there being no idle men.

Bricklayers, masons and carpenters in the building trades are exceptionally busy, there being a scarcity of hands. Owners of real estate who were burnt out on May 20 are rebuilding. The Dominion government has given the contract for an addition to the post office building on land formerly occupied by residential property; the former house is being demolished. The Messrs. Coté, whose boot and shoe factory was burnt on May 20, are erecting a building to replace it 100 feet in length, 41 feet wide and four stories high, including the basement. Contracts have been awarded for the stone work, the bricklaying and wood work, and the work is to be completed by September 1 to permit of the setting up of the necessary machinery. Activity has been most

pronounced in sash and door factories and in foundries. Merchants have had a satisfactory month. There have been no changes in rates of wages nor hours of labour.

CONDITION OF LOCAL INDUSTRIES.

Farmers are getting ready for harvesting. Notwithstanding the unfavourable weather of the earlier season, hay will be abundant.

Manufactures are generally very busy. With the Penman Manufacturing Company, Limited, several branches were stopped from time to time owing to lack of water, but the company has purchased a steam engine of sufficient power to run their machinery when the water supply fails. As soon as this engine is placed in position activity will again be the rule. The company is even about to make a superior class of goods to that already on the market and has also decided to replace its present stocking knitting machines by other up to date ones.

CONDITION OF PARTICULAR TRADES.

Building trades.—Bricklayers, masons, carpenters and joiners have more work on hand than they can attend to.

Metal and engineering trades.—Iron moulders and machinists have been extremely busy throughout the month. Blacksmiths report satisfactory conditions.

Woodworking and furnishing trades.—Woodworkers and carriage makers have had a good month.

Printing and allied trades.—Printers state that they are well satisfied with the month's work.

Clothing trades.—About sixty men are working in the Ames Holden boot and shoe factory. The wages are not equivalent to those paid by other Montreal and Quebec boot and shoe manufacturers.

Food and tobacco preparation.—Cigar-makers have had a busy month.

Leather trades.—Tanners and curriers have had sufficient work to keep them employed all the time.

Miscellaneous.—Barbers and bartenders report satisfactory conditions.

Unskilled labour.—Day labourers have plenty work at fair wages and are scarce.

MONTREAL, QUE., AND DISTRICT.

Mr. Gustave Audet, Correspondent, reports as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

Workmen in all branches of the building trades are becoming scarce owing to the abundance of work and the shortening of the hours of labour. The following trades are also influenced by these conditions:—Plumbers, roofers, carpenters, joiners, bricklayers, plasterers, painters, masons, electrical workers, and stone cutters. Building operations have been very much delayed owing to the strikes which have taken place since the spring, and the cost of building is said to have increased 20 per cent on account of the increase in wages paid to the crafts engaged in the trade and other causes. Since last month strikes have occurred in boot and shoe employees working for J. T. Bell & Co., and the Slater Shoe Company.

CONDITION OF PARTICULAR TRADES.

Building trades.—All those engaged in the building trades are extremely busy and workmen are scarce.

Metal, engineering and shipbuilding trades.—Iron workers are fully employed.

Woodworking and furnishing trades.—Woodworkers, upholsterers, wood carvers and other branches of the woodworking trades are busier than they have been for many years previous.

HULL, QUE., AND DISTRICT.

Mr. Rodolphe Laferrière, Correspondent, reports as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

The labour market in July in this city was comparatively satisfactory. The local industries did not perhaps provide sufficient labour, but the beginning of the shantying

operations supplied ample employment for the surplus working population. Several hundred men have already left for the bush at the high wages of \$30 to \$35 per month and board. The bulk of the population is working in Eddy's factories, and Booth's and Gilmour's saw-mills. The former establishment is in a prosperous condition except that the match shop is closed during the hot season, owing to the difficulty in handling sulphur during that period. As a consequence a couple of hundred girls are losing six weeks' time. The International Portland Cement Company has added a number of men to their construction gang. This work will last a couple of years. Construction work in other parts of the city is dull. A small church is being put up in Tetreauville and a school-house in No. 5 ward. Reports from the country as to crops are encouraging, despite the heavy rains.

DISTRICT NOTES.

The construction work on the Ottawa, Northern and Western Railway extension is progressing favourably and the terminus of the line will be Maniwaki, 100 miles from the capital, this fall. The company intends building to a point one hundred miles above Maniwaki, crossing a country which the company considers to be as fertile if not more so than that on this side of the present terminus.

OTTAWA, ONT., AND DISTRICT.

Mr. T. W. Quayle, Correspondent, reports as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

July was a fairly satisfactory month in every respect except that outside employment was interfered with to a certain extent by rain. So far as could be learned general labour was fairly well employed, and the month was free from industrial troubles of a serious character. The stone-cutters' union declared a strike which lasted less than a week and which at no time involved more than thirty-five men. The strike was called to enforce a uniform wage

scale of 33 cents to 36 cents. The union also demanded the abolition of a clause in the agreement requiring employees to give at least ten days' notice before tendering on a contract. The employers held that indiscriminate tendering by employees, especially after learning the employers' figures was not fair. The strike was settled by compromise. The masters granted the wage demand and the men agreed to take out an employer's card before tendering on a job.

The strike of the plasterers, inaugurated on May 2, had not been officially declared off at the end of July, but so far as could be learned it had ceased to be a disturbing element in the building trade. Several of the men returned to work at the old scale, while others had become jobbers, and so far as could be learned not one man was idle. There was some dissension in the union and talk of forming a national union was heard. All other trades in the city were active and no disturbances of any kind were in evidence.

KINGSTON, ONT., AND DISTRICT.

Mr. Wm. Kelly, Correspondent, reports as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

Labour was fully employed during the month of July, and the supply was about equal to the demand, except in the case of agricultural labourers. In this line there is a scarcity, and high wages are offered compared with former years. The iron smelting company which has been sending experts and agents to Kingston for some time past recently asked the mayor for an option on part of the original smelter site for ten days only. The Finance and Industries Committees of the city met and decided to offer the company certain sections of the site for \$3,990, plus three years interest at 4 per cent. The balance of the property is to be reserved to give the Frontenac Railway and Cement Company and option also affording access to the harbour. A joint wharf and railway pier, it is thought, would be of mutual benefit to the companies, and

they could share the cost. The mayor and council are endeavouring to keep the way open for both industries.

During the month the business of the McGown Cigar Factory, which recently suspended operation in consequence of a disastrous fire, was resumed in new quarters and on a much larger scale. A feature in connection with the moving of the stock was the employment of every carter in the city. While the moving was going on the union carters objected to the employment of non-union carters, and were consequently released.

The Bell Telephone Company is asking the city council for the right to lay underground wires in certain sections of the city and other privileges. During the month the business of the Bailey broom factory was entirely suspended by a fire which destroyed the building and its contents. The new company recently formed to manufacture cereals of various kinds is making good progress, and the necessary machinery, &c., is being installed. Citizens are being asked to take up 7 per cent of the preferred stock to the amount of \$15,000. The government dredge *Sir Richard* has been employed for most of the month in the harbour. On Friday, July 3, the dry-goods merchants and others met and decided to close their places of business, Saturday excepted, at 5 p.m. during the months of July and August. Since the recent decision of the Imperial Privy Council *re* the 'Lord's Day Act,' the Kingston Street Railway Company has been running Sunday cars, and the company has decided to run them from 8 a.m. to 10 p.m. hereafter on Sundays. The cars are being largely patronized to Lake Ontario Park and other points.

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—The abundant rains have greatly benefited the various crops and the outlook is satisfactory.

Mining.—Recently large deposits of hematite iron ore were found on the Rideau canal, near Brewer's mills. On a close test the deposits were found to contain 60 per

cent of iron. There are splendid facilities for shipping, &c.

CONDITION OF PARTICULAR TRADES.

Building trades.—All engaged in these trades are fully employed.

Metal, engineering and shipbuilding trades.—All branches are busy.

Woodworking trades.—Favourable conditions are reported.

Printing and allied trades.—Printers report business as more active than for years.

Clothing trades.—July was the best month for clothiers, &c., in years past.

Food and tobacco preparation.—Those engaged in the preparation of food, tobacco, &c., are well employed.

Leather trades.—Owing to change of management tanners and curriers are not busy, but prospects for a large business later on are excellent.

Miscellaneous.—The miscellaneous, transport and unskilled trades, both male and female, are fully employed.

DISTRICT NOTES.

In view of the expiration of the lease of the ferry between Wolfe Island and Kingston the residents of the island recently voted to acquire and conduct the ferry business. This will likely facilitate business with the city.

Many American tourists are in the surrounding district camping. Their presence brings additional revenue to boatmen and others.

BELLEVILLE, ONT., AND DISTRICT.

Mr. W. S. Macdiarmid, Correspondent, reports as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

The month of July has shown little change over the preceding month in this locality. There have been encouraging reports from all branches of trade and a steady demand for all kind of labour. Merchants report the month's trade ahead of the corresponding month of last year. There

have been no strikes or lockouts in this locality during the month.

CONDITION OF LOCAL INDUSTRIES.

The harvest season is in full operation and it is with difficulty that farmers can get men. They say labourers want mechanics, wages.

Fishermen report a good month's catch.

CONDITION OF PARTICULAR TRADES.

Building trades.—Work in the building trades shows no changes over the preceding month. There is considerable activity and contractors report a scarcity of men.

Metal, engineering and shipbuilding trades.—All engaged in these trades have enjoyed a good month. Iron moulders and machinists have been exceptionally busy, owing to there being a great deal of work preparing harvesting machinery.

Woodworking and furnishing trades.—There is a great deal of work in the woodworking and furnishing trades, local factories reporting that they have all the work on hand that they can do.

Printing and allied trades.—All engaged in these trades have experienced an improvement over last month.

Clothing trades.—The clothing trades report an improved month's business.

Food and tobacco preparation.—Bakers and confectioners report a good month. The bakers have organized in this city and will in future only give a 3½-pound loaf for 10 cents instead of the usual 4-pound loaf. Cigarmakers report a very good month.

TORONTO, ONT., AND DISTRICT.

Mr. Philips Thompson, Correspondent, reports as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

General activity continues to prevail in nearly all branches of industry, and the prospects are good for a busy fall season. The only drawback has been the prevalence of labour troubles, resulting in considerable friction and bitter feeling. This has been intensified by the importation of labour

from abroad to take the places of striking workmen and the resort to arbitrary methods generally. The extensive immigration of workmen, apart from those specially brought over, has been a noticeable factor in terminating strikes adversely to the interests of the workers and in several trades the influx of immigrants has perceptibly increased the number of competitors for employment.

CONDITION OF PARTICULAR TRADES.

Building trades.—The building trades are still quiet as the result of the protracted strikes, from the effects of which the industry is slowly recovering, though no considerable revival can be expected this season. The builders' labourers who went out on May 1 on account of the refusal of the employers to pay them 30 cents per hour, returned to work on the 15th at the former rate of 25 cents. The great majority of the strikers had either left town or obtained other work in the meantime. Many of the places of the men on strike were taken by recent immigrants. The carpenters, who had also been out since May day for an increase in wages from 30 cents to 35 cents, also went back on the old terms on the 16th. Many of them had been employed in the meantime at the advanced rate. The strike of the painters and decorators is still on. Plumbers and steamfitters are well employed.

Metal, engineering and shipbuilding trades.—The metal trades are flourishing and work is plentiful. The strike of the iron moulders and core makers has resulted in very serious complications, owing to the systematic importation of workmen by the Canada Foundry Company to take the places of strikers. The company availed themselves of the services of the 'National Foundrymen's Association,' an international organization, and by sending agents to Britain induced the immigration under contract of a large number of English and Scotch moulders. Only a small proportion of the latter, however, were willing to go to work when they learned the state of affairs on their arrival. About 70 Scotch

moulders and core makers arrived on the 18th, only very few of whom remained with the company, many of the others returning to Scotland. They claim to have been deceived by the company's agents who, they state, assured them that there was no strike or dispute in progress. The strong feeling aroused by these occurrences has been increased by the arrest of members of the union for picketing the company's premises and by the refusal of Police Magistrate Denison to allow the secretary of the union charged with intimidation a jury trial. The cases are still pending. The unions connected with the District Labour Council have been appealed to for funds to aid the strikers. Machinists, engineers, electrical workers and blacksmiths are all well employed. Jewellers and silversmiths are very busy. The brass working trades have decided to submit their differences as to hours and wages to the following arbitrators:—For the manufacturers, A. F. Rutter, F. Polson and P. W. Ellis; for the union, J. Wilson, J. Atcheson and D. A. Carey. If the arbitrators fail to agree an umpire will be called in, whose decision will be final.

Woodworking and furnishing trades.—Conditions in these trades are generally satisfactory, with but few out of employment. The Piano Workers' Union has lately increased its membership considerably, and decided to affiliate with the Trade and Labour Congress of Canada.

Printing and allied trades.—The printing trade which had been exceptionally good for the season until two weeks or so since, is now a little slack though better than at this time last year. Bookbinders, electrotypers and pressmen are all busy.

Clothing trades.—Custom tailors who have been doing very well in the earlier part of the summer, are entering upon their slack season. (Other trades are generally fair. Garment makers are perfecting their organization and recently admitted 50 new members to the union.

Transportation.—All workers engaged in transportation are busy, as the volume of traffic is unusually heavy. A small strike

among unorganized deck hands employed on the Niagara Navigation Company's steamers, on the 11th, was quickly terminated by filling the places of the men. They made no formal demands, but it is understood that the strikers wanted an increase of pay from \$20 to \$23.50 per month.

DISTRICT NOTES.

Toronto Junction.—The Union Stock Yards will be opened for business on the 28th inst., the office building being complete. A number of dealers have acquired office accommodation there. Work has been commenced on the construction of a factory building for the manufacture of underwear, which will employ 25 hands. The Comfort Soap Company is building a large addition to its works.

HAMILTON, ONT., AND DISTRICT.

Mr. S. Landers, Correspondent, reports as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

Labour is exceptionally well employed in the city and a large number of outside people are coming and securing work both in the skilled and unskilled trades. Letters patent have issued to the Canadian Westinghouse Company, of Hamilton, with a capital of \$2,500,000; 800 additional hands will be employed, making a total of 2,000. The D. Moore Foundry Company will erect a new moulding shop 100 x 50 feet. Business, both wholesale and retail, is very active. There is only one labour difficulty existing in the city at the present time, viz., the bakers, and a settlement is expected to be reached soon. Rents have advanced and vacant houses are few.

CONDITION OF LOCAL INDUSTRIES.

Agriculture and manufacturing are both enjoying prosperity at the present time. All industries are busy with a full staff of employees.

No railway construction is being carried on at present.

CONDITION OF PARTICULAR TRADES.

Building trades.—The building trades are all very busy with the exception of the painters who have been a little slack. The plumbers ceased work in all but five shops owing to their July agreement not being signed; the matter was settled in a day and all men are now at work.

Metal, engineering and shipbuilding trades.—Stove plate and machinery moulders are busy. In one shop six moulders (non-union) quit work on account of a dispute about rules; they desired a few minutes to cool off after pouring off, which was denied them. The trouble was settled in about twenty-four hours. Stove mounters, blacksmiths, sheet metal workers and horseshoers were all fairly busy.

Woodworking and furnishing trades.—Woodworking trades have enjoyed a fairly good month.

Printing and allied trades.—The printing and allied trades are all busy, and there are few idle men in the city at present.

Clothing trades.—Tailors, hatters, boot and shoe workers are enjoying a busy season.

Food and tobacco preparation.—The bakers' strike is still on, although it is expected that it will soon be settled. The master bakers have decided to test the legality of the 'Ontario Bake Shop Act' in regard to the Sunday labour clause. Since the Privy Council have declared the 'Lord's Day Act' *ultra vires* some of the shops have started working on Sundays at ten p.m. No prosecutions have as yet taken place. Cigar-makers and tobacco workers all well employed.

Transport.—All railway employees and longshoremen have constant employment.

Unskilled labour.—Unskilled labour is the busiest of all class of workers, at from 15 to 20 cents an hour.

NIAGARA FALLS, ONT., AND DISTRICT.

Mr. Ernest Green, Correspondent, reports as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

As was the case a year ago there is work in this district for every man who wants to work. In some lines the supply of men is about equal to the demand, in others not enough men can be obtained. Several contracts on the electrical power development works have been practically completed and as new contracts are not far advanced, the number of labourers employed is rather less than last month. Manufactures in all lines of metal work are busy, and some are running overtime. The building trades show continued prosperity. Freight traffic is very heavy for the season. In the early part of July passenger traffic was remarkably heavy. Trade generally is excellent. Radical changes in wages and hours of labour affecting any number of men were few, but the general tendency is towards concessions by employers along both lines. No labour trouble of importance was reported.

CONDITION OF LOCAL INDUSTRIES.

Farmers expect a profitable season. All fruit crops except apples are first class. Hay turned out better than expected.

Manufacturing concerns are generally busy. The iron bedstead works have been reopened after several years' idleness and are doing a large business. Contractors on the power development works buy largely of local concerns in the lines of heavy castings, hoisting engines and machinery, rough and dressed lumber, &c.

Several large flows of natural gas have been struck by companies boring new wells west of Welland. Another company is about to begin operations in the townships of Willoughby and Crowland and will pipe gas to Niagara Falls.

Railway construction is duller than for several years past, but more men are employed in all branches of railway work than ever before at this season. Pavement, sewer and gas main construction employs a large number of men. Additional contracts in this line of work have just been let. Stonecutters and quarrymen at Queenston and Hagersville are having a heavy season.

CONDITION OF PARTICULAR TRADES.

Building trades.—All lines of employment in the building trades showed continued prosperity. Many mechanics from other places are working here.

Metal, engineering and shipbuilding trades.—Workmen employed in foundries, machine shops, blacksmith shops or as stationary engineers are busy.

Printing and allied trades.—Printers are well employed.

Clothing trades.—Tailors have been in demand.

Food and tobacco preparation.—Cigar-makers are busy. A large number of hands are employed in the canning factories in the fruit district at this season.

Miscellaneous.—Large numbers of stenographers, time-keepers and office employees are employed by contracting firms and power companies. There is a good demand for female help in hotels and restaurants. The supply of servants for private families is not equal to the demand.

Transport.—There was less falling off in railway freight business on the opening of navigation than for many years and all classes of men employed in that line are busier than usual for the time of the year. Passenger traffic has been excellent. No railway construction to any extent is in progress at present and only the usual gangs of trackmen are working. Electrical railways would take a few more trainmen for the summer season. Teamsters, hackmen and similar classes are all busy. The demand for unskilled labour is not so urgent, but all local men are employed. The number of foreign labourers working is rather smaller than in June.

DISTRICT NOTES.

Thorold.—A difficulty existing between the Federal Labour Union and the Paper Workers' Union was investigated by Mr. R. Glockling, secretary of the Ontario Bureau of Labour, and an amicable settlement is anticipated.

Welland.—Contracts for new bridges across the Welland canal at this place and Port Robinson have been awarded to a firm in Thorold. Work on the bridge here has been commenced.

Bridgeburg.—Large gangs of men and many teams are employed at the building of the new shipyard at Miller's Bay near here.

St. Catharines.—Manufacturing concerns are generally busy, but the building trades are very dull. Business was brisk on the Welland canal early in the month, but showed signs of dullness later. Electric railway lines are busy and some extensions are being made.

Port Colborne.—The government cruiser *Petrel* has made several seizures of fishing equipment being used by Americans in Canadian waters.

Port Dalhousie.—The building trades are fairly busy this season.

Niagara.—Canning factories in this section give employment to many women and some men during the fruit season.

BRANTFORD, ONT., AND DISTRICT.

Mr. J. C. Watt, Correspondent, reports as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

During the past month in all branches of industry great activity has prevailed, the iron and building trades taking the lead. There have been no idle men upon the market who wanted employment, and many from a distance coming to the city have found work with little trouble. The Industrial Soap and Oil Company, of Toronto, has purchased the Brantford soap factory which has been vacant several years, and will commence with a staff of twenty-five hands at once. The American Seeding Company, of Springfield, Ohio, has secured the plant now used by the Cockshutt Plough Company, and will commence operations when the Plough Company moves to its new plant now nearly completed. Harmony between employers and employees has existed throughout the month.

CONDITION OF LOCAL INDUSTRIES.

In the adjacent country the greatest activity has prevailed. The hay crop was harvested early in the month and much grain also during the latter part of the month. Farmers are in great need of more labourers.

The Grand Trunk Company has continued during the month, the extensive improvements commenced some time ago.

CONDITION OF PARTICULAR TRADES.

Building trades.—Bricklayers and masons, carpenters and joiners and plasterers have had a busy month and trade prospects are good. Painters and decorators, plumbers and builders' labourers have had steady employment.

Metal, engineering and shipbuilding trades.—Iron and brass moulders are rushed with work. First class men can find employment. Coremakers and machinists have been working overtime. Electrical workers, linemen, buffers and polishers have been fully employed. Machinery and carriage blacksmiths have been very busy during the month. Boilermakers and sheet metal workers have had plenty of work.

Woodworking and furnishing trades.—Carriage and waggon makers report a busy month. Patternmakers are in demand. Millwrights and coopers have had a steady month.

Printing and allied trades.—Printers and pressmen report a brisk month.

Clothing trades.—Journeyman tailors report trade as being fair.

Food and tobacco preparation.—Bakers and confectioners have experienced a busy month. Cigarmakers and tobacco workers have had an average month.

Miscellaneous.—Barbers, clerks and delivery employees report a brisk trade for the month. There is a demand for hotel employees. Laundry workers report a steady month.

Transport.—Street railway employees, carters and teamsters, particularly the latter, have been very busy.

Unskilled labour.—Unskilled labour is readily employed and there are no idle men upon the market.

GUELPH, ONT., AND DISTRICT.

Mr. O. R. Wallace, Correspondent, reports as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

Labour has been well employed during the month and the same general conditions noted last month continue. There are very few idle men, and there is little complaint as to the prevailing rates of wages. Work on the sewerage system is about completed. This has been largely done by gangs of Italians who were specially brought here to do the work. Two foundries have additions to their shops under way. Retail business is slightly ahead for the season of the year. Retail clerks have been generally granted a half holiday on Thursdays during the months of July and August without loss of pay. The month has shown less unrest among work-people than has been noticed for some time.

CONDITION OF LOCAL INDUSTRIES.

Hay and green crops of all kinds are yielding a very bountiful harvest in this district. Roots promise well. Sugar beets are not being as extensively grown as last year. There is little complaint here of the scarcity of farm help.

It is expected that a by-law will shortly be submitted to the ratepayers to bonus a Threshing Machine Company which desires to move here from Brampton.

CONDITION OF PARTICULAR TRADES.

Building trades.—The building trades are enjoying an exceptionally good season, and men from other places continue to find employment here. There is a large amount of public work under way with only an average number of houses being built. Bricklayers and masons, carpenters and joiners, and painters have all been steadily employed, with prospects of a busy season's work. Stonecutters are all employed. During the month trouble arose at the Ontario

Agricultural College buildings over the use of non-union cut stone. The men employed there, six in number, were on strike for one day, when they returned to work on the understanding that no more of the stone was to be used.

Metal, engineering and shipbuilding trades.—Iron moulders, machinists and iron workers have had a good month. A slight falling off in the cream separator trade is noticed owing to the season.

Woodworking and furnishing trades.—Woodworkers, varnishers, organ and piano workers are all steadily employed. A small movement of shifting around to other jobs took place but there are no idle men in these trades. Carriage and wagon makers are entering on their slack season.

Printing and allied trades.—Printers are busy, for the season of the year.

Clothing trades.—Tailors have had a good month for July.

Food and tobacco preparation.—Cigar-makers report a fair month's work.

Unskilled labour.—Unskilled labourers are in good demand, but a falling off is expected shortly with the finishing of the sewers and other work at present under way.

STRATFORD, ONT., AND DISTRICT.

Mr. Joseph T. Carlin, Correspondent, reports as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

All classes of labour have been fully employed during June, though there was some loss of time to out-door labour and the building trades owing to rainy weather and lack of bricks. The iron trades are very busy, overtime being worked in the Grand Trunk shops, where several night gangs have also been added. Mooney's biscuit factory is nearing completion, and will be in running order by August 1. There will be 40 men and 100 girls employed to begin with, and the staff will be increased as the work demands. There is quite a scarcity of dwelling houses and rents are gradually advancing. Merchants, wholesale and retail,

have had a satisfactory month. There have been no industrial disputes during the month.

CONDITION OF LOCAL INDUSTRIES.

Farmers are busy harvesting their fall wheat and they report an exceptionally good crop, though they have experienced much difficulty in securing sufficient help.

All lines of *manufactures* are reported to be very busy.

CONDITION OF PARTICULAR TRADES.

Building.—The building trades have been actively employed, and there is sufficient work to keep all branches busy. Builders' labourers are rather scarce.

Metal, engineering and shipbuilding trades.—Machinists and engineers are all well employed. Blacksmiths and horse-shoers are kept busy.

Woodworking and furnishing trades.—These trades are fully employed. Factories report plenty of orders on hand.

Printing and allied trades.—These trades are busy with no idle men.

Food and tobacco preparation.—On account of the warm weather the bakers and confectioners are very busy. Cigarmakers report a satisfactory season.

Miscellaneous.—Barbers have had a very active month.

Transport.—The trades engaged in transportation have all the work they can do, owing to the cheap rate season. Cab drivers, draymen and teamsters are fully employed.

Unskilled labour.—There is a scarcity of unskilled labour.

LONDON, ONT., AND DISTRICT.

Mr. Alex. Woonton, Correspondent, reports as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

The condition of the labour market is satisfactory, the general busy time in all trades continuing. The McClary Company is gradually getting its new shops in working order. The strikes of machinists, cigar-

makers and brick makers still continue, with no signs of settlement. A petition for an increase of wages has been presented by the attendants at the asylum for the insane, but no action has been taken in regard to it yet.

CONDITIONS OF PARTICULAR TRADES.

Building trades.—In all the different branches of the building trades employers are looking for help, and conditions are all that could be desired.

Metal, engineering and shipbuilding trades.—The strike of Leonard & Sons' machinists still continues with no signs of wavering on either side. A number of machinists from England arrived here, but when they found a strike was in progress would not go to work and some found work elsewhere. Moulders are in demand. Metal polishers and stove mounters are very busy.

Woodworking and furnishing trades.—At the car shops the car builders are very busy on repair work, and some departments are working overtime.

Printing and allied trades.—All classes of workers in the printing trades are busy, and there are no idle men in the city. The brickwork is about completed on Messrs. Lawson & Jones' new job office.

Clothing trades.—Tailors are slack at present. The officers of the local union for the next six months are: president, James Byrne; corresponding secretary, Jas. Hussey.

Food and tobacco preparation.—The cigarmakers' strike is still on, but a new union shop has started here, and others have enlarged their premises, giving work to a number of the strikers.

Miscellaneous.—The places of the striking brickmakers have about all been filled, and the Builders' Supply Company plant is running as usual.

DISTRICT NOTES.

Farm labour in this district is much in demand, and in some localities farmers are behind in getting in the hay and grain. Both the Grand Trunk Railway and the

Canadian Pacific Railway companies are doing considerable double tracking and switch-laying west of London.

ST. THOMAS, ONT., AND DISTRICT.

Mr. A. Roberts, Correspondent, reports as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

The condition of the labour market continued normal, and no noteworthy change occurred during the past month. There was a keen but limited demand for unskilled workers, and also for mechanics in a few lines. Railway traffic continued brisk and as a consequence a large class of workingmen in this line have had steady employment. No industrial disputes were recorded, and rates of wages are generally unchanged. Most of the retail merchants are closing their stores on Wednesday afternoon, in order to give their employees a half holiday during the months of July and August. The Thomas Bros. Broom and Brush Company also is giving its employees a half holiday on Saturday afternoon during the hot weather.

CONDITION OF LOCAL INDUSTRIES.

Harvesting is in full operation and the crops are up to the average. Millers report that the wheat crop is a heavier yield and a better sample than last year, with more favourable milling qualities.

All local *manufacturers* are very active and report an ample supply of labour, with the exception of the broom, brush and wooden ware factory, which is in need of experienced brush makers.

CONDITION OF PARTICULAR TRADES.

Building trades.—All classes of building mechanics are actively employed, but there is not a large demand for the season.

Metal, engineering and shipbuilding trades.—Metal workers continue in steady employment.

Woodworking and furnishing trades.—There is no changes reported in the woodworking line, all being actively employed. A temporary shut-down occurred in the

turning factory during the month for the purpose of installing a system of dust collectors, making the conditions more sanitary.

Printing and allied trades.—Printers report a normal month, and are active but not rushed.

Clothing trades.—Journeyman tailors are in the slack season, but report work as being fairly good.

Food and tobacco preparation.—Bakers and confectioners' trade is improved as a result of warm weather, picnics, &c. Butchers and meat cutters report normal conditions, as also do cigarmakers.

Miscellaneous.—Broom makers brush makers and laundry workers are very busy and in good demand.

CHATHAM, ONT., AND DISTRICT.

Mr. John R. Snell, Correspondent, reports as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

Labour conditions continue fairly good, there being but little change to note from last month. The Manson Campbell Manufacturing Company is enlarging its works and the William Gray & Sons Company is preparing the ground for an addition to its carriage factory. A great deal of civic work is going on, in paving, laying sidewalks, extending water mains, &c. The gas company also has a large number of men employed laying gas mains. Transportation is active and railroad men are busy. Wholesale and retail trade is normal. Contractors for the corporation and other work, aside from paving, are paying labourers 20 cents per hour for nine hours, so that labourers are receiving about equal wages with mechanics. There is no unrest in the labour market.

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—Farmers are busy cutting grain but complain of too much rain and a scarcity of farm hands.

Manufacturing is rather quiet in some branches at this time of the year, but few men have been laid off as yet.

CONDITION OF PARTICULAR TRADES.

Building trades.—Bricklayers, masons, carpenters and painters are all fully employed.

Metal, engineering and shipbuilding trades.—Iron moulders, machinists and engineers have plenty of work.

Woodworking and furnishing trades.—Carriage and wagon makers report work a little slack.

Printing and allied trades.—Printers and pressmen have plenty of work.

Clothing trades.—Journeyman tailors report work fairly good.

Food and tobacco preparation.—Bakers and confectioners have steady employment. Cigarmakers and tobacco workers are fairly well employed.

Miscellaneous.—Barbers and delivery men are busy.

Transport.—Railroad trainmen are all fully employed. Teamsters are exceptionally busy.

Unskilled labour.—There is a great demand for this class of workmen, twenty cents per hour being paid by contractors and builders.

WINDSOR, ONT., AND DISTRICT.

Mr. D. Mitchell, Correspondent, reports as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

There is great activity at present in all lines of trade, especially in the building trades. Some of the contractors have had to refuse work as they cannot get the men to do it. Owing to the scarcity of houses and the constant demand of new-comers there are more dwelling houses in course of erection than in any previous year. The Windsor Salt Company is spending \$30,000 in alterations and additions to its plant in order to keep up with the demand, and will have from 35 to 40 extra men employed all summer. Railway traffic continues very

heavy; the Canadian Pacific Railway has a large gang of men loading and unloading freight cars and boats almost continuously.

The teamsters who were receiving \$3.50 per day of nine hours asked for \$4 per day of nine hours. The contractors, all but one, and the city commissioners, agreed to pay the increase. All teams are working.

CONDITION OF LOCAL INDUSTRIES.

It has been a splendid month for the farmers, and they have taken full advantage of it. Most of them have all their hay in, and it was a good crop. The oats and corn are looking well. The principal crop is corn in this district, and if warm weather follows, this will be a good crop. There is a great demand for farm help.

The condition of all other local industries continues good.

The Windsor and Amherstburg Street Railway Company has its road completed and running to Amherstburg, a distance of 18 miles down the river front.

CONDITION OF PARTICULAR TRADES.

Building trades.—Men employed in the various branches of these trades are fully employed. Bricklayers, masons, carpenters, lathers and plasterers are all busy. Painters report trade fairly good for this time of the year, as there is not much of the new work ready for them. Plumbers and steam-fitters are rushed with work. Builders' labourers are all employed.

Metal, engineering and shipbuilding trades.—Iron moulders and machinists have all the work they can do. In the machinists' trade men are very scarce.

Woodworking and furnishing trades.—Carriage and wagon makers report having plenty of work.

Printing trades.—The printers have been very busy during the past month, and most of them have been working overtime.

Food and tobacco preparation.—Bakers, butchers, cigarmakers and tobacco workers are all fully employed.

Miscellaneous.—Barbers report trade being good. Hotel and restaurant employees

are working very long hours, on account of so many strangers being in the city at this time of the year.

Transport.—Railway men in the transport business have all the work they can handle. Longshoremen have had a busy month.

Unskilled labour.—Unskilled labour is in demand.

WINNIPEG, MAN., AND DISTRICT.

Mr. John Appleton, Correspondent, reports as follows :—

GENERAL CONDITION OF THE LABOUR MARKET.

All classes of labour continue to be well employed, the supply as well as the demand being greater than last year. Since the beginning of spring there has not been at any time any lack of employment. For a few weeks in May and June a congested state existed on account of the immigration movement, and some remained idle for a week, until they were brought into touch with employers through the medium of the employment agencies and immigration authorities. During the whole of July, however, there has been a steady demand for all classes of labour, and a very keen demand for skilled men in all local undertakings. Commercial conditions are exceptionally bright, although late reports would indicate that on an average the crops this year may possibly not equal those of the previous season. Labour troubles seem to have left this locality. Negotiations are proceeding in some cases for advances, which are being generally conceded.

Building is active, but limited by the supply of labour and material. During the latter part of June and early in July the employment of labour was interfered with by the operation of an alleged combine. It appears that several well-known contractors, through an agent, secured a contract from the whole of the local brickmakers, to the effect that they would supply only certain specified firms with their product. On the ground that this provision was not being observed, an injunction was obtained

requiring compliance with the contract. The injunction was in force for a period of two or three weeks, and in consequence work on many buildings was stopped for want of brick. About July 4 an appeal to the full Court of Manitoba to quash the injunction was sustained. The supply of brick became sufficient for all purposes, but the contractors whose work had been interfered with were not able to get the men to proceed, and are still, in consequence, in an embarrassed position.

Farm labourers, who generally avail themselves of cheap excursions from Eastern Canada about the middle of August, will find this year, that their services are hot in such great request. Last year it was estimated by the local government in Manitoba that fully 20,000 would be necessary. Inquiries at the department of Agriculture on July 30, did not result in securing any definite information. The arrival of an unusual number of settlers, who after their land breaking and home building will seek employment in the harvest fields, will to a very large extent fill the demand. The crop in Manitoba is not as heavy as last year, but that of the Northwest Territories is said to be quite equal to that of the previous season, and employment agents in Winnipeg are looking for men to send to assist the territorial farmers. On the whole not more than half of last year's supply of labourers for purely harvesting purposes will be required.

CONDITION OF PARTICULAR TRADES.

Building trades.—In the building trades skilled men in all lines are in demand. For unskilled labour there is no particular demand.

Metal, engineering and shipbuilding trades.—Really competent machinists or skilled men in any branches of the metal trades can get employment in Winnipeg.

Woodworking and furnishing trades.—All the woodworking factories are busy, and good men are in demand. There is supply enough of unskilled labourers.

Printing and allied trades.—Printers continue to be fully employed.

Clothing trades.—Custom tailors in many cases have placards advertising their need of assistance.

Food and tobacco preparation.—As the city develops, there is in the tobacco and food preparation a corresponding industrial development. Employment is steady, and good men are needed.

Miscellaneous.—In all classes of employment where experience and skill is necessary there seems to be a strong demand, but where no skill is required the market is fully met.

BRANDON, MAN., AND DISTRICT.

Mr. S. P. Stringer, Correspondent, reports as follows :—

GENERAL CONDITION OF THE LABOUR MARKET.

Trade and labour conditions are practically unchanged from last month, the demand for labour continuing good. There is exceptional activity in the building trades, and in all other branches there is evidence of steady employment. The Canadian Pacific Railway Company is giving employment to a large number of men, who are required to carry out the improvements contemplated this season along the main line from Willipeg to Moosejaw. Large gangs were at work between Brandon and Broadview, and although large additions were made to the ranks of labour, chiefly of new arrivals from the old country, yet there are very few idle men to be found. There has been no addition made to industrial establishments, but all are in active operation, and working full time. Considerable improvements are being carried out by the city in laying cement sidewalks and other public works. Great activity is evidenced in the milling and lumbering industries, which are running night and day, with a full staff of employees. Transportation companies and banks report business very active. Wholesale and retail merchants report trade exceptionally good, and large shipments of merchandise are

being shipped throughout the district. There were no changes in rates of wages, though several railway unions have made a demand for a new schedule in rates, which are being considered by the Canadian Pacific Railway authorities. There is no unrest in the labour market at the present time.

CONDITION OF LOCAL INDUSTRIES.

The recent rain and other favourable conditions have ensured a good harvest for 1903. In no previous year have the crop reports been so encouraging as they are at present. Reports from all the Brandon district go to show that the crop is farther advanced than it was at this time last year. The weather has been perfect, and indications are such as to almost ensure an unprecedented yield of grain. The straw is short all over the district, which will save considerable labour in harvesting the grain. The heads are also filling out well, but it is impossible at present to say what the yield will be, as it will largely depend on weather conditions later on.

There is great activity in the *lumber trade* this season. One local firm has just received a drive of logs, floated down the Assiniboine river, of five million feet. The city lumber merchants report business better this season than in any previous one, owing chiefly to the influx of newcomers throughout the city and district.

Canadian Northern Railway construction work is being pushed forward from Grand View, and large gangs of men are at work under contractor Streval, who says that the line will reach Kanisak by September. This is an extension of the main line of the Canadian Northern west of the Riding Mountains. There are eight hundred men and fifty teams employed.

CONDITION OF PARTICULAR TRADES.

Building trades.—Bricklayers and masons, carpenters and joiners, lathers and plasterers, are very busy. Painters, decorators and paperhangers report trade excellent. Plumbers are fully employed. Steam-

fitters, stonecutters and builders' labourers report trade good.

Metal, engineering and shipbuilding trades.—Machinists are exceptionally busy, but there are no openings at present. Boiler-makers are working overtime, and the supply of men is not equal to the demand. Jewellers and watchcase makers report trade good.

Woodworking and furnishing trades.—Upholsterers and patternmakers report trade satisfactory.

Printing and allied trades.—These trades report trade good.

Clothing trades.—All branches report being fairly busy.

Tobacco and food preparation.—Bakers, confectioners, butchers and meat cutters report trade very good. Ice drivers report business active.

Leather trades.—A little slackness prevails.

Miscellaneous.—Barbers are very busy. Clerks and stenographers find business good, but there are no openings. Laundry workers are doing a good trade.

Transport.—Men engaged in this line having regular runs are busy, but spare men are a little slack at present. Men employed on construction work are making good time. Freight handlers are very busy.

Unskilled labour.—There are very few idle men in the city. Farm labourers find no difficulty in securing employment at good wages, and owing to the construction work on railways every available man finds employment.

DISTRICT NOTES.

Business conditions throughout the district are very satisfactory. The extension of railway branches opens up new districts, and will have a good effect on trade conditions. Several of the elevator companies are building new elevators on the branch lines, in anticipation of doing a good business this summer. The railway companies are also making preparation to ensure better transportation facilities than hither-

to. Every town and village gives evidence of prosperity, in building additional stores and dwelling houses.

CALGARY, N.W.T., AND DISTRICT.

Mr. S. D. Milliken, Correspondent, reports as follows :—

GENERAL CONDITION OF THE LABOUR MARKET.

The past month has been noticeable for the unsettled state of the labour market.* In addition to the disturbances previously reported upon, some 40 Galicians working on the sewers struck. The men demanded \$2.00 for nine hours or \$2.25 for ten hours. Up to the present the men receive \$1.75 for a ten-hour day. The men state that the city pays \$2.00 per nine-hour day, and that they wish the same.

There is a movement on foot to establish a permanent board of conciliation, to deal with all local labour disputes, but from present indications such a board, unless possessing powers under legislative enactment, would be of little use, as the feeling here seems to be on the employers' side to control the labour market, and that of the labour organizations to fight for what they claim to be their rights.

Owing to the large number of men that are working for ranchers, putting up the season's hay crop, few men can be hired to do labouring work, and in many instances trouble is experienced in securing sufficient men for harvesting the hay crop, even at \$35 per month with board.

A by-law has been carried by the rate-payers giving power to a company to put in a gas plant, the city to have the right to buy out the company after 10 years. This will give work to a large number of hands, and make openings for plumbers and gas-fitters as soon as the plant is established.

The rush of immigration continues, many large cattle outfits coming in. Much inconvenience is experienced owing to inability to get the necessary lumber for building

purposes. The local lumber dealers cannot secure lumber fast enough to meet the demand, and often a car is delayed in transit owing to the rush of freight.

CONDITION OF PARTICULAR TRADES.

Building trades.—Lathers and plasterers, stonemasons and painters, are busy. Plumbers are well employed.

Woodworking and furnishing trades.—Machine woodworkers are in demand.

Transport.—All railway employees are steadily employed.

DISTRICT NOTES.

All the towns, both north and south of here, are rapidly growing, and a good demand is in evidence for mechanics and labourers.

Edmonton is especially busy, and carpenters, bricklayers and others are kept busy. Some trouble is experienced in meeting the demand for labour.

ROSSLAND, B.C., AND DISTRICT.

Mr. R. A. Laird, Correspondent, reports as follows :—

DISTRICT NOTES.

The Kootenays district of British Columbia is in the early stages of an important industrial revival, the effects of which are already visible in the demand for skilled mine workers. This is the direct outcome of the recent decision by the Federal government to subsidize Canadian lead miners to the extent of \$15 per ton. From the local viewpoint, the decision was an exceedingly happy one, and it is confidently predicted that the stimulus thereby imparted to the industrial life of the country will, in the course of a few months, entirely justify the action taken. The Canadian lead industry—which means the silver-lead mining industry of the Kootenays—has laboured for more than two years under handicaps that reduced production to a minimum, and closed down two-thirds of the mines, while the balance were left with just sufficient crews to prosecute development work or extract the ores carrying

*A full account of the settlement of the carpenters' lock-out will be found in a special article in the present issue of the *Gazette*.

high silver values. The effect of the subsidy is to add sufficient to the value of every average ton of silver-lead ore mined to make up to the miner the amount lost through the difficulties referred to. The result is that mines throughout the silver-lead producing camps are generally preparing to resume operations. The change from widespread inactivity to general activity cannot be brought about in a few days or weeks, but the indications are that within three months the appearance of every silver-lead camp will be entirely altered as the result of the operation of the subsidy. Where there are 200 miners employed now it is estimated that 1,000 will soon be engaged, and the increased market which these men, drawing the best wages paid to any class of workmen in the west, will afford for every class of Canadian producer can scarcely be estimated. Then the Canadian smelters are increasing their crews as rapidly as experienced and reliable men can be secured. The country has been drained to a large extent of the men formerly engaged in mining and lead smelting, and the influx of this class will be one of the first features of the amended conditions. The Kootenays, it is said, are facing at least five 'fat years,' and the expectation is that at the expiry of this period the lead market will have changed, and the lead mining industry will be firmly established.

In other respects conditions are quite substantially improved throughout the country. There is a demand for miners, lumbermen and skilled labourers in the building trades, while common labour is also at a premium.

NEW WESTMINSTER, B.C., AND DISTRICT.

Mr. George Hargreaves, Correspondent,
reports as follows :—

GENERAL CONDITION OF THE LABOUR MARKET.

The satisfactory condition of the labour market reported last month still continues. There is a demand for men in the several lines of the building trade. This season

has been an exceptionally busy one in the building trades, a number of new residences being built, and a large amount of repair work being carried on. The remaining portion of the new Ladner road is to be completed, and a large number of men employed. The factory workers of the Royal City mills, who went out on strike on June 1 for a nine hour day with the same rate of wages as for ten hours, decided on July 14 to call off the strike. Some of the men have returned to work, but many have found employment elsewhere. Some of the former employees have decided to build and operate a factory of their own. With this end in view, a joint stock company has been formed, and a site secured on lease from the city for 30 years. The fishermen's strike was declared off on July 15. The Japanese fishermen decided to fish on the terms offered by the canners, viz., 15 cents and 14 cents per fish. The action of the Japanese fishermen practically decided the dispute. About 2,300 licenses have been issued to fishermen up to the present. Owing to the high water in the Fraser river, work on the new bridge was stopped for some time during the early part of the month; now that the water has gone down, the contractors have increased their gangs, and are making every effort to complete the piers.

CONDITION OF LOCAL INDUSTRIES.

Fishing.—A large number of men are now engaged in the fishing industry, but as yet the run of salmon has not commenced.

Lumbering.—The loggers have decided to close down all the camps for forty-five days after August 1, to provide for a recovery of the overcrowded market. There are a hundred and twenty logging camps in operation, employing about three thousand hands, with fifty million unsold logs, according to reports, in the water. The members of the Loggers' Association have decided to close camps.

Railroad construction.—Work is plentiful, and there is employment for men accustomed to construction work.

VANCOUVER, B.C., AND DISTRICT.

Mr. George Bartley, Correspondent, reports as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

Labour has been very unsettled during the month, principally on account of strikes. At the end of the month, however, prospects seem more promising, as the factory woodworkers' strike was declared off, and there were no others on or in contemplation, so far as could be ascertained. The building season is in full operation, and there is employment for mechanics, though this is only temporary. A scarcity of labour every year at this time follows the starting of the salmon fishing season in the bay and at the Fraser river, when generally a large number of mechanics as well as unskilled workers go over to the river for a few weeks to fish for the canneries. The scarcity thus caused is more than usually felt, because of the fact that quite a number of mechanics left the city during the late disturbance in the labour market. At present there are somewhere over 400 carpenters in the city working on actual construction work. This does not include those engaged at bridge framing along the water front or bench work in the mills. Business is active in all lines with local dealers, and merchants are looking forward to a good fall trade now that the local labour troubles have terminated. Trade with the interior, especially with the Kootenays, is likely to revive considerably, as the result of the granting by the Dominion government of a bounty on lead. Advices show that arrangements are being made on a large scale for the opening up of about a dozen valuable mines. A feature in the grocery trade has been the receipt of the circular sent out by the vegetable and fruit cannery combine in Ontario—the Canadian Cannery Co., Limited—an institution comprising canneries with headquarters at Hamilton, Ontario. The circular requests grocers to pledge their support to the combine, by refusing to purchase from all others.

The following is a statement of some retail prices prevailing during the month: Fresh eggs, 40 cents a dozen; ham, 16 cents per pound; fresh butter, 30 cents to 35 cents per pound; potatoes (new), \$25 a ton; potatoes (California), \$2 per cwt.; cabbage, 2½ cents a pound; new carrots, 2½ cents; corn, 50 cents a dozen; Okanagan, B.C., flour (Hungarian brand), \$4.80 a barrel.

CONDITION OF LOCAL INDUSTRIES.

Fishing.—The Sockeye salmon fishing is now on. The first of the 1903 pack was started on Thursday, the 16th instant, when the Scottish Canadian put up sixteen cases, and the Richmond five. A big run is expected, and all attention is directed towards the Fraser river.

Lumbering.—On July 3 the mill owners refused to supply lumber to the local builders until the factory workers returned to work. Fortunately, however, these conditions only lasted a few days. Had it continued, about 1,400 men would have been idle. A movement had just been started by the building trades to go out on strike in sympathy with the striking factory workers when the strike was declared off in order to prevent a general strike.

CONDITION OF PARTICULAR TRADES.

Building trades.—A local firm of plumbers announced to their employees at the beginning of the month that they would not recognize the 'card system' as put in force by the Building Trades Council. The firm asserted that they would recognize the Plumbers' Union and pay the union scale, but objected to the 'card' because of its alleged discrimination against fair shops. The contention was that the firm was forced to stand responsible for every contractor that works on a building, as the union men would walk out should any workman on the job fail to produce a card. In a case where a job was fair at the time of taking the contract—but where any other contractor got into trouble during the building operation the boss plumber would be unable to fill his own contract. The trouble was set-

tled by the plumbers withdrawing from the Building Trades Council.

Printing and allied trades.—Printers report work good. A convention will be held shortly of representatives from all over the province.

Transport.—There is no demand for railway men, as the train crews are steady and permanently employed. Teamsters and expressmen are busy, and there is some demand for good men. The cartage service inaugurated by the Canadian Pacific Railway Company is reported unsatisfactory to the merchants. The minimum charge is 25 cents, which is considered too high, and wholesale grocers say that they are at a disadvantage as compared with Victoria dealers, where these charges are not in vogue. They claim that a 10 cent minimum charge is sufficient, and have petitioned the general freight agent of the Canadian Pacific Railway Company to this effect.

DISTRICT NOTES.

Van Anda.—Marble Bay is installing a 75 horse-power hoist. Only a few men, however, will be employed until the next level is reached. Copper Queen mine is sinking a wing on the 500-foot level; 18 men are at work.

VICTORIA, B.C., AND DISTRICT.

Mr. J. D. McNiven, Correspondent, reports as follows :—

GENERAL CONDITION OF THE LABOUR MARKET.

Labour generally was well employed during the month, with exceptions here and there. The increased cost of lumber, together with the carpenters' strike early in the season, has had a bad effect on the building trades, and many carpenters are out of employment. The city is providing work for a large number of men on civic improvements, about three hundred extra men being on the pay roll this month. The miners' strike at Ladysmith and Cumberland is practically off. Many of the white miners still refuse to go to work at the company's terms, but both the mines

are being operated, principally by Chinese and Japanese. The Coal Mines Regulation Act prohibits the employment of Chinese in coal mines, and the government is being urged to proceed against the company. No action, however, has been taken as yet.

CONDITION OF LOCAL INDUSTRIES.

Intelligence has been received concerning the two sealing schooners despatched from here last year to hunt seal off the Falkland Islands. The result has been very gratifying to the promoters, one schooner reporting a catch of 2,109 skins, and the other 3,571 skins for the year's work.

A deputation from the Loggers' Association waited on the Premier on the 7th instant, and requested that the government suspend the operation of the law for six months against the exportation of logs, as there was no sale for logs on this side of the line. The loggers claim they are in distress owing to lack of demand. No action has yet been taken by the government.

A new sash and door factory is being added to the Saywood mills.

CONDITION OF PARTICULAR TRADES.

Building trades.—There is no demand for workmen in any of the different branches of the trade. Bricklayers and masons are fairly well employed. Quite a large number of carpenters and joiners are idle, and some have had to seek employment in other places. Painters and decorators report employment fair, and work good for the season. Plumbers are fairly well employed. There is no work for stonecutters.

Metal, engineering and shipbuilding trades.—Iron moulders and machinists report employment for all. Electrical workers, linemen and blacksmiths are nearly all employed. Boilermakers and iron shipbuilders had a busy month. Shipwrights and caulkers report trade as dull.

Printing and allied trades.—Trade was somewhat duller than usual, yet there was fair employment. The working hours for job printers have been reduced from 50

to 48 per week, the rate of pay, \$20.00, remaining unchanged.

Clothing trades.—Journeyman tailors report trade as very dull, while garment workers are very busy.

Food and tobacco preparation.—Bakers are well employed. With cigarmakers trade has greatly improved. Several shops found difficulty in getting workmen to turn out a couple of rush orders.

Leather trades.—Harnessmakers are all employed.

Miscellaneous.—Barbers report trade better than it has been. Clerks and delivery employees are fully employed.

Transport.—Steamboatmen, longshoremen, street railway employees, hack drivers and teamsters all report favourable conditions.

Unskilled labour.—There is plenty of work for all in this class.

NANAIMO, B.C., AND DISTRICT

Mr. A. E. Spencer, Correspondent, reports as follows :—

GENERAL CONDITION OF THE LABOUR MARKET.

The general condition of the labour market in this district has improved a little during the month, but is still quiet, there being no demand for unskilled labour, and very little doing in the building trades. In the lumber industry, while the sawmills are working steadily and in some cases overtime, in the woods there is a talk of a shut-down for six weeks in the lumber camps, commencing on the 1st of August, in consequence of the accumulation of logs. In the coal-mining industry work has been resumed at Extension mine after four months' strike. The situation at Cumberland remains unchanged. In Nanaimo the

mines are working to their full capacity, and a mine that was flooded a year ago has been pumped out and re-opened, and is to be thoroughly prospected. This will give work to a few more men, but there are plenty of men here now to more than supply all demands for some time to come. In the quartz mining sections of the district prospects are improving on Texada island and the Mount Sicker district, but on the west coast matters are very quiet, with very little doing. There is nothing doing in the fishing industry at this time of the year.

CONDITION OF PARTICULAR TRADES.

Building trades.—In these trades there is very little new work going on. Bricklayers and masons report nothing doing. Painters and paperhangers report business quiet.

Metal, engineering and shipbuilding trades.—Blacksmiths and carriage makers report business as fair to good, but plenty of men to fill all demands.

Miscellaneous.—Teamsters and expressmen report work as very dull for the time of the year.

Unskilled labour.—There is very little work for unskilled labour outside of the regular civic improvements, which are not on a very large scale this year.

DISTRICT NOTES.

The strike at Extension mines was settled in the first part of the month, and the works have nearly all been opened up again. The men lose 25 cents on stringers, getting 75 cents instead of \$1.00, and have to pay 50 cents more per ton for house coal, viz., \$1.50. The men had to sign a contract for two years, individually, not to strike, and it was agreed that the union men would not be discriminated against.

REPORT OF BRITISH COLUMBIA ROYAL LABOUR COMMISSION.

THE Commission appointed to investigate recent industrial disputes in the province of British Columbia forwarded its report to the Honourable Sir William Mulock, Minister of Labour, on the 8th

July.* On account of the time necessary for the printing of this report, it was not

* For an account of the appointment of this Commission and the progress of its work, see the *Labour Gazette*, Vol. III., of May, p. 886, June, p. 973, and Vol. IV., July, p. 77.

laid on the Table of the House of Commons during the month, but it was expected that it would be presented by the minister early in the month of August.

The report is a lengthy one, covering about 170 typewritten pages of foolscap. The evidence, which is submitted with the report, covers over 2,000 typewritten sheets of foolscap, and there are also some 100 exhibits. The report is divided into chapters, Chapter I being introductory; Chapter II deals with the strike of the United Brotherhood of Railway Employees on the Canadian Pacific Railway, and the sympathetic strikes connected with it; Chapter III is on strikes in the coal mines of British Columbia during the present year; Chapter IV, a detailed account of the strike at Ladysmith; Chapter V, a similar account of the strike at Union (Cumberland), and Chapter VI, general conclusions.

Introductory.

In the introductory chapter it is stated that the time occupied by the Commission in taking evidence was from the 4th of May to the 14th of June, inclusive; that during that time sittings were held at Victoria, Vancouver and Nanaimo, and in the mining towns of Ladysmith, Extension and Cumberland, and that over 100 witnesses in all were examined. Mention is also made of the fact that the parties to the various controversies under investigation were represented by able counsel, who much facilitated the work of the Commission.

Strike of the U.B.R.E. and Sympathetic Strikes.

The report deals in considerable detail with the circumstances and conditions leading up to the strike of the United Brotherhood of Railway Employees on the Canadian Pacific Railway, which commenced at Vancouver in February of the present year, and with the progress of this strike and the methods adopted by the several parties in furthering their respective ends. This part of the report is based

largely on documentary evidence, each of the parties to the dispute having filed with the Commission all correspondence and other papers relating in any way to the strike, and the Commissioners having drawn inferences of fact therefrom. The United Brotherhood of Railway Employees is shown to be a secret society, bound together by a strong oath, an organization with headquarters in San Francisco, and different from a regular trade union as generally understood, inasmuch as the several divisions have very little absolute control over their own affairs, but are subject almost entirely to the order and direction of the executive head of the order. It is pointed out that the purpose of the organization is to include all classes of employees on a railway, irrespective of the particular kind of work which they have to do, or of the fact that they belong to other railway organizations.

Nature and Progress of Strike.

A kind of secret warfare between the Canadian Pacific Railway Company and the United Brotherhood, existing over a period of some months, is disclosed, and is shown to have culminated in the strike declared on the 27th February. In this connection, attention is paid to the conditions of employment of the clerks on the Canadian Pacific Railway, and to methods adopted by the secret service department of the company. A startling disclosure is made in regard to the chief organizer in Canada of the United Brotherhood. It is shown that while acting in this capacity he had sold his services, along with confidential letters received from the president of the order to the railway company, and acted as one of their secret service officials, while he still continued to be chief executive officer of the order for the Dominion.

Considerable attention is devoted to the work of George Estes, president of the order, both as to his plans for the furtherance of organization in Canada, and his management of the strike on the Canadian Pacific Railway after the strike had been

declared. Estes is shown to have exercised an all but absolute control over the movements of the striking forces, and to have directed the entire strike. Telegrams and communications sent by him by way of command to the strikers at different points are reproduced from the originals, as are also particular communications which passed between the chief representatives on both sides.

Methods Adopted to Win Strike.

The report classifies the different methods adopted by the strikers to obtain recognition of the order, and win the strike, and in this connection reveals a startling condition of affairs. In the first place, it is shown how the strike was extended beyond Vancouver, so as to embrace all members of the order in Canada, as well as organizations not in any way directly affiliated, but which were induced to come out in sympathetic support of the strikers. Attempts to tie up the steamship service of the Canadian Pacific Railway on the Pacific and the Kootenay lakes, to bring about a stoppage in the supply of coal, and to effect a gigantic boycott in connection with the products of all concerns which even remotely might be brought into business connection with the Canadian Pacific Railway, are detailed at length. The report also deals very fully with the treatment of non-union men and 'scabs,' in which connection the practices of picketing, blacklisting, molesting and intimidation of innocent parties are treated.

This part of the report concludes with an account of the attitude of other railway organizations towards the United Brotherhood, and the attitude of certain international unions toward their locals in Canada which had given sympathetic aid to the strikers. One or two cases of violation of their contracts by unions are cited, as also are cases of violation by local unions of their constitutions. The account of the United Brotherhood strike concludes with a statistical summary, indicating the numbers affected by the strike.

Disputes in the Coal Mines of British Columbia.

Chapter III, which deals with the disputes in the coal mines of British Columbia during 1903, points out that strikes have occurred during the present year in all of the local mining properties of importance operated in British Columbia, and that in all cases local unions of the Western Federation of Miners have been involved. The first strike was that of the employees of the Crow's Nest Pass Coal Company at Fernie, Michel and Morrissey, which commenced on February 11, lasting up to the 31st March, and involving about 1,500 men. The second strike was that of the coal miners in the employ of the Western Fuel Company at Nanaimo; commenced on the 16th February and terminated the 26th of that month, affecting between 600 and 700 employees. The third strike was that of the employees of the Wellington Colliery Company at Ladysmith; commenced March 12, affecting about 800 employees; and the last, a strike in the mines of the Wellington Colliery Company at Union (Cumberland), commenced on May 2, in which strike between 300 and 400 miners were affected. Mention is made of the causes of all of these strikes, and all of their main features. The two last mentioned are the subjects of detailed consideration in separate chapters.

The Strike at Ladysmith.

Chapter IV, which deals with the strike at Ladysmith, takes up the facts and circumstances connected with this strike at some length. The manner in which the local organization of the Western Federation of Miners was effected at Ladysmith, and the strike created, are outlined, and portions of the evidence relating to these matters quoted at length. The Commissioners conclude that this strike was brought about, first, by an intrigue whereby the Western Federation of Miners, in an effort to assist the United Brotherhood of Railway Employees strikers on the Canadian Pacific Railway, sought to tie up the

Dunsmuir mining properties on Vancouver Island, which were, at the time, supplying the Canadian Pacific Railway with coal. In coming to this conclusion, the Commissioners base their findings on a review of the facts and circumstances existing at the time, and the nature of the evidence given before the Commission. Telegrams are printed, giving the words of the requests on the part of the United Brotherhood for the assistance of the Western Federation, by way of tying up the supply of coal, and the orders of the executive officers having this purpose in view. Misstatements and contradictions on material points in the evidence of interested parties, as given before the Commission, and the hasty and secret manner in which organization was effected at Ladysmith, the nature of the obligations incurred by the Western Federation of Miners at the time, the absence of any general desire among the miners at Ladysmith for organization, or dissatisfaction with the wages or conditions of their employment, are all cited at length as reasons on which the opinion of the Commissioners is based. This part of the report concludes as follows: 'The trouble at Ladysmith would never have taken place but for the strike of the United Brotherhood at Vancouver. It originated in the intrigues of a few men, who, in part consciously, in part unwittingly, allowed themselves to be used as instruments to serve the desires and ends of a handful of dictators residing in the United States, and who are not in any way amenable to the laws of this country, or responsible to those of its inhabitants whom they succeed in enlisting in the forces over which they hold sway.'

Attention is also directed to the arbitrary and inconsiderate dealing on the part of the management of the Wellington Colliery Company with its employees, and of the manner in which they were required to give up residence at the mines at Extension and reside at the town of Ladysmith; commenting on this, the Commissioners say: 'It is just such arbitrary and inconsiderate dealing that antagonizes employees to their employers, and is at once

a provocation and justification for the formation of unions.'

The Strike at Union.

The strike at Union is the subject of Chapter V. As in the case of the strike at Ladysmith, this part of the report reviews at considerable length the manner in which the organization was effected among the miners at Union, and the strike brought about, and the conclusion is come to that this strike was also the result of an intrigue, in which the Western Federation of Miners played a most prominent part. It is shown that officials of this organization were guilty of deception in dealing with officers of local unions, who should have possessed their utmost confidence. It is also shown that the Western Federation of Miners were prepared to organize the Japanese and Chinese labourers in the Dominion to effect their purpose, and that the chief representative of the Federation in Canada did not respect his oath as it should have been respected, in giving evidence before the Commission. Concluding this part of the report, the Commissioners say: 'As in the case of Ladysmith, an explanation of the cause of the strike at Union is to be found rather in the differences existing elsewhere at the time than any real feeling of dissatisfaction in regard to the conditions of their employment among the miners at Union. . . It was the result of a carefully contrived and skillfully executed intrigue on the part of persons acting as part of, or in connection with the executive of the Western Federation of Miners at Denver, and which, but for the action of this executive and its members, would not have taken place.' This part of the report also comments at some little length on the neglect by the Western Federation of Miners of those of its members who came out on strike, and were subsequently subjected by extreme want to the severest hardships.

Recommendations of the Commission.

Chapter VI, of the report, which is entitled 'General Conclusions,' is of some

length, and is undoubtedly the most important part of the report. The problems to which the relations of organized labour and organized capital have given rise, and more particularly the matter of industrial disputes and questions incident to them, are carefully reviewed, and the rights and duties of the respective parties in relation thereto set forth.

Relation of parties to disputes.

The rights and obligations of employers and employees is the first subject to be treated, and the suggestion is made that much good could be gained if these rights and the relations of parties to strikes and lock-outs were clearly set forth in a code. The right of workmen to combine is defended, but the sympathetic strike, the boycott, intimidation, blacklisting and picketing as commonly practiced are condemned. It is asserted, as a fundamental right, that every man shall choose for himself whether he shall belong or not to a union, and that whether he belongs or not he may work without being insulted, molested, intimidated or oppressed by any person or union whatever. Tried by this test, it is maintained that the sympathetic strike, as declared on account of the employment of non-union labour to take the place of other strikers, is irrational and wrong. Other kinds of sympathetic strikes ought also to be suppressed.

The strike for recognition.

The strike for recognition is dealt with at some length, and in this connection it is pointed out that such a strike cannot be regarded as inherently wrong, and that so far as it is merely an assertion of the right to make a collective bargain it is a natural outcome of the present stage of industrial development. 'If compelled to contract for himself alone, says the report, 'a modern workman would generally have to deal with a purely mercenary organization, which is in a position to take advantage of his fellow-workmen's necessities, in order to compel him to accept terms which a union, dealing on his behalf, might be

justified in refusing and able successfully to reject. The right view of this matter seems to be that the strike for recognition—that is, a strike to declare for a collective bargain,—should not be declared unlawful, but that it is specially incumbent on the authorities, when such a strike takes place, to see that no illegal or criminal methods are used to reinforce it.' It is pointed out that the best way for unions to get recognition is by showing employers by experience that it is to their advantage to deal with them as such, and to leave no doubt in the minds of employers that they appreciate the obligation of the contract.

International Organizations.

The question as to how far the joining of international organizations by Canadians ought to be sanctioned or interfered with is also considered, both the advantages and disadvantages of such relationship being outlined. The chief objection pointed out is the liability of Canadian workmen to interference by the officials in matters of contract, and in settlement of differences with their employers. In this connection, it is stated that if parliament would declare that, notwithstanding anything contained in the constitution or in the rules of the international bodies, any agreement arrived at by an employer with his employees in settlement of a dispute, should be valid and binding, the most formidable objection to these bodies would be removed.

Certain Organizations not Trade Unions.

The report draws a sharp line of distinction between what it refers to as a legitimate trade union and 'a class of so-called union, which is not really a trade union at all, but a secret political organization.' The primary object and common end of this class of organization is alleged to be to seize the political power of the state for the purpose of confiscating all franchises and natural resources without compensation, and to this class the report assigns the American Labour Union, the Western

Federation of Miners and the United Brotherhood of Railway Employees. Referring to these organizations, the report says: 'These three, as already stated, are in confederation with each other, the two latter being affiliated with the former, and as we have just seen, their leaders were engaged in a conspiracy to sweep all the employees of the Canadian Pacific Railway into the United Brotherhood, and all coal miners into the Western Federation, and no doubt with a view to being able to stop all transportation and all mining whenever it might appear expedient in the advancement of the common end.'

Should be declared illegal.

Attention is drawn to the nature of the control which the executive heads of these organizations are, or may come, in view of the constitution or existing or proposed amendments to exercise over all members wherever located. After referring to these matters, the report continues: 'It is obviously against the public interest that any body of Canadian workmen should be subject to be called out on strike by a foreign authority, over whom neither our legislatures or courts can exercise any control, and that, whether they have any grievances against their employers or not. Whether the wheels of Canadian industry shall run or shall rust ought not to depend upon the decrees of a secret council at Denver.' The report recommends that these organizations should be specially declared to be illegal, and reasons are given in some detail for the opinion of the Commissioners on this point. The special reasons assigned for parliamentary condemnation of these organizations is that such a step might serve to stop the distribution of their 'incendiary and scurrilous literature.' Numerous examples are cited in the report of the kind of matter which is periodically put forth. After citing a number of examples in this connection, the Commissioners say: 'We think then, that legitimate trade unionism ought to be encouraged and protected, and that organizations of the class just dealt with ought to

'be prohibited and declared illegal, and that there ought to be a strict enforcement of the law relating to the administration of voluntary oaths.'

Incorporation of Trade Unions.

The Commissioners suggest that provision be made for the incorporation of trade unions with a model constitution, and to protect such unions they propose that it be made an offence for an employer to discriminate against or discharge any member of an incorporated union for the reason only that he is or intends to become a member of such union. Objections sometimes raised to incorporation are discussed, and methods suggested whereby it is thought these objections could be fairly met. It is also stated that incorporated unions should be given the right to use the union label on the products of their manufacture.

The Unfair and 'Scab' List.

The publication of the unfair or 'scab' list is declared to be wrong in principle, and as tending to a breach of the peace, and arguing a contemptuous indifference and a high-handed attack upon the rights of others.

Proposed Strike Legislation.

The Commissioners state that they think the best method of minimizing the danger of strikes and lock-outs by legislation would be found in compelling publicity at the earliest stage of the trouble. In this connection, a definite proposal is made, which may be quoted at length:—

'Where the other party is not attempting to change the terms or conditions of the employment no strike or lockout should be allowed except upon giving at least 30 days notice (some of the unions prescribe 3 months), and the intending strikers or employers should be compelled to file a sworn statement fully and accurately setting forth the reasons for the intended strike or lockout in the office of the registrar of the Supreme Court of the province, and of the Minister of Labour at Ottawa, at least 3 weeks before the day fixed for the strike or lock-out. The statement should also be served upon the opposite party who should be required to file a sworn answer thereto within 10 days of its receipt. On the other hand, where the other party attempts to change the terms and conditions of the employment, provision could

be made, requiring statements to be filed either before or after the strike or lock-out takes place according to the nature of the case. In this way the press and the public will at once become authoritatively informed by both sides of their position at the outset of the trouble, and public opinion will at once begin to act upon the parties, and no doubt in many cases, before the day fixed for the strike or lock-out arrives, better counsels will prevail. It would also afford an opportunity for settlement by means of conciliation or arbitration before the parties come to arm's length.

Boards of Conciliation.

The establishment of boards of conciliation is also mentioned as a source likely to go far in the avoiding of strikes and lock-outs, and the adoption of some such plan is urged upon the larger industries generally.

Compulsory Investigation.

Compulsory investigation is also mentioned as a means of preventing disputes and terminating existing troubles, and in this connection it is pointed out that the Commission itself was a large feature in hurrying the railway strike to an end.

Compulsory Arbitration.

As to compulsory arbitration, it is mentioned that the weight of opinion as expressed before the Commission was opposed to it, and the Commissioners state that while they do think such a law applying to disputes and industries generally would meet with general approval, there are special cases in which it would seem to be a necessary final resort.

In the case of public service undertakings, such as railways, telegraphs, telephones, steamships, the supplying of power, water and light, and particular industries such as coal mining, the Commissioners think that, notwithstanding the objections that could be raised to compulsory arbitration, that mode of settling disputes ought to be resorted to whenever a strike or lock-out has reached such dimensions as to seriously affect the public, and after all other means have been exhausted or would appear to be of no avail. It is suggested that the Governor in Council should be vested with authority in these cases to notify the

parties that unless the dispute is settled by a date to be fixed, it should be referred to a court, which shall have power to summarily investigate and try the same, and give a decision and award, which shall be binding for a period not to exceed one year. This jurisdiction should not be open to be invoked by either party, and should only be exercised by the Governor in Council whenever it appears that the strike or lock-out has reached, or is likely to reach such dimensions, or has lasted or is likely to last so long as to seriously affect the general welfare of the public. In short, that the only ground on which the jurisdiction should be exercised is that of public necessity.

Labour Leaders.

The Commissioners direct the attention of trade unionists to the obligation placed upon them to see that in the selection of their leaders men of character and ability are chosen. The facts disclosed before the Commission, wherein the purchasability and deception of certain leaders was made manifest, being pointed out as the occasion for the remarks made in this connection.

Concerning Foreign Interference.

In connection with the question of how far there should be legislation directed against foreign interference with Canadian workmen, it is pointed out that the evidence presented two classes of interferences, one, that of procuring and inciting to quit work by the foreign agitator in person, and the other the case of officials of international or other organizations who remain in a foreign country, but who procure and incite by means of other officials in Canada, and who assume the control and direction of Canadian workmen until the termination of the dispute. The Commissioners state that they think it is necessary for parliament to interfere in the direction of making it an offence for any person not a British subject, who has not been resident in the province for at least one year, to procure or incite any employee

in Canada to quit employment without the consent of the employer, or for any person in Canada to communicate in any way the contents of any order or request by persons ordinarily resident without Canada, having in view the bringing about of a strike in this country. The wanton violation of contracts is also mentioned as an evil that it is necessary to penalize. It is stated that the older unions, for the most part, show a commendable appreciation of their obligations in this regard, but that some of the recently organized bodies have shown little or no such appreciation.

Hours of Labour.

The report concludes with a recommendation as to the shortening of the hours of labour. 'In these days,' say the Commissioners, 'when the human energies are

strained to their utmost amid whirling dust and machinery, long hours are a crime against nature. The machine should be the servant of man, and not man the slave of the machine. One of the most legitimate modes in which a legislature can aid in improving the condition of the workmen is by the shortening of hours. Of course this ought to be done gradually, and after carefully taking into account the conditions of the particular industry in other countries so as not to transfer it elsewhere or drive it out of our own country. If it could be brought to pass that the workman would have to work only long enough so as to make his work a pleasureable exercise, instead of an exhausting toil, and at the same time secure a comfortable living, society will have advanced a long way towards the millenium.'

THE RAILWAY LABOUR DISPUTES ACT, 1903.

ON the 10th of July the Governor General gave his assent to the 'Act to aid in the settlement of Railway Labour Disputes,' which was introduced in the House of Commons by the Hon. Sir William Mulock, Minister of Labour, and passed by parliament during the present session.*

The nature of the Act was fully explained by the Minister of Labour on the occasion of its second reading before the House of Commons on May 6. It was the subject of considerable debate in both Houses of parliament, but as finally passed did not differ in any material particular from the Act as originally introduced by the Minister.

History of the Act.

In the session of 1902, Sir William Mulock introduced a Bill known as the 'Railway Labour Arbitration Bill,†

the main feature of which was the provisions which it contained for the settlement of industrial disputes on railways by compulsory arbitration. At the time of introducing this Bill the Minister stated that it was being presented to the House, not with a view to having it enacted into law during that session, but, rather, for the purpose of evoking discussion, and calling forth from interested parties expressions of opinions as to this method of settling industrial disputes.

In order that the proposed measure might receive the best consideration, the Department of Labour, shortly after the introduction of the Bill in the House of Commons, mailed copies to the railway companies throughout the Dominion, and to the several labour organizations inviting from these bodies candid expressions of opinion as to the principle involved in the Bill, and the several provisions it contained. Very few replies were received by the Department from railway companies, but a large number were received from labour organizations, more particularly those organizations the members of whom belonged to

* The full text of this Act is printed as an appendix to the present issue of the *Labour Gazette*.

† A copy of this Bill was printed as an appendix to the July number of the *Gazette*, Vol. II., p. 769.

the Railway Brotherhoods or were likely to be directly effected by the measure if it became law. Notwithstanding that prior to the introduction of the Bill by the Minister in the House of Commons in the spring of 1902, there had been on the part of many labour organizations a pretty general demand that legislation having in view compulsory arbitration should be enacted, the organizations when asked to express their approval or disapproval of a concrete measure involving the principle of compulsory arbitration very generally expressed the view that such legislation should not be enacted. Public opinion, moreover, as it was to be gleaned through the medium of the press, appeared to be much divided on the question of compulsory arbitration. In the Bill, therefore, to aid in the settlement of industrial disputes on railways as introduced by the Minister of Labour at the present session, a plan of compulsory investigation was substituted for the original plan of compulsory arbitration; and the provisions of the Bill in this regard framed in accordance with what appeared to be public sentiment on the matter.

Comparison with Bill of 1902.

In three leading particulars the present Act differs from the Bill introduced in 1902:

(1.) The enforcement of the findings of the Board of Arbitration in the present Act is left to the influence of public opinion and the good judgment of the parties interested. Legal penalties for those who disregard the awards made under the provisions not being provided, as was the case in the Bill of 1902.

(2.) The Bill of 1902 had reference to settlement of disputes by arbitration only, whereas the present Act provides for the settlement of labour disputes on railways by methods of conciliation as well as arbitration.

(3.) The law as it now stands makes provision for a special board to deal with individual disputes as they may arise, whereas the Bill of 1902 proposed the establish-

ment of permanent boards to deal with such disputes.

Provisions of the Act.

The leading provisions of the present law may be briefly described as follows:—

The preamble of the Act points out wherein railway lock-outs and strikes may interfere with the proper and efficient transportation of the mails, passengers and freight; interrupt the trade and commerce of the country; cause railways to fall into disrepair; endanger the lives of passengers and employees and in various other ways occasion serious injury both public and private; and, on these grounds, the desirability of the enactment of legislation which may aid in the settlement of any such difficulties as may arise between the railway companies and their employees.

The Act itself is known as '*an Act to aid in the settlement of Railway Labour Disputes*'; the short title as fixed by section 1 is '*The Railway Labour Disputes Act, 1903.*'

Section 2 of the Act explains the meaning to be attached to certain terms used in the context, for example the expression 'railway' is to mean any railway whether operated by steam, electricity or other motive power, or whether under the jurisdiction of the parliament of Canada or of the legislature in any province.

The Act makes provision for the appointment of a Committee of Conciliation and also for the establishment of a Board of Arbitration. The Conciliation Committee is to be the first body to take any part in the settlement of disputes on railways and the Board of Arbitrators to be appointed only where the Conciliation Committee itself may not effect the desired end.

The Committee of Conciliation.

Sections 3 and 4 of the Act contain provisions with regard to the Committee of Conciliation. It is provided that the Minister of Labour may appoint such committee wherever a difference exists between any railway employers and railway em-

ployees, and it appears to the minister that the parties are unable satisfactorily to adjust the same, and that by reason of such difficulty remaining unadjusted, a railway lock-out or strike has been, or is likely to be, caused or the regular and safe transportation of mails, passengers or freight has been or may be interrupted, or the safety of any person employed on a railway train or car has been or is likely to be in danger. The appointment of the committee may in any such cases be made either on the application of either party to the difference, or on the application of the corporation of any municipality directly affected by a difference, or by the minister himself of his own motion.

The committee thus established is to be known as a *Committee of Conciliation, Mediation and Investigation*, and is to be composed of three persons, to be named, one by the railway employers and one by the railway employees (parties to the difference) and the third by the two so named or by the parties to the difference in case they can agree. The parties are to be notified by the minister to name a member of the said committee, the notice fixing the time not later than five days within which a party is to be named, failing the nomination of the party within this time or any extension thereof as the minister on cause shown may grant, a party may be appointed by either the minister or the Lieutenant-Governor in Council as circumstances requires in the place of the party refusing to make such appointment, or, in default, in the same manner the third member may be appointed if the representative members of the committee fail to select the third.

The duty of the Conciliation Committee is to endeavour to assist in the bringing about of an amicable settlement of the difference by conciliation and mediation and to report its proceedings to the Minister of Labour. In case the Conciliation Committee is unable to effect an amicable settlement the minister may then refer the difficulty to arbitration under the provisions of the Act.

The Board of Arbitration.

The powers of the Committee of Conciliation are limited to the extent of such influence as they may be able to exercise in virtue of the authority of their position. In this connection their ability to explain away differences and to conciliate, and the fact that they are required to make a full report of the proceedings, which will be made public, are the powers on which they will have mainly to rely. The Board of Arbitration, on the other hand, is given more extensive powers. The board may, in such manner as it thinks advisable, make a thorough, careful and expeditious enquiry into all of the facts and circumstances connected with the difficulty and the cause thereof, and consider what will be reasonable and proper to be done by both or either of the parties. The board is then to prepare a written report to the Minister of Labour setting forth the various proceedings and steps taken for the purpose of ascertaining the facts and circumstances, and also setting forth the said facts and circumstances and its findings therefrom. A copy of the report is to be filed in the Department of Labour and a copy sent free of charge to each party to the difference, to any municipal corporation which has made application under the Act, and to the representatives of any newspaper published in Canada who may apply therefor; any other person shall be entitled to a copy on the payment of the actual cost thereof. The report is also to be published in the *Labour Gazette* and included in the annual report of the Department of Labour.

Investigation under Oath.

For the purpose of making its inquiry the board shall have full power of summoning before it any witnesses and of requiring them to give evidence under oath and produce such documents or things as the board deems requisite to the full investigation of the matters into which it is enquiring, and it shall have the same power to enforce the attendance of witnesses and to compel them to give evidence as is vested in any court of record in civil cases.

This power of compulsory investigation, as it may be called, and the publicity to be given to all the facts and circumstances connected with the dispute, constitute the real power which lies in this method of settling industrial disputes; and the provisions concerning these matters may be said to constitute the original and most important features of the Act.

The remaining provisions of the Act have to do with the manner in which the Board of Arbitration is to be appointed and the methods of proceeding before the board, and conducting investigations; also other minor matters.

Method of appointing Arbitrators.

It is provided that if acceptable to both parties the Conciliation Committee may act as a Board of Arbitration; in case of objection by either party or its representative on the Conciliation Committee acting as a member of the Board of Arbitration, new representatives on the Board of Arbitration may be appointed in their places in like manner as the original members of the Conciliation Committee were appointed.

Powers of Boards.

The board may issue a summons to any person whom it may think necessary to give evidence in the case, either on application of any of the parties or of its own motion; and any witnesses summoned by the board shall be entitled to free transportation over the railway en route when proceeding to the meeting of the board and thereafter returning to their homes.

Documents may also be required to be produced on summons. All books, papers

and other documents produced before the board may be inspected by the board and also by such of the parties as the board allows, but the information obtained therefrom shall not be made public.

No counsel or solicitor shall be entitled to appear before the board except with the consent of both parties to the difference, who may appear in person or by agents.

The board has power to arrest for contempt any person who wilfully insults any member of the board or wilfully interrupts the proceedings or without good cause refuses to give evidence, and the board may at its discretion conduct its proceedings in public or in private.

It is provided that no court of the Dominion or any of the provinces or territories shall have any power or jurisdiction to recognize or enforce, or receive in evidence, any report of a Board of Arbitration or Conciliation Committee.

Expenses of Boards.

Provision is made for the payment by the Department of Labour for their services, to members of both Conciliation Committees and Boards of Arbitration. Such members, excepting the chairman, are to be allowed their actual travelling expenses and \$10 per day. The chairmen are to be paid such sums as the Governor in Council deems reasonable. It is also provided that the Department of Labour will at its expense provide the committee or board with a stenographer, secretary and any other clerical assistance that the minister may deem necessary for the efficient carrying out of the provisions of the Act.

RESTRICTION OF CHINESE IMMIGRATION.

DURING the present session of the Dominion parliament an Act was passed respecting and restricting Chinese immigration, the purpose of the Act being to render more effective the exclusion of Chinese immigrants from this country. The Act received the royal assent on July

10, but its provisions do not come into force until the 1st day of January, 1904.

Increase in Tax and Penalties.

The principal provisions of the Act in this connection are:

(1.) An increase in the amount of tax payable by Chinese immigrants on entering

this country, from \$100, the amount fixed in the Act of 1900, to \$500.

(2.) An increase in the amount of penalty from \$200, as provided in the Act of 1900, to a penalty of \$500 for every master of any vessel carrying Chinese immigrants, who shall land from his vessel any such persons, until a permit so to do, stating that the provisions of the Act have been complied with, has been granted to the master of such vessel by the proper authority.

(3.) Section 17 of the Act of 1900 provided that persons of Chinese origin might pass through Canada by railway in transit, from one port or place out of Canada to another port or place out of Canada without payment of the tax provided for, provided that such passage was made in accordance with and under such regulations as were made for the purpose. In the present Act the words 'by railway' are omitted, so that this provision under the new Act, relates to any kind of transit. The proviso as to regulation is restricted still further by the addition of the words 'by the Governor in Council.' The same section of 1900 also contains the following:—'Any railway or other transportation company which undertakes to transport such persons through Canada and fails to comply with such regulations, or to take such persons out of Canada at the designated port of exit with-

in a period to be fixed by the chief controller, shall be subject to a penalty equal to double the total amount of the tax payable under the provisions of section 6.' In the present Act the words—'Or to take such persons out of Canada at the designated port of exit within a period to be fixed by the chief controller' are omitted, and the penalty for a violation of this section of the Act is fixed at a sum not exceeding \$500, instead of what under the old Act would have amounted to a penalty of \$200.

Minor Changes.

The Act of 1900, known as chapter 32 of the statutes of 1900, and an amendment * known as chapter 5 of the statutes of 1902, are both repealed, but virtually all of their provisions have been re-enacted, excepting the important changes above quoted and certain minor changes which experience under the working of the Act of 1900 has suggested as essential. Of the latter is the following subsection relating to exemptions, which refers exclusively to Chinese servants of British subjects visiting Canada:

In the case of a person of Chinese origin who is the personal attendant or servant of a British subject visiting Canada, the tax payable under the first subsection of this section may be refunded to the person paying the same, upon his furnishing satisfactory evidence that such Chinese attendant or servant is leaving the port of entry with his employer or master, on his return to China, if within twelve months of the date of his arrival in Canada, and upon returning to the controller of such port the certificate granted under section thirteen.

SETTLEMENT OF CARPENTERS' AND CONTRACTORS' DISPUTE AT CALGARY, N.W.T., UNDER CONCILIATION ACT.

ON June 3rd all of the carpenters, members of the Carpenters' Union in Calgary, N.W.T., were locked out by their employers. This action was taken in anticipation of a strike which was threatened by the Carpenters' Union, and which, but for the lock-out on June 3, would have taken place on the following day. The circumstances were as follows:—

Teamsters' Strike in June.

During the month of May the teamsters who were members of the Teamsters' Union

of Calgary endeavoured to secure a uniform rate of \$50 a month from the master teamsters; about five of the latter agreed to this rate, but the others, about ten in number, refused. The teamsters then, on June 1, declared a strike and appealed to other unions to assist them. The carpenters, in response to this appeal for sympathy

* The Act of 1900 allowed one-quarter of the tax and penalties collected under the Act at the end of every fiscal year, to the province where-in the same were collected, while the amendment of 1902 (chapter 5) increased this amount to one-half.

thetic aid, decided on June 2 to give notice to the contractors by whom they were employed not to handle, after June 4, any lumber that might be hauled by non-union teamsters who might take the place of teamsters on strike. Before this notice was given, however, some carpenters in the employ of one contractor refused to work on lumber which had been brought by non-union teamsters. The contractors thereupon met together and decided to lock out all carpenters in their employ who were members of a union. This action was taken jointly with other employers in the building and lumber trades, who, having formed a sort of employers' association, agreed to stand together with a view to crushing out union labour. This position was abandoned, however, by all save the carpenters' contractors within ten days after the general lock-out occurred, owing largely to the fact that all the employers had not joined the association and refused to take a stand of this kind.

The teamsters' strike continued till the end of June, when it was finally declared off, the places of most of the union teamsters having been filled and the union not having sufficient funds to permit of a prolonged dispute.

Carpenters Out During June and July.

The differences between the carpenters and the contractors remained unadjusted, despite many efforts of a conciliatory nature to bring about a common ground of understanding between the parties. The contractors remained fixed in their determination not to employ union men, and the members of the union refused to work unless a joint arrangement could be come to with the contractors. The contractors took steps at once to secure men from outside points, but only a limited number were obtainable.

Intervention of Department of Labour.

On June 17 the secretary of the Trades and Labour Council of Calgary communicated with the Department of Labour, re-

questing, on behalf of the striking teamsters and carpenters, the friendly intervention of the department under the Conciliation Act, 1900. Mr. King, the Deputy Minister of Labour, was at the time in British Columbia on official business there, and the request was made that he should stop over at Calgary on his way back to Ottawa. It was possible for Mr. King to reach Calgary until the morning of July 14, but at that time no settlement had as yet been come to between the carpenters and the contractors, and practically all of the men who had been laid off on June 3 were still out of employment, saving a few who had left Calgary and obtained work elsewhere.

Settlement Effectuated.

On arrival the Deputy Minister met at once a committee of the carpenters, and members of the Trades and Labour Council, and after an interview with them saw some of the contractors. An agreement was framed which it was believed would be acceptable to all the contractors and the men. The several contractors were then interviewed by Mr. King, accompanied by Mr. R. A. Brockabauh, the president of the Carpenters' Union, and the contractors having without exception expressed their willingness to abide by the terms expressed in this agreement, and most of them having agreed to sign individual contracts with their employees, the agreement was brought before a meeting of the Carpenters' Union on the evening of the same day, and the nature of the negotiations and the terms of the agreement explained to the members by the Deputy Minister and the president of the union. The members subsequently, by unanimous vote, decided to accept the agreement and to make application for work on the following day.

The Action of the Lumbermen.

An important factor in the settlement was the attitude of the local lumber dealers in the matter. In Calgary the number of dealers in lumber is limited to four, in virtue, it is alleged, of an agreement between

the manufacturers of lumber restricting the number of persons to whom lumber will be sold in British Columbia and the Northwest Territories. When trouble with the carpenters threatened, the four lumber dealers of Calgary agreed not to sell lumber to any man who employed union labour, or to any union man who might want to buy lumber either to work on for himself or for other persons. This action on the part of the dealers made it impossible for union carpenters to find employment or to do any work in Calgary or its surroundings during the continuance of the dispute. The two dealers having the largest business were interviewed by Mr. King during the day, and were shown the terms of proposed settlement and asked if, in the event of these terms being agreed to by the contractors and the men, they would continue to discriminate in any way against union men in the future. They gave positive assurance that as soon as a settlement was arrived at all discrimination would cease.

The Terms of Settlement.

The following communication, sent on July 15 to the several contractors and to the lumber dealers referred to, explain the exact nature and terms of the settlement:—

The following letter was sent to each of the following contractors: Messrs. T. Underwood, S. Spaffard, J. Mitchell, W. H. Whittleton, F. Fahey, J. Hornby, W. Grant, H. McLellan and J. Hunter:—

Department of Labour, Canada.

Calgary, N.W.T., July 15, 1903.

Dear Sir,—I have the honour to inform you that at a meeting held last night the carpenters agreed to return to work on the terms of the agreement proposed yesterday as a basis of settlement of the dispute between themselves and the contractors of Calgary, commenced on June 3rd, which agreement you expressed a willingness to become a party to in the event of its terms being accepted by the carpenters.

I enclose herewith two copies of the agreement one to be retained in your possession and one to be given to the carpenters in your employ or such person on their behalf as they may desire.

Yours respectfully,

(Sgd.) W. L. MACKENZIE KING,
Deputy Minister of Labour.

(Contractor,

Calgary.

(Copy of agreement attached.)

Agreement entered into this 15th day of July, 1903, between carpenters employed by contractor, and said contractor re rate of wages for carpenters working in the city of Calgary and surrounding country for the said contractor.

The following scale of wages and conditions to go into effect on this fifteenth day of July, 1903:—

1. A day's work to consist of nine hours.
2. A minimum rate of \$2.50 per day to be paid to carpenters.
3. A maximum rate per hour or day to be made between carpenters and said contractor, according to their merits.
4. The said contractor agrees not to discriminate against union carpenters.
5. The carpenters employed by the same contractor agree not to discriminate against any non-union carpenters or any non-union men employed by him.

Dated at Calgary this
fifteenth day of July, 1903.

The following letter was sent to Messrs. T. S. G. VanWart and T. H. Cushing, lumber merchants:—

Department of Labour, Canada,

Calgary, N.W.T., July 15, 1903.

Dear Sir,—I have the honour to inform you that at a meeting held last night the carpenters agreed to return to work on the terms of the agreement proposed yesterday as a basis of settlement of the dispute between themselves and the contractors of Calgary, commenced on June 3, which agreement I submitted to you yesterday and which you stated you regarded as a fair and equitable basis of settlement.

Kindly permit me to say that the assurance given me by you, and communicated by me to the carpenters at their meeting last night, that in the event of this agreement being accepted by both parties, you would not discriminate against any union or non-union carpenters in the matter of selling lumber upon application and proper payment for the same by them, was a material factor in bringing about an acceptance by the carpenters of this agreement.

Yours respectfully,

(Sgd.) W. L. MACKENZIE KING,
Deputy Minister of Labour.

Effects of the Dispute.

It is to be noted in connection with this dispute that prior to its occurrence the Carpenters' Union had had a written agreement with all the contractors setting forth the conditions governing their employment. Some trouble arose in May, when the carpenters quit work on the 15th of that month because of the employment by the contractors of some non-union men contrary to the provisions of this agreement. The contractors alleged that, inasmuch as no union men were displaced in conse-

quence of the employment of additional non-union men, the contract could not be held to be violated. They were obliged, however, to discharge the non-union men, and, after a strike lasting a day and a half, the men returned to work. In this instance the men gave proper notice to the employers of their intended action in the matter.

In the case of the present trouble, however, the contractors urged that the threatened strike of the carpenters in sympathy with the teamsters was an unwarranted violation of the agreement of the contractors with the union; they were in no way responsible for the trouble between the teamsters and their employers, and should not be made to suffer in consequence of it. It was the sense of injustice in this action which led the contractors and others to take so strong a stand at the outset against all union labour, and which kept the contractors fixed in their determination not to enter into another agreement with the union as a body, but to confine agreements to their own employees, while conceding the right of the latter to remain members of an organization, and agreeing not to discriminate against them for being such. The settlement effected secured for the carpenters a continuance of the same conditions as to wages and hours which had been in force before the strike and which were regarded by the employees as satisfactory; on the other hand the rights of both parties in the matter of discrimination against union or non-union men were definitely set forth, and individual agreements substituted for a collective agreement. It should

be added that the carpenters for the most part did not hesitate to acknowledge the mistake they had made in not remembering that their first allegiance was to a contract which existed between themselves and their employers and which was being lived up to by the latter, and that they did not in seeking for a final settlement press their desire for a new agreement with the union or ask that men who had been taken on while they were out should be displaced.

Losses to Contractors and Men.

In consequence of this dispute, which lasted for six weeks in all, building operations in Calgary were practically at a standstill for some time, and but partially carried on any of the time. This, notwithstanding the fact that there has at no time been a more prosperous outlook for the building trades in that city. Contractors were obliged to discontinue work which had been undertaken, and to refuse contracts for new work. They assert that a conservative estimate would put the loss of building, which would otherwise have been completed during the present year, at between \$75,000 and \$100,000. The carpenters estimate their loss in wages alone during the six weeks at about \$7,500. Business interests generally have also suffered in consequence of the trouble.

There were in all between 80 to 100 carpenters directly involved in this dispute. The demand for labour is happily such that practically all were able to obtain immediate employment as soon as a settlement was reached.

CONVICTIONS UNDER THE ALIEN LABOUR LAW.

IN the spring of 1891 the Alien Labour Act was amended by the House of Commons in such a manner as to enable parties who believe themselves to be injured in consequence of the violation of its provisions, to commence action in the local courts on their own initiative without, as was required under the old Act, obtaining in the first instance the consent of the At-

torney General of the Dominion of Canada. The Act as amended was assented to in May, 1901.

Prosecutions under Act.

In August of the same year Mr. W. L. McDonald, a member of the Miners' Union at Rossland, B.C., laid an information before the police magistrate of that city

against one Albert Geiser for a violation of the provisions of the Act. Proceedings were instituted against Mr. Geiser under the following sections of the Act:—

1. From and after the passing of this Act it shall be unlawful for any person, company, partnership or corporation, in any manner to prepay the transportation, or in any way to assist or encourage the importation or immigration of any alien or foreigner into Canada, under contract or agreement, parole or special, express or implied, made previous to the importation or immigration of such alien or foreigner, to perform labour or service of any kind in Canada, 60-61 Vict., chap. 11, 1897.

2. All contracts or agreements, express or implied, parole or special, hereafter made by and between any person, company, partnership or corporation, and any alien or foreigner, to perform labour or service, or having reference to the performance of labour or service by any persons in Canada, previous to the immigration or importation of the person whose labour or service is contracted for into Canada, shall be void and of no effect. 60-61 Vict., chap. 11, 1897.

3. For every violation of any of the provisions of section one of this Act, the person, partnership, company or corporation violating it by knowingly assisting, encouraging or soliciting the immigration or importation of any alien or foreigner into Canada to perform labour or service of any kind under contract or agreement, express or implied, parole or special, with such alien or foreigner, previous to his becoming a resident in or a citizen of Canada, shall forfeit and pay a sum not exceeding one thousand dollars, nor less than fifty dollars.

(2.) The sum so forfeited may, with written consent of any judge of the court in which the action is intended to be brought, be sued for and recovered as a debt by any person who first brings his action therefor in any court of competent jurisdiction in which debts of like amount are now recovered.

(3.) Such sum may also, with the written consent, to be obtained ex parte, of the Attorney General of the province in which the prosecution is had, or of a judge of a superior or county court, be recovered upon summary conviction before any judge of a county court (being a justice of the peace), or any judge of the sessions of the peace, recorder, police magistrate, or stipendiary magistrate, or any functional, tribunal, or persons invested by the proper legislative authority, with power to do alone such acts as are usually required to be done by two or more justices of the peace, and acting within the local limits of his or its jurisdiction.

(4.) The sum recovered shall be paid the Minister of Finance and Receiver General.

(5.) Separate proceedings may be instituted for each alien or foreigner who is a party to such contract or agreement. 60-61 Vict., chap. 11, 1897, repealed; Edw. VII., chap. 13, 1901.

Two Convictions Obtained.

Mr. McDonald sought to recover penalties under subsection 3 of section 3 above quoted, choosing as the person before whom the action was to be brought the police magistrate of the city of Rossland.

It was shown that the defendant, Albert Geiser, had violated the law by bringing in under contract from Baker City, Oregon, in the United States, two persons named Neal Stevenson and J. H. Andrew respectively. These men had been brought in to work for the LeRoi Mining Company at the time the miners in the employ of that company were on strike. Mr. McDonald, who laid the information, was one of the strikers at the time. Convictions were obtained in each of these cases, and Geiser was fined in one case \$500 and in the other \$50, and the amount of the fines was paid over to the police magistrate.

Appeals Dismissed.

The defendant, however, appealed from the decision of the magistrate, in the first place, by way of special case, application being made before Mr. Justice Walkem. The application was refused, however, as the recognizance required by subsection 4 of section 900 of the Criminal Code had not been filed, but the sum of \$100 deposited in lieu thereof. Another application was made later to the Honourable Mr. Justice Irving at Greenwood, which application was also refused on a technical ground, when a further or third application was made to the Chief Justice of the province. On the argument of the case before the Chief Justice a dispute arose between counsel as to the points which had been argued before Mr. Justice Irving, and the Chief Justice referred the matter back to Judge Irving, to be disposed of by him when next in Rossland.

These several appeals extended over the greater part of 1902. Mr. Justice Irving held the assizes at Rossland in the spring of the present year. On this occasion, he held that previous applications for writs of certiorari to remove the convictions made by the police magistrate for Rossland having been refused, it was not a practice of the court to entertain the same application twice, and the applications were accordingly dismissed. Owing to a delay on the part of the police magistrate at

Rosslund, the amount recovered upon conviction was not forwarded to the Department of Finance until the 14th of July.

Informer Receives 50 per cent of Fines.

One section of the Alien Labour Act provides 'that the Receiver General may pay to any individual who furnishes original information that the law has been violated such share of the penalties recovered as he deems reasonable and just, not to exceed 50 per cent, where it appears that the recovery was had in consequence of the information thus furnished.'

As soon as the Department of Labour was authoritatively informed that the appeals on behalf of the defendant had been dismissed, the department communicated at once with the Department of Finance, requesting that Mr. McDonald, the original informer in both these cases, should be al-

lowed as full a share of the penalties recovered as the law permitted, as it appeared that the convictions in both cases had been obtained in consequence of the information he had furnished. This communication of the Department of Labour having been favourably considered by the Receiver General, the latter forwarded to the Department of Labour a cheque for \$275 (being 50 per cent of the fines imposed), payable to the order of Mr. McDonald. On the 29th of the month this cheque was mailed to Mr. McDonald from the Department of Labour.

These two cases of *Rex v. Geiser* are of special interest, inasmuch as they were the first cases, and appear to have been the only cases, in which proceedings under the Alien Labour Act have been commenced by parties themselves under the new provisions contained in the amendment of the original Act.

THE IMMIGRATION AND COLONIZATION MOVEMENT.

ARRIVALS of immigrants at the various Canadian ports of entry continued on a large scale during July, though accurate returns were not obtainable on the closing day of the month. The returns of steamship companies, however, and the reports of traffic on railways furnished evidence that the movement, though declining from the records of the earlier months of the season, compared favourably with the corresponding period of last year. A feature of the month's developments was the rapidity with which, in view of the approaching harvesting season, the immigrants who remained in the older provinces, more particularly in Ontario, found employment as farm hands, unprecedentedly high wages being offered for this class of labour, and active steps being taken by government immigration officers in Montreal and Quebec to direct the attention of the immigrants to the opportunities of employment thus offered. Many of the immigrants thus remaining will continue their journey later to the west. Another feature of the month

was the marked increase in oriental immigration into British Columbia, in prospect of the imposition of the \$500 poll tax. Skilled labour of various kinds was also extensively sought for in Great Britain by employers in many branches of industry.

In the House of Commons a number of important statements regarding immigration into the Dominion were made during the month. The government, it was asserted, was opposed to granting assistance to the new settlers, as well as to any expenditure to move citizens from the older provinces to the west. Arrangements for the keeping out of undesirable immigrants, it was said, were being rigidly enforced and the class of immigrants admitted during the past year was declared to be particularly satisfactory.

Immigration Returns for the Fiscal Year.

Statements compiled by the Department of the Interior showed that the arrivals of immigrants during the fiscal year ending June 30, reached the total of 124,658, of whom 47,980 were from the United States,

41,787 from the British Isles and 37,891 from the continent of Europe. The growth which these statistics represent in the immigration movement of the past year will be shown when it is stated that in 1902 the figures were 26,388 from the United States, 17,259 from the British Isles and 23,732 from the continent of Europe, making a total of 67,379. The increase for 1903 over 1902 is accordingly 57,279. Arrivals from the United States increased by 70 per cent, from the British Isles 140 per cent, and from the continent of Europe by 60 per cent. In 1901 the total arrivals were 49,159, and in 1899, 44,543.

The number of homestead entries shows an even greater average increase than the total arrivals, amounting to 31,343 for the year ending June 30. In 1896 the entries numbered 1,857; in 1897, 2,383; in 1898, 18,167; in 1899, 6,689; in 1900, 7,426; in 1901, 8,167; and in 1902, 14,633. The increase in 1903 over 1902 was 16,710.

Immigration Arrivals during June.

A total of 17,926 arrivals of immigrants was reported by the Department of the Interior during June, as compared with 24,144 in May. Of these 4,984 were from the United States, via Winnipeg, while of the arrivals at ocean ports, 4,506 were English, 1,483 were Scotch, and 449 Irish. There were in addition 2,415 arrivals of Galicians, with 585 from Iceland, 507 from Russia and 454 from Sweden. There were 141 returned Canadians also among the number. The total arrivals for the last six months of the calendar year were 83,037, of which 24,555 were English and 24,250 from the United States.

Emigration returns of the Board of Trade of Great Britain continued to show a satisfactory Canadian increase, namely, a total of 9,989 up to the end of June compared with 6,617 for the same period, 1902, or an increase of 51 per cent. The Dominion of Canada secured 26 per cent of the total immigration this year, as compared with 24 per cent in 1902, while the emigration to the United States showed a decline of 34 per cent.

Homestead Entries for June.

The following statement, published by courtesy of the Department of the Interior, shows the number of homestead entries, according to the various agencies, made during the month of June, 1903, as compared with the month of June, 1902:—

| Agency. | | | In- | De- |
|---------------------|-------|-------|---------|---------|
| | 1903. | 1902. | crease. | crease. |
| Alameda | 355 | 508 | .. | 153 |
| Battleford | 342 | 64 | 278 | .. |
| Brandon | 49 | 133 | .. | 84 |
| Calgary | 240 | 228 | 12 | .. |
| Dauphin | 64 | 24 | 40 | .. |
| Edmonton | 414 | 318 | 96 | .. |
| Kamloops | 12 | 8 | 4 | .. |
| Lethbridge | 180 | 161 | 19 | .. |
| Minnedosa | 52 | 42 | 10 | .. |
| New Westminster | 2 | 3 | .. | 1 |
| Prince Albert..... | 505 | 202 | 303 | .. |
| Regina | 1,356 | 521 | 835 | .. |
| Red Deer | 174 | 136 | 38 | .. |
| Winnipeg | 137 | 96 | 41 | .. |
| Yorkton | 809 | 344 | 465 | .. |
| Total | 4,691 | 2788 | 2,141 | 233 |

It will be seen that the net increase in the number of entries during the month was 1,903.

The statement of entries made for the various months of the year, ended June 30, 1903, is as follows:—

| Month. | | | In- |
|--------------------|--------|--------|---------|
| | 1902. | 1901. | crease. |
| July | 2,622 | 921 | 1,701 |
| August | 1,904 | 768 | 1,136 |
| September | 1,416 | 566 | 850 |
| October | 2,142 | 779 | 1,363 |

| May | 4,109 | 2,199 | 1,910 |
| June | 4,691 | 2,788 | 1,903 |
| Total | 31,383 | 14,620 | 16,763 |

Nationalities of Homesteaders.

The nationalities of homesteaders, as reported by the several agencies of the Department of the Interior in Manitoba, the North-west Territories and British Columbia during the month of June, 1903, and during the fiscal year ended June 30, 1903, respectively, were as follows:—

DURING JUNE, 1903.

| Nationalities. | No. of Entries. | Nationalities. | No. of Entries. |
|---|-----------------|---|-----------------|
| Canadians from Ontario | 510 | Belgians | 55 |
| do Quebec | 51 | Swiss | 18 |
| do Nova Scotia | 16 | Italians | 5 |
| do New Brunswick | 11 | Roumanians | 109 |
| do Prince Edward Island | 5 | Germans | 754 |
| do Manitoba | 209 | Austro-Hungarians | 2,793 |
| do North-west Territories | 96 | Hollanders | 6 |
| do British Columbia | 6 | Danes (other than Icelanders) | 60 |
| Persons who had previous entry | 306 | Icelanders | 200 |
| Canadians returned from United States | 130 | Swedo-Norwegians | 549 |
| Americans | 1,538 | Russians (other than Mennonites and Doukhobors) | 337 |
| English | 758 | Mennonites | 83 |
| Scotch | 149 | Doukhobors | 2,013 |

CHANGES IN RATES OF WAGES AND HOURS OF LABOUR IN GREAT BRITAIN, 1902.

A special report of the Labour Department of the Board of Trade of Great Britain in relation to changes in wages and hours was recently

received by the Department of Labour, Ottawa, and contains comprehensive returns regarding the general movement in this respect in Great

Britain during the season of 1902. It is explained in the report that only changes which indicate a rise or fall in the market price of the same quantity and quality of labour are taken account of, all changes of wages or hours dependent upon a change in the work to be performed, or in return for an increased length of service or experience of the worker, being excluded. 'Rates of wages,' the further report explains, 'are not necessarily the same thing as earnings, as they tend in bad times to be somewhat above earnings, and in good years to be somewhat below.' The sources of information drawn upon by the British Department are in the main returns from employers and employers' associations, from trade unions, from its own correspondents and from other official sources. The daily and trade papers of the country were also searched for references to any movement in wages or hours and forms of inquiry issued by the department to the parties concerned in any reported change, both employers and workpeople being invited to state the facts of the various cases in question.

General Summary of Changes in Wages Scales.

In 1902, as in 1901, the net result of the various changes in wages recorded in Great Britain was a decrease, some 890,356 workpeople having been affected by changes in remuneration, amounting to a decrease of £72,700 in weekly wages. This result was found to obtain in spite of the fact that the total number of increases in wages granted in 1902 was 321 as against only 150 decreases. In the 50 principal bodies of workpeople, however, the increases number only 51 as against 89 decreases. Stat- ing the same result according to the number of workpeople affected, 91,812 workpeople were affected by increases in 1902 in Great Britain and 793,041 by decreases. In the 50 principal bodies of workpeople the figures were 70,989 as affected by increases and 786,365 by decreases. In terms of the aggregate amount of change per week the increase totalled £5,126 and the

decrease £78,027. The returns for the 50 principal bodies showed an increase of £3,521 and a decrease of £77,745 per week. It will be seen from the above that the changes affecting the 50 principal bodies of workpeople had an overwhelming effect over the changes during the year.

The numbers of workpeople mentioned above represent approximately 11 per cent of the total working population covered by the department's statistics. In 1901 a decrease of £77,300 in the weekly wages was reported, but in 1900 there was a total net increase of £209,400 in the weekly wages.

Principal Features of Changes.

The adverse showing above referred to is almost wholly to be attributed to the fall in coal miners' wages which, according to the report, commenced in 1901 and continued practically throughout the following year. Of the total number of workpeople mentioned above as affected by changes in wages in 1902, 89 per cent sustained net decreases, and of these 735,380 or 93 per cent were engaged in the coal mining industries, the total reduction in their weekly wages being £73,889 or nearly 95 per cent of the total computed weekly amount of decrease. Reductions also took place in the shipbuilding trades, but in 1902 these were confined to the north of England, though the decline has since spread to other shipbuilding centres. All of the other groups of trades, however, reported an upward tendency of wages. In the building trades an advance was recorded, though on a diminished scale from any previous year since 1893, except in Scotland where a recovery from the depression of 1900-1901 in these trades took place. In the iron, mining and quarrying trades slight increases were reported, and in the other metal trades the same result was generally achieved.

Methods of Effecting Changes.

In 1902 the changes preceded by strikes or lock-outs were an insignificant fraction of the whole, affecting only 1·4 per cent of the total number of persons receiving changes, a record lower than that of 1901,

which was hitherto the lowest. Thus in 1902 there were 12,799 workpeople who were affected by changes in the rates of wages arranged without a stoppage in work. In 1901 the figures were 14,553, and in 1900, 54,960, the percentages being 1·4, 1·6 and 4·8 respectively for the three years. This decrease in the number of workpeople whose changes in wages were preceded by disputes was accompanied by an increase in the number of those whose changes were arranged by conciliation or arbitration boards. Thus of the total of 890,356 workpeople affected by changes in 1902, some 541,152, or 61 per cent, had their changes arranged by conciliation or arbitration boards; 172,988, or 20 per cent, under sliding scales; and 172,216, or 19 per cent, by the parties concerned or their representatives. In 1901, out of a total of 931,126 workpeople thus affected, only 507,355 changes came under the heading of conciliation boards, and in 1900, out of 1,135,783, only 480,157. The most important changes arranged by conciliation boards in 1902 were those which took place in the coal mining industry in Northern England, and one affecting 20,000 iron workers in the Midlands. The number of changes arranged under sliding scales

chiefly affected coal miners and workpeople in the pig iron and iron manufacturing trades.

Changes in the Hours of Labour.

A net reduction in hours of labour is recorded as a result of the various changes of 1902. A total of 1,057,507 workpeople were affected in this respect, of which 1,051,983 received decreases, the total amount of reduction per week being 1,024,868 hours. This is by far the largest return indicated since the year 1893 and is due chiefly to a change in the weekly hours of workpeople employed in textile factories, and in printing, bleaching and dyeing works, the working time on Saturday being reduced by one hour, making the maximum weekly hours 55½. Apart from this change the number of workpeople whose hours of labour were reduced in 1902 was less than in any of the previous nine years, the textile trades accounting for 997,500 hours of the total amount of reduction above mentioned.

The report contains, in addition to the general statement, of which the above is a summary, detailed reports of the changes in the particular groups of trades for the convenience of those specially interested in such trades and groups.

STRIKES AND LOCK-OUTS IN GREAT BRITAIN DURING 1902.

A report dealing with the strikes and lock-outs occurring in the United Kingdom during 1902 and on the action of the conciliation and arbitration boards in this connection, being the fifteenth return of the kind issued by the British Labour Department since the commencement of the series in 1888, was recently received at the Department of Labour, Ottawa, and the following resumé of the leading statistics which it contains is presented in view of the general interest of the subject. The report contains the figures for the year as finally and officially revised for the purpose of a permanent statistical record, and consists of a general summary and comparison of the year with previous years, followed by a

detailed report in which the disputes are analyzed by groups of trades, while a further section is devoted to the methods of settlements. Labour disputes affecting a small number of workpeople and of short duration are not included. The effect of this arrangement is to exclude 326 disputes, or 74 per cent of the total, and accounting for nearly 17 per cent of the aggregate duration of time lost, while it includes 116 disputes responsible for 83 per cent of the total duration of all the strikes and lock-outs beginning in 1902.

General Record of the Year.

On the whole, the year 1902 in Great Britain was less affected by labour disputes than the year preceding, and the separate

labour disputes reported numbered less than in any of the preceding four years. According to aggregate duration of strikes, also the year 1902 was less affected than 1901 and was well below the average of the previous four years. Thus there were 442 new disputes reported, affecting 256,667 workpeople and causing a loss of 3,479,255 working days in 1902, as against 642 disputes, with 179,546 workpeople involved and 4,142,287 working days lost in 1901. The record, it will be seen, was accordingly nearly one-third less than in 1901 in spite of the increase in the number of workpeople involved, which latter fact was due entirely to the occurrence of one large dispute which threw 85,000 men out of employment. The total of 256,667 mentioned above represents about 2·9 per cent of the industrial population of the United Kingdom. The amount of working time lost, spread over the entire number of working people, amounted to less than half a day per head during the year.

Analysis by Trades.

Of the various trades the mining and quarrying group heads the list as to the number of workpeople affected by disputes during the year, with 208,536, textile trades following with 16,706, and metal trades coming third with 15,914. The building trades with 5,356 showed a great reduction from previous years, and the transport and dock labour classes with 1,590 showed also materially reduced returns from 1901.

As to the proportions of workpeople affected in the several branches, it is stated that the mining and quarrying trades, with 22·3 per cent involved, the textile trades with 1·4 per cent, the metal trades with 1·3 per cent, show the largest mean percentages for 1902. During the period covered by the statistical tables, agricultural labourers and seamen were scarcely touched by trade disputes, and it is stated that if the number so employed were included in the returns the proportion of the workpeople concerned in the disputes would present a still lower figure.

According to the duration of disputes in the various groups of trades, the mining group with 2,550,047 days lost, the metal trades with 420,362 days lost, the textile trades with 237,380 and the building trades with 115,860 days lost, were the branches chiefly concerned. The returns, with the exception of the mining, show a marked decrease over 1901. As regards the average, it is stated that the time lost to the workpeople affected by disputes in 1902 averaged 14 working days per head, as against 20 days per head in 1901.

Causes of Disputes.

The wages question was the most frequent cause of dispute in 1902, though the preponderance of disputes of this character was less marked than in any of the four preceding years. Of the total of 442 disputes, 267, or 60 per cent, arose under this heading, embracing 48·6 per cent of all the persons directly concerned. The strikes for increases of wages embraced 26·8 per cent of the persons directly concerned, while those against reduction embraced 45·9 per cent. The statistics show that during the past year there has been a marked decrease in the number of persons directly affected by the disputes having an advance of wages for their object and a corresponding increase of those resisting reduction of wages. Disputes as to hours of labour were of little consequence, though a large number of workpeople went on strike on account of the employment of non-union men and other questions of trade unionism, the proportion so involved being 21·8 per cent of those engaged in the disputes of the year.

Results of Disputes.

According to the report, the number of workpeople directly engaged in disputes in which they were successful (36,917), was larger than the number of those in which they were entirely unsuccessful (35,515), while the number directly affected by disputes resulting in compromises (41,645) was larger than either of the other two classes. On the whole 31·60 per cent of

the workpeople who went on strike in 1902 were successful, while 30·4 per cent of the strikes were ended in favour of the employers and 35·65 per cent were compromises, 2·35 per cent being indefinite or unsettled. According to the groups of trades 40·09 per cent of the strikes in the building trades were successful; 35·33 per cent in the mining and quarrying trades; 7·76 per cent in the metal trades; 21·89 per cent in the textile trades; 24·96 per cent in the clothing trades; 33·93 per cent in the transport branches; 11·91 per cent in miscellaneous trades, and 40·52 among employees of public authorities. The only group in which the percentage of workpeople entirely successful was greater than the unsuccessful was the mining and quarrying branches.

Method of Settlement of Disputes.

Of the 442 disputes of the year, 16 were settled by arbitration, 13 by conciliation, 316 by negotiations between the parties concerned or their representatives, 40 by returning to work on employers' terms without negotiations, 47 by replacement of

workpeople, 3 by closing of the works, while the remaining 7 came under the heading of indefinite or unsettled. According to the number of workpeople effected the totals under the various headings enumerated above were respectively as follows:—4,481; 7,129; 222,547; 16,570; 3,188; 230; 2,522; and 256,667. The figures show a decrease in the percentage of persons involved in labour disputes settled by arbitration or conciliation, the great bulk, as will be seen from the above figures, being ultimately settled by direct negotiations between the parties concerned or their representatives, the number of disputes so settled being 71·5 per cent of the total and embracing 86·7 per cent of all the persons involved in the disputes of 1902 as against 80 per cent in 1901. These returns, of course, do not accurately set forth the total amount of work accomplished by the permanent arbitration and conciliation boards during the year, for, although the number of actual stoppages settled by arbitration was only 29, the boards were instrumental in arranging some 669 disputes prior to stoppage of the work.

STRIKE OF IRON MOULDERS, TORONTO.

ON May 4 some four hundred iron moulders and coremakers in the employment of fourteen firms in Toronto went on strike on the refusal of the employers to grant a nine-hour work day in place of the ten-hour day then prevailing. The men returned to work on May 18 without obtaining the change in hours demanded, but on the understanding that the matter would be settled by negotiation. Subsequently, however, though a number of conferences were held, the difference failed to be adjusted, and on June 12 some 275 iron moulders in the employ of eleven firms again went out on strike, the three firms employing the balance of the original number (with the exception of about fifty who had left the city during the previous two weeks' strike), having agreed to the nine-hour day. On

the declaration of the strike on June 12 there was estimated therefore to be about 77 iron moulders remaining at work in Toronto.

Progress of the Strike.

Though the firms concerned in the disturbance dating from June 12 numbered eleven, interest in the progress of the strike dispute, more especially since the opening of the month just passed, centered chiefly on the efforts made by the Canada Foundry Company, whose establishment is located at Toronto Junction, to break the strike of its employees by filling their places with iron moulders brought into Canada under contract from the United Kingdom. The first contingent of these, numbering about forty, reached Toronto early in the month, a second, numbering about fifty iron mould-

ers and twenty core and pattern makers, arrived a few days later, while subsequent arrivals brought the total to the neighbourhood of 170. It was in consequence of the attitude assumed by these men with regard to the situation at Toronto Junction and the various statements issued by them as to the terms under which they had been engaged in Great Britain to work for the Canada Foundry Company that the most important phase of the past month's developments arose. Briefly stated, the men, with few exceptions, refused to take the places of the strikers, alleging that they had been engaged under an assurance that no labour difficulty was in progress. The Canada Foundry Company is a member of the National Foundries Association of the United States, while the workmen brought out from Great Britain were members of various unions there.

Interview with the Provincial Government.

On the afternoon of July 20 a deputation of representatives of the local Iron Moulders' Union and some 125 moulders and iron workers from England and Scotland waited upon the Honourable the Premier of Ontario in order to lay complaint with regard to the misrepresentations which they stated had been made to them in England by either the government immigration agent or the agents of the Employers' Association there. The circumstances of the strike and of the importation of the British workmen were explained by the president of the local union and declarations of the men themselves received.

The Premier's Reply.

The Premier in reply stated that no misrepresentations had been made by the Ontario government's agents, explicit instructions having been sent to the agent at Liverpool, who was the only agent of the province in Great Britain, not to import any mechanics but only agriculturists. The Immigration Act of the province, he

stated, could not be further amended at present, and though he regretted the state of affairs that had arisen, he could not do more than suggest a conference of the employees and their employers to settle the difference.

Arrest of Strikers' Pickets.

An arrest of two pickets of the local Moulders' Union on the charge of loitering or doing picket duty about the premises of the Canada Foundry Company occurred on July 16. Bail was refused prior to the appearance of the men before the police magistrate, when the men elected to be tried by a jury. Subsequently the two men entered suits against the Canada Foundry Company for assault and false imprisonment and will ask the jury to assess the damages. On July 20, also, the recording secretary was charged with intimidation and assault, the complainant being a moulder in the employ of the Canada Foundry Company. This case was subsequently dismissed being withdrawn by the prosecution.

The best account of the exact nature of the situation is to be had from the statements issued to the local press of each of the parties to the dispute, which statements may be regarded as official.

Statement by the Company.

On July 21 the following statement was given to the press by the Canada Foundry Company:—

As a number of conflicting and erroneous statements in regard to labour conditions at the Canada Foundry Company have appeared from time to time, we desire to place the following facts before the public:—

The Iron Moulders' Union had an agreement with the foundrymen not to go on strike without first endeavouring to settle matters by a conference of three representatives from each side. The local union disregarded this agreement, and the men went on strike early in May. After being out two weeks their head officials persuaded them to go back to work, and a conference was held on the 8th and 9th of June, which resulted in a disagreement, as the union representatives insisted on 50 hours per week at 30 5-9 cents per hour for moulders and 25 cents for coremakers. Below will be seen conditions in other places:—

| | Mont- real. | Hamil- ton. | To- ronto. |
|--|----------------|----------------|---------------|
| Hours per week. | 60 | 60 | 55 |
| Coremakers' rate per hour last year. | 15 & 16 | 22½ | |
| Coremakers' present rate per hour. | — | 17½ | 22½ |
| Moulders' rate per hour last year. | 24 | 25 | 27½ |
| Moulders' present rate per hour | 25½ | 26½ | 27½ |

Note.—In the hot weather they give half a day off on Saturdays without pay in Montreal.

Union demanded for coremakers 25 cents per hour.

Union demanded for moulders 30 5-9 cents per hour.

Union demanded 50 hours per week, as against 60 hours per week in Hamilton and Montreal.

It will be noted that we have been for some time past paying, and are now paying, considerably more than Montreal and Hamilton in wages, although it is known that both cities are more expensive places to live in than is Toronto. In addition, the men work longer per week, which still further handicaps us in competing for the trade of the country. Smaller towns, such as Guelph, Galt, &c., pay still less than Hamilton and Montreal.

On the 12th of June the iron moulders went on strike, and at a meeting held on the afternoon and evening of the 13th we offered to work 54 hours per week, and, although we protested against the union's unfair discrimination against Toronto, offered 28½ cents per hour, then 29 cents, 29½ cents, and finally, to effect a peaceable settlement, 30 cents per hour, which was rejected with the statement that nothing less than 30 5-9 cents per hour and 50 hours per week would be accepted.

You will thus see that the union rejected an offer nearly 18 per cent above Montreal, and nearly 14 per cent above Hamilton, and in the case of coremakers nearly 50 per cent above Hamilton.

From the above it will be seen that for some unexplained reason the Moulders' Union are attempting to discriminate in a drastic way against Toronto, and that it is out of the question that we should pay so much greater wages and work fewer hours than our competitors in other cities. Our moulders left work of their own accord, although they were at the time actually in receipt of higher wages than are being paid elsewhere. We exercised our inalienable right to fill their places, and at the present time out of a pay roll of over twelve hundred men at work about one hundred are moulders and coremakers.

We have healthy, well ventilated shops, with every modern factory convenience, including shower baths for the comfort of the men, and were paying higher wages than prevail in other cities, but when the men refused the generous offer of compromise that was made there was no other course open except to fill their places, which has been done.

THE CANADA FOUNDRY CO., LIMITED.

July 21, 1903.

Reply of the Workmen.

In reply to the above the following official statement was made by the secretary of the Moulders' Union:—

In reply to a statement issued by the Canada Foundry Co. I would like if you would publish a statement from the moulders' side of the dispute. On March 27th last a circular was sent to the different foundrymen of Toronto asking for a reduction in the hours of labour from ten to nine hours per day at the present rate of wages, that is \$2.75 per day for moulders at \$2.25 per day for coremakers, giving 30 day notice as agreed upon by both parties. But the foundrymen of Toronto ignored our request till the last minute, knowing that under the agreement of the National Foundrymen, of New York, the moulders could not strike till a conference was held; and that it would be six or eight weeks before such conference could be held. This course was taken instead of meeting the moulders and trying to effect a settlement inside of the 30 days as agreed upon. At that time some of the foundrymen were in Ottawa speaking in favour of the Loughheed Bill making it a criminal offence for an international officer of any union to come to Canada, a subjecting him to a fine and imprisonment.

Yet these same foundrymen sent to the international organization, the National Foundrymen's Association, with headquarters at London, to order the International Union to send moulders who had gone out on strike, independent of their governing body, back to work. Although the manufacturers of Canada spreading the statement broadcast that international officers who incited the men to strike, the international officer came here to their request and ordered us back to work. We went back pending a settlement. The statement issued by the Canada Foundry Co. is asserted that it is cheaper to live in Toronto than in Montreal or Hamilton. The truth of that statement I think the public can judge for themselves. In regard to the cost of living in Montreal I could give figures, I don't think the foundrymen of Toronto would like to see their mechanics living like the majority of the workmen of Montreal.

In regard to the matter of wages, the offer that was made at the conference with the moulders was an offer of \$2.85 a day or 9 hours. The representatives of the moulders at the conference offered the foundrymen of Toronto a resolution as follows:—'Resolved, that on and after June 1st, 1903, 9½ hours shall constitute a day's work; that on and after September 1st, 1903, 8½ hours shall constitute a day's work; that time and one-half be paid for overtime; that double time be paid for days and legal holidays; that the rate of wages for moulders be \$2.75 per day, and \$2.25 for coremakers; that in so far as the half holiday is concerned it shall be left optional with the men and the company whether it will be served or not.'

The nine-hour day has been granted in cities in the United States and Canada by the National Foundrymen's Association. Ten of the foundrymen of Toronto have granted the nine-hour day, showing the reasonableness of our demands. The general public knows that the mechanic works harder than the moulder.

J. H. BARNETT,

Corresponding Secretary.

A despatch from Montreal, dated last night, says:—'A committee of ten, representing Scotch iron moulders who were brought to this country to work for the Canada Foundry Company, of Toronto, is in the city making arrangements to have the whole party of 170 men taken back to the old country. They claim they were brought to Canada under misrepresentation

Correspondence of the Department of Labour.

During the month, in articles contained in the press dealing with the dispute, it was asked why the Department of Labour at Ottawa had not intervened, and during the discussion upon the estimates of the department in the House of Commons on the 22nd of the month, the Minister of Labour was questioned in regard to the matter. The minister's reply was to the effect that the department had never refused to lend its friendly offices when appealed to by either of the parties to a dispute, but that the present instance no application had been made by either of the parties for its intervention.

It is the order, however, that the attitude of the Department might be made perfectly clear, and that there might be no misconception as to its willingness to lend its friendly offices with a view to assist the parties to a settlement, a communication was sent on July 23 to Mr. W. R. Brock, the President of the Canada Foundry Company, and to the president and secretary of the Iron Moulders' Union, explaining the attitude of the department and its willingness to assist the parties if requested to do so. The communication was addressed to the representatives of both sides, and the following is a copy:—

c G.

OFFICE OF THE DEPARTMENT OF LABOUR,
OTTAWA, July 23, 1903.

SIR,—I am directed by the Honourable Minister of Labour to express to you the effect of this Department at the serious and perilous situation which has arisen in consequence of the strike of the iron moulders in the employ of the Canada Foundry Company, situated at Toronto, commenced on the 12th inst., and to say that if acceptable to the parties to this dispute, the Minister would be pleased to lend the good offices of the Department to assist in bringing about a settlement of the dispute under the Conciliation Act of

1900, as you are doubtless aware, provides in the case of a dispute either party may request the friendly intervention of the Department of Labour. No request for its intervention has been made by either of the parties to the dispute, the Department has not up to the present time, intervened in the matter. In view, however, of representations which have been made in the House of Commons by members of parliament, and the evident necessity, in the interests of the public, that a speedy ter-

mination of the present difficulties should be effected if possible, the Minister feels that the parties should be made fully aware of the willingness of the Department to assist in any way to bring about an understanding between the parties should its intervention be acceptable to them.

I inclose herewith a copy of the Conciliation Act, 1900, referred to, and would add that I am sending a similar communication to the other parties to this dispute.

Yours respectfully,

(Sgd.) W. L. MACKENZIE KING,
Deputy Minister of Labour.

Reply of Iron Moulders' Union.

On the last day of the month the department received the following from the secretary of the Iron Moulders' Union:—

Iron Moulders' Union No. 23.
Office of the Secretary,
19 Rolyat St.,
Toronto, July 30, 1903.

W. L. Mackenzie King,
Ottawa, Ont.

Dear Sir,—In reference to your letter of July 23, I would say that the moulders' Union being the prime movers in conciliation in labour matters are always willing to conciliate, but in regard to arbitration we have nothing to arbitrate. Of the fourteen firms in Toronto that were in dispute, ten have settled their trouble and over two-thirds of our men are working, there being only four shops out, so we cannot see where there is anything to arbitrate, but we believe it is only a matter of trying to break up the union.

Yours truly,
(Sgd.) J. S. BARNETT,
Secretary.

No acknowledgment of its communication had been received by the department from the Canada Foundry Company at the end of the month. Owing to this fact and the nature of the reply received from the secretary of the Moulders' Union, the department did not intervene in the dispute.

ENFORCEMENT OF FAIR WAGES RESOLUTION BY POST OFFICE DEPARTMENT, JULY, 1903.

During the month of July the following orders were given by the Post Office Department for the supplies below mentioned. All were given subject to the regulations for the suppression of the sweating system, and securing payment to the working men and women of fair wages, and the per-

formance of the work under proper sanitary conditions:—

| Nature of Order. | Amount of Order. | |
|--|------------------|------|
| | \$ | cts. |
| Making and repairing metal dating and other hand stamps; also type and brass crown seals..... | 431 | 91 |
| Making and repairing rubber dating and other hand stamps and type..... | 16 | 40 |
| Supplying stamping material, inclusive of making and repairing pads, also wooden boxes and postmarking and cancelling ink..... | 545 | 97 |
| Making and repairing post office scales.. | 153 | 50 |
| Supplying mail bags..... | 942 | 00 |
| Repairing mail bags. | 773 | 26 |
| Repairing mail locks and supplying mail bag fittings..... | 55 | 45 |
| Making letter boxes and repairing portable letter boxes and mail clerks' tin boxes..... | 198 | 26 |
| Miscellaneous orders for making and repairing postal stores..... | 32 | 15 |
| Making up and supplying articles of official uniform..... | 6,515 | 55 |

UNIONS FORMED DURING THE MONTH OF JULY, 1903.

The department has received notice of the following organizations as having been formed during the month of July, 1903:—

New Brunswick:

St. John—Pressmen and Assistants.

Quebec:

Montreal—Tailors.

“ Woodcarvers.

Sherbrooke—Carpenters and Joiners.

Ontario:

Brantford—Freight and Baggage-men.

Berlin—Garment Workers

Hamilton—Building Trades Council.

British Columbia:

Victoria—Hack Drivers.

RECENT INDUSTRIAL INVENTIONS.

(The following particulars have been obtained from the latest number of the 'Canadian Patent Office Record,' issued by the Department of Agriculture.)

In May, 1903, there were four hundred and sixty-one Canadian patents issued. Of these twelve had reference to car or other brakes and brake mechanism, while there were three new car couplers, four rotary steam engines, five clamps, four inventions pertaining to signals, and three switches. There were in addition, three gas burners, three oil burners and seven new lamps. In

connection with the agricultural industry may be mentioned a harvester, a cultivator, two mowing machines, three churns, an animal tying device and a plough. Other inventions were, a process of producing aluminum, a bending machine, a bolt-making machine, a safety device for steam boilers, a boom for dredges, a dipper gear for dredges, a button-hole cutter, a centrifugal machine, three nut locks, five gas generators, two electrical furnaces, a flue cleaner, a moulding apparatus, &c., &c.

TRADE DISPUTES DURING THE MONTH OF JULY.

THE month of July showed a decided improvement, on the whole, in the condition of the labour market in Canada as regards the numbers and magnitude of the trade disputes reported. There were in all some 39 disputes in existence during July, of which

23 had been inaugurated prior to the beginning of the month. Of the total number no less than 31 were settled, namely, 19 disputes which began prior to the opening of July and 12 inaugurated since. There were accordingly only eight disputes unsettled at the close of July, four of which

had been begun before the opening of the month and four after. The importance of the month's developments in this respect is emphasized by the fact that among the settlements effected were some of the most widespread and keenly contested disputes of the season. Thus in British Columbia the strikes in the coal mines at Ladysmith and Cumberland came to an end, and the extensive unrest existing in the building and the woodworking trades of Vancouver was alleviated. The disturbed situation in the labour market at Calgary, N.W.T., was also effectively terminated under the Conciliation Act.*

In Toronto and vicinity also the prolonged interruption of building operations caused by the strikes of the carpenters and the builders' labourers came to an end about the middle of the month by the return to work of the men. A considerable number of strikes of less importance than these at various points were also satisfactorily terminated. The continuance of the iron moulders' strikes at Toronto and the failure of the arbitration award with regard to the wages of carpenters at Halifax to prevent a strike there, were the chief features of unrest in the labour market in addition to those already mentioned during July. The ill effects of the dispute of the fishermen with the canners in British Columbia for a wages scale to govern conditions during the present season, though involving four thousand men and though lasting over two weeks, were largely offset by the fact that the strike occurred before the opening of the fishing season proper, so that the interruption occasioned to the industry was slight. The strike of the painters at Toronto also, though not officially declared off at the end of the month, was reported to be causing less loss in working days owing to the fact that a majority of the men had found employment at the rate for which they originally went out on strike.

* A separate article dealing with the settlement of this dispute appears on another page of the present issue.

Analysis of Trade Disputes during the Month.

The number and magnitude.—The total number of disputes in existence during July was thirty-nine, of which twenty-three were begun prior to the opening of the month. There were forty-seven disputes in existence during June. The improvement in the situation, however, is better indicated by the statement that thirty-one of the thirty-nine disputes above mentioned were settled during July and that in consequence only eight disputes were reported to the department as in existence at the close of the month. Of the twenty-three disputes begun prior to the opening of the month, nineteen were settled and of the sixteen begun during the month twelve were settled. There were some 8,820 men involved in strikes during July, and three hundred and fifty-nine establishments of employers. Of the strikes settled, sixteen were in favour of the employers, six in favour of the men, and nine were settled by compromise.

Loss of time in working days.—The approximate time lost in working days by the men directly effected in labour disputes during July was 49,905, as compared with 122,612 in June.

Trades affected by new disputes.—Of the sixteen new disputes the building trades and general labour contributed four each. There were two strikes of boot and shoe workers in Montreal, a strike of teamsters at Windsor, deck hands at Toronto, employees of Emery Wheel Works at Hamilton, machinists and cigarmakers at London, and fishermen in British Columbia.

Causes of new Disputes.

Eleven of the sixteen new disputes arose in connection with the wage scale, of the remaining five one strike was in sympathy with a dismissed employee, a second arose at the objection by stonecutters at Guelph to use the non-union cut stone, a third was caused by the refusal of the company to dismiss two non-union employees, a fourth

arose out of the refusal of the employees to become members of an international union and the fifth was occasioned by the refusal of an intermission to employees in the Emery Wheel Works.

The following is a classification of the new disputes reported:—

| | |
|---|---|
| Demand for increase of wages.. | 7 |
| Demand for increase of wages and shorter hours..... | 1 |
| Alleged breach of wages agreement.. | 2 |
| Demand for uniform scale and other conditions..... | 1 |
| Demand for reinstatement of dismissed employee..... | 1 |
| Demand for change in working conditions..... | 1 |
| Refusal to use non-union cut-stone.. | 1 |
| Demand for discharge of non-union workman..... | 1 |
| Refusal of employees to join an international union.... | 1 |

Strikes commenced prior to the beginning of the Month.

As above stated, only four of the twenty-six disputes which appeared in the table published in the July *Labour Gazette* as not settled at the opening of the month remained in existence at its close. Nineteen were settled and two, namely, that of the plumbers at Vancouver and of the carpenters at Sydney have been withdrawn from the table, the department having received information that the former strike was settled in a few hours, and that in the case of the latter cessation of work was due to ten or twelve carpenters leaving owing to a delay of headquarters to reply to the communication which the local carpenters had addressed in anticipation of striking. Of the settlements of the strikes begun prior to the opening of the month, the more important were as follows:—

Settlement of Strikes in Building Trades, Toronto.

The settlement of the strikes in the building trades, Toronto, was effected by the men returning to work about the middle of the month without obtaining the concessions for which the strikes were originally declared in May last. In the closing days of the strike the number of men in idleness had materially diminished

owing to the large numbers who had left the city, about 150 builders' labourers and some 200 carpenters being included under this heading; and by the number who had obtained work at the advanced rate under permits from the union. There were accordingly only about 200 builders' labourers and in the neighbourhood of 250 carpenters effected by the return to work. The result, however, was immediately felt throughout the building trades of the city, and very marked activity prevailed in the closing weeks of the month. The men returned to work at the original rate of wages, namely, thirty cents per hour for carpenters and twenty-five cents per hour for builders' labourers. The brickmakers' strike for increased wages at Toronto Junction, by which 130 men and four firms were affected from May 1, was compromised during the month by the granting of certain increases of wages in different establishments.

Settlements Effected in British Columbia.

The return to work early in the month of the men employed in the Dunsmuir mines at Ladysmith, where a strike of 700 miners had been in effect since February last, resulted in consequence of the Western Federation of Miners failing to give to the strikers the aid they had expected. The men returned under the old conditions, excepting that the company was able to effect a reduction of twenty-five cents on the price paid formerly for stringing timbers, and to exact fifty cents a ton more for coal supplied to miners for domestic use.

The strike in the mines of the same company at Cumberland also ceased to materially affect the company, as the places of the men were largely filled. The strike of fishermen begun on the opening day of the month, was declared off on July 11, and the 4,100 involved, including 1,200 Japanese and 500 Indians, went to work on the terms of the canners' offer of fifteen cents per fish during July and 14 cents during August. The strike of woodworkers at Vancouver

*Considerable difficulty has been experienced by the Department of Labour in making an exact classification of existing trade disputes, particularly in cases where, after the declaration of a strike, some of the original strikers have returned to work, or have had their places filled with new hands, or where the establishments affected have found that for either of these reasons, or both, for other causes, their business is no longer seriously affected. In such cases while, in one sense, it may be true that a strike may be regarded as still in existence because of no formal declaration by either of the parties of its termination, yet so far as the actual effect upon the business interests of the community is concerned a record of the continuance of such a dispute might be misleading. The list of trade disputes published in the present table, therefore, includes mention only of such disputes as during the month or at its termination affected to an appreciable degree the carrying on of the industrial or business operations of the firms or establishments concerned, mention, moreover, is not made of disputes involving less than six employees or of less duration than 24 hours.

was ended on July 15 on the employers' terms. A feature of the month's development in this connection was the refusal of mill owners to supply lumber for the local building trade, notice to that effect being served by the Builders' Exchange on the Amalgamated Society of Carpenters and Joiners and the Brotherhood of Carpenters and Joiners. The strike at New Westminster ended on the same date.

Other Strikes Settled.

Among other strikes begun prior to the opening of the month and settled in July may be mentioned that of the glass workers at Toronto, who returned on a compromise, though eight of the strikers remained out at the end of the month, and had started a business on their own account, the strike not being officially called off. The strike of the marble workers in the same city was settled on a compromise. At Sherbrooke the plumbers who went out on June 1 had received the advance demanded in four of the six establishments affected. The painters at Guelph, though they had not officially declared their strike off, were, with the exception of two union painters, all at work on the close of the month. At Berlin, the woodworkers' strike came also practically to an end, the men having for the most part obtained employment elsewhere. The employees who started the co-operative factory in Elmira, mentioned in the July *Gazette*, were chiefly those formerly employed by the Krug Furniture Company. At Wingham the places of the striking iron moulders had been largely filled, as was also the case of many of the striking bakers at Hamilton. In the strike of moulders reported at Montreal, the union has retired its members from the foundry affected and has placed them elsewhere, the establishment running as usual.*

* An account of the developments of the month in the strike of the iron moulders in the employ of the Canada Foundry Company, at Toronto, appears on another page of the present issue of the *Gazette*.

New Disputes.

The disputes during the month of July were for the most part of secondary importance, and twelve of the sixteen reported were settled during the month. From the point of view of numbers effected (omitting reference to the strike of the fishermen in British Columbia), a strike of employees of the city of St. John on July 2, may be mentioned first, some 193 men being affected over a period of two weeks. The strike arose out of the demand of the workmen for an increase in wages, the men who were receiving \$1 per day asking \$1.25 and those receiving \$1.20 demanding \$1.50. Conferences with the authorities were held and the compromise offered by the city council was finally adopted, the wage scale to be \$1.10 and \$1.40 respectively. Strikes of boot and shoe workers in two establishments in Montreal also affected 175 and 90 respectively. In one case the dispute arose out of the refusal of the employers to dismiss two men who were not members of the local union. The men in question subsequently applied for membership but refused to pay an initiation fee of \$25 imposed by the union. They subsequently left the establishment and the men

returned to work. In the other factory the dispute was caused by the demand of the employers that the men should join an international union, the company refusing to employ members of the Canadian Federation. No settlement of the latter was reported at the end of the month, conflicting statements being made with regard to the extent to which the establishment was affected. The strike of carpenters at Halifax, of which no settlement had been reported to the department at the end of the month, arose on July 9 out of the alleged failure of the master builders to carry out the terms of the award recently declared by the board of arbitrators, who sat to determine the question in July.*

Particulars as to other Disputes of the Month.

Particulars as to other disputes of the month will be found in the table published herewith, which is a compilation of the trade disputes of the Dominion, which began or were in continuance during the month of July and which have been reported to the department:—

* See special article in the *Labour Gazette* for July, on page 52.

REPORTS OF DEPARTMENTS AND BUREAUS.

The following reports of departments and bureaus were received at the Department of Labour, Ottawa, during July, 1903:—

ONTARIO REPORTS.

Fruit Experiments.

Ninth Annual Report of the Fruit Experimenting Stations of Ontario, 1902; Toronto, King's Printer; pages 104.

The fruit experimenting stations, the operations of which are covered in this report, are under the joint control of the Ontario Agricultural College, situated at Guelph, and the Fruit Growers' Association of the province. Attention is especially directed in the report to the new fruits reported on for the first time in

Canada, to the alphabetical arrangement of the matter and to the revised copy of the fruit catalogue. Full reports of the secretaries of the various stations are printed in the volume.

Farm Poultry.

Farm poultry with results of some experiments in fattening chickens by W. R. Graham, B.S.A., Bulletin 127 of Ontario Agricultural College and Experimental Farm; Toronto, King's Printer, pages 39.

The May, 1903, bulletin of the Ontario Agricultural College and the Experimental Farm is 'intended to give information to farmers and others on general matters appertaining to the keeping of poultry, with the results of a few experiments conducted in fattening chickens for the home and ex-

port market.' Among the subjects treated are the following:—Construction of poultry houses, breeding of poultry, egg production, nature of artificial incubation, rearing of chicks, trap nests, fattening chickens, dressing and shipment of poultry, and egg preserving.

BRITISH REPORTS.

Alkali, &c., Works Inspection.

Thirty-ninth Annual Report on Alkali, &c., work inspection by the Chief Inspector; Proceedings during year 1902; London, Eng., Eyre and Spottiswoode, printers; price 10d.

The number of works registered under the Alkali, &c., Works Regulation Act in Great Britain and Ireland is, according to this return, at present 1,044. Of these 25 are works decomposing salt and are scheduled as alkali works. There was a reduction of 8 in the alkali works in 1902 and an increase of 16 in other works under the act. The record of 4,946 visits and 5,091 tests are included in the volume.

Employment of White Labour in Australian Mail Service.

Despatch to the Governor General of Australia respecting the employment of white labour. Eyre and Spottiswoode, printers, London, Eng., pages 5, price 1d.

This despatch of the Colonial Secretary to the Governor General of Australia, relating to the exclusive employment of white labour in the Australian mail service, is dated April 17, 1903, and has reference to the contracts between the British government and the Peninsular and Orient Steam Navigation Companies for the conveyance of mails to and from Australia and the East, into which the government of Australia had petitioned for the introduction of a clause making the employment of white labour on the vessels imperative. To this proposal the Colonial Secretary refuses consent on the part of the Imperial government on the ground that legislation of that character would seriously affect the Indian subjects of the Crown. The government, accordingly, puts itself on record as objecting both as regards aliens and as regards British sub-

jects to specify legislative discrimination in favour of or against race and colour. To proscribe the people of India from the service in question, on which they have been employed for a long period of years, would be, according to the despatch, to produce justifiable discontent among a large portion of His Majesty's subjects, and regret is accordingly expressed that the feeling of obligation on the part of the Imperial government in this matter 'is not shared by the parliament of the commonwealth and that in regard to a matter which cannot affect conditions of employment in Australia and in no way affects the purity of race which the people of Australia justly value, they should have considered it desirable to dissociate themselves so completely from the obligations and policy of the empire.'

Statistics of Mines and Quarries.

Mines and quarries; general report for 1902, London, Eng.; Eyre and Spottiswoode, printers, pages 47, price 6½d.

The total number of persons employed in and about all the mines in the United Kingdom, according to this report, was 855,603 in 1902, of whom 824,791 worked in the 3,349 coal mines and 30,812 in the 703 metalliferous mines. Compared with 1901 there is an increase of 18,056 persons employed in coal mines and a decrease of 1,631 of persons employed in metalliferous mines. Over 80 per cent of the coal miners were employed below ground, and of the surface workers 3·3 per cent were females, there being an increase of 158 females for 1902. The output of minerals in metalliferous mines was 3,322,820 tons, of which 1,700,624 tons were iron ore. There were 44,230,894 tons of stone quarried. The total output of coal was 227,095,042 tons, an increase of 8,000,000 tons over 1901. There were 919 fatal accidents in coal mines in 1902, 29 in metalliferous mines and 113 in the quarries.

The Regulation of File Cutting by Hand.

Report of the draft regulations proposed to be made for factories and workshops in which the process of file-cutting by hand is carried on; by Chester Jones, London, Eng.; Eyre and Spottiswoode, printers, pages 15, price 2d.

This report contains the result of a personal inquiry as to the probable effect of certain regulations proposed to be put in force in factories and workshops in Great Britain in which the process of file-cutting by hand is carried on. There are about 708 shops to which the proposed regulations would apply, and of these 517 are situated in Sheffield and 84 in Birmingham. The proposed regulations are examined in detail in the light of the information elicited by the investigation. A copy of the original regulations as well as of the regulations embodying the alterations suggested in the report are added.

UNITED STATES REPORTS.

Annual Conventions of Factory Inspectors.

Fifteenth and sixteenth annual conventions of the International Association of Factory Inspectors held respectively at Niagara Falls, N.Y., September, 1901, and Charleston, S.C., December, 1902; Vincennes, Indiana Commercial Job Rooms, 122 pages.

The report of the proceedings at the conventions of the International Association of Factory Inspectors, held in 1901 and 1902, is largely taken up with the reprinted addresses of the various delegates on the subjects falling within their official jurisdiction. Many of these refer to recent changes made in factory legislation in various states and provinces while others dealt with the subject of factory inspection in more general terms. Child labour legislation received a good deal of attention at the sixteenth annual convention. The seventeenth annual convention will meet in the city of Montreal on August 18.

Sex in Industry.

Sex in industry; from the 33rd annual report of the Massachusetts Bureau of Labour Statistics, pages 1 to 53; Boston, State Printers.

The presence and influence of women in productive occupations of the commonwealth of Massachusetts, as recently estimated and presented in pamphlet form by the State Bureau of Statistics of Labour, is based upon the censuses taken by the state and national governments from the year 1855 forward. In that year it was stated in the census report that 13,210 wo-

men in Massachusetts were engaged in the manufacture of straw hats and bonnets, while in 1875 and 1885, in which the numbers of women furnished with work at home is considered, it was ascertained in the former instance that 30,916 women were employed at an average rate of \$49.44; and in the latter that the number of women furnished with work at home was 18,333 receiving an average remuneration of \$33.10. The precise date that women entered into the factories in Massachusetts is not stated, though it is said that in the revival of manufactures following the war of 1812 women of all classes entered the industrial field in largely increased numbers. The relative percentages of males and females employed in gainful occupations since the year 1870 has not, according to the table published in the report, been subject to very wide variation. In 1873 the percentage of males was 77.8 per cent, in 1875 it was 75.25 per cent, in 1885, 73.92 per cent, in 1895, 72.88 per cent, and in 1900, 72.77 per cent. Males, it is stated, have only held their own in gainful occupations as compared with the total population, while the number of females in gainful occupations show an increase far in excess of the men per total of female population. The volume is largely occupied with tables of occupations of sexes, illustrative of the numbers of males and females in the different classes of occupations. Tables are also added giving statistics as to the number of married females employed in 1900.

Agriculture in the United States.

Year-book of the United States Department of Agriculture, 1902, Washington, Government Printing Office, pages 912.

The bulk of the annual year book of the United States Department of Agriculture for 1902 is taken up with 37 articles relating to various aspects of the subject in the United States. Among others the following subjects receive attention: climate, forestry, dairying, drainage, injurious insects, poultry, cost and nutritive value of foods, new fruits, crop rotation, seed selection, fertilizers, rain-fall, foot and mouth disease, &c., &c. There are 87 plates in the volume.

RECENT LEGAL DECISIONS AFFECTING LABOUR.

The following synopses of cases affecting labour are taken from the latest law reports and other legal records of the different provinces of Canada :—

ONTARIO CASES.

Accident causing Death of Electric Company's Employee.

G., who was employed by the Hamilton Electric Light, &c., Co., was killed by an accident, which occurred while he was engaged in doing his ordinary work for the company. His father, who was appointed administrator of his estate, brought an action against the company for damages, alleging that G's death had been caused by its negligence in allowing its cable, wires, &c., to be in an unsafe and dangerous condition.

At the trial the action was dismissed, on the ground that there was not sufficient evidence as to how the accident had happened.

An appeal was taken from this judgment.

The Court of Appeal reversed the decision given at the trial, and held that there was sufficient evidence to submit to the jury. The appeal was therefore allowed, with costs, and a new trial ordered, the costs of the former trial to be paid by the company.

The facts of the case, and the gist of the reasons for the judgment of the Court of Appeal, are contained in the following extracts from that judgment :—

‘The deceased was a labourer, and with his fellow workman, one Higgins, was, on the 1st July, 1902, ordered to cut a trench or opening at two places in the concrete floor of the defendants' power house. This floor may be said to be covered with the various sorts of electrical apparatus used for the development and transmission of electric power, such as cables, wires, switch-boards, transformers, &c., access to and among which is obtained by alleys or alley-ways, some passing east and west, lengthwise through the room, and others

transversely, called the north and south alleys, crossing the former from one side of the room to the other. On each side of the former is a series of switch-boards, from each of which depend two loose loops or coils of wire, the ends of which are attached to a moveable handle. These wires pass through the switch-board, and are connected through the transferrer with the generators. The trenches were to be cut in the transverse or north and south alleys at the east end of the room. The cables in the works adjoining the north alley were dead, and there was no danger in working there. Those in the south alley were alive. According to the evidence of Higgins, he and his fellow-workman were directed to clear up and remove the rubbish which would be made in cutting the trench in the concrete, which, from its hard and brittle character, was apt to fly and make a litter in every direction. They were engaged in doing this when the accident happened. Higgins said that he had gone into the east alley, i.e., that part of the east alley which was east, and immediately opposite or at right angles to the south alley, in which one of the trenches had been cut, and was sweeping out the litter from there towards the trenches, when he suddenly became unconscious, receiving, as there can be no doubt he in some way did, a severe electric shock. He had last before this noticed the deceased stooping over the trench about four feet distant from him. Live wires, it may be said, were proved to have been in the east alley within arm's length of any one working in the trench. The bodies of both men were discovered lying near each other, just east of the switch-board in the east alley, that of Higgins being a little above to the north of the two switch-boards. From the evidence, it may also be inferred that the deceased in some way received an electric shock, and that this was the cause of his death. Whether this was at the same time as Higgins, or immediately or soon afterwards, does not appear.

To prove defendants' negligence, it was shown that there was a break or rupture in the insulation of the loose loop or coil of cable, hanging from the switch-board directly over where Higgins was lying, such as might be caused by its being bent backwards and forwards in its constant use. There was also evidence that, having regard to the enormous voltage passing through the wires, their insulation was quite insufficient for the purpose of safety to any one working among them in an unprotected condition, even though he did not actually come in contact with them, and also that the depending loop or coil might easily have been better guarded than it actually was.

Whatever may be said of the case hereafter, when the evidence on both sides is in, I think that as it stood at the close of plaintiff's case there was evidence in support of it which could not properly have been withdrawn from the jury. The men were not forbidden to go in the east alley, and it would be quite permissible for the jury to find, on the evidence of Higgins, that their instructions were such as to require them to clean up any litter or rubbish which got there in the course of their work. I by no means intend to say that the jury would be bound to infer this, or that there was not evidence, such as putting up the slab or lath across the east alley, which would justify the contrary inference. As to the cause,—if the men were lawfully in the place where they were found, one of them dangerously shocked and the other dead—they were working there without having had any special warning on the subject, in a place where a single unguarded movement might bring either of them in contact with death from the ruptured wire, or even if, as one witness suggests, the rupture might have occurred at the moment, then from a wire insufficiently insulated or insufficiently guarded. There is no reason that I can see to look further and imagine possible negligence on the part of the men themselves.

There was evidence that the death of the deceased was owing to the neglect of some precaution of this nature, or to the damaged condition of the wire close to which the body was found. I think it is quite immaterial whether both the men received the shock concurrently, one through the other, or whether Griffith's shock came after his fellow-servant had been struck. It is enough that he was not wrongfully in the place where he met with his injury.'

(Griffiths vs. The Hamilton Electric Light, &c., Co. Judgment given by the Court of Appeal, June 29, 1903.)

Accident caused by Negligence of Employee.

B., who was employed as an assistant carpenter, was helping to cover the top of a wall of a canal which was being built by his employer. In obedience to the orders of the superintendent in charge of the work, B. went to the canal bed, where there were a number of long planks, and delivered three of them to C., a fellow-employee, who was on the top of the wall. The place these planks were to be delivered was unobstructed and perfectly safe. B. then returned to where the planks were, took another one, and noticing then that C. was at the top of the wall, at a distance of about fifty feet from the place where the planks were to be delivered, made a few steps in the direction of where C. was, and in so doing stepped on a board with a nail in it, which went through the sole of his boot and into his foot, thereby seriously injuring him.

B. subsequently brought an action for damages on account of this injury against his employers, alleging that they were liable on the ground that the place or way where he had been required to do this work was unsafe and dangerous.

The court came to the conclusion that the course which B. took in bringing the plank was not a 'way' at all, as at that point the bottom of the canal was dangerous, on account of the large number of

pieces of plank lying about with nails in them, and that as C. had chosen to use this dangerous route, when his employers had furnished a safe one at the point where the planks were required to be delivered, the latter were not liable.

(*Birmingham v. Larkin*; Judgment given by Mr. Justice MacMahon at Toronto, June 22, 1903.)

Judgment Awarding Damages Confirmed.

R. was employed by a firm which manufactured hinges, &c., and was put to work at a pin-cutting machine to carry away the pins as they came out. While so employed he was caught between two cog-wheels of the machine, and thereby lost part of his left hand. He brought an ac-

tion against his employers for damages, alleging that the machine was not properly guarded as required by law, and also that he had been employed contrary to the provisions of the Ontario Factories Act, as he was under 14 years of age. The employers defended the action and claimed that the machine was properly guarded, and that when R. had been employed by them he had stated that he was over 14 years.

The trial judge decided that the evidence supported R.'s contention and awarded him \$1,000 damages. The employers appealed from this judgment, which, however, was confirmed by a Divisional Court.

(*Ryan v. Britton*. Judgment given at Toronto, June 1, 1903.)

APPENDIX

BILL No. 17.

An Act to aid in the settlement of Railway Labour Disputes.

[Assented to 10th July, 1903.]

WHEREAS from time to time differences may arise between Railway Companies and their employees which the parties thereto failing to adjust, may result in lockouts and strikes; and whereas railway lockouts and strikes may interfere with the proper and efficient transportation of mails, passengers and freight, interrupt the trade and commerce of the country, cause railways to fall into disrepair to the danger of the lives of passengers and employees, and in various other ways occasion serious injury both public and private; and whereas it is desirable to aid in the settlement of such differences: Therefore His Majesty, by and with the advice and consent of the Senate and House of Commons of Canada, enacts as follows :—

1. This Act may be cited as *The Railway Labour Disputes Act, 1903.* Short title.

2. In this Act, unless the context otherwise requires,— Interpretation

(a.) The expression "Minister" means the Minister of Labour; "Minister."

(b.) The expression "Department" means the Department of Labour; "Department."

(c.) The expression "Railway" means any railway whether operated by steam, electricity or other motive power, and whether under the jurisdiction of the Parliament of Canada or of the Legislature of any province; "Railway."

(d.) The expression "Railway Employers" means any Company or Government owning or operating wholly or to a lesser extent any railway operated by steam, electricity or other motive power, and whether under the jurisdiction of the Parliament of Canada or of the Legislature of any province; "Railway employers."

(e.) The expression "Railway Employee" means any person engaged to perform any work or service in respect of any railway whether operated by steam, electricity, or other motive power, and whether under the jurisdiction of the Parliament of Canada or of the Legislature of any province; "Railway employee."

(f.) The expression "difference" means any dispute, disagreement or dissension which in the opinion of the Minister may have caused or may cause a lockout or strike on a railway or which has interfered or may interfere with the proper "Difference."

and efficient transportation of mails, passengers or freight, or the safety of persons employed upon any car or train ;

"Committee."

(g.) The expression "Committee" means the Committee of Conciliation, Mediation and Investigation established under the provisions of this Act.

"Board."

(h.) The expression "Board" means the Board of Arbitrators established under the provisions of this Act.

Appointment
of Committee
of concilia-
tion.

3. Whenever a difference exists between any railway employers and railway employees, and it appears to the Minister that the parties thereto are unable satisfactorily to adjust the same, and that by reason of such difference remaining unadjusted a railway lockout or strike has been or is likely to be caused or the regular and safe transportation of mails, passengers or freight has been or may be interrupted or the safety of any person employed on a railway train or car has been or is likely to be endangered, the Minister may either on the application of any party to the difference, or on the application of the corporation of any municipality directly affected by the difference, or of his own motion, cause inquiry to be made into the same and the cause thereof, and for that purpose may, under his hand and seal of office, establish a Committee of Conciliation, Mediation and Investigation to be composed of three persons to be named, one by the railway employers, and one by the railway employees (parties to the difference), and the third by the two so named or by the parties to the difference in case they can agree. The Minister shall in writing notify each party to name a member of said committee stating in such notice a time not being later than five days after the receipt of such notice within which this is to be done and if either party within such time or any extension thereof that the Minister, on cause shown, may grant, refuse or fail to name a member of said committee the Minister or the Lieutenant Governor in Council, as the case may be, as hereinafter provided, may appoint one in the place of the party so refusing or in default, and if the members of said committee so chosen fail to select a third member the Minister, or the Lieutenant Governor in Council, as the case may be, may make such selection.

Duty of
committee.

4. It shall be the duty of the Conciliation Committee to endeavour by conciliation and mediation to assist in bringing about an amicable settlement of the difference to the satisfaction of both parties, and to report its proceedings to the Minister.

Board of
arbitrators.

5. In case the Conciliation Committee is unable to effect an amicable settlement by conciliation or mediation, the Minister may refer the difference to arbitration under the provisions of this Act.

(a.) If acceptable to both parties, the Conciliation Committee may act as a Board of Arbitrators.

(b.) In case of objection by either party to its representative on the Conciliation Committee acting as a member of the Board of Arbitrators, or to the chairman of said Conciliation Committee being a member of the Board of Arbitrators, new representatives on the Board of Arbitrators shall be appointed, in place of the member or members of the Conciliation Committee objected to, in like manner as the original members of the Conciliation Committee were appointed.

The Board of Arbitrators so chosen shall be established by the Minister under his hand and seal of office.

6. If any member of said committee or board shall die, refuse, neglect or become incapable to act, then whenever the same shall happen a successor shall be appointed in like manner as is above provided in respect of the original member of committee or board. Before such appointment the name of the person proposed to be appointed shall be submitted to both parties to the difference and there shall be afforded to each of them an opportunity, within such time as the Minister may fix, of making known to the appointing authority whether such proposed appointee is objected to, it being intended that it shall be endeavored to appoint only such person as shall not be reasonably objected to by either party.

Filling of vacancies.

7. In the event of the establishment of a committee of conciliation, mediation and investigation, or of a board of arbitrators to deal with any differences between the Government of Canada in respect of the Intercolonial Railway and the Prince Edward Island Railway and any of its employees, the power to appoint conciliators or arbitrators which otherwise in accordance with the foregoing provisions might be exercisable by the Minister shall be exercisable either by the Lieutenant Governor in Council of the Province of Quebec, of New Brunswick, of Nova Scotia, or of Prince Edward Island (in this Act called the Lieutenant Governor in Council), as the Minister shall for that purpose in each case of conciliation or arbitration in writing name.

In case of difference with Intercolonial Railway employees.

8. The third member of the said committee or board shall be the chairman.

Chairman.

9. In case of arbitration pursuant to the provision hereinbefore contained the findings and recommendations of the majority shall be those of the Board. In case of the absence of any one arbitrator from a meeting of the Board the other two arbitrators shall not proceed unless it be shown that the third arbitrator has been notified of the meeting in ample time to admit of his attendance.

Acts of majority of Board, etc.

10. Forthwith after the appointment of the Board the chairman shall promptly convene the same, and the Board shall in

Convening Board.

such manner as it thinks advisable make thorough, careful and expeditious inquiry into all the facts and circumstances connected with the difference and the cause thereof and shall consider what would be reasonable and proper to be done by both or either of the parties with a view to putting an end to the difference, and to preventing its recurrence and shall with all reasonable speed make to the Minister a written report setting forth the various proceedings and steps taken by the Board for the purpose of fully and correctly ascertaining all the facts and circumstances, and also setting forth said facts and circumstances, and its findings therefrom including the cause of the difference and the Board's recommendations with a view to its removal, and the prevention of its recurrence.

11. The Minister shall forthwith cause the report to be filed in the office of the Department, and a copy thereof to be sent free of charge to each party to the difference and to any municipal corporation as aforesaid, and to the representative of any newspaper published in Canada who may apply therefor; any other person shall be entitled to a copy on payment of the actual cost thereof.

12. For the information of Parliament and the public the report shall without delay be published in the *Labour Gazette*, and be included in the annual report of the Department of Labour to the Governor General.

13. For the purpose of such inquiry the Board shall have all the power of summoning before it any witnesses, and of requiring them to give evidence on oath, or on solemn affirmation, if they are persons entitled to affirm in civil matters, and produce such documents and things as the Board deems requisite to the full investigation of the matters into which it is inquiring, and shall have the same power to enforce the attendance of witnesses, and to compel them to give evidence as is vested in any court of record in civil cases; but no such witness shall be compelled to answer any question, by his answer to which he might render himself liable to a criminal prosecution.

14. On the application of any of the parties, or on its own motion, the Board may issue summonses to such persons as the Board may think necessary to give evidence in the case, and any witness summoned by the Board shall be entitled to free transportation over any railway en route when proceeding to the place of meeting of the Board, and thereafter returning to his home, and the Board shall furnish to such witness a proper certificate evidencing his right to such free transportation.

15. The summons shall be in such form as the Minister shall prescribe, and may require such person to produce before the

Board any books, papers, or other documents in his possession or under his control, in any way relating to the proceedings.

16. All books, papers, and other documents, produced before the Board, whether voluntarily or in pursuance to summons, may be inspected by the Board and also by such of the parties as the Board allows; but the information obtained therefrom shall not be made public, and such parts of the books, papers, and documents as, in the opinion of the Board, do not relate to the matter at issue, may be sealed up.

Documents
not to be
made public.

17. The Department will pay to each member of a Conciliation Committee or Board of Arbitration his actual travelling expenses and also to each of them other than the chairman, ten dollars per day for each day that he shall attend a meeting of the Committee or Board or be engaged in travelling from or to his home (being in Canada) for the purpose of attending or after having attended a meeting of the Committee or Board. The Department will pay to the chairman such sum as the Governor in Council deems reasonable. The Department will also at its expense provide the Committee or Board with a stenographer, secretary and any other clerical assistance that to the Minister may appear necessary for the efficient carrying out of the provisions of this Act.

Payment of
members of
Committee
or Board.

Clerical
assistance.

18. The report of the Conciliation Committee and the report of the Board shall be signed by such of the members as concur therein, and may also be signed by a dissenting member.

Report to be
signed.

19. No counsel or solicitor shall be entitled to appear before the Board except with the consent of all parties to the difference, and notwithstanding such consent, the Board may, if it deems it advisable, decline to allow counsel or solicitors to appear before it. The parties to the difference may appear in person or by agents.

Counsel not
allowed,
except by
consent.

Agents
allowed.

20. No court of the Dominion of Canada or of any Province or Territory shall have or possess any power or jurisdiction to recognize or enforce or to receive in evidence any report of the said Board of Arbitrators or any report of the said Committee of Conciliation, or any testimony or proceedings before either the said Board or Committee as against any party or person or for any purpose whatsoever, except in case of prosecution for perjury.

Jurisdiction
of courts.

21. Where the difference, which is being inquired into, affects a class of employees, it shall not be necessary for them all to take part in the inquiry, but the class may be represented

Representa-
tion of
employees
before
board

ed by a limited number chosen by a majority or by agents other than counsel or solicitor.

Power of
arrest for
contempt of
Board.

22. If, in any proceedings before the Board, any person wilfully insults any member of the Board, or wilfully interrupts the proceedings, or without good cause refuses to give evidence, or is guilty in any other manner of any unlawful contempt in the face of the Board, it shall be lawful for any member of the Board or constable to take the person offending into custody and remove him from the precincts of the Board and retain him in custody until the rising of the Board.

Secrecy of
proceedings.

23. It shall be in the discretion of the Board to conduct its proceedings in public or in private.

Regulations.

24. The Minister may from time to time make, alter and amend regulations, as to the time within which any thing hereby authorized shall be done, and also as to any other matter or thing which appears to him necessary or advisable in order to the effectual working of the several provisions of this Act.

THE LABOUR GAZETTE

THE JOURNAL OF THE DEPARTMENT OF LABOUR

Vol. IV—No. 3.

SEPTEMBER, 1903

Price Three Cents

The LABOUR GAZETTE wishes to draw the attention of its readers to the fact that, while every care will be taken to have information as complete and impartial as possible, it does not in its accounts of proceedings, abstracts of reports, legal decisions, quotations, or other records of matters of concern to labour, necessarily endorse any of the views or opinions which may be expressed therein.

DEPARTMENT OF LABOUR, CANADA.

September 15, 1903.

THE leading article of the present issue of the *Gazette* is devoted to a review of the wages movement in Canada from the beginning of the calendar year to September 1, with a tabulation of the various changes in wages and hours reported to the Department of Labour as occurring during that interval. The review, it will be noted, covers the period of most active alteration in the wages scales of a season of great industrial prosperity and of an almost universal upward tendency in the rate of remuneration of labour. As is explained in the course of the article, the department has been enabled this year to secure much more complete returns relating to this important subject than in any previous statement of the kind. As is also pointed out, it is the intention of the department, in continuance of the subject, to publish henceforth, from month to month in the *Labour Gazette*, a statement covering the more important changes in

wages throughout the Dominion concerning which detailed information can be obtained. A copy of the blank form, specially designed for the purpose of securing returns on the subject from correspondents to the *Labour Gazette* and from the parties immediately interested, is embodied in the article in the present issue.

Publication is resumed in the present issue of the series of articles on the cost of living in Canada, which was interrupted owing to lack of space in the August number. The statistics presented have reference to retail prices of ready-made clothing, boots and shoes, &c., and are designed to indicate from original sources the general condition of current prices of these commodities over the past year in the several provinces of the Dominion.

Two articles on the subject of recent legislation affecting labour in Canada appear in the present issue, being devoted to reviews of statutes of this class passed during the sessions of the legislatures of Ontario and New Brunswick of the present year. The Workmen's Compensation Act of the latter province is perhaps the most important single statute, from the standpoint of labour, among those to which the articles refer.

Two important assemblies of the month, namely, that of the Chambers of Commerce of the Empire in Montreal, and the annual convention of the International Association of Factory Inspectors held in the same city, receive notice under separate headings, a

concise account of the more important proceedings of the two bodies being presented in each case.

The usual reports and reviews of industrial and labour conditions, the immigration

and colonization movement, trade disputes, new unions formed, Government contracts, publications of departments and bureaus, and recent legal decisions appear in the issue.

INDUSTRIAL AND LABOUR CONDITIONS DURING THE MONTH OF AUGUST.

I. GENERAL SUMMARY.

THE month of August showed, on the whole, with only seasonal alterations, the continuance in full operation of the active industrial conditions of the earlier months of the season. Labour was generally employed to the utmost of its capacity, and in only a very limited number of trades and localities was anything approaching dullness reported. On the other hand exceptional activity prevailed at a number of centres, notably at Halifax, Montreal and Winnipeg, and the demand for labour continued keen at these and other points, more particularly in western Canada. In this connection the diminishing number of trade disputes may be mentioned as a satisfactory feature of the month, only eleven new strikes, none of which involved any large body of men, being reported to the department during August, while the resumption of employment in industries affected by labour disturbances earlier in the season materially improved conditions in some localities. The immigration movement, though on a lesser scale than during the earlier months of the season, compared favourably with previous years.

Wages Changes.

The most important increase of wages reported to the department during August was that granted by the C. P. R. Co. to its trainmen on the company's lines between Fort William and Calgary. The increase was asked for by the workmen in March last and is reported as having given general satisfaction, amounting approximately to from 12 to 15 per cent. Passenger conductors will now be paid \$125 per 5,000

miles, and the brakemen will receive 53 per cent and baggagemen 58 per cent of this, the relative percentage paid remaining the same as under the old agreement. Brakemen on through freight trains will receive \$2.35 per 100 miles, and on way freights \$2.60 per 100 miles instead of \$2.07 in each case as formerly. An important provision in the agreement, which went into effect on August 16th, was the dropping of the third brakemen on freight trains, so that the crews will now consist of a conductor and two brakemen instead of a conductor and three brakemen as before. The last mentioned change, it is stated, will not involve the laying off of any of the present force of the company. Nine hours are to constitute a day's work; overtime to count eleven miles for each extra hour.*

From the 1st of September also an increased schedule went into operation affecting the machinists of the C.P.R. Co., from Winnipeg westward to Vancouver. According to a schedule received from the Brandon correspondent of the *Gazette* some 25 employees of the company were affected at that point, consisting of boilermakers, boilerwashers, blacksmiths, and fitters, and their respective helpers. The increase of the first named was from \$17.70 to \$18.80 per week; of the second from \$11.21 to \$11.80; of the third named from \$16.52 to \$17.70, and of the fourth from \$17.11 to \$19.17½, with corresponding advances for the helpers. The hours remain as before, 59 per week.*

* See report of Winnipeg correspondent in present issue of the *Gazette* for detailed reference to the changes granted.

At St. John, N.B., tinsmiths and iron workers, to the number of 34, received an increase ranging from 10 to 25 per cent, involving an advance of from \$1 to \$2 per week. Five waiters in the same city also received an increase of \$1.25 per week, making their wages \$6.25 per week from August 20th.

civic work from 35 cents an hour to 30 cents the prevailing wage.

In Toronto on representations of the Master Painters' Association the Park Commissioner reduced the wages of painters on

Industrial Activity.

Agriculture.—Interest centered during the past month on the various bulletins and reports issued by the different provincial governments and railway and other corporations in reference to the condition of the crops throughout Canada, more particularly in Ontario, Manitoba and the North-west Territories. In the first named province a report issued by the Ontario Department of Agriculture, based upon the returns of over 2,000 correspondents, indicated an average reaching 25 bushels per acre for fall wheat. Grain crops generally will be better than was anticipated earlier in the season, though the continued broken weather in August did not ameliorate conditions and considerably interfered with the curing of hay. This was especially true of Eastern Ontario and of Quebec. The scarcity and high price of farm labour continued in Ontario, having been relieved somewhat by the influx of British immigrants, though this was largely offset by the migration of workmen to the North-west on the harvest excursions conducted by the railway companies, which took many thousands into western Canada. The fruit crop in Ontario were reported as promising satisfactorily. Winter apples, however, suffered somewhat in western Ontario. Plums and peaches are stated to be a satisfactory crop in the Niagara peninsula. The fruit crop, in fact, of the entire Dominion, according to reports, will be larger than last year and will

probably encounter a satisfactory market for export. From Manitoba and the West the reports, though varying, were on the whole of a yield somewhat under that of the season of 1902, though enhanced prices and a larger acreage planted are expected to compensate for the difference. The sample of such grain as had been threshed was reported excellent, owing to the generally favourable ripening weather of the past few weeks. In Quebec and the Maritime Provinces an average crop is expected. Apples in Nova Scotia are above the average though a failure in some districts of Quebec. In British Columbia the various crops are reported as doing well, fruit being especially promising.

Fishing.—The salmon run in British Columbia has been a comparative failure and the pack will be a light one. In the Maritime Provinces good mackerel catches were reported and the lobster trade has been active. On the great lakes the month on the whole was quiet.

Lumbering.—A feature of the month was the continuance of preparations in Ontario and Quebec for the season's work in the shanties, the supply of labour offering in some places considerable difficulty in spite of the high level reached by wages. In Quebec a number of the mills are still feeling the effects of the delay caused by the low water in the spring in getting the logs of last year's cut out of the woods. In British Columbia an over-supply of logs and shingles caused the shutting down of a number of the mills for thirty days. The Government was also petitioned for a suspension of the prohibition of the exportation of logs in order to relieve the situation, but declined to take action. Loggers as a result of the general situation have suffered some loss of employment.

Mining.—In Nova Scotia the activity of the past few months has been continued in the coal mines, though the feature of the month in the general mining situation of the Dominion was the resumption of active

developments, with a full staff of employees, at Nanaimo, Ladysmith and Cumberland on Vancouver Island, following the adjustment of recent labour disturbances. Quartz miners in the same province also reported a satisfactory month, as will be seen in particular from the report of the *Gazette* correspondent at Rossland.

Manufacturing.—The month showed a general continuance of the active conditions which have prevailed for some time past throughout Canada.

Activity in the Trades.

In the several trades, conditions on the whole were very satisfactory. Activity continues for the most part in the *building trades*, more particularly in Halifax, St. Hyacinthe, Montreal, and Winnipeg, though at a few points the end of the season's operations is in sight. In the case of Victoria, B.C., alone, however, it will be seen, is dullness reported, while throughout Manitoba and the Territories very active conditions prevail with a keen demand for labour. The *metal trades* were also uniformly busy, and in the *woodworking* branches the correspondents, with few exceptions, report employment active. In the *printing, clothing, and tobacco preparation* trades a busy month was uniformly reported, while the *unskilled labour* market all over the Dominion continued in the same active condition that has prevailed since the opening of the season, labour, with only local exceptions, being difficult to secure and commanding a high scale of remuneration.

The Transport Branches.

Special mention should be made of the activity which characterized the transportation branches during the past month, owing largely to the advent of the tourist and excursion season, which affected more particularly the employees of railways and steamboats, as well as cab drivers, carters and expressmen. The prosperity of industry

generally, however, has continued to swell the business of the transportation companies, and general freight traffic was heavy during August. Railway construction, especially in western Canada, has also afforded employment to large numbers of workmen at high rates of wages, difficulty being experienced in some cases in securing an adequate supply of labour.

Earnings of the Intercolonial Railway for the fiscal year ended June 30 last were reported as \$6,324,327, and the working expenses \$6,196,150, leaving a surplus of \$128,177.

Canadian Canal Returns.

Evidence to the same effect as the above is offered by recent returns of Canadian canals, which show a heavy month's shipping through the Canadian canals. Thus in July the Canadian canal at Sault Ste. Marie carried 890,338 tons of freight, or 366,402 tons more than in July, 1902, and 613,714 tons more than in July 1901. For the four months ended July 31, the tonnage passed through the Canadian canals was 2,305,118, compared with 2,115,196 for last year. The freight for the four months was 2,602,496, compared with 2,174,688 last year. Moreover, while an absolute increase of nearly 480,000 tons of freight is thus shown the relative increase as compared with the American canal has been more than maintained, the gain being more than 71 per cent.

During the four months of 1903 the wheat carried by the two canals amounted to 25,576,286 bushels, compared with 28,937,384 bushels in 1902 and 13,595,266 bushels in 1901. In 1902 the Canadian canal carried 9,349,320 bushels, or 32.31 per cent, and in 1903 14,710,655 bushels, or 57.55 per cent of the whole carried by both canals.

* See report of Winnipeg Correspondent in the present issue of the *Gazette*.

Montreal Harbour Returns.

The record of Montreal Harbour returns for the present year shows an increase of nearly 200,000 tons in the tonnage of sea going vessels up to August 1. In addition to this, the tonnage of inland vessels is now greater than the last three years. The report of sea going vessels on August 1 for the last three years is as follows :—

| | |
|-------------------------------------|--|
| 1900, 336 vessels, 644,312 tonnage. | |
| 1901, 375 " 718,082 " | |
| 1902, 367 " 726,868 " | |
| 1903, 388 " 922,911 " | |

The number and tonnage of inland vessels are as follows :—

| | |
|---------------------------------------|--|
| 1900, 8,357 vessels, 774,729 tonnage. | |
| 1901, 3,660 " 743,926 " | |
| 1902, 4,123 " 852,761 " | |
| 1903, 4,822 " 1,057,499 " | |

The Collector of Customs at the port on August 10 issued a statement of revenue for July 1903, as compared with July 1902, as follows :

| |
|--|
| Imports, 1903, \$28,000.00 ; 1902, \$27,500.00. |
| Exports, 1903, \$17,000.00 ; 1902, \$11,000.00. |
| From wharfinger for local trade, 1903, \$6,313.74 ; 1902, \$3,296.51. |
| Total from opening of navigation to August 1, 1903, \$129,089.64 ; 1902, \$111,008.49. |
| Increase, 1903, \$18,081.15. |

The New York Produce Exchange statement of the seaboard movement of grain and flour for July makes a very favourable showing from Montreal with regard to shipments of corn and wheat. The receipts of wheat at Montreal for the month amounted to 3,879,301 bushels, while the United States Atlantic and Gulf ports received, all

told, only 4,588,174 bushels. Shipments of wheat via Montreal made a correspondingly large showing of exports during the month, namely, 2,357,209 bushels, as against 3,374,388 bushels for the United States Atlantic and Gulf ports.

Dominion Revenue.

According to the statement of the Department of Finance, as published in the *Canada Gazette*, the total revenue of the Dominion during July was \$2,309,242.43, as against \$1,108,694.80 in July 1902, while the total expenditure on account of consolidated fund was \$6,564,647.25 as against \$5,126,786.62 in 1902. There was expended on capital account a total of \$421,884.78, of which expenditure on public works, railways and canals to the extent of \$237,832.02, on railway subsidies to the extent of \$896,890, and on bounties on iron and steel to the extent of \$81,118.56, made up the principal items. The total revenue from the beginning of the year up to July 31 was \$66,048,514.32, or an increase of nearly \$9,000,000 over the corresponding period of last year. The expenditure for the year up to July 31 totalled \$48,013,750.93, or about \$700,000 more than in the first seven months of 1902.

Canadian Foreign Trade.

The following table, supplied by courtesy of the Department of Customs, shows the record of imports and exports for the Dominion in July as compared with the corresponding month of 1902 :—

IMPORTS.

| | MONTH OF JULY. | |
|-----------------------|----------------|------------|
| | 1902. | 1903. |
| | \$ | \$ |
| Dutiable goods..... | 8,987,688 | 11,117,192 |
| Free goods..... | 4,738,898 | 7,597,372 |
| Total..... | 13,726,586 | 18,714,564 |
| Coin and bullion..... | 346,696 | 761,079 |
| Grand total..... | 14,073,282 | 19,495,643 |
| Duty collected..... | 2,406,053 | 2,937,492 |

EXPORTS.

| | MONTH OF JULY. | | | |
|---------------------------------|----------------|----------|------------|-----------|
| | 1902. | | 1903. | |
| | Domestic. | Foreign. | Domestic. | Foreign. |
| | \$ | \$ | \$ | \$ |
| The mine | 2,668,902 | 8,681 | 1,152,303 | 9,048 |
| The fisheries | 705,937 | 1,317 | 697,394 | |
| The forest | 3,872,060 | 152 | 3,325,500 | 9,011 |
| Animals and their produce | 5,348,675 | 100,342 | 6,640,448 | 76,695 |
| Agriculture | 1,962,998 | 412,839 | 3,158,002 | 2,072,876 |
| Manufactures | 1,048,762 | 196,821 | 1,380,658 | 171,332 |
| Miscellaneous | 5,449 | 165,145 | 2,112 | 37,665 |
| Total merchandise | 15,612,783 | 885,297 | 16,356,417 | 2,376,627 |
| Coin and bullion | | 106,069 | | 21,168 |
| Grand total exports | 15,612,783 | 991,366 | 16,356,417 | 2,397,795 |

It will be seen that in imports the month shows a gain of over \$5,000,000 over 1902, while in exports an increase of over \$2,000,000 is shown.

Trade with the United States.

According to a statement presented by the Department of Commerce and Labour of the United States, imports from Canada amounted to \$54,660,410 during the fiscal year while the exports to Canada amounted to \$123,472,416. The total of the year's commerce accordingly was larger than in any preceding year. Imports from Canada to the United States have never passed \$50,000,000 except in 1881, whereas exports to Canada did not pass \$100,000,000 until 1901. The following table shows the total exports from and imports to Canada in each year from 1892 to 1902 :—

| Fiscal Year. | Imports. | Exports. |
|--------------|------------|-------------|
| | \$ | \$ |
| 1892..... | 34,954,203 | 43,299,787 |
| 1893..... | 37,777,463 | 46,794,331 |
| 1894..... | 30,790,916 | 56,664,494 |
| 1895..... | 36,574,327 | 52,854,769 |
| 1896..... | 40,887,565 | 59,687,921 |
| 1897..... | 40,309,371 | 64,928,821 |
| 1898..... | 31,870,486 | 83,714,086 |
| 1899..... | 31,220,967 | 87,974,961 |
| 1900..... | 39,369,074 | 95,319,970 |
| 1901..... | 42,482,163 | 105,789,214 |
| 1902..... | 48,076,124 | 109,642,993 |
| 1903..... | 54,660,410 | 123,472,416 |

In the above statistics only the provinces of Nova Scotia, New Brunswick, Quebec, Ontario and British Columbia are included. Of the imports from Canada into the United States during the year just ended, \$38,000,000 were from Quebec and Ontario, \$10,000,000 from New Brunswick and Nova Scotia, and \$6,000,000 from British Columbia. Of the exports to Canada, \$110,000,000 were to Quebec and Ontario, \$7,000,000 New Brunswick and Nova Scotia, and \$6,000,000 to British Columbia.

Trade with Great Britain.

The British Board of Trade returns for the seven months ending with July show the following increases in British imports from Canada :—Wheat, £641,000 ; wheat flour, £19,000 ; maize, £370,000 ; cattle, £1,010,000 ; sheep and lambs, £18,000 ; bacon, £194,000 ; hams, £74,000 ; cheese, £358,000 ; eggs, £11,000 ; canned lobster, £60,000.

The decreases were :—Pelts, £29,000 ; butter, £223,000 ; canned salmon, £502,000 ; sawn wood, £58,000 ; hewn wood, £14,000 ; horses, £35,000, and oats, £1,000.

The British exports to Canada showing increases were :—Salt, £6,000 ; spirits, £31,000 ; wool, £5,000 ; scrap iron and steel, £22,000 ; tinned plates and household cutlery, £11,000 ; hardware, £2,000 ; woollen tissues, £28,000 ; worsted tissues, £106,000 ; carpets, £61,000 ; jute piece goods, £31,000 ; linen piece goods, £11,000 ; cotton piece goods, £7,000 ; haberdashery, £12,000 ; lace, £4,000 ; apparel, waterproofed, £25,000 ; not waterproofed, £26,000 ; earthenware, £39,000 ; cement, £26,000.

The decreases were :—Oil seed, £16,000 ; unwrought tin, £4,000 ; galvanized sheets, £4,000. The export of rails totalled up to £310,000 ; iron bars, £120,000, and sheets, plated, £89,000.

Domestic Trade.

Midsummer inactivity characterized the trade situation in some localities during the first week of August, though at most of the larger wholesale centres business was reported as good for the season, with collections favourable and prospects for the fall retail trade excellent. The prevailing uncertain weather in central and eastern Canada during the earlier half of the month was a factor having a tendency to weaken trade returns. The sorting-up business during the last half of the month, however, was particularly favourable and the tourist trade was noticeably active.

Returns for the last fiscal year relating to the trade with the Yukon were received by the Customs Department and show that Canadian goods received in the Yukon and Atlin districts for the fiscal year amounted to \$3,164,592, and the foreign goods to \$1,170,050 or \$1,994,337 in favour of Canada. The showing is \$77,699 better than for 1902.

Municipal organizations and proceedings.

The annual meeting of the¹ Ontario Municipal Association was held at Guelph

on August 12, at which session the following resolution on the subject of municipal control of streets was carried unanimously :

‘That the Municipal Association of Ontario now in session at Guelph this 12th day of August, 1903, view, with alarm the attempt that is being made by railways to deprive municipalities of their just rights to control their own streets and highways, as is proposed by the bill now before the Dominion Parliament respecting the Toronto and Hamilton Railway. This convention, believing that the municipalities should have complete control of their own streets and highways, protests against the principle of such legislation as an interference not only with municipal but with provincial rights, and calls upon their representatives in Parliament to do all in their power to prevent such an injustice being done, and that a copy of this resolution be transmitted to Mr. Hyman, M.P., Chairman of the Railway Committee.’

There was also a considerable discussion on the subject of assessments as effected by recent legislation, and on the second day's session of the association a resolution was passed opposing the bill in question in its present form, on the ground that it ‘will not enable the municipalities to pay their way unless by increasing the general taxes far beyond the former limit of two cents on the dollar, and so making the taxes of property owners far beyond the ability of the average tax-payer to pay.’ The creation of the Dominion Good Roads Department was approved of, and Toronto selected as the next place of meeting.

Representatives of municipalities interested in the transmission of electric power from Niagara Falls held a meeting in Toronto on August 12 and appointed a commission to investigate the question with a view to deciding on the desirability of undertaking the enterprise, as well as the probable cost. The commission was appointed in accordance with the provisions of the Act passed by the provincial legislature during its recent session. The cost of the commission, it was decided, will be apportioned to the various municipalities interested according to assessment. The commission will be allowed to employ electrical engineers and financial experts, and will present their views in the form of a report, after due investigation.

A by-law was passed by the town of Whitby, Ontario, on August 18, authorizing the municipality to spend the sum of \$65,000 for the supply of electric light and water to its citizens, the town to take over the existing electric light plant and combine it with the waterworks system. In this connection it may be stated that attention has been recently directed to the action of the town of Port Arthur, Ontario, in connection with the question of municipal ownership. The corporation named owns and operates a line of electric street railway, seven miles in length, constructed at a cost of \$115,000 in 1892. For a number of years, it is stated, the railway was operated at a loss, though more recently the annual deficit has been wiped out, the earnings for the month of July just passed alone being \$4,107.25, while the operating expenses for May were \$1,680.28. The electric energy is obtained from a neighbouring water-fall, where a power house sufficient to develop seven hundred and fifty horse-power has been installed. Light is supplied to citizens from the same source at a moderate cost. There has also been recently inaugurated, in conjunction with the town of Fort William, a municipal telephone service at a rate of \$24 per year for business telephones, and \$12 a year for domestic. The system has cost about \$12,000 up to the present.

Proceedings of Labour Organizations.

The International Typographical Union met in session at Washington, D.C., on August 10 with delegates present from the various States of the American Union and from the several provinces of the Dominion. The report of the Secretary-Treasurer for the year ended May 31, 1903, shows that receipts amounted to \$223,255 and expenditures to \$174,085, leaving a cash balance of \$149,170, an increase during the fiscal year of \$11,097. The advance in the paying membership during the past year was 4,072, the largest in the history of the

organization. The per capita tax is now being paid by an average membership of 42,436. Death benefits paid during the year numbered 476, involving an expenditure of \$30,940. The balance to the credit of this fund is now \$14,943. The union closed its 49th annual meeting with resolutions pledging moral and financial assistance to the type founders, trade district union in its movement for a universal wage scale. The new trade agreement between the International Typographical Unions, the International Pressmen's Unions and the International Brotherhood of Bookbinders was adopted. The meeting further declared that it was in the best interest of the union that subordinate unions in Canada should affiliate with the Dominion Trades and Labour Congress; authorizing the executive committee to work out a plan for organizing the rural districts throughout the United States and Canada for the purpose of enrolling unattached printers outside of union towns and authorizing a permanent travelling organizer who is a Canadian.

Mr. W. S. Stone, of Eldon, Iowa, was elected Grand Chief Engineer of the Brotherhood of Locomotive Engineers to fill the unexpired term of the office made vacant by the death of Mr. P. M. Arthur. It was announced that the new officer would carry out the conservative principles advocated by Mr. Arthur in every essential.

Notes of the Month.

An organization of retail merchants at Vancouver was formed during the month, the objects of the association being set forth as follows:—

To safeguard and promote the interests of the various retail merchants throughout the city.

To have the retail trade of the city confined to the legitimate retailers.

To enforce the transient trade Act and take measures to regulate the system of peddling on a fair basis.

To induce the public in every legitimate way to patronize local merchants and purchase goods of local manufacture.

To promote a better feeling among the merchants of the city and to work together for the advancement of the commercial interests of the city.

The Ontario Bureau of Labour, in reply to a circular addressed to the different municipalities of this province asking as to openings of industrial concerns, received replies to the effect that during 1902, one hundred and twenty new manufacturing industries were started in the province. Eleven of these were saw-mills, five were foundries, five were furniture factories, three were evaporators, three were lighting plants and three were clothing factories. The majority of the municipalities stated that they have good advantages to offer manufacturers.

At a meeting of the Montreal Board of Canadian Manufacturers' Association on August 7, the executive committee defined its attitude on the labour question as follows:—

'Questions of policy in regard to the labour unions have been before your executive since early in the year. Our association has up to the present

made it a rule to touch these labour troubles only on points of legislation. But it may be that conditions could become so acute that further action would be called for. Such a crisis seemed to be threatening this year, when your committee thought it well to convene the membership of the branch, but happily, the evil worked its own cure.

'As an organized body we cannot deny the workmen the right to organize, but it must be the duty of the manufacturers, both individually and collectively, to protect the rights of free labour, to retain shop government in the hands of those upon whom rest the responsibility of success of our industrial enterprises and to see that the union officers do not injure our industrial well-being. For that reason your branch has supported through its delegations to Ottawa and in conjunction with deputations from other sections of our association, the following requests on the Government:

(1) That the Government should, through its immigration officers, encourage the immigration of mechanics into Canada, to relieve the scarcity of labour for our factories.

(2) That the union label bill should not be made law.

(3) That trades unions should be compelled to become incorporated.

(4) That foreign labour agitators should be prevented from coming into Canada to create industrial strife.

A resolution was also adopted favouring the compulsory incorporation of labour unions.

II.—REPORTS OF LOCAL CORRESPONDENTS.

HALIFAX, N.S., AND DISTRICT.

Mr. F. W. Smith, Correspondent, reports as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

The condition of the labour market during the past month has been exceedingly busy, and was quite as active as, if not more so than, the previous month. Supply and demand have been pretty evenly balanced; and, while the printing trade has not been as active as anticipated, on the whole the general market has been good. Much of this activity can be attributed to the work afforded by the South-western Shore Railway, and the large amount of construction work which is being carried on here. Commercial activity has also been marked, and the wholesale and retail trades have been much engaged. The strike of the carpenters has been settled, the men resuming work on the 17th, under

the terms of the award of the arbitrators, which has already appeared in the *Labour Gazette*.^{*} The strike of the labourers employed on the Imperial works has also been settled. The men demanded an increase of from 12 to 15 cents an hour. The Imperial authorities sent a detachment of regular soldiers to take places of strikers, and the latter have secured employment elsewhere.

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—The outlook for this branch of industry has very much improved during the past month, and while the season is very late the general condition is much more satisfactory than was contemplated, and a good average crop will be harvested.

Fishing.—This industry has been about normal. During the past month, however,

^{*} See *Labour Gazette* for July, page 52.

there have been large catches of mackerel, but other branches are but normal.

Mining.—The general condition of the mining industry during the past month continues to be most encouraging, and all branches report satisfactory yields.

CONDITION OF PARTICULAR TRADES.

Building trades.—Bricklayers and masons are enjoying a good season. Carpenters and joiners have resumed work, and are very busy. Lathers and plasterers also are busy. The painting and decorating trade is still very active, while plumbers, stone-cutters and builders' labourers are enjoying great activity.

Metal, engineering and shipbuilding trades.—Iron moulders are very busy, with iron workers and helpers well employed. Machinists and engineers report work normal. Electrical workers are busy. Blacksmiths are fairly well employed. Stove mounters report work normal. Boiler makers are busy. Shipwrights and caulkers are well employed.

Woodworking and furnishing trades.—This branch is fairly well employed.

Printing and allied trades.—Printers are only partly employed; with pressmen business is normal.

Transport.—In all branches of steamboat and railway business all are actively employed. Teamsters and expressmen are satisfactorily employed.

Unskilled labour.—Unskilled labour has been exceptionally busy, and the season in this line is generally good.

SYDNEY, N.S., AND DISTRICT.

Mr. John Moffatt, Correspondent, reports as follows;—

GENERAL CONDITION OF THE LABOUR MARKET.

Miners and mine labourers of this district have been enjoying unbroken prosperity for

five years. The collieries are working day and night and labour is plentiful. No willing workmen, skilled or unskilled, is refused employment. The Cochrane coal seam is to be developed and operations are already begun. Some of the blast furnaces shut down indefinitely last month. A new steel rod mill with a capacity of 5,000 tons per month, was begun in July. Wholesale trade is not much affected by steel depression as two-thirds of the business is at the collieries. Retail trade is active. Clothing merchants and jewellers were dull. There were no changes in rates or hours of labour, and no strikes.

The English Church Diocesan Conference discussed social questions, such as labour unions, strikes and their settlement, commercial combinations, their uses and abuses.

CONDITION OF LOCAL INDUSTRIES.

Fishing.—Lobster and cod fishing is fairly remunerative at present, but is not carried on extensively.

Manufacturing.—The manufacture of steel billets at Sydney is suffering from the competition of the United States.

Mining.—Mining is the chief industry of Cape Breton county, over 10,000 workers being engaged in and around the mines and shipping piers. The miners are a thrifty and highly intelligent class, providing for their injured by mutual benefit funds and hospitals. The collieries are managed by native workmen who have successfully passed the Provincial Mining Boards. The enormous monthly output ranging, from 60,000 to 80,000 tons, and the low accident rate place these collieries on a level with the best American coal mines. Under-cutting machinery, electric and compressed air haulage underground, are late additional features to the tail rope and endless haulage systems in vogue for years. Steel bankheads for weighing, cleaning and assorting the coal into sieves are constructed at all new

collieries. The Sydney coal-fields produced close to 3,000,000 tons last year, and will exceed it this year, though one large colliery was idle, owing to a fire, for over two months. Within the last two months the D. I. & S. Co. discharged 600 men, shut down two blast and three open hearth furnaces, and the Sydney building boom has been suddenly stopped and trade in general is affected. Numbers of carpenters, bricklayers and masons have left the town, besides the 600 steemplemployees. It is estimated that Sydney to-day has 2,000 less people than it had two months ago.

CONDITION OF PARTICULAR TRADES.

Building trades.—Bricklayers and masons report work fair, but falling off, and many have left town, prospects not being bright. Lathers and plasterers were less brisk than in June or July. Plumbers are active. Gas and steam fitters were fairly employed.

Metal, engineering and shipbuilding trades.—Iron moulders report conditions dull and a few left town, being laid off work. Iron workers and helpers are slack and have no visible signs of employment. Machinists and engineers report a number discharged from Sydney Steel Works. Steam engineers, electrical workers, linemen, blacksmiths and horseshoers were satisfactorily employed.

Woodworking and furnishing trades.—Carriage and wagon makers were fairly active. Pattern makers report conditions dull and are leaving town, there being no work.

CHARLOTTETOWN, P.E.I., AND DISTRICT.

— *Mr. F. J. Nash, Correspondent*, reports as follows :—

GENERAL CONDITION OF THE LABOUR MARKET.

The general condition of the labour market during August was practically the same as during July, supply and demand being

well balanced. Building operations continued fairly brisk in the country, while in the city the construction of the new market house and the erection of an annex to the Charlottetown hospital, an extension to a large dry goods store, and a number of private residences gave employment to all the available carpenters. Produce shipments were light though a large number of cattle was exported. Bankers and wholesale and retail merchants report trade quieter this month than last, a natural condition in this province at this season. There has been no change in rates or hours of labour, and harmonious relations between employer and employed continue.

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—About two-thirds of the hay crop, which will be about an average one despite the drought in the early part of the season, was housed in good condition, broken weather interfering with operations in the latter part of the month. The exodus of 500 young men to the harvest fields of the North-west in the latter part of the month will render farm labourers rather scarce on the Island. The root and grain crops will be equal to if not above the average.

Fishing.—Mackerel fishing was better in August than in July, especially in the western part of the province.

Manufacturing.—There is little to note of the manufacturing situation in a province that is almost purely agricultural, and whose other industries are based upon agriculture. The output from the cheese factories was heavier in August than in July, and prices were satisfactory, being slightly higher than at the same period last year.

Railway construction.—The construction of the Belfast and Murray Harbour Railway is nearing completion and operations are now confined to track-laying and grading. About 200 men are employed on the Hillsborough

Bridge at timbering caissons, dredging and masonry.

CONDITION OF PARTICULAR TRADES.

Building trades.—Bricklayers and masons were fairly busy. Carpenters and joiners had steady employment. Painters, decorators, paperhangers, plumbers and builders' labourers were all fairly employed.

Metal, engineering and shipbuilding trades.—Iron moulders, iron workers and helpers, machinists and engineers had steady employment during the month. Linemen were busy. Blacksmiths and bicycle workers report a good month.

Woodworking and furnishing trades.—Carriage and wagon makers were busy with repairing.

Printing and allied trades.—Printers and bookbinders were satisfactorily employed.

Clothing trades.—Journeymen tailors and boot and shoe workers had steady employment.

Food and tobacco preparation.—Bakers, confectioners, butchers and meat cutters, and tobacco workers, were fairly busy.

Leather trades.—Tanners and curriers, leather workers and saddlers were fairly busy.

Miscellaneous.—Barbers, hotel employees and laundry workers were busy.

Transport.—Railroad conductors, locomotive engineers, locomotive firemen, railway telegraphers, railroad trainmen and railway trackmen were steadily employed. Freight, handlers, steamboatmen, steamboat firemen, teamsters and expressmen were busy.

Unskilled labour.—This class of labour had a fair month, but the temporary stoppage of work on the city streets threw a number out of employment.

ST. JOHN, N.B., AND DISTRICT.

Mr. W. H. Coates, Correspondent, reports as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

During the month of August the labour market continued active, although carpenters were not so well employed as in July. Two new warehouses are in the course of construction at St. John West; also new conveyers are being erected for the C. P. R. elevators to replace those destroyed by fire last spring. Work was commenced on the construction of the Courtney Bay branch of the I. C. R. There is a mile and a quarter of crib-work to be built, and it is estimated that over a million feet of timber will be utilized to complete the work. Work on the extension of the general public hospital was commenced and is progressing favourably. The Street Railway Company has finished double tracking Douglas Avenue, and is now extending its line down to St. John West. The company has also razed a three-storey building on Union Street and will erect a structure for general offices in its stead. The Allan foundry at St. John West has been purchased by a syndicate and will be operated under the name of The Union Foundry and Machine Works. The Portland Rolling Mills management has temporarily closed down its big twelve-inch mill and nine-inch mill, throwing about eighty men out of employment. The rush of tourist trade has created great activity on the railroads and steamboats. Bank clearings for the month of August were \$4,377,079, and \$3,391,557 for the corresponding period last year, being \$985,522 greater than 1902. The wholesale and retail trade is enjoying a successful season. The sheet-iron and metal workers gave their employers notice that on and after the 17th they would expect an increase of \$2 per week. After having several consultations it was decided to accept an increase of \$1

per week for those that were receiving \$10 per week, providing a raise of \$2 be granted to those getting under \$10. Five waiters employed by the Union Club received an increase of \$5 per month on August 20. They formerly received \$20 per month.

The first action under the 'Employers. Liability Act,' which was only enacted during the last session of the Provincial Legislature, has been entered.

The New Brunswick Coal and Railway Company's line from Chipman to Newcastle, Queen's County, is completed and the first car of coal over this line arrived in St. John on August 24, instant.

CONDITION OF PARTICULAR TRADES.

Building trades.—Bricklayers and masons find work satisfactory. Carpenters and joiners are fully employed, Painters, decorators, plumbers, gas and steam-fitters, stone-cutters and builders' labourers are all well employed.

Metal, engineering and shipbuilding trades.—Iron moulders, iron workers and helpers, machinists and engineers are busily employed. Electrical workers and linemen are extra busy. Blacksmiths, boilermakers and sheet metal workers are fairly active. Horseshoers are busy.

Woodworking and furnishing trades.—All branches of the woodworking and furnishing trades are fully employed.

Printing and allied trades.—Work continues good with printers and pressmen. Bookbinders are fairly active.

Clothing trades.—Journeyman tailors are well employed and organized a union on August 27.

Food and tobacco preparation.—Bakers and confectioners are busy, and cigarmakers fairly so.

Miscellaneous.—Broom and brush-makers are satisfactorily employed.

Transport.—Freight-handlers and trackmen report work plentiful. Ship labourers say work is only fair. Street railway employees, teamsters and expressmen find satisfactory employment.

Unskilled Labour.—Unskilled labour is well employed.

DISTRICT NOTES.

Carr's Mill.—James Carr's saw mill, twelve miles below Woodstock, was totally destroyed by fire July 29. A quantity of lumber was also burned, the total loss being estimated at \$8,000.

Tay Creek.—On August 25 fire destroyed the saw and grist mills belonging to Mr. William McNut, at this place; 30,000 feet of sawn lumber and 45,000 shingles were also consumed.

QUEBEC, QUE., AND DISTRICT.

Mr. Edward Little and P. J. Jobin, Correspondents, report as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

Labour has been generally well employed during August, the demand being better than in July. The transportation branches and hotel employees were particularly active, in connection with the tourist trade. The number of conventions of association held in Quebec have also added to employment in these lines. Millmen for work in Ontario were in demand.

A civic grant of three hundred dollars in connection with the annual meeting of the National Trades and Labour Congress of Canada, which will be held at Quebec in September, was passed by the finance committee of the city council on the 21st inst.

Committees from the different international unions held a meeting on the 8th inst. with a view to forming a Federated Trades Council. Further action will be taken when the committees report to their respective unions.

The floating grain elevator "Denny Sullivan" of the Wolvin Co's. fleet was destroyed by fire on the 6th inst., with a loss approximating \$25,000. On the 18th inst., the workshops of the Great Northern Railway Company were burned, involving a probable loss of \$75,000.

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—Wet weather has caused some damage to hay, but the grain crop will be above the average, and the fine weather of the last week of the month was favourable to harvesting operations.

Railway construction.—Work on the extension of the Lévis Electric Railway is being pushed rapidly and it is anticipated that cars will be running as far as the bridge at Etchemin in September.

THE CONDITION OF PARTICULAR TRADES.

Building trades.—Some time was lost through wet weather early in the month, but work is very plentiful, and the various branches have been, on the whole, busy.

Metal, engineering and shipbuilding trades.—Employment has been plentiful and a good deal of overtime has been worked. Boilermakers in particular have been very busy in making penstocks for the new pulp mills and on iron ship repairing. There has also been a demand from outside sources for this class of labour. Electrical workers and linemen have had plenty of work.

Printing trades.—Printers, pressmen and bookbinders report work plentiful and no hands idle.

Clothing trades.—In the shoe and leather trades August has been a better month than July, though all factories are not yet working to their full capacity. Overtime, however, was worked in one establishment.

Miscellaneous.—Barbers have had a good month.

Transport.—These branches have been particularly active, the regular passenger trains being commonly too heavy for single engines. Ship labourers and longshoremen, however, have not been particularly active, though the month on the whole was better than July. The new coal discharging plant of the Dominion Coal Company commenced operations early in the month, involving a very great reduction in the number of men required in unloading coal vessels. Cab drivers and truckmen have been very busy.

THREE RIVERS, QUE., AND DISTRICT.

Mr. John Ryan, Correspondent, reports as follows :

GENERAL CONDITION OF THE LABOUR MARKET.

The condition of the labour market remains about the same as last month. A demand for unskilled labour is still noted. All classes of labourers have been constantly employed since spring, and those that wished to work have obtained employment, high wages being paid compared to previous years. In the building trades there is much activity. Relations between employers and employees are generally of a satisfactory character. The strike at the Montreal Pipe Foundry has been settled amicably. The company was paying the men semi-monthly, and the men asked to be paid weekly, say, every Friday, so as to be able to do their marketing on Saturday. Later on the company decided to pay its men on Saturday night, which caused dissatisfaction, though the men returned to their work as usual.

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—Harvesting is in full operation, and the hay crop has been saved in fairly good condition with few exceptions. The crop will amount to about 60 per cent. Oats will be a very good crop and of excellent quality. Of potatoes there will be

an extra heavy crop,—from all appearances the best for many years.

CONDITION OF PARTICULAR TRADES.

Building trades.—Bricklayers and masons have been very busy. Carpenters and joiners, painters and decorators, plumbers and stone cutters have been steadily employed.

Metal, engineering and shipbuilding trades.—Blacksmiths, bicycle workers, jewellers and watch-case makers have all been fully employed.

SHERBROOKE, QUE., AND DISTRICT.

Mr. H. Logie, Correspondent, reports as follows :—

GENERAL CONDITION OF THE LABOUR MARKET.

The labour market during the month has been exceptionally active, and ahead of the month of July. There has been a good demand for all classes of labour, and the machinists and allied trades are still very busy. There has also been a great demand for unskilled labour, and as a result of the scarcity the water-works department was unable to proceed with contemplated extensions. There has been one unfavourable development in the industrial community during the month, and that was the closing down of the Dominion Carpet Company. It was stated that the suspension of business would only be temporary, but the company has since gone into liquidation and about 150 employees, who could not secure work here, have gone to other parts of the Dominion. The head office of the company was in England. The D. J. Ayer Co., glove manufacturers, has located in Lennoxville, and will start with fifteen hands. It is stated that the Quebec Government will in the course of a few weeks call for tenders for the erection of a new court-house to be located on Strathcona Square. The cost will approximate \$75,000. The retail merchants report business as being ahead of

last month, and they expect a busy week during the forthcoming exhibition, which takes place during the first week of September. A Trades and Labour Council, composed of delegates representing the various unions in Sherbrooke, has been formed; final arrangements have not yet been completed. There is no unrest at present among any class of workmen.

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—Farmers have been greatly inconvenienced by the wet and backward season. The hay crop in some sections is not half what it was last year. The other crops are reported to be well up to the average. Farmers are complaining of the scarcity of help.

Lumbering.—Lumbermen are preparing for their winter's work in the woods. In some cases it was only at the beginning of the month that the spring logs were got to the mills, owing to low water.

Manufacturing.—The woollen mills report business as being fairly good.

Railroad construction.—A large number of men are employed by the Canadian Pacific Railway Company on the Megantic branch grading the track.

CONDITION OF PARTICULAR TRADES.

Building trades.—All engaged in these trades are very busy. Bricklayers and masons and all connected with building report work as more plentiful than is generally the case at this time of the year, and there is every prospect that this will continue well into the winter.

Metal, engineering and shipbuilding trades.—Iron moulders are fully employed, and there is no scarcity of work. The machine shops have been compelled to put on night gangs to overtake work. Good machinists find ready employment. A large number of linemen are employed in the

district both with the Bell and People's Telephone companies.

Woodworking and furnishing trades.—The sash and door factories are well filled with orders, and the various branches of the woodworking trades have no lack of employment.

Printing and allied trades.—The job printing offices are rushed with exhibition orders.

Clothing trades.—Custom tailors are very busy, with work for the Americans visiting the surrounding resorts. Good journeymen are in demand.

Fooded tobacco preparation.—Bakers and confectioners are very busy.

Unskilled labour.—Unskilled labour is much sought after, but is not nearly equal to the demand.

ST. HYACINTHE, QUE., AND DISTRICT.

Mr. Napoleon Samson, Correspondent, reports as follows :—

GENERAL CONDITION OF THE LABOUR MARKET.

August has been an extremely busy month for all classes of labour and there are very few idle men. Contractors report very satisfactory conditions, but with hardly sufficient men to complete their works. The construction work on the Côté boot and shoe factory is progressing rapidly, the workmen being engaged on the second story. This building will be four stories high when completed and will be one of the largest structures of our industrious city. It is nearly certain that by the end of September the factory will be in full blast. Business is briskest among the sash and door factories. Dr. Pomerat, of Holyoke, Mass., has arrived with the machinery for the manufacture of chemical bricks. Some sections of this machinery are very large, weighing in the vicinity of 1,800 lbs. each. It is not known yet where

the factory is to be located, probably in the neighbourhood of the Quebec Southern Railway. This new industry will give employment to a number of hands. The foundations of the principal building of the Bertrand Company are nearly completed, that is to say, the foundation walls, 204 feet in length by 50 in depth, are finished. The workmen were to commence on the 31st August the foundations of the two boiler-houses as well as the tall chimney. No changes have taken place in the rates of wages or hours of labour during the month. Notwithstanding the amicable relations which exist between employers and employees, certain slight instances of unrest occurred from time to time. Thus on the 15th of the month in one of the largest industrial establishments in the city the two night watchmen were notified that in future one alone would do the work. Neither of the employees wished to undertake to do the work alone and were consequently replaced by a new hand. The same thing happened with the stokers of this concern. The company wished to give them additional work, and they have been replaced by others without any objections being raised.

CONDITION OF LOCAL INDUSTRIES.

The unfavourable weather has very much delayed harvesting, and only a very small quantity of the crops has been garnered. Great difficulty is experienced in cutting rye and other cereals. The fields are looking very well, but if the rain continues to fall every day it is probable that the quality of the grain will suffer. The farmers are getting alarmed at the present poor weather. With one or two exceptions, manufacturers are very busy.

CONDITION OF PARTICULAR TRADES.

Building trades.—Bricklayers, masons and carpenters have had an excellent month. Plumbers and steamfitters report very satisfactory conditions.

Metal and engineering trades.—Iron moulders, iron workers and their helpers and machinists have had steady employment. Tinsmiths have had plenty of work.

Woodworking and furnishing trades.—Woodworkers, upholsterers and carriage-makers have been very busy.

Printing and allied trades.—Members of these crafts state that business is good.

Clothing trades.—Journeyman tailors and garment workers have had a fairly good month.

Food and tobacco preparation.—Cigar-makers have been well employed.

Leather trades.—Tanners and curriers report similar conditions to last month.

Transport.—Carters have been fully employed.

Unskilled labour.—Day labourers have been fully occupied, but there has been a slight loss of time owing to the unfavourable weather during the month.

DISTRICT NOTES.

St. Césaire.—A St. Hyacinthe firm has taken the contract to improve the large heating apparatus of the chapel of the college of this place.

MONTREAL, QUE., AND DISTRICT.

Mr. Gustave Audet, Correspondent, reports as follows :—

GENERAL CONDITIONS OF THE LABOUR MARKET.

Owing to the pressure of work in the harbour, wharfingers are very busy and hands are scarce. The transportation trade at the present time has assumed abnormal dimensions. Notwithstanding the holiday months wholesale and retail merchants have no reason to complain, as sales are excellent and there is an extraordinary activity for the months of July and August. Coal merchants report their books filled with retail orders, and that trade is very good this year.

With the exception of a small strike among the marble cutters, workmen in all branches of trade are satisfied.

CONDITION OF LOCAL INDUSTRIES.

Manufacturer in general have plenty of work on hand. Boot and shoe workers are very busy. The Singer Sewing Machine Company is working by night on account of an excess of orders. Rubber and cotton manufacturers are also fully occupied. In a word, from information received, manufacturers of all kinds are extremely busy and orders are arriving in large numbers.

CONDITION OF PARTICULAR TRADES.

Building trades.—Bricklayers and masons are very busy and hands are scarce. Carpenters, joiners, lathers, plasterers, painters, and all branches of the building trades are fully occupied.

Metal, engineering and shipbuilding trades.—Iron moulders, iron workers and helpers, coremakers, machinists, etc., report excellent conditions, there being no men idle. Stove mounters are very busy with autumn work. Blacksmiths, boilermakers and sheet metal workers have plenty of work. Bicycle workers are fairly occupied but are not so busy as last year.

Woodworking and furnishing trades.—Furniture workers generally report that business has never been so good as this year. Carriage and wagon makers are very busy. Car builders report a comparative slackness owing to the holiday months.

Printing and allied trades.—Members of these crafts report an abundance of work, with much higher wages than last year.

Clothing trades.—Journeyman tailors and garment workers are fully occupied on fall and winter clothing. Boot and shoe workers complain of lack of hands.

Food and tobacco preparation.—This is the busiest time of workmen in this branch.

Transport.—Owing to the congested state of the port through excess of business, steamboat men and steamboat firemen are very busy and, with ship labourers and longshoremen, have too much work on hand. Additional hands are needed.

Unskilled labour.—There is plenty of activity in this branch owing to the work which is being done on the streets.

HULL, QUE., AND DISTRICT.

Mr. Laferriere, Correspondent, reports as follows :—

GENERAL CONDITION OF THE LABOUR MARKET.

Labour generally was in a healthy condition in August in and around Hull. There was a great scarcity of hands and the highest wages were paid. Outsiders have to be brought in to meet the demand. Shanty wages offer the greatest inducement, and the city workingman leaves readily for the bush, where his salary is clear profit, without opportunities to spend it. The highest wages are paid to cooks, and other hands are paid proportionally high. For instance, hewers get from \$50 to \$55 per month and board. The latter is fully equal to any \$3 board in the city. The new method of supplying the men with varied food has superseded the old style of supplying pork and beans, exclusively. The condition of the shantymen as to personal security and comforts is better now than ever before. Apart from that source of demand for labour, the Ottawa Northern and Western extension, north of Gracefield, and the construction of the cement works in Hull are contributing to the exhaustion of the supply, so much so that both of the enterprises mentioned will have to import labour. A carload of Italians arrived in Hull toward the closing of the month for the cement people. The latter company employs over 150 men on construction work, of whom a great many are bricklayers. There was a slight disturbance among the sawmill labour-

ers of the city when the new spread around on the 20th instant, that there was a general strike on at J. R. Booth's. Although those mills are situated in Ottawa, Hull is directly affected. Happily, the strike did not last long. Owing to a few men operating one of the main machines leaving work, the mills had to be closed down, but remained so for two days only. Some 300 Hull men were idle for that length of time, and one of them was arrested and fined in Ottawa for interfering with the workingmen. The cause of the trouble was that some leaders had advised their followers to go out for an increase of \$1 per week for the day gang, and \$2 per week for the night gang. It happened that they went out alone, not meeting with the support that they expected from the men. The grocers who are the immediate creditors of these people, on account of the system prevailing in the city, were in some danger of loss as the workingmen as a rule pay their grocery bill only every two weeks, and are usually in debt for one or more fortnights supplies. The grocer depends directly on the toiler, whom he supplies on a system of credit. The dry goods business was dull during August, but merchants expect it to pick up in the early fall.

CONDITION OF LOCAL INDUSTRIES.

Manufacturing, like *lumbering*, is very brisk. The woollen factory, the Eddy shops, and axe factory are running full capacity.

Lumbering.—Business suffered from a slight set-back, owing to the destruction by storms of the engine-room of the Fraser mills at Deschenes. It is not expected that these mills will be running again this fall.

CONDITION OF PARTICULAR TRADES.

Building trades.—Bricklayers employed in laying the cement blocks of the large mills are paid the union wage of \$3.30 per day. Commons labourers are paid at those shops \$1.35 per day, the rate of corporation

labourers. Stone-masons get the union wages of \$3.50 to \$4 per day. Carpenters and joiners are receiving \$1.50 to \$1.75 per day.

Unskilled labour.—This class is paid \$1.35 per day.

DISTRICT NOTES.

Buckingham, Aylmer, Papineauville and Templeton have their saw-mills and local industries in full operation. Farmers are complaining of the rain, which has been especially harmful to potatoes, fruits, &c.

OTTAWA, ONT., AND DISTRICT.

Mr. T. W. Quayle, Correspondent, reports as follows :—

GENERAL CONDITION OF THE LABOUR MARKET.

There was an abundance of work for every one who wanted to work during August, and opportunities for employment were never greater. In almost every line of work there was activity. More particularly was this true in regard to farm labour, and in the lumbering industry. In the factories there was a busy air and every evidence of abundance of orders. The building trades were well employed, for, in addition to the numerous houses in the course of erection, several large buildings were being pushed forward. Mercantile transactions were brisk for the summer months, and the orders placed for fall and winter stock gave proof of the confidence felt in the future. There were no serious industrial disturbances.

About 300 millmen employed by Mr. J. R. Booth, went out on strike for an increase of \$1 to \$2 a week in pay, but the strike was of short duration, lasting less than two days. The men had no organization and appeared to have acted without much previous consideration. They went out on Wednesday 19th and all had returned by Friday the 21st. There was no disturbance of any kind. A few of the strikers were engaged by another firm, and a number

engaged for the shanties, but the bulk returned to their former employment.

CONDITION OF LOCAL INDUSTRIES.

The ingathering of the *harvest* was interfered with somewhat by rain, but on the whole it was safely garnered and was a satisfactory crop.

Lumbering was active with a scarcity of men for the woods. The wages offered ranged from \$28 to \$35 a month and board.

CONDITION OF PARTICULAR TRADES.

Building trades.—Among the large buildings going up which give considerable employment were the new public library, Davidson & Thackray's sash and door factory, the J. W. Woods Company's factory, and the Citizen Company's new building.

Metal, engineering and shipbuilding trades.—All branches of the metal trades were fairly well employed. The Bell Telephone Company had a large force at work strengthening on several streets.

Printing and allied trades.—Printers were all busy.

Clothing trades.—Tailors report trade good for the season.

Transport.—Owing to heavy traffic transportation companies were busy, and all railway employees were employed full time.

BELLEVILLE, ONT., AND DISTRICT.

Mr. W. S. Macdiarmid, Correspondent, reports as follows :—

GENERAL CONDITION OF THE LABOUR MARKET.

The month of August has been a good one for all classes of labour, and in the different branches of trade there has been a good demand for men. As a result there are few idle men anywhere. Banks report a good month, and merchants report the month's business ahead of the corresponding month of last year. There have been no changes

in the hours of labour and no lock-outs or strikes.

CONDITION OF PARTICULAR TRADES.

Agriculture.—The month has been a busy one for agricultural pursuits, the wages paid to farm labourers being higher than last year.

Fishing.—There has been no fishing this month in this locality as net fishing is prohibited.

Lumbering.—Many men left here during the month for the Georgian Bay lumber camps to engage in lumbering. The wages paid are as high as \$30 per month with board, which is higher than last year.

Manufacturing.—Local manufacturers report plenty of orders on hand, and having done a good business during the month.

Mining.—Mining is very active in this country and a great many men are engaged.

Building trades.—In the building trades the month has been a good one, and those engaged in this work report a busy season.

Metal, engineering and shipbuilding trades.—The reports from all engaged in these trades are very encouraging.

Woodworking and furnishing trades.—The local manufacturers in woodworking and furnishing report a good month's business with plenty of orders on hand. One firm is getting out work for Toronto, and another reports that it has orders which cannot be completed before the new year.

Printing and allied trades.—These trades have had a good month. Printers have been scarce, and there is plenty of work on hand at present.

Clothing trades.—The month has been a good one for the clothing trades.

Food and tobacco preparation.—In the food and tobacco preparation trades the month has been a satisfactory one and very encouraging reports have been received.

Leather trades.—Leather workers and harness makers report good conditions.

Miscellaneous.—Barbers were busy.

Transport.—Steamboatmen report business excellent.

Unskilled labour.—There was a steady demand for unskilled labour.

DISTRICT NOTES.

The rails of the Belleville Portland Cement Company's spur line of railway is being laid down at Point Ann. Very encouraging reports are being received and are well only be a short time until operations will be carried on on a very large scale.

KINGSTON, ONT., AND DISTRICT.

Mr. Wm. Kelly, Correspondent, reports as follows :—

GENERAL CONDITION OF THE LABOUR MARKET.

Labour generally was fully employed during the month of August, without perceptible change in the supply and demand, or the opportunities for employment, etc., as compared with several previous months. Many places of business are undergoing extensive repairs and improvements. There was also a new piano factory started here during the month. Commercial operations continue active judging from the extent of shipments, bank clearings, etc. Wholesale and retail trade is good and merchants are looking forward to an unusually large fall trade. There were no changes in the rates of wages or hours of labour, and no strikes or lock-outs, etc., during the month.

Considerable interest was taken in the visit of members of the Chambers of Commerce of the Empire during the month. The Board of Trade and city officials provided entertainment for the visitors.

CONDITION OF LOCAL INDUSTRIES.

Agriculture is very active. Crops of all kinds are abundant and farmers are having

some difficulty on account of the lack of help and continued rains in getting their harvesting done.

Fishing and lumbering are dull at present.

Manufacturing.—Manufacturers of all kinds are busy.

Mining is very active. Many rich finds of various kinds are being constantly made in the county of Frontenac.

CONDITION OF PARTICULAR TRADES.

Building trades.—The various branches of the building trades continue unchanged and busy.

Metal, engineering and shipbuilding trades.—All branches of these trades continue to be steadily employed.

Woodworking and furnishing trades.—Woodworkers and persons engaged in the furnishing trades are actively employed.

Printing and allied trades.—All branches of these trades report business satisfactory.

Clothing trades.—Merchants engaged in the clothing trades report business much improved since July.

Food and tobacco preparation.—Bakers, confectioners, butchers, ice cutters and drivers, cigar makers, etc., report business active.

Leather trades.—Tanners and curriers are still rather slack, but improvement is anticipated soon.

Miscellaneous.—Barbers are busy.

Transport.—Business in connection with the various railways is very active, freight-handlers, etc., being extremely busy. Several wrecks in connection with the railways occurred locally during the month.

Unskilled labour.—This class of labour is fully employed.

DISTRICT NOTES.

The ratepayers of *Wolfe Island* having decided to build and operate their own ferry

between Kingston and the Island, are now asking for tenders for the construction of a ferryboat to be built on the lines of the steamer *Pierpont* operated by a company for years past.

TORONTO, ONT., AND DISTRICT.

Mr. Phillips Thompson, Correspondent, reports as follows:—

GENERAL CONDITION OF THE LABOR MARKET.

There is little change in labour conditions, which continue generally satisfactory, with plenty of employment in nearly all trades and fewer labour troubles. There is considerable feeling between employers and employed as a result of the season's strikes which is kept alive by the methods employed in some of the disputes still remaining unsettled—more especially the introduction of labour from abroad and the resort to legal proceedings against trade unionists. One significant evidence of the growing tension is the determination of the Toronto District Labour Council to exclude the press and the general public from their sessions, which are now held with closed doors.

CONDITION OF LOCAL INDUSTRIES.

Manufacturers in all lines are generally busy, most of them having orders for some time ahead. They anticipate an active and prosperous fall season.

Builders and contractors have hardly as much work as last season. Not so many new building permits are being taken out, and some building contractors, who have finished the work undertaken in the spring, have none on hand. Many large undertakings are in course of completion, but the outlook for the immediate future is not encouraging. Some extensive operations in the construction of cement sidewalks and street pavements are employing a large number of men.

Farmers are actively engaged in harvesting, the crop prospects being generally favourable,

but recent heavy rain-storms have interfered somewhat with operations and inflicted damage in some neighbourhoods.

CONDITION OF PARTICULAR TRADES.

Building trades.—The building trades are fairly prosperous at present, but, as intimated above, the prospects are hardly so favourable for steady fall and winter work as was the case last season. Bricklayers, builders' labourers, stonemasons and plasterers are well employed. Carpenters who are good mechanics have plenty of work, but those who are only partially skilled are not in demand and many of them are idle. The painters' strike was settled on the 3rd inst., the men returning to work at 30 cents per hour.

Metal, engineering and shipbuilding trades.—Employment in all these lines continues plentiful and present appearances indicate that favourable conditions are likely to continue for some time. The strike of the bridge and structural iron workers was settled with the Dominion Bridge Co., and the Canada Foundry Co., on the 18th. According to the terms of settlement the wages, formerly 25c. to 27½c. per hour, have been increased to 27½ and 30c. per hour, the number of hours remaining the same. The only firm where the men are still out is that of McIntyre & McGregor. All the men who went out are now at work. The strike of iron moulders and caremakers at the Canada Foundry Co.'s. works is still on. Only about 30 of the men who struck remain out of work. A number of the Scotch moulders brought over to take the places of strikers have returned to the old country. The silver workers, who number about 300, and have hitherto been affiliated with the brass workers and other unions, intend establishing an organization of their own.

Woodworking and furnishing trades.—Satisfactory conditions prevail in these lines, with plenty of work.

Printing and allied trades.—The printing business during the month was considerably

better than in July and there are few out of work. Bookbinders, stereotypers and electrotypers are also well employed.

Clothing trades.—Custom tailors are experiencing the usual lull in trade between seasons but look forward to abundance of work shortly. Garment workers are fairly well employed. There is abundance of work for boot and shoe workers. Hat and cap workers are steadily employed as the extension of this industry has increased the demand for help. Another line which has grown considerably of late is that of the manufacture of neckwear. Several new establishments have recently been started, and the number of female operators and finishers employed in Toronto in this department is about 500.

Food and tobacco preparation.—August has been a good month for workers in these departments, who are particularly busy just now owing to the opening of the Dominion Exhibition on the 29th and the large number of visitors who will come to Toronto during the next fortnight.

Transportation.—Employees engaged in transportation of all kinds have steady employment and are very busy at present. The business of the Toronto Street Railway shows a continuous increase, the gross earnings for July being \$192,629, an increase of \$30,556 over the corresponding month in 1902.

DISTRICT NOTES.

The construction of a large slaughterhouse, 160 by 75 feet, in connection with the Union Stock-yards, *Toronto Junction*, has been commenced. It will have capacity for 400 cattle per week, besides hogs and sheep. The Union Stock-yards at *Toronto Junction* have secured from the Grand Trunk Railway the same privileges and rates for cattle-men shipping stock there as those in force for delivery at Toronto.

HAMILTON, ONT., AND DISTRICT.

Mr. S. Landers, Correspondent, reports as follows:—

GENERAL CONDITION OF THE LABOUR MARKET,

Labour during the month has been very well employed and there are no idle workers in the city. A number of workers, male and female, who recently arrived from Great Britain, have secured work in the city. Several of the new industrial buildings under construction are about completed. Transportation returns and bank clearings have been unusually large. Wholesale and retail trades are very busy. There have been no changes in rates of wages or hours of labour in the different trades during the month and no strikes or lock-outs. The bakers' strike has been declared off, the men having returned to night work, against which they went out on strike.

The following institutions were incorporated during the month:—The Lake Ontario Steamship Company, Ltd., capital \$150,000, divided into 1,500 shares of \$100 each; head office, Hamilton. The Safety Fruit Picker Company of Ontario, Ltd., capital stock \$20,000, divided into 2,000 shares of \$10 each, and the Hamilton Brewing Association, Ltd., capital \$600,000, divided into shares of \$100 each, head office, Hamilton, Ontario. The latter is the result of a consolidation of the three local breweries.

CONDITION OF LOCAL INDUSTRIES.

Agriculture and fruit farming are at present profitable callings in this vicinity; the fruit crop is very large.

Manufacturing of every description is at its height of production. The International Harvester Co., has begun operations in some portions of its plant and several hundred men are employed. The canning factories are very busy, and help is scarce. The tobacco, clothing, iron, cigar and many other factories are working to their full capacity.

CONDITION OF PARTICULAR TRADES.

Building trades.—The building trades are still very busy, bricklayers and masons, plasterers, painters, carpenters, electrical workers, plumbers, and all engaged in kindred building trades, are well employed at present, and likely to be while the good weather lasts.

Metal and engineering trades.—Iron moulders, stove mounters, metal polishers, coremakers, etc., are also very busy. Sheet metal workers are fairly well employed, both at inside and outside work. Horseshoers have not been very busy during the month. Machinists are fairly busy, and all men are in employment. Jewellers are also well employed at present.

Woodworking and furnishing trades.—Among the woodworking trades work has been very fair during the month. Finishers, polishers, piano workers, and all operators in mills and furniture workers have been fairly well employed.

Printing and allied trades.—The printing trades have been very busy during the month and few idle men are in the city. Bookbinders have had a fair month.

Clothing trades.—The custom tailoring trade has been somewhat slack, as it is between the seasons. The garment workers, on the other hand, have had a very busy month. Hat makers and boot and shoe workers find employment fair.

Food and tobacco preparation.—Bakers are all at work again at the old rate of wages, having abandoned their strike for the abolition of night work. The cigar and tobacco workers are all very busy and all men in employment. The bakers are also busy.

Miscellaneous.—Broom-makers are well employed and have enjoyed a fair month. Hotel and restaurant employees, (waiters), have organized a union. Laundry workers are very busy.

Transport.—All railroad men, both electrical and steam, are well employed. Teamsters are very busy. A union of teamsters has been formed in the city. The longshoremen have not been very busy during the month, owing to considerable coal being shipped by rail.

Unskilled labour.—Unskilled labour is very busy at 18 cents per hour.

FORMATION OF LABOUR ORGANIZATIONS.

Hamilton.—Teamsters and hotel and restaurant waiters have formed labour unions, and the garment workers have changed from an Independent Union to an International.

DISTRICT NOTES.

Dundas.—All of the trades in town, machinists, garment workers, moulders, axe factory employees, woodworkers, etc., have had a very busy month. Houses are very scarce.

NIAGARA FALLS, ONT., AND DISTRICT.

Mr. Ernest Green, Correspondent, reports as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

Workingmen of all classes are very busy in this section, and in some lines there is an unsatisfied demand for men. It may be said that there are no unemployed men. Several small manufacturing concerns are being established here, and others are likely to locate here soon. The building trades are still very busy, as are also all moulders, machinists and allied crafts. Wholesale houses report trade as excellent and railway freight traffic heavy for the season. The only sign of dissatisfaction among labouring men in this district is the strike of the rubber workers at Port Dalhousie. Contracts have been let by the Ontario Power Co., to the Jencks Machine Co., of Sherbrooke, Que., for a steel conduit 5,880 feet long and 18 feet in diameter, and by the

Toronto and Niagara Power Co., to M. P. Davis for the construction of the wheel-pit of its works to develop 125,000 electric horse power. The city has let contracts for brick paving, granolithic sidewalks, and an additional pump for the waterworks, and sewer improvements.

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—Farmers are generally busy and prosperous. Frequent rains have interfered to some extent with harvesting operations, but there has been little loss on that account. Fruit suffered from hail and wind storms near Lake Ontario and west of this city. There is a good demand for capable farm help. Several paying *gas wells* have been struck in this district.

Manufacturing.—Manufacturing concerns are all busy and business is in a healthy condition.

Railroad construction.—Railroad men are well employed. The passenger traffic on local and through lines was very heavy during August. At the end of the month freight traffic became so heavy that all yards on the frontier were overcrowded and the railways found difficulty in keeping it moving.

CONDITION OF PARTICULAR TRADES.

Building trades.—Bricklayers and masons continue very busy and at times not enough men can be secured. Carpenters are all well employed, but the shortage of men is not so marked as it was earlier in the season. All other sections of the building trades are constantly employed at good wages. Contractors from outside towns and cities are doing considerable work here, and all local building firms are busy.

Metal, engineering and shipbuilding trades.—All sorts of men who work in foundries, machine shops, etc., are busy and likely to be so for some time to come. Blacksmiths, tool-sharpeners and their helpers are

well employed, as are also stationary engineers, firemen, steam and air drillers, channel drillers, etc.

Woodworking and furnishing trades.—Carriage workers are experiencing a dull period, but practically all the men in that class are employed.

Printing and allied trades.—All classes of employees of printing houses find plenty of employment.

Clothing trades.—Tailors are generally busy and men are frequently advertised for.

Food and tobacco preparation.—Fruit canning factories throughout the district are working to fullest capacity, and there is a great temporary demand for women, girls and boys for these factories.

Miscellaneous.—Barbers are busy and are having a good season. Office employees are generally well employed. Hotel and restaurant employees have been in demand, but the busy season is now closing. New hands have been taken on at several laundries.

Transport.—An unusually busy season in the tourist and excursion business with a well sustained freight traffic, followed by a heavy yield of fruit, have kept all classes of men engaged in the transportation business well employed. Freight handlers have been in demand at wharves and freight houses. Electric railway traffic is now growing much lighter and a reduction in the number of crews will follow.

Unskilled labour.—Unskilled labourers find ready employment at good pay. Hundred of men are employed on the Electrical power development work as muckers and general labourers.

DISTRICT NOTES.

Welland.—The machine and boiler shops are working at their fullest capacity. The wire fence factory is doing a good business, and canal improvements gives employment to many men.

St. Catharines.—The serious loss by fire suffered by the Geo. A. Wilson Co., lumber merchants and contractors, has forced that firm to make an assignment for the benefit of its creditors. Five fruit canneries are working at their fullest capacity. Manufacturing concerns are hardly as busy as last month. Building trades are quiet.

Thorold.—This place has been working a general nine hour day for some months. Employment and industry are in a thrifty and satisfactory condition. The Niagara, St. Catharines & Toronto Railway is reconstructing its high level line.

Port Dalhousie.—The strike of the rubber workers employed by the Maple Leaf Rubber Co., has greatly disturbed industrial conditions here. The rubber factory is the chief industry of the place. Many strikers are working at other callings and some have left the locality.

Crystal Beach.—A vendor of newspapers was convicted in police court of selling on Sunday, contrary to the "Lord's Day Act," and fined.

Port Colborne.—A Sunday excursion steamer from Buffalo could not land its passengers as the Customs office declined to issue clearance papers that day.

BRANTFORD, ONT., AND DISTRICT.

Mr. J. C. Watt, Correspondent, reports as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

Workingmen in Brantford have had a good opportunity for steady employment during August. In the building trades the activity of the preceding month continues, and further additions to factories have been decided upon. The Ham & Nott Co. is erecting a large warehouse, 125 x 74 feet, at an estimated cost of \$3,000. A number of additional men will be employed. The Adams Waggon Co. has commenced the construction of a large addition to its factory,

and more skilled labour will be required. The Verity Plough Co. has commenced operations on an extension to the engine room. A new engine of greater horse power and another boiler will be installed. The factories engaged in the iron trades are running to their greatest capacity, and all available competent men are being employed. The Ham & Nott Co., before closing its factory for repairs and stock-taking, shared the profits for the year, as is its custom, with the employees. Those in the employ of the company one full year and earning over 13 cents an hour received \$11; those earning under that amount, \$5. Amicable relations between employers and employees have continued.

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—Farmers and market gardeners have been exceptionally busy during the month, and crops on the whole have been good. The fruit crop is very heavy and the sample excellent. Many farmers have already threshed, and some ploughing has been done. On account of the scarcity of labour many of the farmers co-operate in taking off their crops.

Railroad construction.—The Grand Valley Electric Railway will be extended from Paris to St. George at once. Extensive operations on the line of the Grand Trunk are affording employment to a large force of men, many of whom are foreigners.

CONDITION OF PARTICULAR TRADES.

Building trades.—In the building trades there has been much activity, and bricklayers, masons, carpenters, plasterers, painters, plumbers and gas-fitters have been steadily employed.

Metal, engineering and shipbuilding trades.—Iron and brass moulders and core-makers have been rushed with work. Machinists have been working overtime, and there is a demand for first-class steady men.

Electrical workers, linemen, metal polishers and buffers report having plenty of work. Carriage, general and machinery, blacksmiths have had steady employment. Sheet metal workers have had a very busy month.

Woodworking and furnishing trades.—Woodworkers of all classes have been busy. Patternmakers, millwrights, carriage and waggonmakers and coopers have had steady employment.

Printing and allied trades.—Printers and pressmen report all local men fully employed.

Clothing trades.—Journeyman tailors experienced a fair month's work.

Food and tobacco preparation.—Bakers and confectioners have been exceptionally busy. Butchers and meat cutters have had a very satisfactory month. Cigarmakers and tobacco workers have had an excellent month.

Miscellaneous.—Barbers report doing an average trade. Clerks have had steady employment. In grocery stores there has been much activity on account of the fruit season. A demand for hotel employees, male and female, has continued during the month. Laundry workers report an active month's business.

Transport.—Freight-handlers have been working overtime. Railroad trackmen and street railway employees have worked steadily. Teamsters, draymen and expressmen have all found ready employment.

Unskilled labour.—This class of labour is fully employed.

DISTRICT NOTES.

Paris.—There has been much activity in building trades during the month. At the Penman mills employment has been steady. A \$2,000 dye-house has just been completed. The Sanderson-Harold Company is erecting a \$5,000 warehouse. The present warehouse is to be fitted up with machinery and will be a splendid addition to the factory.

GUELPH, ONT., AND DISTRICT.

Mr. O. R. Wallace, Correspondent, reports as follows :—

GENERAL CONDITION OF THE LABOUR MARKET.

The labour market continues in about the same general condition noted for some months back. There is no lack of employment for all lines of trade, except in a couple of trades where employment is unseasonable, and in one shop where a strike is in progress. One feature of the month is the reported scarcity of bricklayers. Work on the Government buildings is being pushed steadily, but the Macdonald buildings at the Ontario Agricultural College are going up slowly, and the Carnegie Library is at a standstill owing to the lack of concrete blocks of which it is being built. Retail trade has been good for August. Fires destroyed two small factories, which, however, are already being rebuilt. Bakers, after working day work for two weeks, have gone back to the night work system again.

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—Crops of all kinds are yielding abundantly. Farm labourers for the summer months are receiving \$1.50 per day, or \$30 and board per month.

Manufactures.—Manufactures in all lines are busy, with the exception of the cream separator and carriage trades. An addition equal to the size of the present building is about to be added to the tube mills.

CONDITION OF PARTICULAR TRADES.

Building trades.—The building trades are exceptionally well employed and have a large amount of work still in hand. There are about 50 bricklayers and masons at work at present compared with 28 last year, and there are jobs for 10 or 15 more. Carpenters and painters are all steadily employed. Stone-cutters are also steadily employed, but the season's rush is about over. With build-

ers' labourers the demand for men noted last month has been met.

Metal, engineering and shipbuilding trades.—Iron moulders, machinists and sheet metal workers have had a fair month, with the exception of one shop, where 28 moulders and apprentices went out on strike for an adjustment of piece work scale and recognition of the union. This afterwards caused the shutting of the shop, throwing about 160 machinists and machinists' helpers out of work.

Woodworking trades.—Woodworkers and piano and organ workers have had a very busy month, with new men taken on. Upholsterers for August have been exceptionally busy. Carriage workers report their slack season.

Printing and allied trades.—Printers are busy, with no idle men.

Clothing trades.—Tailors have had only a fair month's work.

Food and tobacco preparation.—Bakers have gone back to night work, the reason assigned is that too much stale bread accumulated.

Textile trades.—Textile workers report a busier month than July.

Transport.—Teamsters are exceptionally well employed.

Unskilled labour.—The demand for unskilled labour is not so brisk, owing to the approaching completion of the sewage works. Ten Italians employed on the sewers struck for \$2 a day, instead of \$1.80, the higher rate being paid to some new men who were taken on. Four of the men returned to work at the old rate and six obtained other employment.

FORMATION OF ORGANIZATIONS.

Berlin.—The building contractors of Waterloo County have organized and given notice of a declaration of incorporation before the County Judge and County Clerk of the Peace. The membership numbers about 30

DISTRICT NOTES.

Galt.—A scarcity of bricklayers is noted. Considerable difficulty in obtaining building material is experienced. A project is under consideration to erect about 30 or 40 workmen's dwelling houses to rent from 8 to 12 dollars a month.

STRATFORD, ONT., AND DISTRICT.

Mr. J. T. Carlin, Correspondent, reports as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

Great activity prevails at present in all lines, especially in the building trades. Every skilled mechanic finds steady employment and labourers are in great demand at good wages. Owing to the scarcity of houses and the demands of new comers there are more dwelling-houses in course of erection than in any previous year. The Kemp factory is now turning out seven machines a day; the Stratford Clothing Co's. factory addition is nearly finished and will be ready for occupation in a few weeks. The foundation of the Y.M.C.A. building will be completed next week. The brick work on the Cardigan factory is about done, and the excavating is finished and foundation started on Kalbfleisch's new factory, which will manufacture automobiles and all kinds of rubber-tired vehicles. These operations, with those of the factories have made Stratford a busy city. Wholesale and retail merchants report business exceedingly good. There were no changes in the rates of wages and no disturbances in the labour market.

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—The farmers are nearly through harvesting and report a successful year. Wheat is an excellent crop, yielding nearly forty bushels to the acre, and the quality is good. Barley is also a good crop and will yield a fine quality. Peas are not so extensively sown, but are a fair crop.

Oats will yield from forty-five to sixty bushels per acre. Threshing is now well on.

Railroad employment continues very steady, and all train crews are working full time.

CONDITION OF PARTICULAR TRADES.

Building trades.—Bricklayers and masons are fully employed and have plenty of work on hand. Carpenters, joiners, lathers and plasterers are also very busy. Painters and decorators report enough to do. Plumbers, gas and steam-fitters, stonecutters and builders' labourers have all the work they can do.

Metal, engineering and shipbuilding trades.—Machinists are well employed. Electrical workers and linemen have had a good month. With blacksmiths work is steady, with no idle men. Boilermakers of the Grand Trunk shops are working full time.

Woodworking and furnishing trades.—Upholsterers report plenty of work. Coopers are especially busy.

Printing and allied trades.—Printers are fairly busy.

Clothing trades.—Journeyman tailors report trade satisfactory, while the factories are running to their full capacity.

Food and tobacco preparation.—Cigar-makers are well employed and a few extra hands were employed during the month.

Miscellaneous.—Barbers report a good month's trade.

Transport.—Men engaged in transportation service are exceedingly busy, especially train hands, owing to the increase of passenger traffic this month. Teamsters and expressmen report a busy month.

Unskilled labour.—Men in this class are all employed and good wages are offered for steady men.

LONDON, ONT., AND DISTRICT.

Mr. A. Wootton, Correspondent, reports as follows :—

GENERAL CONDITION OF THE LABOUR MARKET.

This city has just passed through another month in which labour generally has been employed to its utmost capacity. There is no trade that is not enjoying its share of the rush, and especially is this so in the building and metal working trades. The walls of the armoury are rising rapidly and it is expected that the roof will be on before the end of the year. The McClary Co. is again adding new buildings to its plant, a large enamel shop is being built at the old works, and a pattern shop on a portion of the new site. The present month has been an eventful one in the matter of the settling of long-standing feuds between employer and employee. The trouble between the management of the Grand Opera House and the Musicians' Protective Association and Opera House Orchestra, which has been in the law courts for a year, has at last been settled. The lessee of the house decided to withdraw all suits against the musicians, each side to pay its own costs, and he also agrees to employ none but members of the Musicians' Association to play in his house. The members of the orchestra are to be allowed to again become members of the association on payment of a fine, and another orchestra, which formerly played in the house, will play for the first two weeks of the season; after which the lessee may engage whom he wishes as long as they are members of the association. The machinists' strike still continues, a number of machinists from Great Britain are at work at Leonards, but are not giving entire satisfaction, and some of those have already quit. A number of the strikers have left the city, and at present there are only about six original strikers here. The cigarmakers' strike took a turn in favour of the men during the month, when McNee & Sons, one of the largest firms out of which thirty-five men went

on strike, granted their demands, and are now employing as many of the old hands as they can get. A peculiar feature of this strike is that all the male strikers had secured employment in other shops in the city before the firm mentioned yielded, but have left these shops to go back to their old jobs, and although at the present time there is quite a number of jobs open, these firms cannot get men to fill them. There are thirty-one female strikers idle yet, but they are bunch breakers and rollers, and work in teams; the jobs that are open are for those that can make the cigar all through.

CONDITION OF PARTICULAR TRADES.

Building trades.—Bricklayers and masons are all employed, but the biggest jobs are drawing near a finish. Carpenters, lathers and plasterers are rushed. Painters are in demand. Plumbers and gas and steam fitters have more than they can do. Stonecutters and builders' labourers are in demand. Brickmakers are very busy and cannot supply the demand. The price of brick has been raised from \$6 and \$6.50 per thousand to \$7.50 for ordinary brick to \$9 for veneer brick.

Metal, engineering and shipbuilding trades.—Iron moulders can secure employment here. About thirty iron moulders from Great Britain came to work at McClary's at \$2.25 and \$2.50 per day. After working for about two weeks at day work, the company wished them to work piece-work, but, as the conditions were different and such as they were not used to, they refused and for the most part quit and have returned home. Core-makers and machinists are very busy. Linemen report nothing but the fair work doing. Metal polishers and stove mounters are extra busy.

Woodworking and furnishing trades.—Woodworkers are very busy. Carriage and wagon workers report a splendid summer's work, and a large amount of their work being

shipped to the North-west. Car workers continue very busy. Coopers continue to be in demand.

Printing and allied trades.—The most important event in these lines during the month was the closing up of the *Daily News* after over seven years existence. As an indication of the condition of the trade it may be stated that all the hands had secured employment elsewhere, within one week after the closing. The London Printing Co. has put on about eight extra men during the month, and has added a large Meikle & Colt's armor press to its already large plant. The brick work on the five story new job and lithographing establishment for Messrs. Lawson & Jones has been completed.

Clothing trades.—Tailors report a very fair summer. Garment workers have been delayed somewhat on account of the inability of the mills to deliver cloth.

Food and tobacco preparation.—Cigarmakers are very busy, with a few jobs open in some shops. A number of cigarmakers that went away during the strike have returned.

Miscellaneous—Broom-makers report trade as being good.

Transport.—On the railways a scarcity of engines causes a delay in the movement of consignments. Train crews are making an exceptionally large month, and all classes of railroad hands are busy. Double tracking is under way on the Sarnia branch of the G.T.R. near Sarnia.

Unskilled labour.—This class of labour continue in demand, on cement sidewalks, new roads and sewers, gas mains, etc.

ST. THOMAS, ONT., AND DISTRICT.

Mr. A. Roberts, Correspondent, reports as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

General activity continues to prevail in nearly all branches of industry, and in some

there is an increased output and longer hours worked. In the building line, however, there is a marked dullness and evidences of an early fall closing, attributed largely to the recent failure of a loan company, which seems to have affected the building prospect more than other lines. Labour, however, is generally well employed, and a few unskilled workers only report intermittent employment. Factory hands are in demand in several lines. Railway traffic is active, and there is a demand for locomotive firemen, in anticipation of a heavy fall traffic. Retail business is normal, and merchants report favourable prospects for fall trade. Rates of wages continue generally unchanged, and there were no industrial disputes to report.

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—Harvesting work is well under way and as a result many harvest hands have taken advantage of the C. P. R. excursion to the North-west. About 125 men left this district, which about equals last year's record, notwithstanding the alleged scarcity of help in this line.

Manufacturing.—All local industries show the same favourable conditions as have prevailed during the summer. The lumber supply is more difficult to obtain than in former years, owing to its scarcity, and manufacturing is somewhat restricted in this line as a result, especially in the wagon and carriage supply trade. The Erie Flour mills are reported to be practically flooded with orders from the British market, and as a result the company has commenced running its mills night and day. Some difficulty was experienced in getting a supply of wheat as there is a tendency among the farmers to hold it in anticipation of higher prices.

CONDITION OF PARTICULAR TRADES.

Building trades.—While the building trades show signs of relaxation, all mechanics have been steadily employed up to the present. Bricklayers anticipate a short season,

but for carpenters, plasterers, painters, plumbers, etc., the season will be much longer.

Metal, engineering and shipbuilding trades.—For iron moulders, machinists, blacksmiths and boiler-makers conditions continue favourable.

Woodworking and furnishing trades.—Wood turners, benders, car builders, stave and carriage makers report trade active.

Printing and allied trades.—Printers, pressmen and bookbinders report being very busy working on fall mercantile advertising. An amalgamation of two local firms, viz., the 'Municipal World' and the "Sutherland Printing Company," has been effected. The new firm will be known as the 'Municipal World,' Ltd.

Clothing trades.—Journeymen tailors reported a fairly steady trade all through the slack season. Garment workers are in demand at the John Northway and Sons factory. The firm has increased the staff from 10 to 30 hands within the past two months, and announces that in the course of time one hundred to two hundred hands will be employed.

Food and tobacco preparation.—Bakers have advanced the price of bread, and are now selling a one and a half pound loaf for five cents instead of the regular two-pound loaf. Cigarmakers report a steady trade.

Miscellaneous—Broom-makers, brush and woodenware workers are in demand at the local factories.

CHATHAM, ONT., AND DISTRICT.

Mr. John R. Snell, Correspondent, reports as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

Labour of all kinds was as well employed this month as last. Men in the building trades have been all fully employed. Street paving and other civic work has been exceptionally active, with prospects of continu-

ing so for the balance of the season. The supply of labour is about equal to the demand. The addition to the Wm. Gray & Sons' factory is progressing rapidly towards completion, and the addition to the Manson Campbell fanning mill factory is completed and in operation. Transportation continues active, both by rail and water. Wholesale and retail trade is fairly busy. There are no changes to note in the rates of wages, and no unrest in the labour market.

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—The hay, oats and wheat harvest is about over; hay and oats have been fully up to the average yield. Wheat, however, is scarcely up to the mark, and corn and beans it is expected will not be an average crop. Corn in some sections will only be fit for fodder.

Manufacturing in nearly all its branches is fairly active, with plenty of orders ahead,

CONDITION OF PARTICULAR TRADES.

Building trades.—Bricklayers, masons carpenters, plasterers and painters report trade good, with no idle men. Plumbers, gas and steamfitters, and stonecutters have all the work they can do.

Metal, engineering and shipbuilding trades.—Iron moulders, machinists and engineers are all fully employed. Sheet metal workers, electrical workers with linemen have all they can do.

Woodworking trades.—Carriage and wagonmakers report work a little slack. Coopers are fairly well employed.

Printing and allied trades.—Printers, pressmen and bookbinders report trade very good for this month.

Clothing trades.—Journeymen tailors report trade as being rather quiet this month.

Food and tobacco preparation.—Bakers and confectioners report having steady employment. Cigarmakers have plenty of work.

Miscellaneous.—Barbers have had a very good month. Clerks and delivery employees are all steadily employed.

Transport.—Railway men of all classes report steady work throughout the month. Ship labourers and longshoremen are all satisfactorily employed. Teamsters are exceptionally busy.

Unskilled labour.—Farm hands continue scarce.

WINDSOR, ONT., AND DISTRICT.

Mr. D. Mitchell, Correspondent, reports as follows :—

GENERAL CONDITION OF THE LABOUR MARKET.

The condition of the labour market in this city and district continues good, all classes of labour having been employed, both skilled and unskilled. Owing to the large increase of building operations men engaged in those lines are very scarce, and the supply is not equal to the demand. Wholesale and retail trade continues good. There have been no changes in the rates of wages, or trouble between employer and employees.

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—Owing to the good weather prevailing during the past month the crops have turned out well, and the farmers report that the yield of farm and garden produce will be above the average, while fruit is abundant.

Lumbering.—The lumber business is very active at present, and dealers are laying in a large supply this summer. As they were short of lumber in filling their orders this spring, they are anxious not to have the occurrence happen again.

CONDITION OF PARTICULAR TRADES.

Building trades.—Bricklayers and masons are fully employed and there are no idle carpenters or joiners. Lathers and plasterers are very busy, and painters have abundance

of work. Plumbers are rushed with work and some of them are working overtime. Builders' labourers are in demand.

Metal, engineering and ship building trades.—Iron moulders are satisfactorily employed. Machinists have their hands full, and there are a few openings for capable men. Blacksmiths and wagon makers are rushed with work.

Printing and allied trades.—The printing trade has been a little slack during the past month but it is now picking up again.

Clothing trades.—Journeyman tailors report trade good.

Transport.—All railway men are fully employed.

Unskilled labour.—This class of labour is still in demand.

WINNIPEG, MAN., AND DISTRICT.

Mr. John Appleton, Correspondent, reports as follows :—

GENERAL CONDITION OF THE LABOUR MARKET.

With the exception of a few men, mainly recent arrivals in the province, who have no particular vocation, and others who have come with the intention of farming and have found such vocation not to their liking, every able man is employed, and there is a great demand in the city of Winnipeg for all classes of manual labour. Much of the work itself, however, is not in the city, but at railway construction camps situated at various points in the North-west, and at other classes of work not in the city. For such work the necessary labour is hired in Winnipeg and distributed therefrom. Skilled men in the building trades are still in demand, the most necessary being plasterers. During the month several new industries have been commenced, including a new general iron works, the building of new railroad repair shops, a cigar factory, &c. The iron works have commenced operations

with 75 hands, and when more fully equipped will employ more than double that number. The construction of the railroad shops will give employment to a large number of work-people, and when completed will require to operate them from 3,000 to 4,000 men. At the present time approximately 1,000 are employed. The continuation of extensive building operations is perhaps the most striking feature of business activity. Wholesale houses find it very difficult to keep pace with expanding trade, and bank clearings continue to show large increases over corresponding periods of previous years and immediately preceding months. Wages continue to show signs of general advances. The train employees of the Canadian Pacific Railway Company have received an advance all round of approximately 15 per cent. The employees of the same company in the repair shops have also received notice of an advance which will take effect on the first of September. The new schedule in course of formation will show an advance of the maximum from 30 to 32½ cents per hour for machinists, while the less skilled workers will get an advance of 1½ cents per hour. The advances secured are all the result of negotiations of a very satisfactory character.* During the last few months the labour market has been free from unrest of any kind.

CONDITION OF LOCAL INDUSTRIES.

Recent crop reports indicate a better average than as hoped for earlier in the season. Various estimates have been made, but they vary according to localities. Immediately around Winnipeg the crops are light and wheat will at average more than 10 to 15 bushels to the acre. From a line north to south halfway across Manitoba westward the crops are good and will average 20 bushels to the acre. This yield will necessitate the employment of as many labourers as were brought here for the purpose last year.

*For full text of the agreements see below under District Notes.

If the crop on the whole is slightly lighter the acreage is larger. The number of labourers necessary is estimated to be about 18,000. The first contingent of this number arrived in Winnipeg on the 18th of August, a date slightly late as the harvest is already proceeding briskly. Thousands of acres have been already cut and await the arrival of labour to put the sheaves in shock. The methods adopted by the farmers and encouraged by the Provincial Department of Agriculture are the same as those pursued last year. This year the delegates sent to Winnipeg to employ help for groups of farmers have in some cases provided themselves with cards and these they present to the incoming labourers as they leave the train. The competition for the labourers is very keen. By a general understanding the wage offered is \$40 per month with board, or without the latter \$2 per day. In cases of especially good and experienced men \$45 is paid.

The manufacturing concerns of every description in the city are extremely busy. One garment factory reports many machines idle because of inability to secure young women to operate them. Another is about to move into a new and commodious factory just completed, and contemplates adding to its staff. The various iron works all report a dearth of really skilled men, which fact hampers their dealing satisfactorily with an extraordinary rush of orders. Generally speaking, as far as manufacturing interests are concerned, most prosperous conditions prevail. The Vulcan Iron Works new foundry building is approaching completion and will provide accommodation for many more hands in that department.

Railroad construction is proceeding as fast as the supply of labour will permit. The continuously increasing number of employment agencies all display placards announcing their requirements, most of which are for railroad labourers. Wages for such work appear to be strengthening; quotations are

as follows:—Axemen, \$35 per month with board; tie loaders, \$1.25 per 100; station men, 20 cents per yard; cooks, \$35 per month; bridge carpenters, \$2.75 to \$3 per day, with board to be charged at \$3.50 per week; teamsters, \$35 to \$40 per month and board; ordinary labourers, \$1.75 per day with board at rate of \$3.50 per week. In most cases free fare is provided to actual location of work. Respecting the provision of free fare it would be as well to draw attention to a recent suit at Virden, Manitoba. Out of 76 men engaged to work as extra gang on the Kirkella extension of the Canadian Pacific Railway only 12 actually went to work and the balance refused or absconded. Action for breach of contract was entered against nine of these men, all of whom were given the option of paying a fine of \$20 or going to prison for 20 days. The practice of such men is to sign a contract for service with the railway companies while at the same time not intending complying therewith, but simply using the transportation ticket to reach some point for their own personal convenience. Several cases have recently been before magistrates, and in all cases severe sentences have been passed.

CONDITION OF PARTICULAR TRADES.

Building trades.—All the building trades are busy, and really good men in all lines are in demand. Plasterers are exceptionally scarce. Plumbers and steamfitters have recently received an advance in wages and the best class of men earn 50 cents per hour. Inferior workmen, however, get as low as 25 cents. The painters' union has given notice that on and after September 1 union men will refuse to work with non-union men.

Metal, engineering and shipbuilding trades.—All the metal and kindred trades have as much business on their hands as their plant and facilities will permit of their handling. Moulders are receiving 30 cents per hour, blacksmiths $32\frac{1}{2}$ cents and machinists $27\frac{1}{2}$ to 30 cents.

Woodworking and furnishing trades.—In all branches of the woodworking trades unusually good conditions prevail.

Printing and allied trades.—In these trades all available hands are employed and prospects are excellent.

Clothing trades.—Garment factories and journeymen tailors are enjoying a fine season's trade; hands are scarce.

Food and tobacco preparation.—Caterers and cigar factories are sharing in the general prosperity. A new cigar factory has opened and already employs some twelve hands.

Leather trades.—Leather workers report steady employment with overtime and with busier times ahead.

DISTRICT NOTES.

The Machinists' Unions of Winnipeg and westward as far as Vancouver have agreed with the C.P.R. Co. to the adoption of the following schedule:—

Fort William to Pasqua Junction, $32\frac{1}{2}$ cents per hour.

Pasqua Junction to Laggan and east of Crow's Nest, 34 cents per hour.

Crow's Nest to Kootenay Landing, 36 cents per hour.

Laggan to Kamloops (exclusive of Kamloops) including all points in the same longitude, 37 cents per hour.

Kamloops to Vancouver, $34\frac{1}{2}$ cents per hour.

Apprentices, first year, 9c.; second, 11c.; third, 13c.; fourth, 15c.; fifth, 17c. per hour.

(a.) New men may be started at 3 cents (3) per hour under the minimum rates for a period not exceeding three months, when, if not considered qualified for the minimum rates, they shall be discharged, but nothing in this clause shall prevent a qualified machinist from obtaining the minimum rates before the expiration of three months on the recommendation of the foreman and general foreman.

(b.) Charge hands, paid by the hour to receive two cents above the regular rate.

The Brotherhood of Railroad Carmen has agreed with the C.P.R. Co. to the adoption of the following schedule:—

ARTICLE 1.

Men inspecting or working on trains or car cleaners shall not be considered shopmen.

(a.) The regular shop hours shall be from 7k. to 15 o'clock the first five days of the week, with one hour for dinner between 12k. and 1., and on the sixth day the hours shall be from 7 to 17k. from October 1 to April 1, with one hour for dinner between 12k.

and 13k., and from 7k. to 12k. from April 1 to October 1.

(b.) Time and one-half will be paid if worked after the above hours and for Sundays and the following public holidays, viz.: New Year's Day, Good Friday, Victoria Day, Dominion Day, Labor Day, Thanksgiving Day and Christmas Day.

(c.) The company may lengthen or shorten the working hours as business may necessitate.

ARTICLE 2.

All car inspectors, air-brake testers and cleaners, oilers and coach cleaners employed at outside points and yards, including Winnipeg yard, will work from 7 o'clock to 19 o'clock for day work, and from 19 o'clock to 7 o'clock for night relays, and if worked after regular hours will be paid overtime rates.

(a.) Should the company call on a car repairer to take the place of a car inspector, oiler, air-brake tester, &c., they will be paid the same rate as schedule after the 7th day, but should we know that men will be required to do superior work for two weeks or over they will be paid same as schedule rate from the time they start on such work.

(b.) Men employed on work trains to be classed as inspectors.

(c.) Unless upon mutual agreement of foremen or men, employees working regular night and day relays will be governed in accordance with the above hours, and shall take their regular turn on night work.

ARTICLE 3.

The rates of pay shall be as follows and shall not be changed only on thirty days' notice being given:

Cents per hour.

| | |
|---|------------|
| Car inspectors (including leading car inspector)..... | 21½ to 23½ |
| Car repairers and oilers..... | 18 to 20½ |
| Air-brake testers and cleaners | 20½ to 21½ |
| Leading truck hands..... | 26 to 27½ |
| Truck repairers..... | 19½ to 22½ |
| Car heating and lampmen..... | 18½ |
| Cleaners and washers..... | 16½ to 18 |
| Cleaners and washers, leading hand..... | 19½ |
| Leading hand, Winnipeg coach yard..... | 21½ |
| Leading hand, Winnipeg coach shop..... | 29½ |
| Carpenters, coach and locomotive..... | 25½ to 28½ |
| Pattern makers | 27½ to 30½ |
| Freight carpenters..... | 22½ to 24½ |
| Leading mill hand..... | 30½ |
| Wood machine men | 22½ to 27½ |
| Wood machine helpers..... | 15½ to 19 |
| Mill driller..... | 20½ |
| Painters, coach and locomotive..... | 25½ to 28½ |
| Painters, freight..... | 17½ to 22½ |
| Leading painter, tender shop..... | 28½ |
| Leading tinsmith..... | 31 |
| Tinsmiths..... | 25½ to 28½ |
| Pipe fitters, coach and locomotive..... | 25½ to 29½ |
| Apprentices out of their time..... | 21½ to 24½ |

(a.) All men entering the employ will get two cents less than the minimum rate and qualify for same in one month, one cent increase in six months and the maximum rate in 12 months.

(b.) Men called out after regular working hours to receive not less than two and one-half hours' straight time.

ARTICLE 4.

Wrecking crews will be paid straight time while travelling, excepting on Sundays and the above mentioned holidays, when they will receive time and one-half, travelling to and from wrecks; time and one-half working at wrecks. No time to be allowed while laid up for rest.

(a.) When men are sent out on the road to relieve men or to work, they will be allowed full time while travelling, and overtime, if worked, and 75c. per day for board for every day they are absent from their regular station.

ARTICLE 5.

Any boy hereafter engaging himself to learn the trade of a pipe-fitter, carpenter or tinsmith, must serve not less than five years, must not be under 16 years of age and not over 18 years of age, able to read and write English, and know the first four rules of arithmetic.

(a.) Apprentice, after having served one year, if, in the opinion of the foreman, shows no aptitude for acquiring the trade, shall be dismissed or transferred, and all obligations accepted by the company shall of necessity be forfeited.

(b.) It shall be the duty of the foreman and others in authority, to advance the apprentices as much as possible in all branches of the trade, especially during the last two years of their time.

ARTICLE 6.

That when reductions in staff are necessary men who have others dependent upon them shall be given the preference of employment, seniority and proficiency to govern. All right to promotion shall be governed according to merit, ability and seniority, the man longest in the service shall have the preference, providing he is a competent man.

ARTICLE 7.

Employees shall be subject to the general rules of the company in regard to leave of absence and free or reduced transportation.

ARTICLE 8.

The company shall not discriminate in any way against any employee who may, from time to time, represent his fellow workmen on a committee, and will be granted leave of absence and transportation to discuss any grievance they may have, but the leave of absence must be confined to once a year, and during the months of May, June or July.

ARTICLE 9.

Employees who feel they have been unfairly dealt with may appeal from the foreman to the master mechanic.

ARTICLE 10.

Men leaving the service will be granted clearance without delay when asked for.

Effective August 1, 1903.

BRANDON, MAN., AND DISTRICT.

Mr. S. P. Stringer, Correspondent, reports as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

General activity is evident in all industrial lines, especially in skilled labour. Carpenters, plasterers and bricklayers are in great demand, and the highest wages are offered for outside points in these lines of trades.

Outside points seem to have the same difficulty as Brandon in securing the above classes of labour. A prominent Winnipeg builder was in this city offering 50 cents per hour for bricklayers, but without getting them to go to Winnipeg. This city received a large addition to its working population on the 10th instant when two hundred Englishmen arrived. They were a fine strong body of men, many of whom could have found work between Brandon and Winnipeg had not their contract bound them to come to Brandon. A large number have found employment, while others have gone out on the branch lines. They are not farm labourers but are willing to do anything that offers. The harvest excursions from Ontario are bringing a large amount of help for the harvest work. There are sections of the district that are needing considerable help to harvest the crops. The corporation has engaged a considerable number of men to make improvements, such as laying new sidewalks and other civic works.

Flour and lumber mills are very active, some firms running day and night and expecting to do so for some time owing to the difficulty experienced in keeping up with orders. The Canadian Pacific Railway Company is employing a large staff of men, machinists and labourers, to complete the work on the new round-house and machine shops, bridge and other extensive improvements. The binder twine factory has closed in order to have new machinery installed for the purpose of making rope. Transportation companies and banks report trade very satisfactory. Wholesale and retail merchants are doing a heavy business in all lines. Agricultural implement dealers are doing an immense business, particularly in binder and threshing outfits. The only change in wages has been in those of men employed by the Canadian Pacific Railway Company, the trainmen and men in the locomotive department, machinists, boilermakers, blacksmiths and their respective helpers, all of whom

have had their rates increased. All men between Fort William and Calgary are affected. The Pacific division has had a new schedule for some time. There is no unrest in the labour market at present. The locomotive firemen of the Canadian Pacific Railway Company have asked for an increase in their rates; the decision of the company in the matter is not yet known.

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—The latest reports from all sections of the west indicate a much better crop yield than was expected a month ago. There has been splendid weather for filling and ripening the grain, although at a few points there may have been too much rain. It is now apparent that in every district the crop can be said to be successful. Taking the whole western country into consideration it may be said that the harvest falls somewhat short of the two previous years, yet the west has again been blessed with a bountiful harvest. Wheat cutting is in progress throughout this district, and threshing machines are in full operation in some places. The crop prospects in the Territories are also encouraging, and to judge from latest reports it will be larger than it was last year. In the Moosejaw district there has been some damage done to crops by hail storms, but the track of the storm was not very wide. At the end of the month the weather in that district was not very settled for good harvesting owing to frequent storms. Farmers throughout the district are looking anxiously for help coming on the Ontario excursions. Canadian help is preferred to that of old countrymen.

Manufacturing.—All manufacturing companies are doing a steady business, particularly in house building supplies.

Railroad construction.—The C. P. R. Co. construction work is being pushed forward by the company with all possible despatch on the new extensions. Large gangs of men

are employed, in this city, on the new shops, bridges and yard improvements.

All other industries are doing a very satisfactory business; planing mills, saw mills and sash and door factories are very busy keeping up with orders.

CONDITION OF PARTICULAR TRADES.

Building trades.—Men engaged in these trades are very busy, and there is work for quite a number in these lines. Painters, paperhangers and plumbers are fully employed, and will continue so until winter sets in. Stonecutters are working overtime, but there are no openings. Builders' labourers are fully employed.

Metal, engineering and shipbuilding trades—Machinists are working overtime, but no openings. Blacksmiths' trade is good, with opening for some good men. Boilermakers find trade good, with some openings for first-class men.

Woodworking trades.—Upholsterers and patternmakers report trade good.

Printing and allied trades.—These trades are fully employed.

Clothing trades.—All employed at these trades find employment good.

Food and tobacco preparation.—Bakers, confectioners, butchers and meat cutters are very busy. Cigarmakers and tobacco workers are fully employed.

Miscellaneous.—Laundry workers report trade as very brisk.

Transport.—All men engaged in the transportation business have all the work that they can do.

Unskilled labour.—The demand for unskilled labour continues very good, although a great number of old country men have come into the city and district, yet there is not many seeking employment at present. They seem to have been scattered throughout the district. A great many have found

employment in this city owing to the large amount of building operations and railway improvement going on.

DISTRICT NOTES.

Industrial conditions throughout the district in all lines are very satisfactory, and merchants and business men expect a large trade. The elevator companies are making preparations for handling a large part of the crop. In all principal wheat centres elevators are to be found and loading platforms on the branch lines of the railways. The C. P. R. Co. is making every preparation possible, in adding a large number of locomotives of the largest and most powerful type to this station. Most of them will haul 60 cars of wheat.

ROSSLAND, B.C., AND DISTRICT.

Mr. R. A. Laird, Correspondent, reports as follows :—

DISTRICT NOTES.

Labour conditions throughout the Kootenays are in a most satisfactory condition. While there has been no remarkable increase in activity with consequent unusual demand for workmen, there has been a steady improvement in the demand for skilled labour resulting from improvements being carried out in various sections. The Kootenay boundary districts are busy and mining, smelting and lumbering are in a thriving condition, with every indication pointing to a substantial, conservative and steady advance in all the three industries specified.

In the *Rossland* camp itself practically the only change in labour conditions has been occasioned by the addition of several properties to the working list. This has brought about increases in the number of men employed. The outlook for further additions in this respect is good, but it is conceded that the improvement will be gradual. Of special interest to the labouring men of the camp is the announcement by the general

manager of the War Eagle-Centre Star Companies, as to the commencement of construction on a 200-ton concentrator at an early date and as to the positive solution of the problem of concentration. Successful concentration of Rossland ores opens a prospect of activity in mining that is appreciated only by those aware of the vast tonnage of milling ores already blocked out in Rossland mines. The extraction of these ores will employ an army of skilled and highly paid miners eventually, hence the importance of the announcement purely from the view point of workmen.

In the *Slocan* district the bounty on lead granted by the federal government continues to have its effect in stimulating the opening of mines. There is a demand for skilled miners throughout the district, and lack of this class of labour has delayed matters in many instances. Generally speaking it may be stated that skilled miners are at a premium throughout the Kootenays, and it is interesting to note that the special class required for the *Slocan* is hand drillers. The change from practical paralysis to the amended conditions existing under the beneficent operation of the lead bounty is taking time, as is natural under the circumstances, but the results are in sight and the improvement is already very marked.

In *East Kootenay* lead miners are preparing for active operations. About the coal mines skilled men are in great demand, and skilled artisans are employed in considerable numbers on construction for the Crow's Nest Coal Company and at the towns that are springing up, notably at Morrissey Mines. The lumbering industry of *East Kootenay* is also advancing rapidly. This month saw the commencement of milling at the new Wardner mill having a daily output of 200,000 feet. This plant alone will give employment to many men in the plant and in the woods. An idea of the magnitude to which the lumbering industry has attained may be gathered from the statement by a

prominent lumberman that Eastern British Columbia mills will cut 200,000,000 feet of lumber this year.

In *Boundary* there has been a marked improvement in conditions generally. This is due in large measure to the enhanced supply of coke, which has enabled smelting plants throughout the district to operate to better advantage with beneficial results on all sides. The ideal condition in respect to coke supplies has not yet been reached, but the problem is being worked out steadily, and a few months is expected to see boundary smelting plants in receipt of ample fuel. This will mark the commencement of a new era in the district.

NEW WESTMINSTER, B.C., AND DISTRICT.

Mr. Geo. Hargraves, Correspondent, reports as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

Industrial conditions during the past month compare favourably with those of the preceding month and exceed those of the same month last year. A demand is still made for carpenters and railroad men, and farm hands also are still in demand at \$2 per day and board. The British Columbia Lumber and Shingle Manufacturers' Association agreed to close down its shingle mills on the 15th of August. In Manitoba and the North-west the supply has been too great and the shut down is made to prevent a break in prices. No more shingles will be turned out by the coast mills for the Manitoba trade for 30 days. The only exception with be mills cleaning up stocks and filling contracts for export. A new company is being formed as the Fraser River Tannery Co., Ltd, with headquarters at New Westminster. The company is capitalized at \$50,000. Good progress is being made on the construction of the New Westminster bridge. The piers are nearly completed and four spans of superstructure are in position.

Laboureis are scarce for this class of work although good wages are offered. A contract has been awarded by the Vancouver, New Westminster & Yukon Railway Co., for piling a right of way on the water front, to cost \$40,000. The New Westminster creamery has shipped to the Yukon during the present year over 100,060 lbs. of its output, besides relieving the local market. This has had the effect of ensuring the farmers throughout the district a good price for the cream.

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—The farmers have been favoured with exceptionally fine weather for harvesting one of the largest crops of hay and grain ever gathered in this province.

Fishing.—Up to the present the Sockeye fishing on the Fraser has been a failure and the average catch per boat has been very small indeed. The season closes at the end of this month, that is according to previous runs, and very few of the men have made wages, allowing nothing for gear or other expenses. The number of licenses issued this season for fishing is about 2,800. The secretary of the B. C. Packers estimates that this year's pack of salmon on the Fraser is about 130,000. The two boats operating for the B. C. Packers Association, in the halibut trade are making successful trips, averaging fourteen to sixteen thousand pounds each trip.

Lumbering.—The shipment of large quantities of lumber to the North-west from local mills has been active of late.

CONDITION OF PARTICULAR TRADES.

Building trades.—Bricklayers and masons report trade very dull during the past month. Carpenters find work plentiful, with a slight demand for good men, wages being increased in some cases to secure men. Painters, gas fitters and plumbers report work satisfactory, with prospects of a long season's work.

Metal, engineering and shipbuilding trades.—All the shops are very busy, with a demand for good men. Shipwrights and caulkers are only fairly employed at present.

Printing and allied trades.—These trades report work good, with demand for additional help.

Food and tobacco preparation.—Cigar-makers have not been very busy during the month, stock-taking and overstock being the causes.

Transport.—All engaged in the several branches report work plentiful, especially among steamboatmen and street railway employees.

DISTRICT NOTES.

Mission.—The Western Canada Milk Company's business and factory has been purchased by the Reindeer Co., of Truro, N.S. The business was commenced about five years ago and was a great benefit to the locality, employing from 30 to 40 hands. The new company will make large increases in the plant and equipment.

Tenders were called for for the erection of new frame schools at *Chiliwack*, and a number of new buildings are also in course of construction.

Throughout the *Okanagan* district there is a scarcity of help to gather the fruit and grain crops. Men have been sent from the coast to work for the farmers, and still the demand is not met; \$2 per day and board being the rate of wages offered. It is estimated that the fruit crop will be at least 25 per cent heavier than ever before.

VANCOUVER, B.C., AND DISTRICT.

Mr. George Bartley, Correspondent, reports as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

Last month saw the settlement of the last of the strikes, so that with the opening of

August business in the building trades of this city was resumed on a solid basis. The prospects, therefore, are for a prosperous termination of the year's building season. The records in the building inspector's office go to prove this statement. One thing particularly noticeable in this connection is that the raise in wages did not shut off a large amount of work. On Thursday, August 20, the erection of the proposed new sub-station of the Vancouver Electric Power Co. was started. It will be used for distributing the current from Lake Beautiful to the city. The structure will cost \$45,000 and will be two storeys high, of brick, with sandstone trimmings, measuring 60 by 120 feet; iron roof and concrete floors to make it as fireproof as possible. Large plate glass windows will be used.

CONDITION OF LOCAL INDUSTRIES.

Fishing.—The salmon run so far this season has been a failure, and the pack will be far below the average.

Lumbering.—Several shingle mills have shut down for 30 days, the supply of shingles on hand exceeding the demand. There is a law in the province preventing the exporting of saw-logs. The loggers, having a big surplus of logs in the water, petitioned the government to temporarily set the Act aside and allow the logs to go out of the province to the United States. The ministers decline to accede to this request; millmen have, consequently, taken advantage of the situation and lowered the price of logs, to the great detriment of the loggers.

Mining.—The revival of mining in the interior in a measure has been the cause of enlivening business, which in all lines is good.

CONDITION OF PARTICULAR TRADES.

Building trades.—Bricklayers report work very good, and there is a demand for really good carpenters. Lathers and plasterers are busy, but the market is well supplied with men. With plumbers work is fair. Owing to

Messrs. Barr & Anderson having an apprentice in their employ whom the plumbers' union considers a qualified plumber, whereas the firm and lad himself do not regard him worth the union wage of \$4 per day for eight hours, a strike has been declared and the union plumbers called out of the shop. The boy has refused to join the union, not being yet out of his apprenticeship, and Messrs Barr & Anderson will not discharge him, so their employees have quit work. With stonecutters there is comparatively nothing doing. Builders' labourers report work fair.

Printing and allied trades.—There are a few idle men, both job and news. Three new Mergenthaler linotype machines have been installed in this city this month, viz., one by the 'Province,' one by Hughes & Campbell, and one by Jos. Houghton. The two latter will do work for the trade. The 'Independent' moved from the Flack block to 112 Hastings street West, in the new premises recently erected. Messrs. Clark & Stewart and the 'News-Advertiser,' each installed large Optimus presses, while Evans & Hastings have installed a small one. The 'Morning Ledger' will print the new voters' list of seven thousand four hundred and twenty for Vancouver district.

Food and tobacco preparation.—Cigar-makers find trade slack.

Miscellaneous.—The bartenders' union has seceded from the A. L. U., and joined the International Bartenders' League. There are a few idle men in this trade.

Transport.—Teamsters and expressmen are very busy.

Unskilled labour.—It is no use for unskilled labour to come here for employment. Book-keepers, clerks, stenographers, agents, &c., are out of work in large numbers.

FORMATION OF LABOUR ORGANIZATIONS.

The Civic Employees' Union of the Dominion Trades and Labour Congress has seceded from that body and has taken out a charter from the American Labour Union.

DISTRICT NOTES.

Revelstoke.—In an interview with a press representative, the manager of a local bank stated that business in Revelstoke was very good, the present summer having been an exceedingly prosperous one. Much attention was being paid to the lumbering possibilities of the district. Eastern lumbermen and capital were being interested in two large mills that are now being erected at Arrowhead, 28 miles from Revelstoke. Questioned regarding the banking business, the favourable condition of the same was shown by the fact that the Imperial Bank had let a contract for the erection of a \$15,000 building to be used as a bank, with a manager's residence above.

VICTORIA, B.C., AND DISTRICT.

Mr. J. D. McNiven, correspondent, reports as follows :—

GENERAL CONDITION OF THE LABOUR MARKET.

Labour conditions during the month have been fairly satisfactory, except in the building and metal trades, where lack of employment is reported, an unusual circumstance at this season of the year. The shipyards also report a dull month. With other trades conditions are normal. The tourist hotel project, mentioned in the June report, has been advanced another stage, and an agreement has been arrived at between the Canadian Pacific Railway Company and the city council providing for the erection by the company of a tourist hotel in this city to cost not less than \$300,000. The city grants a five acre site, exemption from taxation for fifteen years, and is to provide water for hotel and domestic purposes for the same period free of cost. A by-law to ratify the agreement is now before the ratepayers. There has of late been a marked increase in the volume of business handled by the ferries operating from the mainland to points on the east coast of the Island, and preparations are being made to increase the

facilities of the ferry services to meet the requirements of the trade. The Cumberland Miners' Union unanimously declared the strike off at a meeting held August 21st, instant. It was then decided to accept the company's proposition to sign a two years' contract. Under the terms of the contract the miners may leave at any time, except for the purpose of a strike or for causing a cessation of work. There is no provision made for top hands, but it is expected most of them will be taken back. The President of the Colliery Company is authority for the statement that the Comox mines will now be worked to their fullest capacity. Recently the output has been eight hundred tons per day, and it is proposed to increase this to one thousand five hundred tons. The Van Anda miners are out on strike for official recognition of the union.

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—The fruit crops throughout the province this year will be abundant according to reports of Government fruit inspectors, and British Columbia fruit is finding a ready market in Manitoba and the North-West. Large quantities have recently been shipped from the Okanagan country to Edmonton, which offers a good market. The crop of two hundred and two apple trees at Kelowna was recently sold for \$1,000. These trees occupied but four acres of land, being Northern Spys and twelve years old.

Lumbering.—In July the Loggers' Association petitioned the provincial government for a suspension of the law, for a limited time, prohibiting the exportation of logs, in order that they might dispose of their surplus stock to United States mills. The government, however, refused to meet the wishes of the association. United States capitalists are manifesting a keen rivalry to become possessed of valuable tracts of Island timber lands. Agents are in the woods selecting for a Seattle firm fifty thousand acres of timber lands recently purchased.

Another body of agents, representing San Francisco capital, are purchasing select timber lands with the object of erecting large mills in the province.

CONDITION OF PARTICULAR TRADES.

Building trades.—There is a lack of employment throughout nearly all branches of the building trades. Bricklayers and plasterers are fairly well employed, but not more than two-thirds of the carpenters of the city have found steady employment during the month. This latter condition also prevails with painters. In consequence of the extension of the sewerage system plumbers are well employed.

Metal, engineering and shipbuilding trades.—In the machine shops and shipyards work was slack throughout the month, especially so for machinists, boilermakers, shipbuilders, shipwrights and caulkers. Moulders are fairly well employed. Electrical workers and linemen report lack of employment for all. Carriage blacksmiths are busy.

Printing and allied trades.—Work is fair in every branch of the trade with all hands fully employed. During the month there was a demand for machine operators.

Clothing trades.—Custom tailors are only partially employed. Garment workers are busy.

Food and tobacco preparation.—Bakers and cigarmakers each report fair employment, with a few men idle.

Leather trades.—Harnessmakers are busy, but there is no demand for extra help.

Transport.—In all branches of the steamboat service full employment is reported. Street railway men, longshoremen, hack drivers, draymen, teamsters and expressmen also report satisfactory conditions.

Unskilled labour.—This class of labour is more fully employed than is any other in the city.

NANAIMO, B.C., AND DISTRICT.

Mr. A. H. Spencer, Correspondent, reports as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

The condition of the labour market in this district for the past month has been a little better in the mining industry, but in the building trades there has been no improvement. The number of idle men has somewhat diminished, but there are still a number out of employment. In commercial circles the feeling is slightly better, owing to the settlement of the labour troubles at the different mines. There have been no changes in the rates of wages during the past month. The recent strikes being ended, there is a more settled feeling in the district, with the exception of Texada Island, where there is some trouble on at one of the mines. There was a slight difference at one of the other mines at Texada, a quartz mine, but it was settled after a few days' loss of work.

CONDITION OF LOCAL INDUSTRIES.

Fishing.—There is nothing doing in the fishing industry at present.

Lumbering.—In the lumbering industry there is a falling off, there being too many logs on hand at present for home consumption, though the foreign demand still continues good. The work in the woods still continues, but there is no demand for more men at present. In shingle bolts the state of affairs is about the same as in logs. At the saw-mills work is steady, there being a good demand for lumber, both in the Northwest and for shipment.

Quartz mining.—In the quartz mines matters are quiet, there being no exceptional activity.

Coal mining.—The coal mines in this city are working full time, and the company is sinking a new shaft, driving a new slope, which, when down, will materially increase the output of coal. On the first of the month

work was resumed at a shaft that had been closed down for some time. At Ladysmith the company is working steadily and putting on the men as fast as places are ready. At Cumberland some men started this week, and the mines will be worked with a full set of men as soon as possible.

CONDITION OF PARTICULAR TRADES.

Building trades.—In the building trades business is very quiet for the time of year, there being hardly any new buildings going up.

Metal, engineering and shipbuilding trades.—Blacksmiths, and carriagemakers, report business as fair.

Transport.—Teamsters and expressmen report business as very quiet.

Unskilled labour.—Unskilled labour has been fairly well employed during the month on civic improvement, but the outlook is not very promising.

DISTRICT NOTES.

There is little doing in the West Coast mining properties, although a few mines are active on development work.

CHANGES IN RATES OF WAGES AND HOURS OF LABOUR, CANADA, JANUARY 1st–SEPTEMBER 1st, 1903.

In the following article, and more particularly in the table which accompanies it, an attempt has been made by the Department of Labour to afford an index, of a more or less official character, to the extent and magnitude of the movement towards a higher rate of remuneration for labour during the period of the present year in which changes of the kind are chiefly carried into effect. The period covers more particularly the months of April, May and June, but in the present review as many changes are taken into account as the department could secure returns of, from the opening day of the year up to and including the month just past.

The importance of the movement, both from the point of view of the labouring classes and of the employers of labour as well, need not be emphasized here, constituting as it does perhaps the most noteworthy accompaniment of the very marked activity and prosperity which has been characteristic of industry throughout Canada during the present season. All classes of the community have been influenced thereby, directly or indirectly and to a greater or

less degree, owing to the almost universal prevalence of the conditions in which it had its origin. In the strike chronicle of the year, in which industry generally is so directly interested, it plays a prominent part, most of the trades disputes of April, May and June being in connection with the arrangement of the wages scales, though it may be stated as one of the most satisfactory circumstances of the present year's developments in this connection, especially in view of the extensive scale on which increases were demanded and received by labour, that the wages movement, comparatively speaking, involved a minimum of loss of time to industry. As to the magnitude of the movement itself the table will bear conclusive evidence, there being scarcely a single branch of the trades concerning which reports are usually received from correspondents of the *Labour Gazette* which has not at one point or another in Canada been affected by it, and there being few districts within the several provinces which have not in one branch or other furnished instances of an upward tendency in the wages of labour.

months of the present year have been received by the department, and it is on these returns that the present table has been largely based, the reports of wages changes noted in the press being utilized to suggest sources of information rather than to supplement that independently secured by the department.

It may be stated that it is the intention of the department hereafter to publish from month to month in the *Labour Gazette* a table relating to the changes in rates of wages and hours of labour as reported on forms received from the correspondents of the *Labour Gazette*, and from the immediate parties to the change.

Causes of the Movement.

The leading cause of the upward tendency of wages in Canada during the present season has been already stated as the active and prosperous condition of industry, which has not only necessitated the employment of many additional workmen, but has, generally speaking, enabled operations to be conducted upon a sufficiently profitable character to allow the granting of increased pay to employees, without material injury to business. Accompanying this, and constituting perhaps the most frequently repeated claim of workmen in their demands upon employers for increased wages, the increased cost of living has been put forward as having not yet been fully met by the wages increases of 1901 and 1902, material as the advances of these seasons were. The scarcity of workmen above mentioned, though more or less a feature in all branches of trade, has been particularly the subject of comment in the metal trades of Ontario, printing trades of the Maritime provinces, and in the farm labour market both in central and western Canada. In the lumber industry also, in which wages during the present season have reached the highest level recorded in the history of the industry in Canada, the scarcity of help obtainable has been stated

as the leading cause of the high rates which have prevailed in the camps and mills over the past several months.

Scope and Arrangement of the Table.

In the present table and review it will be noticed that no specific returns are included in reference to the increased scale of remuneration current in the great industries of agriculture and lumbering, though, as already remarked, the advances granted to the workmen in these branches constitute one of the most important features of the year's development in this connection. The impossibility, however, of obtaining complete returns, either as to the numbers of the workmen affected or the amount of increases in wages involved, the latter varying considerably according to locality, precluded the department from presenting statistics on this subject other than those that have appeared from month to month in the reports of several of the correspondents to the *Gazette* since the opening of the year. In the fishing industry the same difficulty was encountered, and it is in the single instance of the salmon fishermen of British Columbia, who accepted a decreased scale from last year, that a return on the subject was possible.* The commentary offered below on the wage changes presented in the table accordingly refers wholly to those obtained by members of the various trades.

With regard to the form in which the table is presented, it will be seen that the changes are first arranged according to the groups of trades affected and secondly by localities running from east to west.

The Building Trades.

By far the largest number of individual changes in wages concerning which the department was able to secure returns fall under the heading of the building trades. A glance

*See *Labour Gazette* for August, 1902, vol. III, No. 2, page 93, as compared with *Gazette* for August, 1903, vol. IV., No. 2.

| 54 | 54 | 1.35 | | | | Increase from 17½c. per hr. to 20c. per hr. voluntarily conceded. |

at the table will show both the widespread nature of the movement in these trades, there being reports of increases received from every province of the Dominion with the exception of Prince Edward Island, and the large number of work-people affected thereby. The larger centres of population were naturally the chief contributors to the movement, and the substantial increases granted to the various branches in Montreal and Toronto are the most prominent features of the table, more particularly from the point of view of the number of workmen affected. A pleasing feature which may be emphasized in this place was the absence of serious friction with which the changes in the majority of cases were carried out. In Montreal there was no interruption to industry, a statement which is true in a much less degree of Toronto and of Victoria, B.C., in the last named of which the increases affecting the larger bodies were secured only after a strike. The cities of St. Hyacinthe, Hamilton, St. Catherines, London and Winnipeg may also be singled out as centres of an active movement during the past eight months towards a higher remuneration for workmen in these branches of employment. With regard to the wages of carpenters and other branches of the building trades in the last named city, the change in which is not entered in the table, the following statement was received from the correspondent of the *Gazette* and is quoted as throwing light on conditions of employment in this branch of trade throughout Manitoba and western Canada:

'Carpenters' work, especially in house building, in Winnipeg and the western provinces generally, does not appear to demand any great degree of skill, and men without any special training seem to readily adapt themselves to this class of employment. By the regular graduate, one that has served the regular apprenticeship to the carpentering business, the average man engaged in the woodwork of house building is called a "hammer-and-saw man," the term signifying that a hammer and saw are about the only tools he requires. Such class of men last year (season) on an average were paid 27½c. to 30c. per hour. This season the average rate is from 30c. to 32½c. For skilled bench hands the average is from 32½c. to 35c. and men in charge are paid as high as 40c. an hour. These are

the wages paid to men who are thoroughly assimilated with western conditions. In certain classes of inferior workmen who are not yet familiar with the English language and but recently settled in Winnipeg are content to work at ordinary labourers' wages.

'In builders' sheet metal work and tinsmith work there has been an all round advance of 2½ cents per hour since January last.

'Plasterers, according to an arrangement with employers agreed to a season's work at 45 cents per hour. This represents an advance of approximately ten per cent. Skilled builders' labourers are receiving 25 cents per hour. Ordinary labourers assisting in building obtain 20 cents. This does not represent any increase.'

The Metal Trades

In the metal, engineering and shipbuilding trades it will be seen from the table that the tendency towards a higher rate of wages was most marked in the province of Ontario, where, as has been pointed out in previous issues of the *Gazette*, more or less difficulty was experienced throughout the season in the matter of the supply of labour (*) and where the demand for a shorter working day has been the cause of one of the most protracted disputes of the year, namely, that of the iron moulders in the employment of the Canada Foundry Company at Toronto (†). In Brantford, Ont., however, the numerous changes noted in the table were granted for the most part without serious trouble. In Victoria, B.C., the general adoption of the nine-hour day in the metal trades went into effect in March, and in May several advances were granted in the wage scale of the same classes of employees. For a statement of the improved scale granted to linemen and other electrical workers in Vancouver, B.C., during the year, the reader is referred to the report of the correspondent of that city which is published in the January *Gazette*, at page 517. It may be pointed out that large numbers of workmen in these branches are in the employment of the different railway companies and that increases granted in the various locomotive and car construction shops are included under the heading of transport.

(*) See *Labour Gazette* for May, 1903, page 915.

(†) See special article in *Labour Gazette* for August, 1903, at page 151.

The Woodworking Trades.

In the number of increases granted to members of the woodworking trades, the cities of Montreal, Toronto, Guelph and Winnipeg appear most prominently, though the movement was widespread and on a substantial basis. In the woodworking factories of Winnipeg the wages of skilled men have advanced on the whole fully ten per cent. The average rate at the commencement of the present year was between 27½ cents and 30 cents per hour. At the present time it is fully five cents per hour higher. The largest employer of this class of labour in Winnipeg stated to the correspondent of the *Gazette* that really skilled men were very difficult to procure, and in consequence a higher rate has to be paid to retain their services. The ordinary labourer in wood yards receives \$1.75 a day of ten hours, and machine men from \$2 to \$2.75 per day of ten hours. In the two latter cases there has been no advance. Skilled sawyers have been advanced from \$3.60 per day to \$4.

The Printing Trades.

The movement for higher wages in the printing trades was perhaps more marked in the Maritime Provinces than in any other section of Canada during the past year. The reader is referred, in this connection, to a special article which appeared in the April, 1903, issue of the *Labour Gazette*, page 785, in which the wages of printers in Nova Scotia, Prince Edward Island and New Brunswick were made the subject of a special inquiry by the department. In the table the increases granted to members of this craft at London, Ont., figure most prominently.

Clothing and Leather Trades.

Concessions in wages and hours in the clothing trades were chiefly centered in London and Hamilton, Ont. Tanners and curriers at Quebec, Que., received a material advance, though the leather trades generally

have been less actively employed than many other branches of industry during the present season.

Food and Tobacco Preparation.

An endeavour to abolish the system of night work among bakers, coupled with an increase of wages, was a feature of the movement at Guelph and Brantford, Ont. Cigarmakers at several of the manufacturing centres in Ontario received materially improved schedules.

Employees of Public Authorities.

The number of changes recorded under this heading may be regarded as evidence of the public recognition of the general upward tendency of wages during the season. Among these the increases granted to the canal employees of the Dominion, affecting 577 men; to the policemen of the cities of Toronto, Hamilton and London; to the firemen of Toronto and London, and to the corporation labourers of a number of municipalities from St. John, N.B., to Windsor, Ont., are worthy of special reference. Increases granted to the employees of the Intercolonial Railway are noted under the heading of Transport.

Miscellaneous.

Under the heading of Miscellaneous Trades a general upward tendency noted in the tariff charges by barbers has been a leading feature, affecting a large number of localities not represented in the table on account of the difficulty of obtaining accurate returns. The increases granted to log drivers and axemen in the St. Maurice and Quebec district, of which special mention is made is, as above stated, to be regarded as part only of a general upward movement in the rates of remuneration paid to the men engaged in the lumbering industry. The reduction in the hours noted in the case of retail clerks may also be considered of general application, having reference to the half holiday customarily granted during the summer months.

Transport.

It will be noted that under the heading of Transport in the table no mention is made of the increases in wages which have been granted by the leading railway companies of the Dominion to various branches of their employees since the opening of the present year. This is in part due to the difficulty of obtaining complete and official information regarding the same, and partly to the amount of space which would be required to introduce such a complex body of information into the table in question.

With regard to the Intercolonial Railway, the following statement was received from the general manager of the system :—

In January the mechanics all over the railway who were entitled to it by length of service received an increase of 1c. an hour. Some 654 received this increase.

Civil engineers and draughtsmen received an increase in February and March as follows : 8 from \$5 to \$25 each per month.

In April the men employed on the steamer *Scotia* were increased as follows :—

1 chief engineer, \$100.00 to \$105.00 per month.

1 second " 50.00 " 55.00 "

8 deckhands 35.00 " 14 per hour.

4 firemen 35.00 " 16 "

2 oilers 1.50 a day to 16 "

On May 1 the following increases were given :—

23 baggage-masters, increase ranging from \$2 to \$10 per month.

25 car inspectors, increase ranging from \$2 to \$10 per month.

215 freight porters, from \$1.20, \$1.25, \$1.30, \$1.35 to \$1.40.

17 freight checkers, from \$1.25 and \$1.35 to \$1.45 and \$1.50.

50 freight checkers, increase ranging from \$3 to \$12 a month.

420 clerks, from \$2 to \$13.33 per month increase.

250 car cleaners, 12c. to 13c. an hour.

On May 1 also the carpenters and car repairers were re-classified and the scale of rates for paying them was increased and 100 of them received an increase of 1c. an hour.

From the general manager of the Canadian Pacific Railway Company a statement was received to the effect that during the year ending June 30 the railway, in round numbers, advanced the salaries of its staff, not including any additional employees engaged since the time of the increase, to the extent of between \$480,000 and \$500,000.*

*See report of *Gazette's* correspondent at Winnipeg, in the present issue for a reference to changes inaugurated by the company in Western Canada during the past month.

With reference to the Grand Trunk Railway system increases approximating from 10 to 15 per cent, according to the general manager, have been granted to employees in nearly every branch of the service since the opening of the present year, without alteration in the hours of labour.

Employees in the construction department of the Canadian Northern Railway Company were advanced to the following scale early in the present year :—

Blacksmiths, \$60.00 to \$75.00; teamsters, \$30.00 to \$35.00; cooks, \$50.00 to \$75.00; cookees, \$35.00.

The above includes board.

Rough carpenters, \$2.50 to \$3.00 per day; drillers, \$2.50 per day or 30 cts. per foot; bushmen, \$28 to \$35.00 per month; day labourers, \$1.75 per day; gang foremen, \$3.00 to \$4.00 per day; station men, 20 cts. per yard; tie loaders, \$1.00 to \$1.50 per 100 ties.

Board is charged to above class at the rate of \$3.50 per week. In case their work is in a locality which necessitates long haulage by toll road of provisions, the price of board is \$4.00.

The above rates represent to the workmen an advance of from 10 to 15 per cent.

From the Winnipeg correspondent of the *Labour Gazette*, in this connection, the following statement was received and is quoted as being typical of conditions at other points in Canada where car construction works are in operation :—

'In the spring months the rate of pay to almost all classes of employees in railroad shops was advanced from 15 to 25 per cent. The rate paid to machinists is now 30 cts. per hour. In some cases beginners are started at a lower rate and are not paid the rate of 30 cts. until they become familiar with the routine of the particular department they are employed in.

The average competent moulder receives 31½ cents per hour. Some, however, engaged on special work receive more. Blacksmiths, according to ability, are paid from 30 to 34 cents per hour. The rates for the classes of workmen referred to above are on the average approximately 15 per cent higher than last year.'

The Michigan Central Railway Company also granted substantial increases to its employees during the present season. All the

men employed in the mechanical department of the company in Canada, except train hands, were granted an unsolicited increase in pay commencing April 15. Some 500 men were affected by this change which was on a general basis of 10 per cent increase, or from one to two cents per hour. Thus, locomotive and car builders received an increase of 20 cents per day with individual instances of 30 cents and 40 cents increases. Labourers, helpers, car repairers and round-house men received an increase ranging from one to one and a half cents per hour. By the scale high-grade machinists and black-

smiths receive \$2.60 per day and boiler-makers \$2.70, the change involving an additional expenditure of about \$1,400 per month to the company. Besides these changes five locomotive engineers and five firemen received increases in February, while general freight crews were relieved of certain work, a change which involved the employment of several additional men by the company. St. Thomas was the point in Canada chiefly affected by these changes.

Employees of the Pèrè Marquette Railway Company, also at St. Thomas, also received the

(Schedule of Longshoremen at Quebec for season of 1903.)

All the work can be done by the hour if desired at the rate of 25c per hour from 6 a.m. to 6 p.m., 31c. from 6 p.m. to 6 a.m. 40c per hour on Sunday.

* Unloaded from the car

following scale, representing satisfactory increases:—Passenger engineers, $3\frac{3}{4}$ cents per mile; through freight, $3\frac{1}{4}$ cents per mile; local freight, \$4 per day; switch engineers, \$2.60 per day of ten hours. On engines having a cylinder larger than 18 x 24 inches the rate will be \$4.50 per 100 miles. This last provision is made so that the men on the moguls on the main line will receive more pay than the men pulling light trains on the smaller divisions.

Bateauxmen and Longshoremen's Schedules.

New scales of wages for bateaux men and longshoremen of the city of Quebec and district went into effect during the present season as follows:—

No. 1.—Bateaux men.

| | |
|---|--------|
| By 100 deals, Quebec standard..... | \$1 00 |
| By 100 deals for vessels anchored in the river..... | 1 25 |
| Wood, sawn, by 100, Quebec standard..... | 2 00 |
| Square timber, by 100 cubic feet..... | 1 25 |
| Boxes of matches and splints per 100..... | 3 00 |
| Boxes of all kinds per 100, Quebec standard..... | 1 00 |
| Ballast, iron, coal, &c., per ton..... | 0 40 |
| Coke by cauldron..... | 0 75 |
| Coke per ton..... | 0 50 |
| Bags of salt per 100..... | 3 00 |

No trip shall be made for less than \$9.00.

The sum of \$9.00 will be claimed for every unsuccessful trip.

Every return trip shall be paid in accordance with the tariff. No trip for less than \$9.00.

Every time one of the bateaux is asked to do day work within the limits of the district of Quebec, \$10.00 per calendar day, that is from one date to another, will be paid.

Every delay in loading or unloading will be paid at the rate of \$9.00 per day of 24 hours.

Every cargo loaded or unloaded outside the boundaries of the district of Quebec will be paid for at not less a rate than \$1.25 per 100 Quebec standards.

Tow-boats will never be hired at the cost of the bateaux men, and wages in all cases shall be paid every Saturday.

Navigation for the district of Quebec will be bounded to the west by the Quebec Bridge and to the east by the Davie Basin.

(See preceding page.)

Unskilled Labour.

The section of the table in which the various increases granted to unskilled labourers in Canada are set forth, will show the wide prevalence of the movement in this direction since the opening of the year. Especially is this true when the number of increases granted to labourers in the em-

ploy of municipalities, which were recorded under another heading, are taken into account. The unskilled classes, it may be said in effect, have almost universally obtained increases in remuneration during the present season, the scarcity of labour affecting this class perhaps more than any other branch of the trades.

Summary of the Table.

Though the table, as will be seen from the above, does not contain a number of important changes in wages which have taken place during the past eight months, and though in some cases it has been found impossible to secure complete returns in the case of all changes in the table, the following summary of the changes occurring in the several groups of trades, with the numbers of men affected thereby, will be of interest as an index of conditions in this respect during the present season:—

| Group of Trades. | Numbers of Changes reported. | Numbers of Men affected by Change. |
|---|------------------------------|------------------------------------|
| Building trades..... | 64 | 10,777 |
| Metal, engineering and shipbuilding trades..... | 30 | 1,793 |
| Woodworking and furnishing trades..... | 9 | 1,746 |
| Printing and allied trades..... | 6 | 319 |
| Clothing trades..... | 10 | 4,018 |
| Food and tobacco preparation..... | 8 | 644 |
| Leather trades..... | 2 | 453 |
| Miscellaneous..... | 17 | 1,040 |
| Employees of public authorities..... | 18 | 1,177 |
| Transport..... | 24 | 1,763 |
| Unskilled labour..... | 10 | 2,343 |
| Totals..... | 208 | 26,073 |

General cargo including work in freight sheds, stores, warehouses, propellers, barges, and all vessels of 40 tons over:

25c per hour from 6 a.m., to 6 p.m.
 $31\frac{1}{2}$ " " " 6 p.m., to 6 a.m.
 40c " " on Sundays.

A patron stevedore or foreman who will call a gang of men after 7 o'clock p.m. and keep them waiting will have to pay the time in full, as if they were working.

This tariff will take effect May 1, 1903, to December 1, 1903.

ANNUAL CONVENTION OF THE INTERNATIONAL ASSOCIATION OF FACTORY INSPECTORS.

The seventeenth annual meeting of the International Association of Factory Inspectors convened in the city of Montreal, Quebec, on Aug. 25. The first convention of the association was held in Philadelphia, Pa., in the year 1887, being called by Mr. Henry Dorn, then chief factory inspector of the State of Ohio. Five states were represented, that being the entire number of states at that time which had laws governing the inspection of workshops. The association has since grown so as to include inspectors of both countries. On two previous occasions the association has met in Canada, viz., at Toronto in 1897 and at Quebec in 1899.

Opening of the Convention.

At the opening of the present conference the president, Mr. James Mitchell, of Montreal, introduced the Hon. the Commissioner of Public Works of the Province of Quebec, who extended a cordial welcome to the association on behalf of the province. The commissioner spoke of the benefit derived from a discussion of the laws of the various provinces and states for the protection of the wage-earners as of very important assistance to the law-makers. The acting mayor of Montreal also greeted the delegates on behalf of the corporation. A telegram regretting the inability of the Deputy Minister of Labour to be present was read, as were also letters of regret from the representatives of Minnesota, Indiana and South Carolina.

The following provinces and states were represented by about 50 delegates: Connecticut, Illinois, Indiana, Kansas, Michigan, Massachusetts, Missouri, New York, Ohio, Ontario, Pennsylvania, Quebec, Rhode Island, and Wisconsin.

Programme of Convention.

The committee to whom was referred the matter of arranging the programme for the

convention reported as having received papers on the following subjects, and recommended that they be read:—

‘Well Lighted Work Rooms,’ by Mr. Geo. McLean, Connecticut.

‘Prevention of Accidents,’ by Mr. Louis Guyon, Chief Factory Inspector of Quebec.

‘Factory Inspection Contemporaneous with Collecting Labour and Industrial Statistics,’ by Mr. L. S. Russell, of Michigan.

‘Review of Labour Conditions in Kansas,’ by Mr. W. L. A. Johnson, Labour Commissioner and Factory Inspector of Kansas.

‘Iron vs. Steel,’ by Mr. Geo. I. Rudolph, Deputy Factory Inspector, of Pennsylvania.

‘Practical Results of Legislation in Illinois,’ by Mr. E. T. Davis, Chief Factory Inspector of Illinois.

‘Labour Legislation in Missouri,’ by Mr. W. L. A. Johnson, Commissioner of Labour of Missouri.

‘Criticisms,’ by Mr. John Williams, First Deputy Commissioner of Labour of New York.

The Papers Discussed.

Mr. McLean’s paper on ‘Well-Lighted Work Rooms,’ referred to the use of corrugated glass in buildings, which was considered injurious to those employed in such premises. In the discussion of the question it was stated that investigation had shown that headaches were frequent among workmen employed in factories where corrugated glass was used.

Mr. Guyon’s paper on the ‘Prevention of Accidents’ reviewed at length the steps taken in Europe to lessen the number of accidents through the introduction of safeguards in connection with machinery and by legislation. The writer declared that his fifteen years’ experience in Quebec convinced

him that the greatest danger to factory employees came from machinery operated by mechanical power, though accidents arising from fires or explosions attract greater public attention. Factory inspectors had a great duty to perform in the introduction of safety devices. In Quebec, manufacturers displayed great interest in all movements looking to the prevention of accidents. In the discussion which followed this paper it was stated that very often accidents occurred through employees removing from the machines the safety devices which had been planned for their protection. It was suggested that if the manufacturers of machinery could be induced to incorporate the various safety appliances when building the machines it would be a step in the right direction.

Mr. Russell's paper, 'Factory Inspection contemporaneous with the Collecting of Labour and Industrial Statistics,' dealt with the workings of factory inspection in Michigan, where the departments of labour and industrial statistics are combined. Factory inspection and the collecting of labour statistics were termed 'twin brothers,' the two branches serving as aids to each other. Mr. Johnson, of Missouri, held that if no statistics were secured the need of factory inspectors would never have been ascertained. Mr. John Williams, of New York, believed that both factory inspection and the gathering of labour statistics were equally important, and stated that factory inspection, the collection of labour statistics and the arbitration laws of New York were all contained in one chapter and under one head in the statutes of the State.

Mr. Rudolph's paper, entitled 'Iron vs. Steel,' referred to the relative merits of the two metals in the construction of elevator cables.

Mr. Williams' paper, entitled 'Criticisms,' among other things stated that criticism of the work of factory inspectors and

departments of labour were often unfair. The association, in this connection, passed a resolution deploring and condemning the publication of adverse criticisms upon any department connected with factory inspection without an opportunity first being given to the department of being heard.

Reports Regarding Factory Legislation, etc.

The following reports regarding new legislative enactments were given by the different departments mentioned :

Connecticut.—A law providing for the proper lighting of workshops was re-enacted at the last session of the legislature, and an Act requiring proper examination of elevators was passed. The appropriation for the staff was increased.

Illinois.—A law limiting time of labour for children to 8 hours per day was passed, and the age limit set at 16 years. No child is now permitted to work until able to read and write, and the law applies to all industries except agriculture. The women's clubs of the state did much in advocating the abolition of night work for children. All the salaries of the staff were increased, and there was an addition of eight members.

Indiana.—There have been no increases in the staff, but it is possible that the force will be increased next year, as there are four new laws to be placed on the statute books the enforcement of which will be delegated to the department. The Acts provide for boiler inspection, steamboat inspection, signal lights on vessels, temporary floors to be placed in all buildings of over three stories in course of construction. The child labour law of Indiana is well enforced, the age limit being 14 years.

Massachusetts.—No new legislation re factory inspection was reported, but the present laws are being enforced.

Michigan.—Over 7,000 premises were inspected during the year. There are very few sweatshops in the state. Two female

inspectors are employed. The canning factories of the state now come under the law, and the use of emery wheels in basements of factories has been prohibited.

New York.—A few changes in the law regarding child labour have been made, the hours being reduced to nine per day. The parents of children are now required to submit clear proof of age from the principal of the public school, who must also certify that the child is fitted for an industrial career, before an employment certificate is issued. This law is to take effect on the 1st of October next. The amended law relating to the employment of minors on polishing and buffing wheels in establishments where the baser metals are used, raises the age limit to 18 years for males and prohibits the employment of females in such factories.

Ontario.—A law in reference to better sanitary conditions in bake shops, canning factories, etc., has been provided whereby sleeping apartments are not allowed in the buildings referred to.

Ohio.—No changes were reported in present laws. As the present number of inspectors is insufficient to do the work properly, it is the intention of the department to endeavour to secure an additional number.

Pennsylvania.—There are now 39 deputies employed, 14 having been appointed during the past year. The inspector of steamers on the inland lakes has been added to the work of the deputies. The child labour law remains the same, but the method of enforcing its provisions has been simplified. In reference to age certificates, the signatures of both parents and child are required to be attached to the documents.

Kansas.—In addition to the general factory inspection Act a new and more specific law in regard to elevators and fire escapes on public buildings has been provided. There is no law in reference to child labour, but

an Act known as the Truancy Bill has been enacted and provides for the appointment of an officer whose duty it is to see that all children under the age of 14 years attend school.

Indiana.—The child labour law is very much similar to the New York state legislation. Some difficulty was encountered in enforcing the provisions of the law requiring fire escapes on public buildings, but the Act is being generally observed,

Quebec.—The age limit of children has been raised to 13 years for boys, and in certain dangerous employment the age limit is 18 years, and 14 years for girls. There is no compulsory Education Act in force, but free text books are provided. Regulations stipulating the kind of fire escapes to be built on public buildings have been made, as well as providing for portable balconies for those employed in washing windows on high buildings. Greater conveniences are now being provided for workers in stores.

Finances of the Association.

The secretary-treasurer of the association reported that the receipts for the year amounted to \$460.50, and the expenditure to \$324.10, leaving a balance of \$136.40 on hand. For his services during the past year the secretary-treasurer was granted \$100.

Joint Meeting Proposed.

An invitation was received from the last convention of Labour Commissioners asking for a committee from the Factory Inspectors to confer with a similar committee from the Labour Commissioners, in order, if possible, to arrange for the holding of their respective conventions in the same city and at the same time of year, so that joint meetings for the discussion of subjects of mutual interest might be held. A committee was appointed to consider the proposition.

Officers Chosen.

The following officers were chosen by the association for the coming year :—

President : D. H. McAbee, Chief Factory Inspector of Indiana, Indianapolis, Ind.

First Vice-President : M. J. McLeod, First Deputy Commissioner of Michigan, Lansing, Mich.

Second Vice-President : W. L. A. Johnson, Commissioner of Labour and Factory Inspector of Kansas, Topeka, Kan.

Third Vice-President : Louis Guyon, Chief Factory Inspector of Quebec, Montreal, Que.

Fourth Vice-President : Miss Margaret Carlyle, Factory Inspector of Ontario, Toronto, Ont.

Secretary-Treasurer : D. F. Spees, Chief Deputy Inspector of Indiana, Indianapolis, Ind.

Assistant Secretary : Jas. T. Burke, Factory Inspector of Ontario, Toronto, Ont.

St. Louis, Mo., was selected as the place of meeting for the next convention, which will convene on the 21st of September, 1904.

During the convention the delegates were given drives to the principal places of interest in and about the city of Montreal, and were also entertained at a luncheon at Bout de l'Isle, for which, before adjourning, votes of thanks were passed.

FIFTH CONGRESS OF THE CHAMBERS OF COMMERCE OF THE EMPIRE.

THE meeting of the fifth triennial Congress of Chambers of Commerce of the Empire was held at Montreal from August the 17th to 21st, inclusive, and the representative and weighty character of the personnel of that body, delegates to the number of 548 from Great Britain and the various colonies of the empire, as well as from the larger towns and cities of the Dominion being present, and the highly important nature of the subjects which came under its deliberations, made the occasion one of very widespread interest. The last assembly of the kind was held in London three years ago (the first having met in 1886), and the present marks the first occasion on which the Congress convened outside of the city of London. Some idea of the volume of business which came under the consideration of the Congress will be afforded when it is stated that some 71 resolutions, relating to a great variety of subjects, appeared on the programme as originally arranged.

Extensive preparations for the reception and entertainment of the delegates were made, especially by the Board of Trade of

Montreal, the Dominion Government contributing the sum of \$25,000 towards the travelling expenses of the British and Colonial members of the Congress, and furnishing each member with a handbook of the Dominion especially compiled for the occasion.

The following is a brief reference to some of the more important items of business transacted and resolutions adopted at the meetings of the Congress :—

Opening of the Congress.

The Congress opened on the morning of August 17th with an address by Lord Strathcona and Mount Royal, as Honorary President, who referred in passing to the growth in importance of the Congress and of the topics discussed by it, and to the significance of the meeting in Montreal. The Colonial Conference of last year was mentioned as having led to the establishment of the present all-British Pacific cable. The fiscal and trade policy of the Empire was discussed at some length with special reference to the expediency of a preferential

tariff. Lord Brassey, the President and Chairman of the Congress, who followed, defined the prime object of the meeting as the strengthening and consolidation of the Empire by every practicable means, and especially invited discussion on trade questions in their bearing on Imperial relations.

Imperial Defence.

The active business of the convention was entered upon with a discussion of two resolutions presented by the Canadian Manufacturers' Association and the Montreal Board of Trade respectively, recommending that the various colonies of the Empire should contribute to the expenses of Imperial defence. An amendment, suggesting that the colonies would best contribute to the strength of the Empire by devoting their revenues to the development of their own resources, was also submitted, but the form in which the matter received the final assent of the Congress stated it as the duty of the self-governing colonies to participate in the cost of the defences of the Empire while claiming 'the privilege of keeping their own initiative as to the nature and mode of help which they may agree to offer.'

Food Supply and Emigration Policy of Great Britain.

After a discussion relating to the increase of imports into Great Britain in recent years, and the situation of Great Britain in this respect in the case of war, in which connection mention was also made of the methods of grading wheat at Montreal, the following resolution was carried unanimously :—

Whereas the assurance of a constant and ample supply of food to the citizens of the United Kingdom in both peace and war is a matter of the first importance for the security of the empire, it is resolved that in the opinion of this Congress the food supply of Great Britain can be most safely relied upon by developing the output of her own territories to such an extent as to make her independent of supplies from foreign sources, and to best achieve this end it is most desirable and necessary to divert as far as possible all of her able-bodied surplus population who will make useful citizens to the shores of her dominions beyond the seas.

General Imperial Policy.

Other resolutions of the opening day's session of the Congress recommended that all treaties between Great Britain and foreign countries should leave Great Britain free to enter into such relations with the colonies as might be deemed expedient, and that the Imperial Government should be asked to take immediate steps to obtain most-favoured-nation treatment for British colonies from those countries which had granted such treatment to the United Kingdom. It was also moved, on behalf of the Paris chamber, that representations should be addressed to the French Government with a view to obtaining that goods coming into France on a through bill of lading via a British port from a British colony which has no direct service with France, be decided by the French customs as coming direct and admitted free of the special tax which is imposed upon goods of extra European origin coming into France through a European port other than a French port.

Imperial Trade Relations.

There were twelve resolutions on the original programme relating to the commercial relations of the United Kingdom and the various colonies and dependencies, ten being from Canadian boards and the other two from London and Manchester, England, respectively. This subject was first introduced on the second day's session of the Congress. In the resolution relating thereto as finally adopted by the Congress on the fourth day's session (the most of the time of the second and third day's session being devoted to the discussion), the extreme recommendations of some of the original resolutions were avoided and a compromise accepted which embraced a clause of the Toronto Board of Trade's resolution, favouring a commercial policy based upon a principle mutually beneficial, to which was added a recommendation suggested by the London Chamber of Commerce that due consideration

be had for the fiscal needs of the component parts of the empire. The resolution was finally proposed by Lord Strathcona and carried after a keenly contested debate, the fiscal problem of the empire being recognized as the chief problem with which the Congress had to deal, was as follows :—

It is resolved that the bonds of the British Empire could be materially strengthened and the union of the various parts of His Majesty's dominions greatly consolidated by the adoption of a commercial treaty based upon the principle of mutual benefit, whereby each component part of the Empire would receive a substantial advantage in trade as the result of its national relationship, due consideration being given to the fiscal and industrial needs of the component parts of the Empire ; that this Congress urges upon His Majesty's Government the appointment by them of a special commission, composed of representatives of Great Britain and her colonies and India, to consider the possibility of thus increasing and strengthening trade relations between the different parts of the Empire and the trading facilities within the Empire and with foreign countries.

Other Resolutions.

The other and more important resolutions adopted by the Congress were as follows :—

Imperial Postage.

Five resolutions had been offered on the subject of Imperial postage, and the compromise adopted was as follows :—

It is resolved that the free interchange between the peoples of the Empire and of the newspapers and periodicals published therein would do much to strengthen Imperial unity and that association of ideas and aims upon which such unity must be based ; that such interchange would be largely promoted by a reduction of the postal charges on such matters ; that this Congress, therefore, prays His Majesty's Government to reduce to the domestic rate the charge on newspapers and periodicals published in the United Kingdom and posted to the colonies ; and that this Congress also urges those colonies which have not already done so to make a similar reduction in postal rates on their publications. It is resolved that it should be the aim of Imperial statemanship to overcome the anomaly, and to endeavour to reach an arrangement which would make it possible for British publications to compete on even terms with foreign papers.

Fast Steamship Service.

The resolution of the Montreal Board of Trade relating to this subject was adopted, as follows :—

It is resolved that this Congress considers it of the utmost importance to the interests of the Empire that the United Kingdom and her colonies should

adopt a policy under which lines of steamships will be secured and retained for (1) the provision of fast mail service on the several routes and (2) the development and control of trade between the mother country and her possessions, and between the colonies themselves.

Settlement of Labour Disputes.

A resolution relating to labour disputes was adopted as a compromise between two originally appearing on the programme of the Congress. The first of these, that of the Belleville Board of Trade, recommended the direct intervention of the Government in labour disputes. To this the London Chamber of Commerce, in view of the success of the English Voluntary Conciliation Boards, could not agree. An amendment favouring the adoption of compulsory arbitration failed to obtain a seconder, and the resolution adopted was as follows :—

It is resolved that the strained relations physically existing between capital and labour demand legislative action throughout the Empire, for the purpose of preventing strikes and lockouts, which are disastrous to the interests of the employers and employees and to the whole country, and this Congress is of opinion that legislative action should include the giving of sanction and encouragement to the promotion of voluntary conciliation boards, which have achieved a great measure of success in Great Britain.

And, further, that labour unions and master trades' associations in all cases be incorporated and registered.

Other Subjects of Discussion.

Resolutions were also passed recommending a codification of the commercial law of the empire, against the embargo on Canadian cattle imported into Great Britain, favouring the uniting of all self-governing British communities with a continuous chain of state-owned telegraphs, favouring technical education and favouring the proposed Canadian bankruptcy law.

Banquet to the Delegates.

On the evening of August 20 a banquet was tendered by the Board of Trade of Montreal to the Congress, at which speeches were delivered by His Excellency the Earl of Minto, Governor General of Canada, the

Right Honourable the Premier, Lord Strathcona, Lord Brassey, Sir William Holland and many others.

On the conclusion of the proceedings of the Congress many of the delegates left on an

extensive tour of Canada, which had been previously arranged for them. Ottawa, Toronto, Hamilton and other cities of Ontario were visited during August, and the party proceeded later to western Canada.

COST OF LIVING IN CANADA,

IV.—RETAIL PRICES OF READY-MADE CLOTHING, UNDERWEAR, BOOTS AND SHOES, ETC.

The Department of Labour presents herewith a statistical table of retail prices of ready-made clothing, underwear, boots and shoes, &c., being the fourth of the series published in connection with the special investigation* recently conducted by the Department into the cost of living in Canada. Previous tables† have been devoted to the prices of provisions, groceries and dry-goods, and in a subsequent issue returns relating to rents will be presented. In the several tables in question the information is given in such form as to afford a basis of comparison between prices obtaining in the different provinces of the Dominion and at various points within the provinces. The arrangement of the localities alphabetically in groups according to population will be understood at a glance.

prices of the various articles of wearing apparel mentioned in the table, were addressed to retail dealers all over the Dominion and it is of the returns received in response that the present table is composed. No attempt has been made to reconcile variations however wide as between one schedule and another, and the value of the statistics, accordingly, consists largely in the fact that they represent a wholly original body of returns as reliable as it was possible to obtain them. The results of the personal investigation by officers of the Department in this connection are reserved for future treatment in the *Gazette*.

As in the previous tables, the returns set in italics were prepared and forwarded to the Department by the correspondents to the *Labour Gazette*.

Nature of the Returns.

(See next pages for Tables.)

The present table, as in the case of the series which have preceded it, consist entirely of returns received from sources wholly independent of the Department. Blank forms, with a request for a statement of

* The nature and extent of this investigation and the methods in which it was carried out are fully described in an article on the Cost of Living in Canada which appeared in the April number of the *Gazette* at page 778.

† See *Labour Gazettes* for May, page 869, for June, page 979, and for July at page .

ONTARIO, LEGISLATION AFFECTING LABOUR, 1903.

A number of bills affecting, in varying degrees, the condition of labour in the province of Ontario, were passed during the recent session of the legislature of that province, and copies of the same in their finally revised form were received at the Department of Labour during August. A reference to the more important principles contained in these will be found in the following:—

The Factories Act, Amended.

In bill No. 176, in which various amendments to the statute law of the province are set forth, two paragraphs refer specifically to additions made to the Ontario Factories Act. It is now made illegal to have a bed-room or sleeping place on the same floor of any building used as a shop, bake-house or factory. Such bed-room or sleeping place may be situated in the same building, but not without the written consent of the in-

spector. It is further made illegal to have a stable under the same roof as a factory, unless the two divisions are separated by a wall approved of by the inspector.

A second section of the Act provides that in cases where liability for damages has arisen by reason of a violation of the Ontario Factories Act the liability is subject to the limitations prescribed in the Workmen's Compensation for Injuries Act, in which the amount of compensation recoverable is limited to the estimated earnings during the three years preceding the injury of a person in the same grade of employment within the province, or the sum of \$1,500, whichever is larger.

The Protection of Children.

By an 'Act to amend the Children's Protection Act of Ontario' new regulations are laid down, in considerable detail, as to the

appointment and duties of Children's Committees. It is now provided that a committee of this kind, consisting of six persons or more—not less than half of whom are to be women—are to be appointed in each electoral district of the province to co-operate with the Superintendent of Neglected and Dependent Children and with children's aid societies in the work of improving the condition of neglected and dependent children, selecting foster homes for children, and other similar duties. The county judge, the sheriff and the warden of the county of which the electoral district forms a part, are to decide the personnel of such committees. In the case of cities, the county judge, the sheriff and the mayor are given this power, though a committee need not be appointed in any town or city where a children's aid society is already in existence. The member of the Legislative Assembly for the district is to be, ex-officio, one of the committee. All services of the committee are without remuneration. The powers and

duties of the committee are generally defined as the promoting and encouragement of philanthropic sentiment on behalf of neglected, abandoned or destitute children, and the adoption of such methods as they may think best for the securing of voluntary subscriptions of money to be applied to the carrying out of the Act. The meetings and reports of the committee are duly regulated. An addition to the Act provides for the placing of a child apparently under the age of 16 years, who is convicted of an offence against the laws of the province, under a probation officer from whom a report is to be submitted to the convicting judge from time to time concerning the progress and welfare of the child. The duty of the probation officer, is to take a personal interest in the child with a view of securing its reformation and to enable it to lead a respectable life. Any member of a children's aid society may act as a probation officer. No child under the age of 14 years of age charged with an offence against the law may

be committed to a jail or police station commonly used for the detention of adults, but must be as far as possible admitted to bail and placed in the custody of some relative or benevolent person willing to be responsible for its appearance. The association may contract for the temporary care and maintenance of such a child, and the expenses thus incurred are to be a charge upon the municipality in which the child has last resided for one year.

Inspection of Lodging Houses, Laundries, &c.

'An Act to amend the Public Health Act,' contains a provision giving the municipal medical health officer, or any sanitary inspector acting under his instructions, power to enter at any time any lodging-house, tenement or laundry where the owner or employees reside on the premises, or other building suspected of overcrowding or unsanitary conditions, in order to ensure that such premises are not occupied by more persons than is proper for the health of the occupants. Sleeping rooms in such premises, it is provided, must contain not less than 400 cubic feet of air for each occupant. The rooms must not be filthy or unclean or in any condition that, in the opinion of the health officer, may endanger the public health or the health of the occupants. The owner or occupant who refuses to carry out the instructions of the medical health officer in this respect within twenty-four hours is liable to the penalties of the Act, and the health officer may enter the premises in question and remove the inmates therefrom and cleanse the same with the assistance of constables, police officers and such other persons as he may think fit.

Re Actions on Lien Notes.

An addition to the 'Act respecting the conditional sale of chattels' makes certain important provisions as to the venue of actions on lien notes, hire receipts, &c. No condition or agreement in any such note or

receipt providing that any action that may arise shall be tried in any particular place or elsewhere than in the court having jurisdiction in the locality in which the defendant resides or in which the contract was made, shall be valid unless there was printed in red ink across the face of the note or contract, with the signature of the maker, the following :—

'Any action which may be brought or commenced in a division court in respect of or on account of this note, hire receipt or contract, may be brought and commenced against the maker or person liable thereon in a division court other than where he resides or in which the contract was made.'

The provision will not apply to existing contracts.

Taxation of Income.

An important section of 'An Act to amend the Assessment Act,' passed during the session, was that which provides that the annual income of any person derived from his personal earnings to the amount of \$1,000 and the annual income of any person to the amount of \$400 derived from any other source than personal earnings shall not be liable to taxation. Previously the exemption extended only to the amount of \$700 upon personal earnings.

Other Acts.

A section of the Act to amend the statute law above referred to makes provision that in the case of holidays falling on a Sunday the day next following shall be kept and observed under the same name as a legal holiday throughout Ontario.

It may be stated that an Act to create a provincial board of conciliation and arbitration, and an Act to provide for the weekly payment of the wages of employees of corporations and joint stock companies were introduced during the session, but did not receive the final assent of the legislature.

NEW BRUNSWICK, LEGISLATION AFFECTING LABOUR, 1903.

A copy of the various Acts as finally passed by the Legislative Assembly of New Brunswick during the session of the present year was received at the Department of Labour during the past month, and the following is a brief review of the more important measures contained in the volume as particularly affecting the working classes of that province.

Workmen's Compensation Act.

Only one Bill (*), namely, 'An Act respecting the Liabilities of Employers for Injuries to Workmen,' was framed with sole reference to the condition of labour, but the nature of the legislation in question, though in general conformity with the statutes of the other provinces relating to the same subject, renders important its analysis in some detail.

Definition of the terms 'Workman,' 'Employer,' Etc.

The term 'workman' in the new Act does not include a domestic or menial servant, or any servant 'in husbandry, gardening, or fruit growing, or in mining or quarrying or lumbering, or in driving, rafting or booming logs,' but means any railway servant, ship labourer, longshoreman, journeyman or handicraftsman, of any age, engaged in manual labour under contract with an employer, irrespective of the nature of the contract. The term 'railway servant' includes employees on tramways and street railways systems.

The term 'employer' includes a body of persons whether corporate or incorporate, as well as the legal representatives of a deceased employer. 'Superintendence' is held to denote the general function of a foreman, whether ordinarily engaged in manual labour or not.

Recovery of Compensation.

A workman, receiving an injury, or in the event of his death from the injury, his legal representative, is granted the same right of compensation against the employer as if the workman had not been in the service of the employer. This applies to injuries received as follows:—

(a.) By reason of a defect in the plant or premises used in the business of the employer.

(b.) By reason of the negligence of any superintendent in the service of the employer while in the exercise of his superintendence.

(c.) When the injury is received as a result of carrying out the orders of any one in the service of the employer, to whose directions the employee was bound to conform.

(d.) By reason of the act or omission of any person in the service of the employer in obedience to the rules or particular instructions of the employer.

(e.) Through the negligence of any person in the service of the employer who has charge of 'any points, signal, locomotive engine, machine or train upon a railway, tramway or street railway.'

(f.) Through the negligence of any person having charge of an engine or other machinery connected with a steamship or with the loading or unloading of a steamship.

Liability of Employer.

In cases where the work on which the labourer is employed is being carried into effect under contract, and the injury has been received through a defect in machinery, plant, premises, etc., of the person for whom the work is being done, the latter is held to be the employer under the Act, and as such liable to pay compensation. The contractor

* Cap. 11.

or sub-contractor, however, is not relieved from responsibility, though double compensation is not recoverable for the same injury.

Cases in which Compensation is not Allowed.

There are three instances mentioned in the Act as invalidating any claim on the part of the workman or his representatives for compensation for injuries received in the course of his employment. These are as follows :—

(a.) Where the defect through which the injury was received cannot be considered in any way as having arisen out of the negligence of the employer or his proper representatives.

(b.) When the injury has resulted from the operation of a perfectly legitimate rule or by-law, the approval of the Lieutenant Governor in Council being held to constitute any rule or by-law proper ;

(c.) When the workman knew of the defect from which his injury was subsequently received and did not report the same to his employer or foreman, in cases where the latter did not know of the existence of the defect. The workman, however, is not held to have voluntarily incurred the risk of an injury in cases where he knows of the existence of a defect and does not notify his employer of same.

Amount of Compensation.

The amount of compensation recoverable under the Act is limited to the amount of the estimated earnings, during the three years preceding the injury, of a person employed in the same grade as himself, within the province, provided the amount is not less than \$1,500, in which case the latter sum is recoverable. This compensation is not to be subject to any deduction or abatement whatever, except of damages secured under the operation of other legislation.

Procedure for Recovery.

Compensation is not recoverable unless notice of the injury sustained is given within twelve weeks, and the action commenced within six months from the occurrence of the accident, or, in the case of death, within twelve months from the time of death. Particulars governing the service of the notice of injury received are fully stated, and it is further provided that if the defendant in an action brought for compensation under the Act intends to rely for a defence on the want or insufficiency of notice, or on the ground that he was not the employer of the workman injured, he must, not less than seven days before the hearing of the case, give notice to that effect to the plaintiff. No contract or agreement between a workman and an employer is to be allowed in defence, unless other considerations than that of the engagement or continuation in employment of the workman were concerned, or unless in the opinion of the court such action on the part of the workman was just and reasonable. When the injury was caused by the personal negligence or wilful act of the employer, the workman may either claim compensation under the present Act or bring suit under other statutes, the civil liability of the employer not being affected by this Act, though he cannot be sued both independently of and also under this Act. If the defendant of an action admits his liability and gives notice to the defendant at least six days before the date appointed for the trial, the plaintiff shall not be allowed any expenses thereafter incurred in proving the matter admitted.

The form of notice to be served on an employer by a workman injured in his service is appended to the Act.

Wages of Railway Employees.

A second Act of the session (*) 'in aid of the construction of certain railways,'

* C. 12.

contains two sections which are of special interest to the working classes. Under their provisions the company in question must produce and file with the provincial secretary a statement of its business, showing net profits for the half year immediately preceding. The salary of each officer of the company and the amount of wages to be paid to any servant or officer is also made subject to the approval of the Lieutenant Governor in Council, who may fix or alter the amount from time to time as long as the conditions governing the guarantee of bonds by the province remains in effect. Freight and passenger rates are also made at all times subject to the approval of the Lieutenant Governor in Council.

Encouragement of certain Industries.

A number of Acts were passed to encourage various branches of the mining, manufacturing and agricultural industries of the province. Under chapter 17, passed to encourage the establishment of works for the reduction of wad or bog ores of manganese, iron and other metals into ferro-manganese and to induce capitalists to develop the necessary water or other power required for such works, the Lieutenant Governor in Council is given power to grant exclusive rights to search for wad or bog ores within the province. The licensee must, however, within eighteen months spend \$100,000 for mining areas, plant, &c., and not less than

\$500,000 within five years. The Aluminum Production Company of New Brunswick, Limited, is also granted (under chapter 20) a town site in the county of Queen's, and on an expenditure of not less than \$1,000,000 on its works will be granted an exemption or reduction of royalty upon all coal mined and raised by the company for its own use for a period not exceeding ten years.

In connection with the agricultural industry, two Acts were passed by the legislature to facilitate the opening up of new lands to settlement, namely, chapters 18 and 19, and to provide for the purchase of lands from the New Brunswick Railway Company and disposal of the same at a specified price to bona fide settlers. An Act was also passed to extend the operation of an Act for the encouragement of agriculture passed in 1898 for a second period of five years.

Under chapter 39 a number of amendments are made to an Act passed in 1899, to encourage the discovery and development of oil and natural gas in New Brunswick.

Other Legislation.

Other legislation of less direct reference to the condition of labour was: An Act allowing the incorporation of local improvement associations, chapter 22; an Act amending the law relating to landlord and tenant, chapter 26; and an Act empowering railway companies to maintain telegraph and telephone lines, chapter 27.

THE IMMIGRATION AND COLONIZATION MOVEMENT.

ON the whole the record of immigration arrivals in Canada during the month of August was maintained at a correspondingly high level with previous months of the season, though the movement, as will be illustrated by the subjoined returns for July, has passed its period of greatest activity, and an exact official statement for August was not procurable at the end of the month. There were also indications that the move-

ment would continue through the balance of the season on a satisfactory scale, contingents of settlers from Scotland, Wales and Australia being promised. Other features of recent developments were, the receipt of reports from the Barr colonists to the effect that they are well satisfied with the prospect of returns of their first year in Canada, and the rejection at Montreal in July of eighty-five immigrants by the Medi-

cal Board of the United States Immigration Department. Reports from the recently settled portions of the province of Quebec are of heavy yields of hay, wheat and potatoes, and of satisfactory progress in the general colonization movement.

Land sales in the Territories by the Canadian Pacific Railway Company were stated to have been the largest recently in the history of the road, discrimination being made against speculators and in favour of the bona fide settler. During July the company disposed of 267,647.32 acres, for \$1,020,404.70; for the same period last year the sales amounted to \$562,876.50, which was received for 155,341.93 acres.

The Canadian North-West Land Company disposed of 21,500 acres for \$140,400 during the same period, against 20,850 acres for \$128,000 in June, 1902. Since the beginning of the year this latter company is reported to have sold 220,000 acres for about \$1,100,000.

Immigration Returns for July.

According to the statement supplied by the Department of the Interior, immigrant arrivals in Canada during July numbered 11,278. The total shows a falling off as compared with previous months of the year, but this is in accordance with the usual course of developments, July ordinarily falling much short of the earlier months. Compared with 1902, there is an increase of 2,639. The arrivals of July were made up of 5,093 British, 2,867 from the continent of Europe, and 3,318 from the United States. The figures for 1902 were 2,170 immigrants from Great Britain, 3,168 from the continent of Europe and 3,251 from the United States, or a total of 8,589.

For the seven months of the present calendar year, to July 31, the returns give a total of 94,315 immigrants, as against 54,040 in 1902. Of these the British immigrants were 36,802, as against 12,804 last

year. The continental immigration was 29,157 as compared with 21,391, and immigrants from the United States, 28,356 as compared with 18,845.

British Emigration to Canada.

Emigration returns, published by the British Board of Trade in August, show a considerable Canadian emigration during June and July, the total number who left Great Britain for Canada being 10,517 as compared with 7,182 in 1902, or an increase of about 46 per cent. Of the total number of emigrants Canada secured 28 per cent, as compared with 21 per cent for the United States. The total British emigration to Canada for the seven months ending July 31 was 70,043, as against 41,243 during the same period last year. This represents 26 per cent of the total.

Homestead Entries for July.

The following statement, published by courtesy of the Department of the Interior, shows the number of homestead entries, according to the various agencies, made during the month of July, 1903, as compared with the month of July, 1902:—

| Agency. | 1903. | 1902. | Increase. | Decrease |
|-------------------|-------|-------|-----------|----------|
| Alameda..... | 289 | 487 | | 198 |
| Battleford..... | 305 | 96 | 209 | |
| Brandon..... | 49 | 228 | | 179 |
| Calgary..... | 251 | 138 | 113 | |
| Dauphin..... | 47 | 30 | 17 | |
| Edmonton..... | 311 | 252 | 59 | |
| Kamloops..... | 7 | 6 | 1 | |
| Lethbridge..... | 185 | 148 | 37 | |
| Minnedosa..... | 48 | 62 | | 14 |
| New Westminster | 2 | 3 | | 1 |
| Prince Albert.... | 213 | 162 | 51 | |
| Regina..... | 811 | 484 | 327 | |
| Red Deer..... | 168 | 93 | 75 | |
| Winnipeg..... | 120 | 82 | 38 | |
| Yorkton..... | 632 | 351 | 281 | |
| Total .. | 3,438 | 2,622 | 1,206 | 292 |

It will be seen that the net increase in the number of entries during the month was 916.

The statement of entries made for the fiscal year of 1902-3 is as follows :—

| Month. | 1902. | 1901. | Increase. |
|----------------|--------|--------|-----------|
| July..... | 2,622 | 921 | 1,701 |
| August..... | 1,904 | 768 | 1,136 |
| September..... | 1,416 | 566 | 850 |
| October..... | 2,142 | 779 | 1,363 |
| November..... | 2,482 | 752 | 1,730 |
| December..... | 1,640 | 825 | 815 |
| | 1903. | 1902. | |
| January..... | 1,109 | 809 | 300 |
| February..... | 1,165 | 928 | 237 |
| March..... | 2,325 | 1,707 | 1,138 |
| April..... | 5,778 | 2,078 | 3,700 |
| May..... | 4,109 | 2,199 | 1,910 |
| June..... | 4,691 | 2,788 | 1,903 |
| Total..... | 31,383 | 14,620 | 16,763 |

Nationalities of Homesteaders.

The nationalities of homesteaders, as reported by the several agencies of the Department of the Interior in Manitoba, the North-west Territories and British Columbia during the month of July, 1903, were as follows :—

| Nationalities. | No. of entries. |
|--|-----------------|
| Canadians from Ontario..... | 419 |
| " Quebec..... | 47 |
| " Nova Scotia..... | 11 |
| " New Brunswick..... | 11 |
| " Prince Edward Island..... | 9 |
| " Manitoba..... | 111 |
| " North-west Territories..... | 84 |
| " British Columbia..... | 7 |
| Persons who had previous entry..... | 339 |
| Canadians returned from the United States..... | 80 |
| Americans..... | 977 |
| Newfoundlanders..... | 547 |
| English..... | 111 |
| Scotch..... | 31 |
| Irish..... | 15 |
| French..... | 4 |
| Belgians..... | 1 |
| Swiss..... | 1 |
| Italians..... | 11 |
| Roumanians..... | 2 |
| Greeks..... | 88 |
| Syrians..... | 395 |
| Germans..... | |
| Austro-Hungarians..... | |
| Hollanders..... | |
| Danes (other than Icelanders)..... | |

| Nationalities. | No. of entries. |
|--|-----------------|
| Icelanders..... | 7 |
| Swedo-Norwegians..... | 19 |
| Russians (other than Mennonites and Doukhobors)..... | 70 |
| Mennonites..... | 29 |
| Doukhobors..... | 8 |
| Chinese..... | 5 |
| Total..... | 3,438 |

Representing 9,580 souls.

Of the total number of entries made during July by persons coming from the United States into Canada, 413 were from Dakota, 265 from Minnesota, 52 from Utah, 48 from Iowa, 35 from Montana, 33 respectively from Michigan and Wisconsin and 32 from Nebraska.

Lands patented in July.

The following is an abstract of letters patent covering Dominion lands situated in Manitoba, the North-west Territories, British Columbia and the Yukon Territory, issued from the Department of the Interior during the month of July, 1903.

| Nature of Grant. | No. of Patents. | No. of Acres. |
|---|-----------------|---------------|
| British Columbia homesteads..... | 5 | 728.84 |
| British Columbia sales..... | 3 | 109.03 |
| Coal lands sales..... | 1 | 160.00 |
| Homesteads..... | 329 | 52,096.03 |
| Mineral rights..... | 2 | 210.00 |
| North-west Half-breed grants..... | 50 | 10,654.30 |
| Railways— | | |

| Yukon Territory special..... | 1 | |
| Total..... | 638 | 228,176.15 |

TRADE DISPUTES DURING THE MONTH OF AUGUST.

DURING the month of August, the effects of trade disputes on industrial conditions were seriously felt in only two places, namely, at Port Dalhousie, Ont., where a strike existed among the employees of the Maple Leaf Rubber Co., Limited, and at Van Anda, Texada Island, B. C., where the works of the Van Anda Mines and Smelter were closed from August 12th until the end of the month, owing to a strike of the employees for recognition of the Western Federation of Miners. The other disputes of the month either involved small numbers of men, were of short duration, and in the case of those of long standing the majority of strikers had obtained work elsewhere or the employers had secured other workmen, and conditions in this way had returned to a normal state.

Analysis of trade disputes during the month.

Number and magnitude.—The number of disputes reported to the department as being in existence during the month of August was twenty-three, which was a large decrease compared with July, when there were 39 in existence. Of the August disputes, 12 were begun prior to the beginning of the month and 11 after. Seven old disputes and three new ones were terminated, leaving 13 still unsettled at the end of the month. The employers were successful in six of the strikes which were ended, and the men in three. The remaining one was due to a misunderstanding with regard to payment for overtime, and a satisfactory arrangement was reached with regard to it after a week's negotiations.

Loss of time in working days.—The approximate loss of time in working days by the men directly affected by labour disputes in August was 30,694, compared with 49,905 in July.

Trades affected by new disputes.—The trades affected by new disputes included building trades in which three disputes occurred; woodworking, in which there were two, and the following occupations, which contributed one strike each: mining, railway construction, ironmoulding, marble working, rubber working and bar tending.

Causes of new disputes.—The following is a classification of the causes of the new disputes reported to the department:—

| | |
|---|---|
| Demand for increase of wages..... | 4 |
| Demand for increase of wages and shorter hours..... | 1 |
| Demand for shorter hours..... | 1 |
| Demand for recognition of union and for certain changes in conditions of work.... | 2 |
| Reduction of payment for piece work.... | 1 |
| Employment of another class of working-men..... | 1 |
| Dispute as to payment for overtime..... | 1 |

Strikes commenced prior to the beginning of the month.

Few important developments occurred in the twelve strikes which had begun before August 1 and continued throughout the whole or part of that month, and in the majority of cases, owing to the employers having obtained new men, or the strikers having secured other positions, the effect of the disputes on industrial conditions were very slight. The following is a short account of the most important facts in connection with these disputes:

Settlement of coal miners' strike at Cumberland, B.C.

On about the beginning of August a committee was appointed by the striking miners of the Wellington Colliery Company at Cumberland, B.C., for the purpose of interviewing the manager of the company in order to try and end the dispute, which had been in existence since May 4. On August 4 a proposition from the company was submitted to the miners at a mass meeting, but the terms were not acceptable, and it was

rejected. The chief objections was a stipulation that the men should sign individual contracts to hold good for two years. Negotiations, however, were continued, and on August 20 another meeting was held, and the terms of the company were finally accepted. A committee was immediately appointed to inform the representatives of the company of their decision, and on the following day the strike was brought to an end. According to the terms of settlement, the company refused to recognize the union, and each miner had to sign an individual contract with the company, covering a period of two years, and containing conditions and rates of payment similar to those prevailing before the strike, with the exception that all miners taken from the face to do day work were to receive \$3 a day, a sum which 75 per cent were said to have been paid before.

Strike of ironmoulders and coremakers at Toronto.

In the August number of the *Gazette*, an account was given of a strike of ironmoulders and coremakers at Toronto, which had begun on June 12, and had originally involved 11 firms. The strikers demanded a nine-hour day, and by the end of July only four firms continued to refuse to grant their demands. The dispute lasted throughout August, but by the end of the month only 30 men, out of 275 who had struck, remained out of work. The Canada Foundry Company, which was the firm most seriously affected by the strike, claimed on August 13 that they had all the moulders they required, but this was denied by their former employees.

On August 24, a charge was laid in the police court against the manager of the Canada Foundry Co., by one of a party of moulders who had been brought from Scotland to take the place of strikers. The manager was accused of withholding the plaintiff's tools when he wished to leave the

employment of the company on account of the existence of the strike. The charge was dismissed, however, as the company claimed that the tools were being held as security for money owed them by the plaintiff for passage and board.

With regard to other disputes which had been in existence before August 1, the journeymen bakers of Hamilton abandoned their attempt to secure day work instead of night work; and on August 3, the striking painters of Toronto accepted their employers' terms of wages of 30 cents an hour, after a two months' struggle to obtain the rate of 35 cents an hour, which they had been receiving for a short time previous to the strike. A strike of cigar makers in London, Ont., which had been declared on May 11, on account of the refusal of employers to pay the union scale of wages to female workers, showed signs of drawing to a close during the month of August. There were originally 10 firms and 104 employees involved, but all the men secured work either with the employers who had yielded to their demands, or with other firms, and at the end of the month there remained idle only 31 women workers.

New Disputes.

The most important of the new disputes begun in August were a strike of rubber workers at Port Dalhousie, and a strike of miners and carpenters at the Van Anda Mines, Texada Island, B.C.

Strike of Rubber Workers at Port Dalhousie.

On August 10, the employees of the Maple Leaf Rubber Company, Limited, of Port Dalhousie, Ont., declared a strike, on account of the superintendent of the company refusing to meet a committee of their union, in order to discuss certain grievances of the men. This company manufactures rubber footwear, and one of the chief griev-

TRADE DISPUTES OF THE MONTH OF AUGUST.

| Province. | Locality. | Occupation. | Alleged Cause or Object. | No of Firms or Establishments affected. | Approximate No. of Employees affected | Date of commencement. | Date of termination. | Result. |

| Ontario..... | Guelph..... | Woodworkers..... | Reduction in piecework prices averaging 7½ per cent. | 1 | 25 | " 29..... | " " " |
| Quebec..... | Montreal..... | Sheet metal workers and roofers. | A lockout. Men demanded 25c. per hour and a 9 hour day instead of 20c. per hour and a 10 hour day. | 5 | 25 | " 29..... | " " " |

*Considerable difficulty has been experienced by the Department of Labour in making an exact classification of existing trade disputes, particularly in cases where, after the declaration of a strike, some of the original strikers have returned to work, or have had their places filled with new hands, or where the establishments affected have found that for either of these reasons, or both, or for other causes, their business is no longer seriously affected. In such cases while, in one sense, it may be true that a strike may be regarded as still in existence because of no formal declaration by either of the parties of its termination, yet so far as the actual effect upon the business interests of the community is concerned a record of the continuance of such a dispute might be misleading. The list of trade disputes published in the present table, therefore, includes mention only of such disputes as during the month or at its termination affected to an appreciable degree the carrying on of the industrial or business operations of the firms or establishments concerned, mention, moreover, is not made of disputes involving less than six employees or of less duration than 24 hours.

ances was that the shoemakers doing piece work were often kept waiting for lasts, etc., and were thus prevented from earning as much as they otherwise would. It was also claimed by the men that certain other classes of work were not sufficiently paid for, and other causes of friction existed. After the dispute had commenced, the strikers submitted their case to the Trades and Labour Council of St. Catharines, and a meeting was arranged through the mediation of two delegates of the council between the committee of the union and the superintendent of the company. The meeting was held on August 22 but no satisfactory result was reached, and the situation remained unchanged at the end of the month. About 184 employees were affected directly by the strike and 56 indirectly. As this factory was the most important industrial establishment of Port Dalhousie, the whole district was more or less affected by the dispute.

Strike of employees of the Van Anda Mines, B.C.

On August 12, a strike was declared by the local branch of the Western Federation of Miners at the Van Anda Mines and Smelter, Texada Island, B.C. The object of the dispute was a demand to increase the wages of the head carpenter from \$3.50 to \$4.00 per day, and to reduce the hours of topmen to 8 and all other surface men to 9 per day with no decrease in wages. The number of men involved was 215, of whom 150 were white and 65 Chinese. The original demand of the strikers were subsequently withdrawn, and a demand for recognition of the union was substituted. The situation was unchanged at the end of the month.

The table published herewith is a compilation of the trade disputes of the Dominion of Canada which began or were in continuance during the month of June, and which have been reported to the department.

GOVERNMENT CONTRACTS FOR THE MONTH OF AUGUST.

(Information supplied by the Department of Public Works.)

THE following is a list of the contracts awarded by the Department of Public Works, and which received the signature of both parties to them, during the month of August, together with a minimum rate of wages to be paid to the labourers engaged upon the work, as set forth in the 'fair wages' schedule inserted in each contract:—

Erection of an Inland Revenue building at St. Hyacinthe, Que.; date of contract, July 30, 1903; amount of contract, \$21,089.

| TRADE OR CLASS OF LABOUR. | RATE OF WAGES. | |
|--------------------------------------|------------------------------|----------------------|
| | Not less than the following: | |
| Contractor's foreman, mason | \$3.50 | per day of 10 hours. |
| " bricklayer | 3.50 | " " |
| " carpenter | 2.00 | " " |
| Carpenters | 1.50 | " " |
| Joiners | 1.50 | " " |
| Stair builders | 1.50 | " " |
| Masons | 2.25 | " " |
| Stone cutters | 2.50 | " " |
| Lathers | 2.00 | " " |
| Bricklayers | 2.25 | " " |
| Builders' labourers | 1.10 | " " |
| Plasterers | 2.50 | " " |
| Painters and glaziers | 2.00 | " " |
| Tinsmiths | 1.50 | " " |
| Steamfitters | 2.00 | " " |
| Sheet metal workers | 2.00 | " " |
| Plumbers | 2.00 | " " |
| Blacksmiths | 1.50 | " " |
| Timekeeper | 1.50 | " " |
| Driver with one horse and cart | 2.00 | " " |
| " two horses and wagon | 3.00 | " " |
| " one horse | 2.00 | " " |
| " two horses | 3.00 | " " |
| Ordinary labourers | 1.10 | " " |

Construction of a Post Office and Customs building at Thetford Mines, Que. ; date of contract, August 8, 1903 ; amount of contract, \$6,735.75.

| TRADE OR CLASS OF LABOUR. | RATE OF WAGES. | | |
|--------------------------------------|-------------------------------|----------------------|---|
| | Not less than the following : | | |
| Foreman bricklayer | \$3.00 | per day of 10 hours. | |
| " mason | 3.00 | " | " |
| " carpenter | 2.00 | " | " |
| Masons | 2.00 | " | " |
| Bricklayers | 2.50 | " | " |
| Stonecutters | 3.00 | " | " |
| Builders' labourers | 1.50 | " | " |
| Carpenters | 1.75 | " | " |
| Joiners | 1.75 | " | " |
| Stair builders | 3.00 | " | " |
| Lathers | 2.00 | " | " |
| Plasterers | 3.00 | " | " |
| Painters and paper-hangers | 2.00 | " | " |
| Blacksmiths | 2.00 | " | " |
| Ordinary plasterers | 1.25 | " | " |
| Plumbers and steamfitters | 2.00 | " | " |
| Sheet metal workers | 2.00 | " | " |
| Writers and electricians | 2.00 | " | " |
| Driver with one horse and cart | 2.25 | " | " |
| " two horses and wagon | 4.00 | " | " |
| " one horse | 2.25 | " | " |
| " two horses | 4.00 | " | " |
| Timekeeper | 1.50 | " | " |

Superstructure of a 200-foot span highway bridge over the North channel of the Ottawa River at Portage du Fort, Que. ; date of contract, August 25, 1903 ; amount of contract, \$9,750.

| TRADE OR CLASS OF LABOUR. | RATE OF WAGES. | | |
|--------------------------------------|-------------------------------|----------------------|---|
| | Not less than the following : | | |
| Contractor's erection foreman | \$3.50 | per day of 10 hours. | |
| Timekeepers | 1.50 | " | " |
| Engineer for hoisting engine | 2.00 | " | " |
| Firemen | 1.50 | " | " |
| Chief carpenter | 2.25 | " | " |
| Carpenters | 1.75 | " | " |
| Carpenters' helpers | 1.30 | " | " |
| Stone drillers | 1.50 | " | " |
| Rivet heaters | 0.75 | " | " |
| Riveters | 2.00 | " | " |
| Riveters' helpers | 1.50 | " | " |
| Blacksmiths | 2.25 | " | " |
| Blacksmiths' helpers | 1.50 | " | " |
| Driver with one horse and cart | 2.00 | " | " |
| " two horses and wagon | 3.00 | " | " |
| " one horse | 2.00 | " | " |
| " two horses | 3.00 | " | " |
| Teamsters | 1.30 | " | " |
| Ordinary labourers | 1.30 | " | " |

**ENFORCEMENT OF FAIR WAGES
RESOLUTION BY POST OFFICE
DEPARTMENT, AUGUST, 1903.**

DURING the month of August the following orders were given by the Post Office Department for the supplies below mentioned. All were given subject to the regulations for the suppression of the sweating system, and securing payment to the workingmen and women of fair wages, and the performance of the work under proper sanitary conditions :—

| Nature of Order. | Amount of Order. | |
|--|------------------------|------|
| | \$ | cts. |
| Making and repairing metal dating and other hand stamps; also type and brass crown seals..... | 290 | 17 |
| Making and repairing rubber dating and other hand stamps and type..... | 24 | 25 |
| Supplying stamping material, inclusive of making and repairing pads, also wooden boxes and postmarking and cancelling ink..... | 538 | 56 |
| Repairing post office scales..... | 0 | 25 |
| Supplying mail bags..... | 1,661 | 40 |
| Repairing mail bags..... | 1,067 | 74 |
| Repairing mail locks and supplying mail bag fittings..... | 52 | 95 |
| Making letter boxes and repairing mail clerks' tin boxes..... | 580 | 00 |
| Miscellaneous orders for making and repairing postal stores..... | 6 | 20 |
| Making up and supplying articles of official uniform..... | 1,456 | 95 |

**UNION FORMED DURING THE MONTH
OF AUGUST, 1903.**

The department has received notice of the following organizations as having been formed during the month of August, 1903 :

Nova Scotia :

Macan—Retail clerks.

Dominion No. 1—Retail clerks.

New Brunswick :

St. John—Tailors,

Moncton—Retail clerks.

Quebec :

Montreal—Structural Iron Workers.

“ Stationary Firemen.

Levis—Machinists.

L'Assomption—Musical Union.

Valleyfield—Carpenters and Joiners.

Ontario :

Hamilton—Waiters and waitresses.

“ Garment workers.

“ Teamsters' Union.

London—Musicians.

“ Actors.

Windsor—Sheet Metal Workers.

Manitoba :

Winnipeg—Horseshoers and general blacksmiths.

British Columbia :

Victoria—Newsboys.

REPORTS OF DEPARTMENTS AND BUREAUS.

THE following reports of Departments and Bureau were received by the Department of Labour during August, 1903.

CANADIAN REPORTS.

Canadian Trade and Industry.

(Special report regarding the growth of trade and material industries of the Dominion of Canada, published on the occasion of the fifth triennial meeting of the Congress of Chambers of Commerce of the Empire at Montreal, August 17, 1903 : Government Printing Bureau, Ottawa ; 25 pages.)

The occasion of the 5th triennial Congress of the Chambers of Commerce of the Empire

held in Montreal during August was made by the Department of Trade and Commerce of the Dominion, the opportunity of issuing in concise form a special statement on growth of Canadian trade and industry during the past thirty years. The pamphlet was intended primarily for the information of the Congress as to what may be the future possibilities of this country. As pointed out in the preface, the Dominion on a per capita basis occupies the position of being at the top of the list of all the countries in the world as regards trade and material progress.

Some of the statistics submitted in this connection are as follows :

In 1871 the total trade of Canada was \$170,266,589; in 1903 it was \$467,061,494. In percentage of growth Canada compares with the other leading commercial nations of the world as follows :

| | |
|-------------------------|-------|
| Canada | 64.97 |
| Italy | 42.27 |
| Argentine Republic..... | 41.64 |
| Japan..... | 38.19 |
| United States..... | 32.39 |
| Cape Colony | 39.47 |
| Germany..... | 23.96 |
| Great Britain | 18.47 |
| Belgium..... | 18.11 |
| Switzerland | 16.11 |
| France..... | 14.54 |

Under exports, animals and their produce have grown from \$12,608,506 in 1871 to \$69,817,542 in 1903; Agricultural products from \$9,853,924 to \$44,624,321; manufactures from \$2,432,750 to \$20,624,967; produce of the forest from \$23,063,223 to \$36,386,015; wheat from \$1,981,917 to \$24,566,703; cheese from \$1,109,906 to \$24,712,943; produce of the mine from \$6,043,868 to \$64,970,732; fisheries from \$3,994,275 to \$11,800,184. In the same period the annual revenue has increased from over \$19,000,000 to over \$63,000,000, and the expenditure from over \$15,000,000 to over \$41,000,000. The debt of the country increased from \$77,706,518 to \$254,934,638. In 1871 there were \$68,123,931 on deposit in chartered banks, post office savings banks, etc.; in 1903, there was \$460,950,580. Assets of loan companies grew in the same time from \$8,392,464 to \$162,531,693, and those of chartered banks from \$121,014,395 to \$641,985,372. Immigration returns which in 1871 were 27,773, were in 1903 over 124,000. Railroad mileage was 2,497 in 1871; in 1893 it was 19,834. Canadian shipping likewise has increased from over 13,000,000 tons register in 1871 to 70,700,000 in 1902.

The pamphlet contains statements in detail showing the total trade of Canada, and the trade of Canada with the British

Empire and foreign countries during the fiscal years of 1868, 1878, 1888, 1898 and 1903. A statement of the value of the imports and exports, etc., of the country is also given for each year since confederation.

Canadian Shipping.

(List of shipping issued by the Department of Marine and Fisheries, being a list of vessels on the register books of the Dominion of Canada on the 31st day of December 1902, Ottawa, King's Printer; pages 359; price 25 cents.)

The 12th list of shipping of the Dominion, issued by the Department of Marine and Fisheries, gives the name of each ship, her official number, the port at which she was registered on December 31, 1902, where she was built, the year in which she was built, her dimension and tonnage, and the name of the owner or managing owner.

The total number of vessels on the registry books of the Dominion of December 31, 1902, was 6,836, measuring 652,613 tons registered tonnage, an increase of 44 vessels and a decrease of 11,870 tons registered tonnage as compared with 1901. The number of steamers on the same date was 2,289 with a gross tonnage of 303,353 tons. At an average value of \$30.00 per ton, the value of the registered tonnage in Canada on December 31, last was \$19,578,390.

There were 316 new vessels, measuring 30,216 tons register, built and registered in the Dominion of Canada during 1902. At a valuation of \$45.00 per ton, this gives a total of \$1,359,720 for new vessels.

Canadian Insurance.

(Report of the Superintendent of Insurance of the Dominion of Canada for the year ended December 31, 1902; Ottawa, King's Printer; price 45c.)

According to this report the business of fire insurance in Canada in 1902 was carried on by thirty-eight companies, of which nine were Canadian, twenty-one British and eight American. Inland Marine insurance was transacted by two Canadian and two

American companies, and ocean marine insurance by two Canadian companies.

The year was a prosperous one for the companies, the amount of cash received for fire premiums being \$10,577,084, or \$926,736 greater than in 1901 while the amount paid for losses was \$4,152,289, or \$2,622,667 less than that paid in 1901. The gross amount of policies new and renewed taken during the year was \$92,049,886 or over \$70,000,000 greater than the amount taken in 1901. The amount of increased risks taken in 1902 was \$44,251,814 among Canadian Companies, \$14,500,593 among British Companies and \$11,724,625 among American Companies. Premiums received on Inland Marine amounted to \$515,222, the year being less favourable than 1901.

The total amount of life insurance policies taken during the year was \$80,552,966, which exceeds the amount taken in 1901 by \$6,653,738. The Canadian Companies show an increase in 1902 of \$7,583,420 as against a decrease of \$247,202 in 1901. The total life insurance in force was \$508,812,305, an increase of over \$45,000,000.

BRITISH REPORTS.

Slavery and Free Labour in British East Africa.

(Report on Slavery and free labour in British East Africa Protectorate; London, Eyre and Spottiswoode; pages 9, price 1½d.)

The question of native conditions, slavery and free trade in the East Africa Protectorate, which are dealt with in this report, are said to be difficult of statement owing to the largeness of the area and the varying conditions of climate and race, and the degree of civilization of the inhabitants being influenced largely by the proximity of the sea and the Uganda Railway. Slavery prevails only in the dominions of the Sultan of Zanzibar, a strip of limited length and only ten miles broad along the coast. The number of slaves, also, is said to be rapidly diminishing, and they are generally well

treated, especially those engaged in domestic service. It is recommended as better in every way to await patiently the collapse of this institution "so repugnant in principle of English ideas, so little injurious in practice to its supposed victims."

The character of the free labour in East Africa is discussed at some length in the report. There is no surplus labouring population in East Africa, though the supply for internal developments is increasing, and it is hoped "that a few years will witness the initiation of some of those greater agricultural and industrial enterprises for which this protectorate is so eminently fitted, and the attainment of that most desirable of objects, the exploitation of the natural resources of the country by the voluntary labour of its inhabitants."

Ankylostomiasis in Germany.

(Reports of the outbreak in the Westphalian Colliery district in Germany; London Eyre and Spottiswoode, pages 23, price 8½d.)

The epidemic of Ankylostomiasis has already been introduced from tropical countries into Cornish mines, and the risk of it spreading to the British Collieries unless effectual means are taken for improving the sanitary conditions under ground is stated as the reason for the publication by the British Home Department of the reports contained in this volume. The reports were originally supplied to the British Consul-General at Dusseldorf.

The disease was in Germany pretty well under control in 1899, since when, however, the number of cases have suddenly and rapidly increased to the extent of an epidemic, a circumstance chiefly attributed by German Government mining authorities to the more extensive application of water sprays in the fiery mines under Government regulation with the object of obviating the danger of explosions of fire damp and coal dust. Thus far, according to the report, it is the pitman only who suffered from the

plague. A reliable disinfectant has not yet been discovered.

The essential measures necessary for preventing the spread of this disease are summed up in the following passage from the report.

"The spread of *Ankylostomiasis*, as appears from the life history of the parasite, depends entirely on contact with material which has been polluted by human faeces (from an infected person) and remained for a sufficient time under such conditions of temperature, moisture, etc., that the ova contained in the faeces have developed. . . It is evident that the spread of the disease may be entirely checked by preventing the pollution of mines by human excrement. Unless this is effected, as it certainly can be, the disease will probably spread gradually throughout the mines of England wherever the temperature and moisture are favourable to the growth of the larvae."

UNITED STATES REPORT.

Industrial Statistics of Indiana.

Ninth Biennial Report of the Indiana Department of Statistics for 1901-'02; Indianapolis State Printer, 891 pages.

The report of the Indiana Bureau of Statistics for 1901-'02 contains tables and conclusions drawn from the same relating to the principal industries of the State, namely, manufactures, mines, quarries and agriculture. The labour problem as relating to the same is also discussed. There are also tables relating to county, township, city and town administration, together with a brief discussion of the various social and economic problems connected therewith. Industrial conditions are generally stated as very favourable with a large growth in the output of manufactures and of agricultural products.

RECENT LEGAL DECISIONS AFFECTING LABOUR.

The following synopsis of cases affecting labour are taken from the latest law reports and other legal records of the different provinces of Canada :—

QUEBEC CASES.

Verdict for \$10,000.00.

T. was employed by the Grand Trunk Railway Company as a conductor of a freight train. In the course of his employment an accident occurred that caused his death. His widow, both on behalf of herself and for the minor children, brought an action against the company for \$20,000.00 damages. She alleged that, on the 31st December, 1902, while acting as conductor on one of the company's freight trains, T. arrived at the company's station at St. Lambert and, having received instructions that the Victoria Bridge was clear, proceeded to cross to the Montreal side; that when approaching the Montreal side, the semaphore was set at danger, requiring the engin-

eer of the train to stop, which was done; that the passing of T's train across the preceding signal points on the bridge had caused the same to move automatically and to show a red disc, this indicating to engineers of later trains that they must stop until the train ahead had crossed the bridge; that while T's train was thus detained, another train coming from behind collided with the rear van of T's train killing T.

Upon these alleged facts, it was claimed that the accident was caused by the fault and neglect of the Railway Company and its employees, because the train causing the collision had disregarded the rules of the company and had gone on over the bridge despite the signals displayed; that the company had failed to employ on the rear train proper and effective brakes; that the engineer of the rear train was guilty of negligence in disregarding the signals and follow-

ing the forward train at a rapid rate of speed; and that, moreover, at the time of the accident, the engineer of the rear train was in an overworked condition.

The Railway Company denied the allegations made by the widow, and claimed that neither she nor her children could in any event recover anything on account of T's death, because for a number of year previous to his decease, he had been a member of the Grand Trunk Railway Insurance and Provident Society and had subscribed to its rules.

It was admitted that at the time of his death, T. was earning about \$100.00 per month, that he was in good health and the sole support of his wife and their children.

The action was tried before a jury which brought in a verdict stating that the widow and children had suffered damages to the extent of \$10,000, and also that at the time of his death that T. had been a member of the Grand Trunk Railway Insurance and Provident Society and had subscribed to its rules.

Both parties moved for judgment in accordance with this verdict, but the Trial Judge reserved for the decision of a Court of Review the question as to in whose favour this verdict was, stating that the solution of the same depended upon the effect of the rules of the Grand Trunk Railway Insurance and Provident Society.

(*Leahey v. The Grand Trunk Railway Insurance & Provident Society*. Action tried at Montreal, June, 1903.)

A judgment awarding damages reversed.

A. was employed by the Canadian Pacific Railway Co. to do ordinary work on part of its road. In the course of his employment he was one day directed by the foreman in charge to drive in certain spikes. While so doing he failed to hit one of the

spikes squarely on the head, and, as a result, it flew away, striking him on the leg, and inflicting a wound, which, though at first not considered serious, rapidly grew worse, and death following from blood poisoning about ten days later.

A.'s mother sued the Company for \$1,999 damages, alleging that her son's death was caused by its negligence, both because the spikes which he had been ordered to drive in were old and unfit for use, and also upon the ground that the work of spike-driving requires special skill, being dangerous to a person inexperienced therein, and that the foreman knew that A. was not competent to do such work.

Upon the evidence given at the trial the court came to the conclusion that spike-driving was a work that required special skill, and that it was dangerous employment for a person who had had no experience in the same. It was also pointed out in the judgment that, although the mother had no right to any particular share of the son's wages, yet she was legally entitled to support according to her son's ability to supply the same. Therefore, as she was 77 years of age, the ordinary expectation of life was 6 or 7 years, the court consequently awarded her \$600 damages.*

The Company appealed and the majority of the judges of the Court of Appeal came to the conclusion that the work of spike-driving was not dangerous, and that the injury in question was purely accidental, and one for which A.'s employers could not in any way be held responsible.

The judgment of the Court below was therefore reversed, and the action was dismissed.

(*Sparano vs. The Canadian Pacific Railway Company*. Judgment given by Court of appeal at Montreal, June 1903.)

* See The Labour Gazette (April 1903, p. 813.)

ONTARIO CASES.

Alleged defects in machinery..

T. met with an accident while employed by C. He subsequently brought an action for damages against the latter on the ground that the accident was caused by the defective machinery used in C.'s sawmill.

The following extract from the judgment given at the trial contains the facts and the result of the litigation.

"Plaintiff was employed as a general labourer, with the particular duty of keeping the boiler supplied with fuel. Among the machinery in the mill was a circular rip saw fixed in a table. This saw was operated by a belt connecting a man drill on the saw shaft, and on the counter-shaft was a split pulley, one-half slack and the other fixed, and this was connected by a belt with a pulley on the main shaft. On June 6, 1901, while plaintiff was attempting to rip a strip off a piece of board about six inches wide by two and a half feet long, his left hand came in contact with the saw, resulting in the loss of two fingers. The plaintiff alleged as defects in the machinery, the absence of a guard or hood over the saw; that the belt connecting the counter-shaft with the main shaft did not fit properly; and the absence of guide to prevent the belt slipping from the tight to the loose pulley and vice versa. A guard or hood enclosing the upper part of the saw was not practicable without great inconvenience and delay in operating the saw. The guide described in the evidence as a "strap guide" was not a necessary and reasonable device that defendants were bound to attach. The slipping of the belt did not endanger the operator, assuming that he possessed ordinary knowledge and skill in using the saw, and it did not in fact induce plaintiff's injury.

But, even if these defects were proved, Plaintiff must fail on the ground of contri-

butory negligence. He was not employed to operate the saw and was not experienced at that work; his attempt to operate it on this occasion was purely voluntary though he had not been forbidden to use it; he should have used the guide or fence, instead of attempting to guide the board with his left hand: trying to saw a short and narrow piece of board without the guide was an unskillful and careless act, and was the proximate cause of his misfortune, which could have been avoided by the exercise of ordinary care on his part. The action was therefore dismissed with costs.

(*Taylor vs Conlon*—Judgment given by Mr. Justice Teetzel at Toronto, 31 July, 1903).

Employee fined for leaving his Employer.

S. hired L. in Toronto to work for him in Bradford, and as L. had no money, S., at his request, paid for railway ticket to Bradford. After his arrival there, L. worked for S. for a few hours but did not do sufficient to repay him for the money so spent; and he then refused to do any further work and left S.'s employment.

S. subsequently had a warrant issued against L. on the ground that he accepted the sum of \$1.30 to pay his fare to Bradford on condition that the amount was to be worked out, and that L. had refused to do sufficient work to recompense him for that outlay. The information upon which the warrant was issued was under "The Masters and Servants Act," 1901.

The Magistrate before whom the matter was tried fined L. \$5.00 and directed that he should also pay the costs, or that in default he should be imprisoned for 10 days.

An appeal which was taken from this conviction was not allowed.

(*Rex vs Lewis*—Judgment given by the Divisional Court at Toronto, April 4, 1903.)

THE LABOUR GAZETTE

THE JOURNAL OF THE DEPARTMENT OF LABOUR

Vol. IV—No. 4.

OCTOBER, 1903

Price Three Cents

The LABOUR GAZETTE wishes to draw the attention of its readers to the fact that, while every care will be taken to have information as complete and impartial as possible, it does not in its accounts of proceedings, abstracts of reports, legal decisions, quotations, or other records of matters of concern to labour, necessarily endorse any of the views or opinions which may be expressed therein.

DEPARTMENT OF LABOUR, CANADA,

OTTAWA, October 15, 1903.

Most of the special articles in the present issue of the *Labour Gazette*, as will be seen from the table of contents, relate to reports of annual conventions of various labour and other associations which were held during the month just past. The most important of these from the point of view of labour were the conventions of the Dominion Trades and Labour Congress and of the National Trades and Labour Congress of Canada, held respectively at Brockville, Ont., and at Quebec, Que., and the annual meeting of the Canadian Manufacturers' Association held at Toronto, Ont., at which the condition of the labour market in Canada was made the subject of very prominent discussion. A brief reference to the recent meeting of the Trades and Labour Congress of Great Britain is also inserted as the parallel proceedings of the central labour body of the United Kingdom.

Other conventions of the month to which special reports are devoted were the Union

of Canadian Municipalities and the conference of Charities and Correction, both held at Ottawa.

The series of tables illustrative of cost of living in Canada is omitted from the present issue, but will be continued in the November number with statistics relating to rentals in the several provinces.

The special article devoted to the colonization and immigration movement in the present issue is somewhat longer than usual owing to the incorporation of matter relating to the outlook for settlement in the northern portions of Ontario. The reviews of reports of departments and bureaus are also somewhat longer than usual, prominent among them being references to the workings of the amended arbitration law of New Zealand and to the reports of the Moseley Commission of investigation by representative British workmen into industrial conditions in the United States.

The mutual benefit association recently organized by the Montreal Street Railway Company after negotiations with its employees is reviewed at some length, and a general idea given of the more important features of its constitution and by-laws.

It will be seen that, as announced in the September *Gazette*, publication is begun in the present issue of a special monthly article dealing with changes in the rates of wages and hours of labour reported to the department. The article consists, as in the case of the review of trade disputes given monthly, of a table accompanied by matter in the way of further statement and explanation.

INDUSTRIAL AND LABOUR CONDITIONS DURING THE MONTH OF SEPTEMBER.

I.—GENERAL SUMMARY.

THE month of September showed on the whole a continuance of conditions of activity and prosperity in the labour market of Canada, employment being in almost all branches plentiful and labour in many important departments, more particularly unskilled labour and in the agricultural and lumbering industries, being scarce. The approaching close of the season of out-of-door employment was largely accountable for the latter feature, though the trades affected only indirectly by seasonal changes were scarcely less busy. This general activity, moreover, was not confined to any particular province, though the province of Manitoba and the North-west Territories, owing to the work of harvesting and transporting the grain crops, reported exceptionally busy conditions. In British Columbia, also, owing to the cessation of labour disturbances and the renewed activity in the general mining market, conditions showed more evidences of industrial prosperity than for some time past.

Wages throughout the Dominion have remained steady, with an upward tendency in the branches more particularly marked by scarcity of labour. In the strike situation of the month no new developments were reported, the chief disturbing influences in existence being those surviving from the disputes occurring earlier in the season.

With regard to the cost of living, a noteworthy development of the month was an increase in the price of bread and flour at a number of points, notably at Brantford, Hamilton, Pembroke, Ottawa, Ont., Montreal, Que., and other centres. Rents also in several localities showed an upward tendency, a marked famine in houses, and especially in workmen's dwellings, being reported from the city of Toronto.

Interruption to Industry at Sault Ste. Marie.

One of the most widely discussed industrial events of the month, though the general industrial situation was but little affected thereby, was the serious interruption to industry which occurred at Sault Ste. Marie on September 18, when the Consolidated Lake Superior Company was forced to suspend operations. The most important industries involved were the construction and operation of the Algoma Central Railway, the mining and smelting of iron ore, the production of wood pulp and the manufacture of steel rails, though the aggregate number of industries carried on by the company was much higher. The effects of the close down were serious locally, some 3,500 men, about 1,500 of whom were woodsmen, being thrown out of employment. The interruption of the earning capacity of so large a body of men had also the additional effect of depressing retail trade throughout the locality. The fact, moreover, that the company at the time of the close down was owing in the neighbourhood of \$200,000 in arrears of wages as well, in some cases dating over a period of months, added to the seriousness of this aspect of the situation.

The immediate cause of the close down, as reported in the press, was the falling due on July 1, of a mortgage of \$5,050,000 held by Speyer & Co., bankers, New York, which the directors were unable to meet. Prior liens of underlying bonds added some \$4,600,000 to this sum, so that the total indebtedness of the company was variously estimated between \$10,000,000 and \$11,000,000. More remote causes of the embarrassment of the company were stated to be the expensive investments made, delays experienced in completing plants, failure in raw

material, and the attempt to pay dividends on the heavy capitalization of the company. This latter is authorized at \$117,000,000, of which \$72,286,200 of common stock and \$27,400,000 of preferred stock have been issued. The total capital invested in lands, mines, plants, railways, &c., is stated to be in the neighbourhood of \$30,000,000.

Employees of Industries Involved.

The following extract from the statement handed to the press by the assistant to the President of the Consolidated Company on September 18, the day of the close down, will show the nature and extent of the industries involved in the shut-down:—

President Shields, on account of not having funds to meet the pay roll and current accounts and no immediate prospects of securing money to meet them, is unwilling to proceed longer incurring liabilities on account of its officers, men or other creditors, and consequently to-day has suspended all operations whatsoever except the Tagona Water and Light Company and street railway service in the Canadian Soo and the ferry service, and the street railway service in the American Soo. But one train per week shall be run on the Algoma Central Railway between the Soo and end of track, or about 60 miles.

This means that 3,500 men will be thrown out of employment.

The Helen Ore mine, employing 300 men; the Grace gold mine, employing 70 men; the Michipicoten branch of the railway, employing 50 men; veneer mill at the Soo, Ont., employing 75 men; the saw mill at the Soo, Ont., employing 100 men; the car shops at the Soo, Ont., employing 20 men; the Algoma Iron Works at the Soo, Ont., employing 100 men; the sulphite pulp mill at the Soo, Ont., employing 100 men; the ground wood pulp mill at the Soo, Ont., employing 100 men; the Gertrude nickel mine at Sudbury, employing 80 men; the reduction works at the Soo, Ont., employing 40 men; the paper mill at the Soo, Mich., employing 20 men; the Michigan Lake Superior Power Company at the Soo, Mich., employing 50 men; the Pine Veneer, Log Pulp, Log Charcoal Co., operating along the line of the Algoma Central Railway, employing 1,700 men; the retort plant at the Soo, Ont., employing 90 men, and the Algoma steel plant at the Soo, Ont., employing 150 men, will be absolutely closed down to-day, leaving at each operation simply one caretaker in the day time and two watchmen at night to protect the property.

The general office staff and the Algoma Central main line staff will be reduced proportionately, the probability being that no more than 15 of the entire staff of 300 men will be retained.

Protection of Employees by Ontario Government.

At the time of the close-down of the works it was stated by the company that the men would receive the arrears of wages due them on the 28th of the month. Prior to that

date, however, a good deal of uneasiness was felt among the employees, the numbers of which were being daily augmented by arrivals from the woods and outlying works of the company, owing to the exhaustion of supplies in the camps. Mass meetings were held at different times to discuss the situation and on September 22 a resolution was passed by the men demanding that the Ontario Government bring influence to bear on the embarrassed company to induce them to pay the wages owing to their men. It was further asked that a fortnightly system of payment should in future be made obligatory upon all companies. In reply to this resolution which was duly forwarded to the Provincial Government, a statement was, on September 25, handed out by the Premier of the province, acknowledging the receipt of the memorial from the workmen, and defining the practice of the Government in cases where subsidies to railway companies have been granted. This, it was stated, was to withhold such subsidies until the workmen and all others who supplied material for the construction of the railway were fully paid. The rule had been enforced last year in connection with the Canada Central Railway, and, some years previously, in connection with a short railway constructed through the County of Prescott. In reference to the Algoma Central Railway the statement was as follows:

In the Algoma Central Act an appropriation of 7,400 acres per mile has been made for the construction of the railway, but the final disposition of the land grant was dependent upon the carrying out by the syndicate of various other works, such as the erection of smelters, pulp works, and shipping facilities between Sault Ste. Marie and the chief ports on Lake Huron. About 80 miles of the Algoma Central Railway have been completed, and the syndicate therefore would be entitled to about 600,000 acres of land, providing the conditions of the land grant were fulfilled.

Following out the policy of the Government with regard to other appropriations, the decision has been arrived at that the land grant should be withheld until the wages due and payable to the workmen in all the enterprises associated with the railway are paid. Instructions have been issued by the Government to communicate with the Workmen's Committee at the Sault to this effect.

On the 28th of the month, failing payment of wages by the company (though a

plan, which, it was stated, had the endorsement and promise of support of the Premier of Canada and the Premier of Ontario, was expected to produce the necessary money within thirty days), rioting ensued at which some damage to property was committed and a few men injured. The local militia was accordingly called out and some troops forwarded from Toronto. At the close of the month order had been restored, the situation in other respects remaining practically unchanged.

Conditions in the Industries.

Conditions in the leading industries of the Dominion during the month were as follows:

Agriculture.

From all provinces of the Dominion satisfactory reports were received as to returns in the season's agricultural operations. Interest naturally centred in this connection on the province of Manitoba and the North-west Territories, from which official reports received in the opening days of the month were uniformly of increased yields expected in the various crops. Cutting was successfully proceeded with, though intermittent wet and cold weather somewhat retarded ripening and prevented stock from drying rapidly in some localities for threshing purposes. The chief damage from weather conditions in Western Canada, however, was reported on September 12, when a rain storm over a wide area developed into a snow storm with high winds, from which a serious loss was at first expected. It was subsequently found, however, that much less damage had resulted than was at first anticipated (*) and throughout the balance of the month, with the continuance of favourable weather a decidedly hopeful tone as to the season's yield was on all hands in evidence.

On the whole the situation in the labour market in the West was reported as having been well met.

In Ontario, (*) Quebec and Nova Scotia, the yield of agricultural products was reported up to the average, reports of diminished yields in particular crops, as of potatoes in certain districts in Quebec, being few, and confined to limited areas.

In connection with the estimated shortage in the world's available wheat supply, a profitable return for the year's operations in Canada is considered assured.

The various fall fairs held throughout Canada were unprecedentedly successful, being well attended and reporting exceptionally attractive exhibits.

Fishing.

Reports of the month relating to the fishing industry were not wholly of a satisfactory nature. The salmon pack in British Columbia has been a failure, totalling somewhat less than 200,000 cases, as against 327,000 cases in 1902, 990,252 in 1901, and 527,396 in 1900. On the Atlantic coast small catches were reported in some localities as the result of the season's operations, both by the deep sea and shore fishermen. The oyster season opened, however, with fair catches in Prince Edward Island, and in Nova Scotia good catches of mackerel were reported from several localities. The lobster season closed with results about normal.

Lumbering.

In eastern and central Canada general activity prevailed, there being a marked scarcity, owing to the prosperity of general industry, in the number of men available for work in the shanties. Wages accordingly ruled high. The mills were, for the most part, busy, though in some quarters the last

* See reports of Winnipeg and Brandon correspondents in present issue of the *Gazette*.

* See reports of Kingston and other correspondents in the present issue.

rafts have been received. In British Columbia dulness prevailed in the logging camps owing to the overstocking of the market referred to in the *Gazette* for September. Men in the mills, however, were generally well employed. Lumber prices remained firm throughout the month, with a tendency on the whole towards higher levels owing to the shortage of supply in certain localities.

Mining.

The continuance of renewed activity in British Columbia was perhaps the noteworthy feature in the mining industry in Canada during September.* Labour in consequence was in many localities scarce and commanded high wages, especially throughout the Kootenay districts. From the Crow's Nest Pass Company's fields reports were received of important extensions to plant, it being announced as the intention of the company to add 500 coke ovens to the 636 already in operation. This will involve an expenditure in the neighbourhood of \$500,000 and will bring the number of ovens operated by the company up to 462 at Michel, 424 at Fernie and 250 at Morrissey. The new ovens, it is expected, will be ready to fire in a couple of months. Extensive increases in output are also contemplated, the capacity of the mines at present being stated to be well over 3,000 tons a day. In quartz mining also throughout British Columbia an improved tone was evident, notably in the silver lead mines of the Boundary District. In Nova Scotia active conditions continued in the coal mines.

Manufacturing.

The manufacturing industry was on the whole very active throughout Canada, factories, with few exceptions, running to their full capacity throughout the month. Canadian cotton mills in particular, owing to having good supplies on hand before the

recent rise in the price of raw material, are, as compared with the industry in other countries, reported in a particularly satisfactory condition.

Dominion Steel and Coal Companies.

In connection with the manufacturing and mining industries, and before referring to conditions in the trades, mention may be made as an occurrence of considerable industrial importance, to a special meeting of the Dominion Iron and Steel and the Dominion Coal Companies, pertaining to the abrogation of the lease of the latter to the former, which was held on Friday, September 25. Many conditions in the lease, it is understood, have proved unsatisfactory. A statement of the former company, issued prior to the meeting, refers to the heavy expenditure on the coal property, especially in the way of development work, amounting, up to July 31, to \$1,682,000. The falling-off in the earnings during the summer were also commented on, being chiefly attributed to the fire in No. 1, and also to the fact that the requirements of the steel company's business had rendered it less able financially to meet the capital expenditure necessary to the coal business. The report says :

This plant requires for its completion considerable capital expenditure; its most urgent needs at present being the completion of the finishing mills, and the construction of a good coal-washing plant. Without the finishing mill, the plant is not balanced; it does not carry forward the manufacture of its products to a point which will enable the company to market them profitably. The washing plant is essential to economical operation of the blast furnace. Careful estimates show that the money which on completion of the present negotiations will be available for construction purposes will suffice for the above requirements. It will provide for a rod and billet mill, for the washing plant, for the additional mills necessary to work up the balance of the output, and for the expenditure necessary to put the plant in good condition throughout.

Touching upon the question of a new coal contract, the document states :

The period of the contract and the price of coal are as provided in the lease, that is, the contract runs until 1992, and the price is fixed until 1909 at \$1.24 per ton. At that time, and at the end of each five years thereafter the price may be readjusted on the same principle as in the original contract, the cost of mining being the basis for settlement and the present price \$1.24 being used as a minimum.

* See reports of Rossland and Nanaimo correspondents in the present issue of the *Gazette*.

Under the new contract, all the coal will be supplied that the present plant will require. The quality of the coal shall be of the grade known as the "run of mine" for the first four years, after which slack coal may be supplied, provided it is found equally suitable.

In a second statement published by the steel company it is stated that in connection with its operations under the coal lease the company has paid or become liable for \$2,725,346.91.

A circular issued to the shareholders of the Dominion Coal Company covered very much the same ground as that above referred to, in rehearsing the development which led to the cancellation of the lease held by the Dominion Steel Company and the modification in the coal supply contract.

Activity in the Trades.

Among the several trades, activity as above stated prevailed throughout September, the building and metal groups taking the lead as during the earlier months of the present season. In the former trade out-of-door work is in some localities approaching an end, and in one or two cases dulness among *bricklayers* and *masons* is reported by the *Gazette* correspondents. At many other points, however, exceptional activity still prevails, especially among *carpenters*, *lathers* and *plasterers*.

The season on the whole has been characterized by exceptionally extensive building operations. Thus in Montreal during the eight months ended August 31, more building was done by 28 per cent than during the entire previous year, the total value of building operations for which permits were taken out in 1902 being \$2,664,147, whereas on September 1 of the present year the amount was \$3,419,419. In April alone permits in Montreal were issued amounting to \$1,103,590.

Among the trades rendered exceptionally busy during September may be mentioned *coopers*, on account of the demand for barrels required for the marketing of the fruit crop and other purposes.

Transportation.

Activity in transportation was general throughout the month in Canada, the movement of freight being heavy, and the continuance of the excursion season swelling returns from the passenger traffic. The movement of western grain was begun under favourable weather conditions, and with the improvements in equipment which have been carried out by the railway companies during the present year fears of a serious blockade, under favourable weather conditions, are not entertained as in previous years, though a shortage of cars was complained of at several points in Eastern Canada.

The question of elevator and grain freight rates was considerably discussed during the month.

The extension of the terms upon which it is proposed to grant a subsidy for a direct steamship service to France was given by the Honourable the Premier in the House of Commons on September 8.

The annual reports of the Canadian Pacific, the Canada Atlantic Co., and other railway companies of the month showed very satisfactory years.

Western Grain Movement.

In connection with the problem of grain shipment in Western Canada during the present season, the following returns, furnished by the Dominion grain inspector stationed at Winnipeg for the year ending September 1, 1903, will be of interest :

| | Bushels. |
|----------------------|------------|
| Wheat inspected..... | 51,833,000 |
| Oats..... | 3,054,000 |
| Barley..... | 565,200 |
| Flax..... | 655,000 |
| Speltz..... | 10,000 |
| Total..... | 56,117,200 |

Of the wheat inspected 42 per cent was No. 1 hard, and 28 per cent No. 1 Northern, the remaining 30 per cent being scattered over the other grades.

The source of the above shipments is shown in the following table:—

| Grain. | From Manitoba. | From Territories. |
|--------------|-------------------|----------------------|
| Wheat | 41,293,000 | 10,540,000 |
| Oats | 2,785,500 | 268,500 |
| Barley | 561,600 | 3,600 |
| Flax | 532,000 | 123,000 |
| Total..... | 45,182,100 | 10,935,100 |

The destination for which this grain was intended was as follows:—

ON CANADIAN PACIFIC RAILWAY.

| | Cars. |
|---|--------|
| For Fort William | 32,650 |
| For Winnipeg..... | 7,601 |
| For all-rail | 2,218 |
| For Duluth via Great Northern Rail- way..... | 2 |
| For Duluth via Soo Line..... | 269 |
| For Minneapolis via Soo Line..... | 291 |
| For Minneapolis via Great Northern. | 40 |
| For Vancouver..... | 202 |
| Total..... | 43,333 |

ON CANADIAN NORTHERN RAILWAY.

| | Cars. |
|-----------------------|--------|
| For Port Arthur .. . | 9,755 |
| For Duluth..... | 1,310 |
| For Minneapolis | 514 |
| For Seattle..... | 93 |
| Total..... | 11,672 |

In these tables a car is estimated for the past season as containing on the average 60,000 pounds of grain, or 1,000 bushels of wheat.

The returns of receipts at Fort William and Port Arthur for the crop year ended August 31 were as follows:—

| | Bushels. |
|-------------|------------|
| Wheat..... | 41,237,823 |
| Oats..... | 1,608,963 |
| Barley..... | 345,928 |
| Flax..... | 161,817 |

The difference between the above figures and those given for grain inspected at Winnipeg is accounted for by the amount milled and consumed locally, and the amount shipped during the past winter by the all-rail route. The amount of shipments for the year from Fort William compared with

the above shows that on August 31 the elevators were very nearly empty.

As a further index to the activity of transport during September, reference may be made to returns received from the Sault Ste. Marie canals and from the port of Montreal as follows:—

Traffic at Sault Ste. Marie.

The official report of traffic on the canals at Sault Ste. Marie for August gives a total of 4,241,683 tons eastbound, and 1,162,128 westbound. The total number of crafts passing through the Canadian canal was 644, with a registered tonnage of 722,456 net tons. The record of grain other than wheat passing through the canal eastbound was 607,149 bushels, while the number of net tons of iron ore was 575,065. The Canadian canal also carried 1,156,724 bushels of wheat and 7,857 M. feet board measure of lumber. Of general merchandise 6,389 net tons passed through the Canadian canal. In westbound traffic there were 25,000 tons of hard coal and 137,762 tons of soft coal, with 21,352 net tons of merchandise, through the Canadian canal. The record of passengers through both canals was 7,707 going west and 7,618 going east.

Montreal Port Returns.

The number of sea-going vessels arriving at Montreal up to September 1 was 511 vessels, having a tonnage of 1,196,219 tons, as compared with 485 with 962,217 tons tonnage last year. The number of inland vessels arriving during the same period was 6,560, with a tonnage of 1,144,720 tons. The revenues of the port show a corresponding increase, receipts to September 1 being \$174,473, as compared with \$149,021 last year. With regard to shipments from the port there has been a very decided increase in wheat, corn, rye, cheese and cattle, attributed mainly to the low rates which are now quoted at Montreal as compared with the Atlantic ports of the United States, cheap lake rates being considered largely respon-

sible for the increase of business and having led to an agitation among the shippers of export grain in New York, Philadelphia and Baltimore for a reduction of freight rates by the trunk lines of the United States. From the opening of navigation to September 1 the shipment of wheat from the port of Montreal amounted to 11,065,000 bushels, as compared with 10,647,000 bushels last year. The increase, however, is much more marked in corn shipments which, to the 1st of September this year, amounted, according to the Board of Trade returns, to 4,604,000 bushels, as compared with only 58,000 bushels last year. Next to corn the largest comparative increase on the list was made in cattle, the total being 87,000 head from the opening of navigation to the opening of September, as compared with 47,000 head last year. Before the close of the month this record had passed the 100,000 mark for the first time in the history of the port, the increase being attributed to the fact that cattle from the New England ports of Boston and Portland are shut out from the British ports. Shipments of butter, on the other hand, are considerably behind last year's record, as are also shipments of apples owing to the late harvesting of the latter crop. Cheese, however, has advanced from 1,145,000 boxes a year ago to 1,278,000 boxes this year. The following table gives the shipments from the opening of navigation to the first of September, according to the Board of Trade figures, and also a comparison for the same period last year:

| | 1903. | 1902. |
|---------------------------|------------|------------|
| Wheat..... | 11,065,290 | 10,647,146 |
| Corn..... | 4,604,293 | 58,150 |
| Oats..... | 665,140 | 713,132 |
| Barley..... | 258,668 | 82,067 |
| Rye..... | 557,615 | 378,629 |
| Butter..... | 138,490 | 248,706 |
| Cheese..... | 1,278,531 | 1,145,594 |
| Meats..... | 74,540 | 63,128 |
| Cattle..... | 87,084 | 40,201 |
| Apples (to Sept. 16)..... | 31,547 | 36,194 |

Canadian Revenue.

The total revenue of Canada on Consolidated Fund for the month of August was \$6,374,689.02, as compared with \$5,486,360.16 in 1902, a gain of nearly \$900,000. For the fiscal year to date of August 31, the total revenue was \$11,520,992.44, as against \$9,758,947.90 last year. In these returns the most conspicuous gains were recorded under customs receipts, on which account \$3,988,936.37 was received during August, 1903, or over \$600,000 more than the corresponding period of last year. Expenditures in August were \$1,448,232.67, as compared with \$2,618,004.17 last year. The fact however that the Auditor General withheld during the month the customary credit of the Departments of the Civil Service was considered responsible largely for the discrepancy in the last mentioned returns. Expenditures on capital account were \$255,489.72 in August as compared with \$505,737.78 last year. Expenditures on public works and railways and canals accounted for \$248,474.75 of this, and some \$8,931.74 was expended on bounties in coal and steel.

As examples of the growth in customs receipts at particular points it may be stated that at Toronto during August collections amounted to \$786,283, or an increase of \$122,181 over the corresponding period of last year. This constituted the largest month on record at the port. An increase of over \$61,000 was reported at Montreal and of \$18,000 in Hamilton. At Vancouver also collections for duty amounted to \$173,111.03, an increase of \$58,910.75.

Canadian Foreign Trade.

The high record reached in the returns of Canadian foreign trade for the past fiscal year has been maintained during the first two months of the present, and the total of imports and exports already shows an increase over last year of \$9,890,192. The exports of domestic produce totalled \$39,-

855,302, a gain of \$3,108,448. For the month of August alone there was a gain of \$487,831 in imports and of \$2,364,814 in exports. In exports of the produce of the mines the gain of about three millions was largely due to exports of gold from the Yukon. Agricultural and manufactured products also show a substantial increase, though decreases are indicated in the produce of the fisheries and in animals and their produce.

A marked increase in exports of butter from the creameries of Manitoba and the North-west Territories during the past few months has been reported.

A complete statement of the foreign trade of Canada for August and for the two months ending August 31, as supplied by courtesy of the Department of Customs, is as follows :—

IMPORTS.

Imperial Trade Returns.

Imports from Canada into England during August amounted to some £3,402,556, while exports from England to Canada reached the total of £652,044. Compared

with the returns for the same period of last year the figures show an increase in corn, cattle, mutton, veal and bacon, while there are slight decreases in flour, cheese and eggs. Imperial Board of Trade returns dealing with trade between the United Kingdom,

Canada and Germany show the value of imports by Germany from Canada in 1902 to have been £472,000, as compared with £370,000 in 1901. Exports from Germany into Canada in 1902 were £1,937,000, as compared with £1,325,000 in 1901. Proportionately, imports by Germany from Canada have grown more rapidly than the exports from Germany.

The value of imports from Canada into the United Kingdom in 1902 was £22,965,000, as against £19,885,000 in 1901. Exports from the United Kingdom to Canada totalled £11,096,000 in 1902, as against £9,250,000 in 1901. The total trade between the United Kingdom and Canada in 1902 amounted to £34,961,000. In 1892, ten years ago, the figures were approximately £13,000,000 less.

Domestic Trade.

The opening of the fall season's trade in Canada was attended by favourable circumstances, orders sent in by wholesalers' representatives attending the fall fairs throughout the country being particularly heavy. Fall millinery openings throughout Canada were reported very successful, and a profitable season's business in general dry goods was practically assured at the end of the month, though the opening weeks were, on the whole, more characterized by activity in the several lines. A sharp advance in cottons, and a similar, though less pronounced, movement in woollen knitted goods were also prominent features of the month in these branches. The prevailing warm weather was a stimulating factor to trade throughout September. Collections, owing largely to the satisfactory harvest, were good. The financial situation, in spite of a prevailing dulness in Canadian securities, was pronounced sound.

A report of the Bank of British North America showed profits for the half-year ending June 30 last amounting to £36,696 6s. 9d. on a capital of £1,000,000. The note circulation of the bank was reported as

constantly extending, rendering necessary a large purchase of Dominion of Canada bonds, the premiums paid on which were written off out of the profits of the last half year. Branches during the year were opened at Toronto Junction, Rosthern and Montreal and sub-branches at Weston, Longueuil and Duck Lake.

It was reported during the month that the rate of interest allowed on bank deposits in Ontario would be advanced to $3\frac{1}{2}$ per cent. At a representative meeting of the banks operating in the province, however, the proposal was negatived.

Meetings of Associations.

The 18th annual meeting of the *Association of Executive Health Officers of Ontario* was opened at Peterborough on September 9. Papers were read relating to epidemics of typhoid fever, small-pox, diphtheria and other contagious diseases.

The *Canadian Wholesale Hardware Dealers' Association* opened its annual convention at Toronto on September 22, with delegates present from all parts of the Dominion. Among the matters discussed was the rise in price of wire rods, as a result of the action of the American Steel and Wire Company, which was stated to be of the nature of a combine, and to have injuriously affected the supply of raw material of Canadian manufacturers.

The 6th annual convention of the *Canadian Horticultural Society* was opened at Toronto on September 8. The president, in his annual address referred to the necessity of paying gardeners better wages, and suggested that the government appoint special appraisers at Montreal and Toronto to expedite the passing of gardeners' goods through customs. The establishment of a Canadian fast Atlantic service was also recommended.

The second annual convention of the *Farmers' Association* was held at Toronto, beginning on September 8. Features of the

meeting were the address of Mr. Goldwin Smith, and the conference held with delegates of the Trades and Labour Council concerning matters of mutual interest. Resolutions were passed protesting against the granting of public money to private enterprises, and against any increase in the tariff. A reduction in freight and passenger rates and the adoption of the principle of equal taxation were also requested. Officers were elected as follows:—Mr. J. Lockie Wilson, Glengarry, president; Mr. L. E. Annis, East York, vice-president; Mr. W. L. Smith, Toronto, secretary-treasurer; Wm. McCrea, Guelph, and Mr. Hyatt, P. E. County, auditors. These officers with Mr. J. F. Beam, Welland, and Major Hood, Guelph, form the executive committee.

Notes of the Month.

Labour Day, occurring on Monday, September 7, was celebrated at several points throughout Canada with demonstrations by the various labour bodies.

At a meeting of the Ottawa Christian Endeavor Union it was decided to take steps to form an employment bureau for the benefit of young people out of employment.

A conference of representatives of agricultural and commercial interests was held in Glasgow, Scotland, with the object of securing the removal of restrictions on the importation of Canadian cattle. The conference decided that the question of the removal of the restrictions should be made a test question at the next Parliamentary elections in Great Britain.

A by-law confirming an agreement between the town council of Orillia and the Dominion Linen Mills Company for the establishment of a *linen mill* and kindred industries was carried on September 21 by a vote of 558 to 14, the chief attraction to the industry being the cheap electric power offered by the municipality from its plant at Ragged Rapids.

It was announced during the month that the *Toronto Railway Company* would spend in the neighbourhood of \$300,000 in increasing its power system. The increases in plant, it was announced, would be made up roughly as follows:—6 new boilers of 600 horse-power each, 2 additional engines with a total capacity of 3,200 horse-power, directly connected with large generators. A large storage battery will also be added.

During September a party of members of the Imperial House of Commons made a tour of the Dominion with the object of investigating industrial and trade conditions. The tour of the delegates of the Chamber of Commerce of the Empire was also continued, and much practical benefit to Canadian development is anticipated therefrom. An excursion to Manitoba and British Columbia, conducted by the Canadian Manufacturers' Association, was also carried out during the closing week of the month.

An event of the month in British Columbia, to which considerable attention was directed, was the first annual distribution of profits by the management of the *British Columbia Electric Railway Company* of Vancouver, New Westminster and other points, to its employees, after an allowance of a reasonable dividend on the capital invested. Employees were made equal sharers in the profit distribution, which amounted this year to \$25 per man, the total amount thus distributed being \$7,500.

The annual report of the chief of the Fire Brigade of Toronto, shows fire losses during 1902, to have amounted to \$423,544.73, compared with \$122,126.53 in 1901. The total insurance paid was \$390,225.73. Losses over insurance paid amounted to \$20,122, and losses with no insurance to \$13,197. The aggregate losses on buildings were \$110,299.21 and on contents, \$313,245.52. Of 798 alarms of fire (of which 120 were false alarms), burning chimneys were the cause in 109 instances, children and

matches in 60 instances, burning rubbish in 29 instances, bon-fires in 14 instances, electric wires in 15 instances, and incendiarism in 14 instances. The total insurance in effect against fire in Toronto during the year was \$2,111,362.

An international congress of *stone workers* was recently held at Zurich, Switzerland, with delegates present from all the countries of Europe except Great Britain, representing in all some 40,000 organized workers in the stone trades. It was resolved to establish an international secretaryship at Zurich, the secretary's duties being defined as the drawing up of quarterly

reports on the movements of stone workers in all countries, the arrangement of subscriptions in support of strikes and the collection and preparation of propositions for protective legislation especially referring to the stone trade in the various countries. Every country was recommended to elect a correspondent and the organizations of every country are requested to publish the notices of the secretary. The entrance fee was placed at 45 francs and the annual subscription at 31 francs for every 1,000 members, though special agreements with Australia and America were approved by the congress. The co-operation of stone workers of all countries was requested.

II.—REPORTS OF LOCAL CORRESPONDENTS.

HALIFAX, N.S., AND DISTRICT.

Mr. F. W. Smith, Correspondent, reports as follows :

GENERAL CONDITION OF THE LABOUR MARKET.

During the past month the general condition of the labour market was very active, and the demand for labour was, on the whole, even greater than the previous month. This in part can be accounted for by the opening of the Provincial Exhibition, which afforded an immense amount of employment. The building trades have been exceptionally active, especially carpenters, while printers and boilermakers have had a splendid month, the latter working night and day. Commerce also shared in the general busy condition of the labour market, and the wholesale and retail trades report a splendid month, some 50,000 people from the surrounding districts having visited the city to attend the exhibition, and a general briskness in the latter branches having ensued as a result. The labour market has been free from unrest, and the chief topic in labour circles is the proposed formation of a Building Trades Council.

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—The splendid weather of the past month has done much to bring about a satisfactory condition in the agricultural industry, and the general failure of this industry which was feared from the unfavourable and disappointing spring, has given way to a healthy and prolific condition.

Fishing.—This branch, too, has been active during the past month, and while no unusual stir was manifest in the general condition, the catch of mackerel has been great, and a good price received, some catches being sold at 10c. each.

Mining.—This important branch throughout the district continues to enjoy great activity.

Railroad construction.—This branch also continues to be active, and affords a large amount of employment.

CONDITION OF PARTICULAR TRADES.

Building trades.—Bricklayers and masons are busy. Carpenters are enjoying a splendid season. Lathers and plasterers are

normally busy. Painters are busy. Plumbers report work plentiful. Stonecutters are also busy, while builders' labourers report work very good.

Metal, engineering and shipbuilding trades.—Iron moulders are busy. Machinists are quite active. Electrical workers have had a busy month. Blacksmiths report work normal. Boilermakers are very busy.

Woodworking and furnishing trades.—Woodworkers and upholsterers report work fair. Carriage and wagon makers are fairly active. Coopers report work normal.

Printing and allied trades.—Printers have had a very busy month. Pressmen were also busy.

Miscellaneous.—Barbers, clerks, and hotel employees have been very active, while delivery employees also have had a splendid month.

Transport.—All branches of railroad and locomotive employees have been very busy, while teamsters have shared in the activity.

Unskilled labour.—Unskilled labour was much in demand.

SYDNEY, N.S., AND DISTRICT.

Mr. John Moffatt, Correspondent, reports as follows :—

GENERAL CONDITION OF THE LABOUR MARKET.

Labour has been fully employed during the month, and the continued abundant supply is only equal to the demand for labour. Glace Bay, after putting in a water and sewerage system, is finishing the streets with bitulithic pavement. Shipping is active. Coal in great quantities is being shipped to other parts of the Dominion, and iron ore and limestone are being brought in from Belle Isle and Marble Mountain. Wholesale and retail trade is good. The retail clerks, members of the Provincial Workmen's Association, issued a manifesto to the purchasing public and merchants calling for a 60 hour week, to be divided as best

suits the mercantile business. A certain amount of overtime will be permitted.

CONDITION OF LOCAL INDUSTRIES.

Fishing.—The lobster season is over, with fair results for the fishermen and factories.

Mining.—Every colliery in the district is busy day and night to supply the demand for coal. A New York company is opening quarries in the plaster mountains of St. Ann's. The whole output of the quarries will be shipped to the United States. A short railway and a pier will be built to facilitate the plaster shipments. The pier will be fitted up with pockets to hold at least 2,000 tons for the ready loading of vessels carrying from 1,500 to 2,000 tons.

CONDITION OF PARTICULAR TRADES.

Printing and allied trades.—Printers are busy.

Clothing trades.—The advent of winter has increased business in the various branches of the clothing trade.

Transport.—Those engaged in the transportation business report trade better than it was during the summer. The Sydney boom arising from the construction of the Dominion Iron and Steel plant, and the Nova Scotia Steel plant has passed, and labour is settling down to normal conditions. The material for these plants and house building affected transportation workers, and caused them to work much overtime. Congested traffic on the railway is not known now.

Unskilled labour.—Unskilled labour is always in demand. Much of it comes from Newfoundland.

CHARLOTTETOWN, P.E.I., AND DISTRICT.

Mr. F. J. Nash, Correspondent, reports as follows :—

GENERAL CONDITION OF THE LABOUR MARKET.

The labour market during September developed little change from August, demand

and supply being well balanced. In Charlottetown the building of the new market house kept about forty men employed, while the annex to the City Hospital and St. Dunstan's College, as well as a number of private residences, kept all the carpenters busy. A new packing house was started in the building formerly used as a furniture factory and closed down last month. Building operations continued fairly brisk throughout the country, the farmers having had a prosperous year and putting a share of their money in improving their dwellings and enlarging their barns. Commercial activity was greater this month than last and the city merchants report retail trade better.

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—The annual fair held during this month indicated that the fruit crop is late maturing and that the quantity will be less than last year. Roots and vegetables were fully up to an average yield. The harvest is late, owing to cold, wet weather, and even at the last of the month a considerable quantity of grain remains in stock. Very little produce has been shipped, but a large number of horses were exported, mainly to Newfoundland and Sydney.

Fishing.—The oyster fishing season opened the middle of the month and fair catches were reported.

Railroad construction and employment.—The construction of the Hillsborough bridge and the Belfast and Murray Harbour railway made good progress during the month. At the bridge pneumatic work commenced about the middle of the month, giving employment to 80 compressed air workers, nearly all from abroad.

Other industries.—The cheese factories have yielded well, and the price was the highest known for some time.

CONDITION OF PARTICULAR TRADES.

Building trades.—Bricklayers and masons, carpenters and joiners, lathers and plasters

were busy, while builders' labourers had a fair month. Plumbers and gas and steam fitters were busy, and painters, decorators and paper hangers report a fair month.

Metal, engineering and shipbuilding trades.—Iron moulders, and iron workers and helpers were steadily employed. Machinists and engineers were busy, as were also electrical workers and linemen. Blacksmiths had plenty of work, while bicycle workers were fairly busy.

Woodworking and furnishing trades.—Carriage and wagon makers were busy at repairs. Car builders and coopers also report plenty of work.

Printing and allied trades.—Printers and bookbinders were steadily employed.

Clothing trades.—Journeyman tailors and garment workers report plenty of work. Boot and shoe workers were also busy.

Food and tobacco preparation.—Bakers and confectioners, butchers and tobacco workers were busy.

Leather trades.—Tanners and saddlers had a good month.

Miscellaneous.—Barbers found September a better month than August, while clerks and hotel employees were busy.

Transport.—All lines of railroad employment were busy. Steamboatmen and firemen had steady employment. Ship labourers and longshoremen were busy, as were also teamsters and expressmen.

Unskilled labour.—All classes of unskilled labour were fairly busy.

ST. JOHN, N.B., AND DISTRICT.

Mr. W. H. Coates, Correspondent, reports as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

The labour market continues to improve, and the prospects are bright for the coming fall season. The building trades are well

employed, but ship labourers are only partially so. The F. B. Dunn Packing Company, whose place of business at Musquash was destroyed during the recent forest fires, has secured a site for its new factory at Fairville. It is expected that \$10,000 will be spent on the buildings, and that about twenty men will be employed.

Murray & Gregory have also now in course of construction one of the most modern saw-mills to take the place of the one destroyed by fire last July. The St. John Ladder Company will shortly establish a business here for the manufacture of the Waggoner patent extension ladder, and it is thought will employ twenty hands. The Street Railway Company has suspended operations on the extension of its line through St. John West, owing to a difficulty with the city council in reference to the route.

Tenders are advertised for a large brick warehouse on Mill Street. On September 2 the steamer *Beaver* was arrested on a warrant for security of a claim of \$700, under the Employers' Liability Act, at the instance of Isaac C. B. Thurber, for damages for injuries sustained by him on board the said steamer, on July 10 last. Bank clearings for the four weeks ending September 24 were \$4,165,732, being \$808,948 greater than the same period in 1902, and \$211,347 less than in the month of August. The wholesale and retail trades report business exceptionally good.

CONDITION OF LOCAL INDUSTRIES.

Harvesting is well advanced, and crops as a rule are good, especially oats. Rust and rot have affected the potatoes in some sections of the county, and heavy frosts did considerable damage to the buckwheat.

CONDITION OF PARTICULAR TRADES.

Building trades.—Bricklayers and masons are busy. Carpenters and joiners report work plentiful. Painters and decorators remain active, and plumbers and gasfitters

continue busy. Stonecutters and builders' labourers are kept busy.

Metal, engineering and shipbuilding trades.—Iron moulders, iron workers and helpers report work plentiful. Electrical workers and linemen are very busy. Boiler-makers report work as good. Woodworkers and shingle weavers are well employed.

Printing and allied trades.—Printers and pressmen continue busy. Bookbinders report work normal.

Clothing trades.—Journeymen tailors say that business is extra good.

Food and tobacco preparation.—Bakers and confectioners are all well employed. Cigarmakers report business fair.

Transport.—Railroad trainmen, switchmen and trackmen are reported as extra busy. Freight handlers report work plentiful. Ship labourers are dull. Street railway employees are very busy. They organized a union on September 10. Teamsters and expressmen are kept well employed.

Unskilled labour.—Unskilled labour is considered fair.

DISTRICT NOTES.

St. Stephen.—The Ganong confectionery factory has been fitted with electric lighting throughout, and will be heated by steam.

Milltown.—Some of the weavers in the cotton mill received an increase of $12\frac{1}{2}$ per cent in their wages on September 1.

Springhill.—Wm. J. Scott's saw-mill was totally destroyed by fire on the night of September 2. Mr. Scott estimates his loss at about \$9,000; it was insured for \$3,600.

Fredericton.—James M. Scott, William J. Scott, John Scott, Charles E. Scott and John S. Scott are applying for incorporation as the Scott Lumber Company, Limited, with a capital stock of \$98,000. The company proposes to carry on large lumber operation at Victoria Mills below this city, and on the second Magaguadavic Lake.

QUEBEC, QUE., AND DISTRICT.

Messrs. P. J. Jobin and Edward Little, Correspondents, report as follows :—

GENERAL CONDITION OF THE LABOUR MARKET.

Labour generally was well employed during September, with a slight falling off in demand from the preceding month, and with no scarcity of men reported. A steamship of the Furness line was brought into dry dock at St. Joseph, Lévis, for repairs to the value approximately of \$60,000. Tenders were asked for the work and a New York firm secured the contract, necessitating the removal of the vessel to the latter port. Ten of the crew who refused to proceed to sea in the vessel were sentenced to two weeks' imprisonment.

During the month the Sicily Asphaltum Company of Montreal began the installation of a \$12,000 permanent steam plant in the city, and also made extensive repairs to a number of streets.

There was one strike reported during the month, that of the batteau men, who claimed demurrage on two vessels to which they were bringing cargo. Work was stopped on the 21st instant, and after a meeting of the representatives of the interested shippers and a committee of the men on the 23rd an arrangement was arrived at whereby the matter was left to arbitration, the firms paying the amount in dispute under protest and the men returning to work pending the decision. The men, some 82 in number, were members of the Knights of Labour Local Assembly No. 1160 and eight firms were directly interested.

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—The weather was particularly favourable for farmers throughout the

month and harvesting operations were accordingly accelerated. Grain and potato crops are reported especially satisfactory.

Lumbering.—A few of the large saw-mills have finished the season's cut, and men are being hired to go to the shanties for the winter. On the south shore a scarcity of labour was reported, and the wages were higher than last year in Quebec, ranging from \$26 to \$30 per month as against \$22 to \$26 per month last year.

CONDITION OF PARTICULAR TRADES.

Builders.—The month has been only fair, as a number of new buildings have been completed. A few masons and bricklayers, accordingly, have been out of employment, but lathers, plasterers and carpenters have been active.

Metal, engineering and shipbuilding trades.—There has been a perceptible falling off of employment during the month in the shipbuilding lines. Machinists, moulders and boilermakers, however, had a good month, and electrical workers and linemen were steadily employed.

Woodworking and furnishing trades.—The destruction by fire of the only car-building establishment in the city threw some 30 men out of employment, and the work of rebuilding had not yet commenced at the end of the month. Coopers are becoming active, owing to the arrival of fish and oil cargoes.

Printing and allied trades.—Printers at present report plenty of work. Bookbinders were well employed.

Clothing trades.—Boot and shoe workers report a good month's trade, with one case of overtime worked.

Food and tobacco preparation.—The tobacco and cigar manufacturers of the city were working full time throughout the month, with a perceptible increase in output.

* A special report dealing with the meeting of the National Trades and Labour Congress of Canada, held at Quebec during September, appears on another page of the present issue of the *Gazette*, and no reference to the meeting accordingly is made in the report of the local correspondents.

Miscellaneous.—Barbers report a good month's work. Furriers are busy preparing for the winter season. Hotel and restaurant employees were very busy owing to the continuance of the tourist trade.

Transport.—Though the movement of passengers has decreased somewhat that of freight has increased, and all branches of railway employees were actively employed. Street railway employees, cab drivers and expressmen had a good month, Ship labourers report a dull month, but longshoremen were well employed,

Unskilled labour.—A fairly good month was reported.

DISTRICT NOTES.

At a meeting of the Town Council of Levis, held on the 22nd instant, it was decided to award to Messrs. Dussault and Power the contract for a water works and drainage system for the town. The contract price is \$287,000 and the works are to be performed according to the plans and specifications prepared by Mr. Laforest, C.E.

THREE RIVERS AND DISTRICT.

Mr. John Ryan, Correspondent, reports as follows :—

GENERAL CONDITION OF THE LABOUR MARKET.

Labour conditions during the past month have been very satisfactory, all classes of labourers being steadily employed with little or no loss of time. Owing to the fine weather of several weeks past, labourers can earn from \$1.40 to \$1.50 per day. Unskilled carpenters are getting \$1.75 per day. Common labourers are getting \$1.25. Wood-sawyers and choppers in yards will not work under 15 cents per hour; 15 cents per load of wood sawed and chopped was the price paid 5 years ago. Women without employment are scarce and none can be had for less than double the price they used to obtain five years ago. Business in the city has been prosperous in almost all of the trades.

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—Most of the crops are in and returns are better than anticipated.

Lumbering.—The saw-mills are kept very busy and will no doubt saw at night until the close of the season. The water on the St. Maurice has been higher than for years past, and the drive of logs will finish in a few days. Lumbermen are preparing for winter chopping and several gangs of men have left for the shanties.

Manufacturing.—Manufacturing is very active in all branches.

CONDITION OF PARTICULAR TRADES.

Building trades.—Workmen are well employed. Carpenters and joiners have constant employment. Painters are not very busy but have been well employed since spring. Stonecutters are fully employed. Plumbers report plenty of work.

Metal, engineering and shipbuilding trades.—Blacksmiths have been very busy. With bicycle workers business is very dull. Horse-shoers report trade good.

Printing and allied trades.—These trades are not very busy, though photo-engravers are busy.

Clothing trades.—Garment workers have more work than they can attend to. Glove-makers and boot and shoe workers are well employed.

Food and tobacco preparation.—Cigar-makers and tobacco workers are all employed.

Leather trades.—Tanners and curriers have plenty of work.

Transport.—Teamsters and expressmen have been well employed all summer.

SHERBROOKE, QUE., AND DISTRICT.

Mr. H. Logie, Correspondent, reports as follows :—

GENERAL CONDITION OF THE LABOUR MARKET.

During the month of September there has been a brisk demand for all classes of labour,

and all trades have been fully employed, with no idle men. Most of the employees of the Carpet Co., which closed down last month, have found employment in the other factories here, and in other parts of the Dominion. The various machine shops are still busy and good men find ready employment. Work has been begun on the foundation of the new court-house, and it is expected that work will be continued on this building until well into the season. There has been a great demand for unskilled labour and men to go to the lumber camps. There is a prospect that a branch of the Singer Sewing Machine Co. will be located here, should satisfactory arrangements be arrived at with the city. Employment will be given to about 500 employees. Wholesale and retail merchants report business during the month exceptionally good. There has been no unrest in the labour market during the month.

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—Farmers have been very fortunate in securing their crops without wet weather. The dry weather is becoming serious in the country, as wells and brooks, which never gave out before, are dry, and water in many instances has to be carried long distances for the stock. The crops are above the average, the potato crop being much in excess of that for some years past.

Lumbering.—Lumbering operations are somewhat handicapped for want of men. Many who formerly went to the woods in the fall find plenty of work in the city, and will not leave unless big inducements are held out.

Manufacturing.—Manufacturers in all lines are busy.

CONDITION OF PARTICULAR TRADES.

Building trades.—All branches of the building trades are busy. There are several large contracts about completed, but there will be enough other contracts to start on

to keep work plentiful until the winter sets in, and Messrs. D. G. Loomis & Sons of this place have secured a large contract in Fort William, and are offering good wages to local men to go west.

Metal and engineering trades.—Iron moulders, machinists and engineers are well employed, considerable overtime having been put in. Both the large machine shops have shipped large quantities of mining machinery to the west.

Woodworking and furnishing trades.—Work has been plentiful during the month.

Printing and allied trades.—The printing trade has been fairly good during the month.

Clothing trades.—Custom tailors have been very busy during the month, and there is a demand for good men.

Food and tobacco preparation.—Bakers and confectioners report trade good. Cigar makers are all very busy.

Unskilled labour.—Unskilled labour is in good demand, and work has been retarded somewhat by failure to secure men.

ST. HYACINTHE, QUE., AND DISTRICT.

Mr. Napoleon Samson, Correspondent, reports as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

The labour market has continued active during September, especially for day labourers. The trades nearly all report favourable conditions, with the exception of the Penman Co. boot and shoe factory, which was obliged to stop night work owing to low water. Through this 125 hands have been thrown out of employment. Several of these, however, have found employment in other branches here and others have emigrated elsewhere. The city is macadamizing Ann Street so as to satisfy the owners of the Bertrand and Co. foundry, who are soon to commence work in their new establishment,

which is one of the most modern of its kind in the city. The factory which Messrs. J. and A. N. Côté have erected for the manufacture of boots and shoes will probably commence operations in a few weeks; the engine and boilers have been installed, some of the machinery has also been placed in position and the balance is expected next week. The contract for 177 window sashes has been given, as also contracts for masonry, metal roofing and heating apparatus. Work at the distillery is well advanced; ten copper vats lined with tin, containing each 10,000 gallons, have been installed, to receive the alcohol which will be subject to all the improvements which experts deem necessary. Work is at present proceeding on the condensers, on the grain elevators and on the cooling alembic. The engines, boilers and scales are in place. All this machinery will be in operation in a few weeks. The cost of the distillery and machinery will amount to \$134,000 when complete. The activity reported last month in the woodworking trades has continued and a large amount of extra work has been necessary so as to fill orders that had been booked. There has been no change in wages or hours and no strikes nor lock-outs. It is stated that the Official Laboratory of the Province of Quebec will be opened to the public on the 1st of October next on Girouard Street. Mr. L. A. Tourchot, licensed chemist for the Dominion of Canada, has been in charge as director since last February. When the new dairy building of the province is constructed the laboratory will then go there. A course of lectures on "Industry" will shortly be given.

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—Farmers have nearly finished garnering their crops and are satisfied with the yield.

Manufacturing.—Conditions in all the branches continue favourable.

CONDITION OF PARTICULAR TRADES.

Building trades.—Bricklayers, masons, carpenters and joiners have been very busy. Lathers and plasterers have had fair work. Painters and plumbers have their hands full.

Metal and engineering trades.—Moulders and iron workers report very satisfactory conditions and continued work is assured. Machinists have also been fully employed. Blacksmiths, boiler makers and sheet metal workers have had a good month.

Woodworking and furnishing trades.—Carriage makers have been sufficiently busy.

Printing and allied trades.—Work has been plentiful with these branches.

Clothing trades.—Tailors are nearly all employed on custom as well as ready-made clothing.

Food and tobacco preparation.—Bakers report a good month. Cigarmakers have been very busy.

Leather trades.—Tanners and curriers have been fairly well employed.

Miscellaneous.—Laundrymen have constant work.

Unskilled labour.—Labourers have had a busy month, all those who wish to work finding employment.

DISTRICT NOTES.

Rapide Plat.—A former employee of Messrs. Louis Côté & Bros. has rented the flour mill at the above place. The stones which have been placed in position will grind about 100 bushels per hour.

MONTREAL, QUE., AND DISTRICT.

Mr. Gustave Audet, Correspondent, reports as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

September was a good month for the building trades, carpenters and joiners particularly, being in great demand. The work

on the Canadian Pacific Railway shops is advancing rapidly although somewhat delayed awaiting the arrival of structural iron. The metal roofers' strike commenced on August 31 last, and ended on September 22, the majority of the employers having granted the demands of the strikers. At the present time the builders' labourers are on strike, which is slightly delaying stone and brick work. Trade in general is very good. Owing to the increase in the price of flour of 70c. a barrel, bread has advanced two cents a loaf. Milkmen are also discussing a raise in the price of milk of two cents a quart. Instead of six cents per quart which we are at present paying we will be obliged to pay eight cents. The newspapers have commenced a vigorous campaign against the bakers and milkmen who wish to raise the prices of their commodities. "La Presse" offers to give free advertising space to all bakers and milkmen who do not raise their prices. The Electric Street Railway Companies are making requests and offers to the city council. Amongst other things the Montreal Street Ry. Company is asking for an extension of its franchise for a term of 30 years. It has still twenty years to run on its present contract. In order to obtain this concession Company agrees to keep all the streets on which its cars run free of snow, to sprinkle said streets at least twice a day, the city to furnish the water free, to sweep the streets at night, the city to cart away the sweepings; to sell 10 tickets for 25c. instead of 8 from 5 to 8 a.m. and from 5 to 7 p.m. and half an hour later on winter evenings, and to undertake certain expenditures in regard to crossings but not to assume the entire cost of paving the streets nor keeping them in repair.

CONDITION OF LOCAL INDUSTRIES.

Manufacturing.—Manufacturers of rubbers, cotton and boots and shoes are very busy, particularly the rubber manufacturers, owing to the approach of fall, and a certain class of workmen have to do night work.

CONDITION OF PARTICULAR TRADES.

Building trades.—Carpenters, joiners, stone and brick masons, painters, stone cutters, plumbers and roofers are extremely busy on account of the abundance of work in Montreal this year.

Metal and engineering trades.—The Dominion Bridge Company has so many orders ahead that it tried to induce its men to work at night. The men refused, but the episode goes to demonstrate how busy the iron trades are.

Woodworking and furnishing trades.—Woodworkers report excellent conditions. Car builders are well employed.

Printing and allied trades.—These crafts have plenty of work.

Clothing trades.—The workmen in these trades are busily engaged on fall and winter garments.

Food and tobacco preparation.—Cigar-makers do not complain.

Leather trades.—Trunk and bag makers and leather workers generally have done well.

Transport.—Car men generally are fully employed.

Unskilled labour.—Labourers have reason to congratulate themselves, there being so much work that they are becoming scarce.

HULL, QUE., AND DISTRICT.

Mr. Rodolphe Laferrière, Correspondent, reports as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

As in the previous month, labour generally was well employed in Hull and district, there being a scarcity of hands in some employments. In spite of the good wages offered coal shovellers could not be had for the Hull docks. The building trades, though not very busy, were fairly well engaged. The high

wages paid to all classes of labour was the noticeable feature of the month.

CONDITION OF LOCAL INDUSTRIES.

An industry which is progressing considerably in the district is *mica mining*. The raw material is found in the township and a couple of hundred men receive employment in the mining of it. The industry is now wholly national, very little being exported to the United States. About two years ago there was no sale in Canada for mica. The product is manufactured in Ottawa, where the leading American electrical appliance factories have established trimming houses. Hundreds of Hull girls are employed at good wages. They are paid by the piece and the expert trimmers can easily earn 96 cents per day. Miners receive \$1.25 per day with board.

The International Portland Cement Company in Hull is employing over 350 men on its large construction works. These men are the best paid labourers in the district, receiving \$1.50 per day.

CONDITIONS OF PARTICULAR TRADES.

Building trades.—Bricklayers received \$3.50 and masons \$3 per day, stone-cutters also receiving the latter amount. Carpenters are paid \$1.75 and \$2 per day, and not \$1.25 and \$1.50 as stated in the report for August. Joiners are paid the same price. Painters receive from \$9 to \$12 per week, working 10 hours per day. Lathers get 20 cents per hour, plasterers 30 cents per hour, and roofers 22½ cents per hour.

Metal, engineering and shipbuilding trades.—Iron workers at the Eddy Company receive from \$2 to \$3 per day, shipbuilders \$1.75 to \$2.25 per day, and caulkers \$2.25 per day.

Woodworking and furnishing trades.—Woodworkers receive from \$2.50 per day, mill hands \$1.25 to \$1.50, and factory hands the same, except girls, who are mostly paid by the piece.

Miscellaneous.—Clerks are receiving from \$10 to \$13 per week, barbers \$8 to \$10, and teamsters \$8 to \$10 the year round.

OTTAWA, ONT., AND DISTRICT.

Mr. T. W. Quayle, Correspondent, reports as follows :—

GENERAL CONDITION OF THE LABOUR MARKET.

The most striking feature of the labour market in September was the notable scarcity of supply. Unskilled labour was especially scarce, and agencies with commissions to secure large numbers of men were unable to supply the orders. Wages ruled high, and indeed the paucity in supply left no other course open to lumbermen and contractors but to pay the outside prices. Work on local contracts was hampered to a certain extent for lack of help, and civic work on streets and sidewalks was also interfered with. The lumber camps made a big draught on the supply and still there was a demand for more men.

There was no exceptional activity in any trade, but all were busy. The building trades were retarded somewhat by a lack of men, many masons, bricklayers and plasterers having left the city early in the season. Commercial activity was marked. Merchants reported a busy month, with the aggregate of trade largely increased, owing to the large influx of visitors to the Central Canada Exhibition.

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—Throughout the district harvesting operations were reported as satisfactorily completed and grain was threshing out a good average yield to the acre.

Lumbering.—The last of the timber rafts was brought down during the month. All the mills were running full time, and the general tone of the lumber market was firm. The agitation in the city as to the menace by fire from lumber piles was settled by the

City Council passing a by-law defining certain areas in which lumber could be piled.

CONDITION OF PARTICULAR TRADES.

Building trades.—The building trades were all busy, with a limited supply of labour.

Metal, engineering and shipbuilding Trades.—Moulders, machinists and other iron workers were very busy. In this class of labour the supply of men was exceedingly limited.

Printing and allied trades.—Printers are reported scarce, both in the city and in surrounding towns. Advertisements for both hand and machine men have been without results. The lengthy session of Parliament contributed to keeping all the Government Printing Bureau staff busily employed.

Transport.—Every available railroad man was pressed into service during the month. Shipping and passenger traffic were both reported exceptionally active. The annual meetings of the Ottawa and New York railway company and of the Canada Atlantic railway company were held during the month, and the volume of traffic was reported as being largely increased.

KINGSTON, ONT., AND DISTRICT.

Mr. William Kelly, Correspondent, reports as follows :—

GENERAL CONDITION OF THE LABOUR MARKET.

A peculiarity of the labour market at present is, that, while there is said to exist a feeling of depression and a certain slowness in business operations, labour continues to be fully employed, with few, if any, exceptions, the demand superseding that of any corresponding period in recent years. The same may be said to apply largely to business operations generally. Building operations continue active so far as alterations, extensions and improvements are concerned. There are also a number of new

residences being erected. During the month the stables and gun sheds used by A. and B. battery, R.C.A., were destroyed by fire. It is expected that the re-building of them will afford considerable work. Clothiers report larger imports and purchases of ready made and other stock than they have made in recent years. The wholesale and retail trade in general lines is above the average.

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—The following summary of the crops in this district was given by an expert and extensive grain dealer, who, in carrying on his trade, makes a personal visit to nearly every part of the county :

After a very dry spring it was thought the hay crop would be a failure, but this is not the case. Instead of being a drawback it was a decided benefit. The farmers have had a large stock of old hay on hand of inferior quality. This was largely sought for by the buyers at good prices and the most of it disposed of. The new crop was of excellent quality and, if anything, is above the average, and is bringing 75 to 100 per cent more than last year's crop. Pasturages have been very good, and the county is full of stock. The supply of milk has kept up well, and cheese has brought an unusually good price. Pork has been high, and the farmers have raised all that they were able to. Grain, which is becoming a secondary consideration with the farmers, has given a good yield. Some farmers are threshing from the stack in the field. Considerable difficulty was experienced in harvesting on account of lack of help and wet weather. Potatoes are in danger of spoiling unless the weather dries up; if it does there will be an abundant crop. Roots, and indeed all garden produce, are good and indeed could scarcely be better. The apple crop is abundant. Taking it altogether the farmer in this district will have had a profitable year. The present prices of oats and barley are good, and if marketed at once will bring good prices. If held, they will be brought into competition with the large crop which is now growing in the American Southwest. The prices may be reduced. There is every prospect of a two and a quarter better crop of corn, which classes it among the phenomenal yields.

Mining.—Interest in mining continues. Recently valuable finds of gold and copper were made near the village of Sunbury.

TORONTO, ONT., AND DISTRICT.

Mr. Phillips Thompson, Correspondent, reports as follows :—

GENERAL CONDITION OF THE LABOUR MARKET.

There is but little change to note in the conditions of the market for labour, excepting in so far as it is affected by the change

of season. Matters are satisfactory in nearly all lines with but few men out of work. The relations between employers and employed are on a much more harmonious basis than in the earlier part of the season except where old difficulties remain unsettled and continue to cause bad feeling, the month having been characterized by an almost entire absence of fresh disputes. While hitherto the demand for general labourers has been good, the prospects are that owing to the closing down of the industries at Sault Ste. Marie, and the close of the busy season on the farms, the supply will be fully adequate to all requirements.

CONDITION OF LOCAL INDUSTRIES.

Manufacturing.—Manufacturers in most departments continue busy, and in many cases are enlarging their establishments in anticipation of a continuance of prosperity. In some lines production is more quiet. The works of the Massey-Harris Company close down in a few days for a fortnight, as is customary for stock-taking. The Toronto Railway Company is putting in new boilers, engines and dynamos so as to secure extra power. The cost of these improvements will probably exceed \$750,000. Among the new industries to be shortly established is a macaroni factory which will employ 60 hands.

Agriculture.—The harvest has been on the whole a good one both as regards quality and quantity. Many of the farmers are still busy threshing, but the rush of the season being over the demand for men is not urgent. The greater attention now being devoted to the stockraising and dairying in this district has resulted in increasing the amount of work on the farms during the winter season, and a larger proportion of men than formerly can find employment all the year round.

CONDITION OF PARTICULAR TRADES.

Building trades.—At present nearly all the men engaged in the building trades are

at work, as a good deal remains to be done in connection with contracts now in hand, but the prospects for a continuance of work until late into the winter season—as has been the case in recent years—are not favourable and many are likely to be laid off much earlier. Painters and decorators report work a little quiet, but plenty in sight at a later stage.

The building trade is by no means as active as last year and employers report that they have no difficulty in securing all the men they need. There are not many large contracts being given out and the prospects are that there will not be nearly so much indoor work on new buildings during the late fall and the winter as was the case last season. Work on the new Grand Trunk Railway freight sheds, on the site of the old Parliament grounds between Simcoe and John Streets, is being pushed rapidly, and is expected to be completed in a few weeks, at a cost of about \$50,000.

Metal, engineering and ship building trades

—In most of these lines mechanics have had a good month. Machinists find trade a little quiet and a few men in that branch are looking for work. Blacksmiths are busy. Several legal cases arising out of the strikes at the Canada Foundry and Gurney's have been before the courts. The application for an injunction against the officials of the moulders' union and a large number of the strikers to restrain them from picketing at the works of the Canada Foundry is still pending. The charge against Robert Hare and Edward J. O'Donnell, accused of the same offence, was tried this week and resulted in the disagreement of the jury. Four men brought over from Britain to work as moulders in the Gurney foundry, who left their employment, were arrested at Montreal and brought back, but criminal proceedings against them were dropped on their returning to work. The suit for \$10,000 damages brought by the Metallic Roofing Co., against Local Union No. 30, of

the sheet metal workers' union was struck from the list owing to the irregularity of the proceedings. Jewellers and silversmiths are well employed.

Woodworking and furnishing trades.—Carriage workers have had a fair month. Cabinet makers find employment good. Piano workers are well employed.

Printing and allied trades.—The printing trade is fair and not many out of work. The book binders employed by the Copeland, Chafferson Co., manufacturing stationers, went out on strike on the 28th on account of the employment by the firm of an apprentice in the work of cutting canvas. They claim that this work should be done by skilled book-binders. Twenty book-binders and five rulers went out.

Clothing trades.—Custom tailors have had a busy month. Garment workers are actively employed. There is plenty of work for boot and shoe makers. The time record for the production of a pair of shoes by machinery involving 25 processes, was broken at the Dominion Industrial Exhibition by the workmen of the J. D. King Co. Limited, in the presence of the officers of the exhibition. The time from the placing of the sewed uppers in the hands of the workmen until the finished shoes were handed to President McNaught was exactly 15 minutes. The best previous time was 18 min. 10½ seconds.

Food and tobacco preparation.—Workers in this department are generally well employed. There has been some friction between the Butchers' union and their employers over the early closing movement. Since May 27th, the great majority of the butcher shops have closed at 7 p.m., in accordance with an agreement arrived at by the trade. A few, however, continued to keep open to a later hour. Exception was taken by some engaged in the business to the circulars distributed by the Union with the view of inducing a general adherence to the rule.

Finally, owing to the want of unanimity, it was agreed at a meeting held on the 23rd to suspend the agreement for the winter.

Transportation.—All classes of employees engaged in land transportation are actively employed. The street railway is steadily increasing its staff in accord with the growing requirements of traffic. Continued fine weather has tended to prolong the season of steamboat travel. Navigation companies report having had a very satisfactory season.

DISTRICT NOTES.

Toronto Junction.—A large number of railway men have left Toronto Junction to obtain employment on the North Western division of the C. P. R. Business at the cattle market continues to increase, 102 carloads of stock being received on the 29th.

HAMILTON, ONT., AND DISTRICT.

Mr. S. Landers, Correspondent, reports as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

Labour generally is equally as well employed as last month, and there are few idle men in either the skilled or unskilled callings.

The International Harvester Company's charter has arrived. The company has been capitalized at \$1,000,000, in 10,000 shares of \$100 each. The objects of the company are: To manufacture, sell and deal in harvesting machines, tools, implements of all kinds, including harvesters, binders, reapers, mowers, rakes, headers and shredders; to make agricultural machinery, such as tools and implements of all kinds, binder twine and all repair parts, and other devices, materials and articles used in connection with any kind of harvesting or agricultural tools or implements. There are already over 600 men working in the big industry, and building is still being continued.

The Hamilton Oak Tanning Company, Limited, has increased its capital from \$65,000 to \$125,000.

The McPherson shoe factory is to build a warehouse in rear of the present building to be 75 feet by 150 feet. The capacity of the factory will be about doubled, and the number of hands will be increased from 360 to 450.

The local customs returns for September show a decided increase over the same month of last year, as follows :

| | |
|---------------------------------------|---------------|
| Duties collected September, 1903..... | \$ 103,748 96 |
| Duties collected September, 1902..... | 85,719 65 |
| Increase..... | \$ 18,029 31 |

The local census of the population shows an increase of 726 over last year.

Owing to the recent advance in the prices of wheat and wholesale flour, the price of retail flour has been placed at from \$2.10 to \$2.25 a bag.

The price of bread was raised by the local bakers to 6c. a loaf, or an advance of .2c. per loaf.

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—Fruit shipments from this district during the month were exceedingly heavy, peaches, pears and grapes being the most prominent. As much as 150 tons were shipped some days, going as far west as Moose Jaw, N.W.T., and east as far as Halifax.

Manufacturing.—Manufacturing generally has been very brisk in almost every line.

Railroad construction and employment.—Railroad employment and construction is about the same as last month.

CONDITION OF PARTICULAR TRADES.

Building trades.—The building trades are still very busy, as the weather continues to be fine for building purposes and houses are scarce. Bricklayers and masons, carpenters, painters and labourers are especially busy.

Metal, engineering and shipbuilding trades. Iron moulders, (stove plate and machinery), are fairly busy. Coremakers, stove mounters, machinists, etc., are fairly engaged. Electrical workers and linemen are all well employed. Metal polishers, blacksmiths, structural iron workers and horse-shoers are fairly busy. The latter have asked for a Saturday half-holiday, beginning October 10. Jewellers and watch-case makers are in steady employment.

Woodworking and furnishing trades.—The woodworking trades are about the same as last month, sash and door hands, furniture makers, carriage and wagon makers and varnishers and polishers are fairly busy.

Printing and allied trades.—Machine, job and ad. men in the printing trades are very busy, as are all of the allied trades.

Clothing trades.—Journeyman tailors have had a very busy month and are now negotiating with the merchants for an increase on vests and trousers, an increase on coats having been secured last year. Garment makers have had a very good month, ending with a rush of the sample season. Boot and shoe makers are exceptionally busy.

Food and tobacco preparation.—Bakers, confectioners and butchers are doing the usual trade, and all employees are fairly busy.

Leather trades.—Leather workers all well employed; broom makers enjoying plenty of work.

Transport.—All classes of railroad employees on both steam and electric roads are well employed. Longshoremen have not had such a good season, much coal coming in by rail.

Unskilled labour.—Unskilled labour is very well employed, and men are being constantly advertized for, in some instances as high as 25c. an hour is offered.

DISTRICT NOTES.

Dundas.—All branches of employment are enjoying the usual prosperity. Rentable houses for workingmen are scarce, many being compelled to put up with various inconveniences until houses can be built. John Real, Dundas, is suing the Dominion Cannister Company, Dundas, for \$200 damages for the loss of the ends of two or three fingers. The injury occurred while the plaintiff was employed by the defendant company.

NIAGARA FALLS, ONT., AND DISTRICT.

Mr. Ernest Green, Correspondent, reports as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

General prosperity in industrial circles is the ruling condition in this district. No man who wants work need be idle. Men of all classes are coming from all parts of the country, and all find employment. There is no 'boom' here; the prosperity is of a much healthier and more stable character.

Manufacturing concerns are having very prosperous times. The Ontario Grape Juice Co., the Wilson-Fyle Co. and the Automatic Clerk Co. have started small factories here. Part of the plant of the Carborundum Company (Canadian branch) was burned, entailing heavy loss.

The building trades are still very busy. Carpenters have been advertised for and painters are unable to handle the work in their line. Transportation companies have been handling a heavy traffic and have been very successful in avoiding blockades.

No new difficulties are reported between employers and employees, nor have there been any changes in hours or wages.

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—Farmers have had a generally good season and satisfactory crops have

been gathered in. The shortage in the supply of farm labourers continues. The grape crop is about two-thirds of a full yield. Peaches and plums have yielded heavily, but apples are likely to be light.

Manufacturing.—Manufacturing concerns report business as generally good and full complements of hands are employed.

Railroad construction and employment.—The busy season on the lakes is drawing to a close, and the railways will soon be taking on additional crews to handle the freight business diverted to them by the closing of navigation.

Other industries.—Fruit canneries continue to be very busy, and the season's work opened at the wine factories at the end of the month.

CONDITION OF PARTICULAR TRADES.

Building trades.—Those in the building trades are undoubtedly the busiest class of workingmen. Enough new buildings are being started to keep them busy till well along in the winter, and it is probable that there will be plenty of work during the entire cold season. Carpenters have been in demand; painters have been unable to handle the amount of work. Masons and plumbers are very busy.

Metal, engineering and shipbuilding trades.—Foundries, machine shops and boiler shops are very busy. Steam engineers are employed in large numbers. Electricians and linemen are busy. The Canadian General Electric Company is erecting temporary buildings here. This company will instal the generators and equipment of the 50,000 h. p. power house of the Canadian Niagara Power Company. The Jencks Machine Co. is building temporary shops to turn out the steel conduit for the Ontario Power Company.

Printing and allied trades.—Printers continue to be well employed.

Clothing trades.—There is a steady demand for girls and women at the suspender and neckwear factories. Tailors are busy.

Food and tobacco preparation.—Butchers, bakers and cigar makers, all report good business.

Miscellaneous.—Retail clerks, office employees, freight clerks, and other similar classes are busy. House servants are continually advertised for.

Transport.—September was a busy month on railways and lake transport lines, but the traffic was steady and no serious blockades occurred. Electric railways are beginning to reduce their staffs to winter numbers, and steam roads are taking on a few men. Team drivers have been in demand and all drivers and carters are busy.

Unskilled labour.—Unskilled labour is steadily employed at good wages.

DISTRICT NOTES.

Bridgeburg.—The Michigan Central Railway has established a station at the shipyard at Miller's Bay. It will be called "Shipyard."

Welland.—Coopers have had a very busy month. Labour generally was well employed.

Attercliffe.—A new brickyard has been started here.

Port Colborne.—A successful demonstration was held here on Labour Day. Hon. Sir William Mulock, Minister of Labour, addressed a large gathering. The west breakwater for the protection of the harbour and Welland Canal entrance, which has been in course of construction for years, is completed.

St. Catharines.—A by-law to bonus the Empire Carpet Company was defeated at the polls. A highly successful demonstration was held here on Labour Day.

Thorold.—The plant of the Montrose Paper Co. is now in full operation. The company will turn out several kinds of paper now largely imported from other countries.

BRANTFORD, ONT., AND DISTRICT.

Mr. J. C. Watt, Correspondent, reports as follows :—

GENERAL CONDITION OF THE LABOUR MARKET.

September has been an active month for all classes of working men. The building trades have been the most active and many new buildings were commenced, the majority being private residences. Local contractors are unable to cope with the demand, and much work will have to be laid over until next year. The Massey-Harris Co. commenced a \$9,000 extension, and the carriage works a large warehouse during the month. The iron trades have continued busy, and in some cases overtime has been worked. Such is also the case in the wagon making trades. Wholesale and retail merchants have had a satisfactory month, and prospects for fall trade are encouraging. The erection of the new buildings for the New England Company, known as the Mohawk Institute, recently destroyed by fire, has been commenced, and the work will be completed before winter. Amicable relations between employers and employed have continued throughout the month.

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—Farmers and market gardeners have had a busy month. Favourable weather has greatly assisted operations, and much of the fruit and potato crop has been harvested. The dry rot is affecting the potatoes, and prices are about 10 cents per bag higher than during the corresponding month last year; 75 cents per bag is being asked at present.

Railroad construction and employment.—The extension of the electric railway from

Paris to St. George is progressing rapidly; and the double tracking on the Grand Trunk, and other operations on the same line, are employing a large force of men.

CONDITION OF PARTICULAR TRADES.

Building trades.—All bricklayers, carpenters, plasterers and painters have been fully employed. Plumbers, gas and steamfitters have had a full month.

Metal, engineering and shipbuilding trades.—Iron and brass moulders, core-makers and machinists have been fully employed, and a number of the latter have been working overtime. Electrical workers and linemen have had a busy month and overtime has been worked. Metal polishers, buffers and stove mounters have had steady employment. Machinery and carriage blacksmiths have had an active month. General blacksmiths and horseshoers report trade as being fair. Boilermakers and sheet metal workers have all had steady employment.

Woodworking and furnishing trades.—Woodworkers, particularly carriage and wagon makers, have been active during the month. The latter are working overtime. Patternmakers and millwrights have been steadily employed; the former are in demand. Coopers report a steady month.

Printing and allied trades.—Printers and pressmen have had a steady month.

Clothing trades.—Journeyman tailors report a fair month, with an increase in trade over the month previous.

Food and tobacco preparation.—Bakers and confectioners are all engaged. Bread is rising in value. Some are giving only 20 tickets for \$1, instead of 22 as formerly. Cigarmakers and tobacco workers continue to be very busy.

Miscellaneous.—Barbers, clerks and delivery employees report steady employment. Furriers are busy and one local dealer has enlarged his place of business to meet the

increasing demands. Hotel and restaurant employees find steady employment. Laundry workers have had a good month.

Transport.—Railroad trackmen, freight handlers and street railway employees, have all had a steady month. The first-named are exceptionally busy. Teamsters and expressmen have been fully employed.

Unskilled labour.—There are no idle men upon the market. The supply seems to be about equal to the demand.

DISTRICT NOTES.

Paris.—Many new buildings are being erected. All local labour is fully employed.

Blue Lake.—The new Portland Cement Works will start in a few days. There are good openings for a few steady labouring men.

GUELPH, ONT., AND DISTRICT.

Mr. O. R. Wallace, Correspondent, reports as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

The labour market improved in general as the month progressed. While there have been no number of idle men, in some lines there has been a slight easing off of trade, which is now improving. The scarcity of bricklayers noticed last month continues. The building season will be an extra long one owing to the number of large works. Although a great scarcity of small houses exists, few houses are being erected for renting purposes. Retail trade improved during the month. The sessions of the O. A. College have commenced with about 225 students in residence. The beginning of the month saw shops employing over 300 men shut down through strikes. All are now at work except 30 men.

CONDITION OF LOCAL INDUSTRIES.

Manufacturing.—Manufacturing in almost all lines is at the height of its capacity. A

number of additions to shops that have been under way are about ready to occupy. Gangs of men under the city engineer are putting in house connections for the new sewerage works.

Railroad construction and employment.—A by-law to purchase the Guelph Radial Railway was carried by the property owners.

CONDITION OF PARTICULAR TRADES.

Building trades.—The building trades have had a good month. There will be employment for all the bricklayers here until nearly Christmas, with a large amount of work for the other trades for a longer time. Bricklayers are consequently all steadily employed, and there is a demand for men in this trade. Carpenters, painters and stone-cutters are all steadily employed, with no idle men. Builders' labourers have had a good month with a fair demand for men.

Metal, engineering and shipbuilding trades.—Iron moulders have had a good month, particularly those on stove work. The strike in this trade of 28 men and apprentices, which shut down a hardware shop employing 200 men has been broken by the employment of N. L. A. men and the shop resuming work. Machinists, machinists' helpers and sheet metal workers have had a fair month with an improvement towards the close. Tube mill men are working overtime.

Woodworking and furnishing trades.—Woodworkers are steadily employed. Organ finishers at the end of last month to the number of 19 refused to accept a reduction in piece rates. About 125 organ workers were locked out, and after two weeks a settlement was reached on a day basis which is slightly lower than what has recently been made at piece rates. The settlement was for 18 cents an hour for fillers, 19 cents for stainers and shellackers, and 21 cents for rubbers, polishers and varnishers. Piano workers are very busy. Upholsterers are very busy for the season of the year. Car-

riage workers report a better month than August.

Printing and allied trades.—Printers have had a good month with a present demand for men.

Clothing trades.—Journeymen tailors are now on fall work with prospects for good season.

Textile trades.—Brussels weavers and ingrain weavers have had a good month, with good prospects ahead.

Food and tobacco preparation.—Cigar-makers have had a good month.

Unskilled labour.—Unskilled labour is well employed, but there is liable to be an easing off from now owing to the approaching completion of the sewerage works.

DISTRICT NOTES.

Hespeler.—Textile workers are only fairly well employed.

Berlin.—A few months ago the town took over the lighting and power plant at a cost of \$100,000. Owing to its poor condition the council has now voted \$70,000 to put the plant in good shape. Incandescent lights will be supplied at 1 cent per night each and gas at \$1 per thousand.

STRATFORD, ONT.

Mr. Jos. T. Carlin, Correspondent, reports as follows :—

GENERAL CONDITION OF THE LABOUR MARKET.

The condition of the labour market in this city and district continues unchanged from previous months, as all classes of labour both skilled and unskilled are fully employed. Men of all trades are in demand owing to the number that are required in the new factories. The building trades are still very busy erecting a number of houses.

Wholesale and retail trade was fairly busy and reports a prosperous month.

There were no changes in the rates of wages, nor any trouble in the labour market.

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—Farmers are busy hauling their grain to market, and are also engaged in taking out their root crops, which are a very good yield.

Manufacturing.—All local industries are active with plenty of orders ahead. The Hodd Cullen flour mill shut down for the last two weeks of the month, putting in new machinery of greater capacity to meet increased demands.

CONDITION OF PARTICULAR TRADES.

Building trades.—Bricklayers, masons, carpenters, plasterers and painters are steadily employed. Plumbers, gas and steam fitters are busy. Builders' labourers have been kept busy this month.

Metal and engineering trades.—Machinists, blacksmiths, boilermakers and fitters are fully employed.

Woodworking and furnishing trades.—Woodworkers and varnishers and polishers are working full time. Coopers are busy making barrels for the apple trade.

Printing and allied trades.—Printers have been very busy during the month, especially job printers.

Clothing trades.—Tailors report work good for this month. Garment workers are busy.

Food and tobacco preparation.—Bakers and confectioners are exceptionally busy this month. Butchers have had a satisfactory month. Cigarmakers have all the work they can do.

Miscellaneous.—Barbers, clerks and delivery employees report trade good.

Transport.—Railroad men report steady work throughout the month, especially conductors and brakemen. Livery men and dray men also report trade satisfactory.

Unskilled labour.—The demand for unskilled labour is very good. A number of Englishmen came to the city and found employment.

DISTRICT NOTES.

St. Marys.—Business is good. Beattie & Co's. store, which was destroyed by fire some time ago, is being replaced by a large brick store, which has given employment to builders. The stone quarries and the Maxwell foundry are running to full capacity.

LONDON, ONT., AND DISTRICT.

Mr. A. Wootton, Correspondent, reports as follows :—

GENERAL CONDITION OF THE LABOUR MARKET.

Industrial conditions have changed but little during the past month, trade among all classes being good. In building trade circles work is beginning to slacken. The brick and stonework on the new armoury is about completed, and the walls will be ready for the roof in about six weeks. On the railroads the rush of the last few months has abated somewhat. In the foundries work is brisk. At McClary's the new stove mounting and polishing building is about completed, and the hands will soon be in. At the rolling mills a night staff is to be put on. A new pavement of several blocks is to be laid on King Street this fall; and a \$1,500 roadway is to be built over the coves at the military rifle range. The two jobs will keep a large number of teams and labourers employed until Christmas. A small strike occurred at Leonard's boiler and engine works on Sept. 21, among the boilermakers. A letter was received from an employer in Winnipeg by a striking machinist offering employment to a number of machinists at good wages. The letter was sent by the machinist to a boilermaker at Leonard's with a request for him to show it to the machinists there with the object of getting them to quit work. The man says he did

not show it to the machinists, but the firm found out he had the letter and ordered his dismissal, and the other boilermakers struck in sympathy.

CONDITION OF PARTICULAR TRADES.

Building trades.—Bricklayers and masons have had a good month, but work is slackening. Eight men were laid off at the armoury the last week in the month. Carpenters continue in demand, and prospects are bright for a couple of months yet. Lathers, plasterers and painters state that they have plenty of work on hand. Plumbers, gas and steam fitters are in demand. Builders' labourers are in demand at present.

Metal, engineering and shipbuilding trades.—Iron moulders are very busy at McClary's; about 140 of this class are employed now, the largest number in the history of the firm. Machinists and coremakers are exceptionally busy. Electrical workers had a busy month, the western fair making a great deal of extra work for them. Metal polishers and stove mounters are exceptionally busy, and have commenced working overtime four nights a week. Boilermakers are busy; a number of these arrived from Great Britain and secured employment here. Sheet metal workers continue very busy.

Woodworking and furnishing trades.—Woodworkers and carriage and wagon workers are very busy. Car builders are rushed on repair work. Coopers are exceptionally busy, working three nights a week overtime at the London and Petrolea barrel works, the largest in the city. The smaller barrel works are busy on apple and flour barrels.

Printing and allied trades.—In the printing trades business continues good. The city printing, one of the largest contracts of the year, was let during the month to the firm of A. Talbot & Co., and the city voters' list will be printed during the next week, giving employment to a number of extra men.

Clothing trades.—Journeymen tailors report trade as improving, after the dull summer months. Garment workers are very busy. Boot and shoe workers report trade fair.

Food and tobacco preparations.—Bakers and confectioners were rushed in the early part of the month, the western fair being the cause. Cigarmakers report trade as good, with no idle men in their line and with some jobs open for hand men.

Miscellaneous.—Broom makers report trade as good.

Transport.—Train crews are having a little more time to themselves now, business not being quite so active. A number of extra men were employed by the Street Railway Company during fair week. Teamsters and expressmen had a busy time of it during the first part of the month, owing to the fair and to the amount of fruit arriving in the city.

Unskilled labour.—This class has had more steady employment and has commanded better wages this summer than ever before, having been in demand all the time.

ST. THOMAS, ONT., AND DISTRICT.

Mr. A. Roberts, Correspondent, reports as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

There is little change in labour conditions which continue healthy and active, with plenty of employment, and peaceful relations prevailing between employer and employed. Commercial activity was evident in the large volume of railway traffic in through freight. Retail business is steady and up to the standard of other years. There were no important changes in rates of wages or hours of employment to report.

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—Agricultural conditions are favourable. The season's crop of grain has

been harvested and farmers have been busy with threshing and fall seeding. The yield of grain is average in quantity and sample. There has been a tendency with farmers to hold their wheat in anticipation of higher prices.

Manufacturing.—Manufacturers report continued prosperity, as there is a good demand for manufactured products. The difficulty experienced in the local broom and brush making industry by the shortage of labour has been partially overcome by the introduction of modern labour-saving machinery, which, in some portions of the work, has effected a saving of 75 per cent in the number of hands.

Railroad construction.—Railroad construction and employment continues active, and constant changes are being made in the motive power and general equipment. The M. C. R. bridge, spanning the Kettle Creek ravine west of the city, is being remodelled and strengthened. A large staff of men are engaged on the work. There is a brisk demand for freight cars and full time is being worked in this particular department of the M. C. R. shops. Formerly the men had a half holiday on Saturday afternoon.

CONDITION OF PARTICULAR TRADES.

Building trades.—Workers in this line have been fairly busy, but as intimated in last month's report, the season will close early. For bricklayers the season is about over, as only a few small jobs are in evidence. Carpenters and inside finishers have a considerable amount of work on hand. The ward school building, which has been the largest job of the season, is now inclosed, and the inside work is progressing rapidly.

Metal trades.—In this line there is steady employment.

Woodworking and furnishing trades.—Satisfactory conditions were reported.

Printing and allied trades.—For printers there is little change, with plenty of work for all.

Clothing trades.—Custom tailors are quite busy, with plenty of orders ahead. Mantle workers in the local factory report favourable conditions. Work on summer goods is about to commence and preparations are being made to increase the staff.

Food and tobacco preparations.—Workers in these departments have been busy. A building is being erected for a wholesale bakery for a local firm. Cigarmakers are very busy, and one local firm is advertising for apprentices.

Transport.—There has been great activity in railway traffic and railway employees have been making good time. Teamsters have been very busy and as a result municipal street macadamizing work has progressed very slowly.

CHATHAM, ONT., AND DISTRICT.

Mr. John R. Snell, Correspondent, reports as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

Labour conditions continue as favourable as during last month. The building trade is still active with a demand for men. The Chatham Manufacturing Co. has let the contract for a large addition to its works. The erection of many private residences continues to give employment to all the available men in the building trades.

Civic works, such as paving, laying sidewalks, sewers, water and gas mains, are employing a large number of mechanics and labourers. The public library is now finished and was opened to the public this month. Wholesale and retail trade is fairly active.

No changes in the rate of wages have been reported this month, and no disturbances in the labour market have taken place, the relations between employers and men having been perfectly agreeable.

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—Farmers report that owing to the excessive rainfall, the crops in many localities have not been as good this year as usual. Corn, beans and potatoes in some places are almost a failure.

Manufacturing.—All local factories are fairly busy.

Building trades.—Bricklayers and masons, carpenters, plasterers and painters are all fully employed. Plumbers and gas fitters are all busy.

Metal and engineering trades.—Iron workers, machinists and engineers are fairly well employed.

Wood working and furnishing trades.—Carriage and wagon makers are fully employed. Coopers are exceptionally busy.

Printing and allied trades.—Printers, pressmen and bookbinders have plenty of work.

Clothing trades.—Journeyman tailors report work fairly good.

Food and tobacco preparation.—Bakers and confectioners, cigar and tobacco workers report trade fairly good.

Miscellaneous.—Delivery employers and clerks have steady employment.

Transport.—Railroadmen report that they have all they can do. Ship labourers, long-shoremen and teamsters are exceptionally busy.

Unskilled labour.—Unskilled labour is in good demand.

WINDSOR, ONT., AND DISTRICT.

Mr. D. Mitchell, Correspondent, reports as follows :—

GENERAL CONDITION OF THE LABOUR MARKET.

During the past month in all branches of industry great activity has prevailed, the iron and building trades taking the lead.

There have been no idle men upon the market who wanted employment, and many from the east coming to the city have found work with little trouble. Labour, skilled and unskilled, is in demand. There were more contracts let for dwelling houses the first two weeks in September than in any similar period this season. The salt company has contracted for another large addition to its plant; this will make the third addition this summer. The Board of Public Works is very busy and is employing all the labour and teams it can secure, laying paved streets, cement sidewalks and sewers. Wholesale and retail business continued good. Harmony between employers and employees existed throughout the month.

CONDITION OF PARTICULAR TRADES.

Building trades.—Bricklayers, masons, carpenters, and painters are all fully employed. Plumbers, gas and steamfitters, and sheet metal workers have all the work they can handle just at present.

Metal, engineering and shipbuilding trades.—Iron moulders, coremakers, machinists and engineers have plenty of work.

Woodworking and furnishing trades.—Carriage and wagon making trade continues good.

Printing and allied trades.—Printers and pressmen have plenty of work.

Clothing trades.—Journeyman tailors report plenty of work on hand, most of them working overtime.

Food and tobacco preparation.—Cigar-makers and tobacco workers are all fully employed.

Transport.—Railroad trainmen are all fully employed, and a great many of the crews are putting in overtime. Teamsters are exceptionally busy.

Unskilled labour.—There is a great demand for this class.

DISTRICT NOTES.

Walkerville.—Manufacturing concerns, of which there are a large number, are very busy, and some of them are two months behind in their orders. The Asphalt Paving Brick Company has got its large plant in operation now, and is giving employment to a large number of hands. There has been more building this year than in any other in the history of Walkerville.

WINNIPEG, MAN., AND DISTRICT.

Mr. Appleton, Correspondent, reports as follows :—

GENERAL CONDITION OF THE LABOUR MARKET.

Conditions have not changed materially from last month, with the exception of the single case of farm labour and of a sharp advance of about 25 cents a day for ordinary manual labour on railroad construction. On September 26 several employment agents received orders to supply as many men as procurable at \$2.25 per day. The conditions as to fare and board remained the same, that is, free fare to point of work and also free fare back to Winnipeg if they stay until the completion of work. Board is charged to the men at the rate of \$4 per week. This class of work usually ceases in the beginning of November, usually from the 1st to the 10th. Sometimes, however, work can continue later, but it is not safe to rely upon its doing so. The cause of the sharp advance is the desire of contractors to get enough men to complete their work before winter. Their demands are being partially met by a certain amount of farm labour that is being released. Farmers in many districts, however, are behind with their harvest and a steady demand for help continues, and in consequence contractors are bidding higher to get men. The general demand for labour is also strong, and a growing feeling among the men is develop-

ing in the direction of standing off for higher pay. Some of the immigrant elements are taking advantage of the demand for their labour to have a good time, by taking alternate weeks for holidays. Contractors complain of their irregular habits in this respect. Another factor in the labour market at the present time is the making up of gangs for the woods. This demand has appeared fully five weeks earlier than last year. Extensive operators, such as Pigeon River Co., Rat Portage Lumber Co., Red Deer Co., East Kootenay Co., are already sending all the men they can get into their camps. Several Winnipeg employment agents have taken advantage of the cessation of work by the auxiliary companies of the Consolidated Lake Superior, at Sault Ste. Marie, to send representatives to engage men for the requirements of the Winnipeg market. Several thousand men could easily be placed at the present time, and it is more than probable the full demand will not be met.

Building operations in Winnipeg are being carried on to the full extent that facilities, such as labour and material supply, will allow. Finishing is being seriously retarded by the scarcity of plasterers, who are small in numbers proportionate with other classes employed. Many buildings are at a standstill awaiting their turn for this class of workmen. Wages show an upward tendency. Bricklayers are being paid in many cases as high as 60c. per hour, or 5c. per hour above the union minimum. All kinds of men have been brought into requisition as carpenters and receive pay at the rate of from 20c. to 35c. per hour.

In the two weeks ending September 26, permits have been issued by the building inspector for 68 new buildings averaging in value \$10,370, and aggregating \$805,200. The statement of building rendered to the civic fire, water and light committee last evening showed the wonderful record of

Winnipeg's progress and development as follows:—

| Date. | Permits | Buildings. | Cost. |
|--------------------|---------|------------|-----------|
| | | | \$ |
| Sept. 28—1900..... | 432 | 538 | 1,199,450 |
| " 28—1901..... | 546 | 704 | 1,596,450 |
| " 28—1902..... | 794 | 888 | 2,213,100 |
| " 14—1903..... | 947 | 1,059 | 4,430,500 |
| " 28—1903..... | 1,002 | 1,127 | 5,235,700 |

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—At the close of the month the Manitoba crop was practically safe from any weather contingency. Farmers however are only reluctantly allowing their extra help to leave them preferring to give them employment—ploughing. With the exception of a severe storm of rain and sleet about September 12 the weather has been favourable. The effect of the storm was not serious, and very misleading reports regarding it were published in eastern Canadian and United States papers.

Lumbering.—The Rat Portage Lumber Co. is building a new saw mill and constructing an artificial dam for the floating of logs on the east side of the Red River. The company will be ready to start operations next spring.

Manufacturing.—Nothing can be added to last month's report regarding manufacturing concerns. In every line business is good. Among the new manufacturing and warehouse enterprises in course of being established are the Adams Saddlery Co., saddlery stock and manufacturing; the Winnipeg-Milwaukee Brewery Co., lager beer brewery; the Western Implement and Manufacturing Co., general machinery and farm implements; Foley, Locke & Larson, wholesale provisions, and others.

Railway construction.—The abnormal amount of railroad construction is creating a huge demand for ties. The labour avail-

able is not increasing at the same ratio as the demand, and the contractors are faced with not only higher wages but an insufficient number of men. This has resulted in modifying methods of tie making. The skilled hewer and trimmer is being replaced by light saw mills requiring no other skilled help than a sawyer and an engineer. This permits of the profitable employment of ordinary unskilled labour.

The Canadian Pacific Railway Co. is employing a very large number of men in raising its yards and tracks in conjunction with the new workshops, and also to comply with their recently completed agreement with the city of Winnipeg, which requires that the present tracks across its principal street—Main—shall be five feet above present level. The agreement also provides for the construction of a subway, new depot, and a hotel of about 400 rooms. The expenditure on these improvements will approximate \$4,000,000.

CONDITION OF PARTICULAR TRADES.

Building trades.—Stone masons are all fully employed. The city quarries were unable to get men to dress curbing for city's requirements, and in consequence artificial stone is being used for that purpose. This can be made by labourers who receive a much lower rate of pay. Foundations of cement are being very largely adopted and some buildings are being put up entirely of artificial material. All classes of work-people auxiliary to the building trades are busy. The same can be said of all other lines, such as iron workers, engineers, pattern makers, wood workers, &c.

Printing and allied trades.—Printers are kept well employed and the local typographical union has now reached a total of 175 members. This is very much larger than it has ever been, and every member is employed. Outside the typographical union there are quite a large number employed in this industry. Help is very hard to procure.

Clothing trades.—Tailors continue to keep busy and are enjoying a very satisfactory run of business.

Leather trades.—Perhaps the best indication of the condition of the leather business is the establishment of a large new manufacturing house. Up to this time the business has been largely in the hands of a local house.

Miscellaneous.—Miscellaneous employment continues to be good, and the same can be said of transport occupations.

Unskilled labour is in general demand.

BRANDON, MAN., AND DISTRICT.

Mr. S. P. Stringer, Correspondent, reports as follows :—

GENERAL CONDITION OF THE LABOUR MARKET.

The unsettled condition of the weather during the last four weeks has somewhat retarded the progress of all outdoor industries within the city and district. There is a great amount of building that will take well on to winter to complete, owing to the loss of time from wet weather. All classes of skilled and unskilled labour are fully employed and no doubt will continue so till winter sets in; although there are a number of foreigners in the city, who have come in from working on the railway construction in hopes of getting better wages with farmers, but farmers prefer Ontario labourers to foreigners. All necessary help seems to have been secured at \$40 per month, and so far all openings for skilled labour seem to have been filled. All factories are working full time. There has been no additional industry started. A member of an eastern manufacturing firm has been in this city looking over the ground with a view to starting a branch of business here, and was reported as favourably impressed with the situation. Great activity exists in all branches of the building trades, the machine shops and in the sash and door factory.

The Canadian Pacific Railway Company and the Canadian Northern Company are doing a very active business at present. The new system adopted by the Canadian Pacific Railway Company in the transportation of stock this year is giving satisfaction to stock men. They are running stock trains as first and second sections of east bound passenger trains and have right of way over all west bound trains. Every day heavy trains of stock are passing through for Montreal. The Canadian Northern Company is also busy, as the new wheat has begun to move. Wholesale and retail merchants report trade very good. Agricultural implement merchants report trade very good. The agent of one Toronto firm sold 40 binders this season. A large number of threshing machines have also been disposed of by local agents. There have been no changes in rates of wages, and the labour market is quiet.

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—The district experienced a very severe storm on Saturday, September 12, which extended into the Territories, doing considerable damage to crops that were standing in the stack. The stock of grain was not much damaged and the fine weather has enabled farmers to prosecute their labours. The weather was not very favourable up to the middle of the month for harvest operations, but reports from outlying districts are generally favourable. The grain will be up to the average of last year, only the colour will not be as good. Threshing is in full operation throughout the district, and a considerable amount of grain has been shipped which will grade No. 1 hard. Reports from the Territories say that the storm has not done much damage to the crops.

Manufacturing.—All manufacturing firms are working full time, and the flour mills are working night and day.

Railroad construction and employment.—Railway construction in this city and dis-

trict is very active, especially in extensions on the Canadian Pacific Railway and the Canadian Northern.

There seems to be a scarcity of *binder twine* in the Territories. All the available twine here has been shipped west, and ten car loads from Winnipeg were also sent west to help to cover the deficiency.

CONDITION OF PARTICULAR TRADES.

Building trades.—The various trades included under this head report trade satisfactory, but with no openings for additional men.

Metal, engineering and shipbuilding trades.—Machinists are exceptionally busy, but there are no openings for new men at present. Linemen are very busy, owing to damage done to wires by recent storms. Blacksmiths report trade good. Boiler-makers are working overtime, but report no openings for additional labour. Horseshoers are busy.

Woodworking and furnishing trades.—Upholsterers and pattern makers report trade good.

Printing and allied trades.—Printers and allied trades are busy, with no openings. Several printers who worked here have secured good positions in the Kootenay country.

Clothing trades.—The clothing trades are exceptionally good, with openings for good men. Boot and shoe makers are fairly busy.

Food and tobacco preparation.—Bakers and confectioners, butchers and meat cutters report trade very satisfactory. Cigar factories are very busy.

Miscellaneous.—Barbers are busy. Clerks, delivery men and laundry workers are busy.

Transport.—Men engaged in all branches of railway business are doing very well. Freight handlers are fully employed.

Unskilled labour.—The unskilled labour market seems to be fairly well supplied, as

there is a surplus supply in the city at present. The improvements on the C.P.R. lines have given employment to a large number. The supply is at present equal to the demand.

DISTRICT NOTES.

Commercial men, after touring this district, report business in a very satisfactory condition. The C. P. R. Co. has erected 250 loading platforms in addition to the 150 already erected, in compliance with the Grain Act. It is impossible at the end of the month to give any near estimate of the damage done to the crops by recent storms, but it seems that the amount of damage is not as great as was at first anticipated. Farms lying in close proximity to Lake Manitoba have had their crops damaged, owing to the overflow of the lake after the excessive rains.

ROSSLAND, B.C., AND DISTRICT.

Mr. Roland A. Laird, Correspondent, reports as follows:—

DISTRICT NOTES.

The situation in Rossland and throughout the Kootenays to-day in respect to labour has rarely been paralleled in the annals of the country. Men are wanted, skilled labour commanding the highest wages, and they are not forthcoming in anything like the numbers required to fill the demand. About mining camps the rule has been an oversupply of labour, a situation which conditions typical of mining camps have fostered; to-day, however the man who is out of work may have a position at once. Work awaits the men instead of men awaiting the work, and the situation comes somewhat as a surprise to those who have not kept in touch with the trend of affairs recently.

A few days since the Granby consolidated mines at *Phoenix* advertised extensively for 100 mine labourers at \$3 per day and for thirty machine miners at \$3.50 per diem.

Ordinarily this number of miners could have been secured in the section without the use of the newspaper columns. A day or two since a *Rossland* mine manager came to your correspondent with a request for machine miners and muckers which he was unable to secure for his property, remarking that it was the first time in all the mining camps of his experience that he has had to go further than the door of the shafthouse to get all the men he could utilize. *

In the *building trades* matters are in the same way. Skilled *carpenters* and *mechanics* are in demand, and the supply is below the demand. A prominent *Rossland* contractor took a large contract in the North-west Territories a few days ago, and his representative on the ground wired him to bring twenty carpenters to start on the work, but it was found impossible to secure the men required.

The remarkable activity in the *lumber camps* has taken up the entire supply of common labour, and this class of workmen is also in demand. Moreover new work is constantly cropping up, so that the scarcity of labour is likely to become more marked as the year progresses.

The *Trail smelter* has had arrangements completed for several weeks to blow in another lead stack, but the enterprise has been blocked by the failure of the company to secure trained smeltermen. A crew is being brought together, however, and in the course of a comparatively short time the smelter will have found a way out of the difficulty.

The only suggestion of labour trouble occurred during the month at the *Morrissey* collieries of the *Crows Nest Coal Company*. The published reports of the trouble were to the effect that the miners found fault with the system of weighing coal as it was brought from the pit. The system at the collieries, regulated under the Coal Mines Act, is that the company has the privilege

of making certain penalties for slack or other waste found in the coal broken down in the mines under the piecework scale. The men were not averse to this, but contended that the weighmaster enforced the rules unfairly, and that the miners had no representative at the scales to protect their interests. At one time it seemed as if the trouble would assume a serious shape, but later reports were to the effect that an arrangement satisfactory to all parties had been arrived at.

NEW WESTMINSTER, B.C., AND DISTRICT.

Mr. Geo. Hargreaves, Correspondent, reports as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

Labour conditions during the past month have been most favourable, a large number of men finding employment with the farmers. The fishing season being somewhat of a failure, a large force of men was thrown out of employment at least three weeks earlier than if there had been a good run of fish. There being a good demand for men among the farmers and camps the men were soon at work. The *Fraser River Tannery Company* have applied to the Provincial Government to lease for thirty years a total of 13,000 acres of timber, for the purpose of carrying on a tannery business. Operations on the construction of the railway and traffic bridge across the *Fraser* at this point are being rushed, and it is expected to be ready for travel by early spring. The *British Columbia Electric Railway Company* is making plans to extend its road to *Ladner* and way points. A number of sales of residential property have taken place lately.

The first of the dividends which will hereafter be handed to employees of the *British Columbia Electric Railway Company* was given the men on September 27, as their share in the earnings of the concern for the year. Each man was handed a cheque for \$25, the money being given

to all employees continuously in the service of the company from June, 1902 to the end of financial year. Twenty-five dollars were paid to each of 284 men in Vancouver, Victoria and New Westminster, the aggregate amount being about \$7,600.

A large number of men are engaged in preparing for our annual exhibition. The civic authorities have a large number of men making necessary improvements to streets and market square. New driving sheds are also to be erected for the convenience of farmers attending the market.

CONDITION OF LOCAL INDUSTRIES.

Fishing.—The total pack on the Fraser River for this season is about 200,000 cases. Last year's pack was 327,000 cases, and that of 1901 the record pack of 990,000 cases. In view of this most apparent shortage of the world's pack of salmon, prices on that commodity are likely to go up immediately. One result of the shortage will be that held-over packs now lying warehoused in England will be disposed of easily, and there will be a clean sheet to work on next year. The fishermen who have invested in new gear are also sufferers in the poor run of fish, many of the men not making enough to pay for gear.

Lumbering.—Large shipments of lumber and shingles continue to be made daily from local mills to points in eastern Canada and the States.

Railroad construction.—A large number of miles of construction is under way, the clearing of bush, grading and tracklaying, giving employment to a large force of men.

CONDITION OF PARTICULAR TRADES.

Building trades.—Bricklayers and masons are cleaning up for the season, the wet fall weather interfering with outside work. Carpenters report work plentiful, many men being employed on jobbing work. Painters report having had a good season, with work in prospect to later part of year.

Metal, engineering and shipbuilding trades.

—Metal workers report work plentiful, with good prospects for the winter months. Shipwrights and caulkers report work very dull at present.

Woodworking and furnishing trades.—

Shingle weavers report work fair at present. Some of the mills are closed, the balance cutting for the American trade.

Printing and allied trades.—

Printers report work plentiful, many of the craft working overtime.

Food and tobacco preparation.—

During the past month work with cigarmakers has been slack, owing to overstock and other causes.

Transport.—

A demand is made for deckhands. Trade on the river boats is good, a large amount of product being shipped by the farmers. A large fruit crop added to the amount of shipping done. Street railway employees report work plentiful. The passenger and fruit trade is good. During the past month the men employed by the B. C. Electric Railway Company were informed that the dividend on the profit sharing basis would be about \$25 per man, the manager expressing the hope that the next year it would be \$40 per man.

VANCOUVER, B.C., AND DISTRICT.

Mr. Geo. Bartley, Correspondent, reports

as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

Labour in all lines, excepting book-keepers, clerks and like, has been very generally in demand. Towards the end of the month rain interfered with outside work, and will interrupt building operations till next spring. It is announced that a new seven-story block will be started at once on the corner of Abbott and Hastings Street, and is to be finished by the new year. Business keeps well up to the average, and merchants as a whole state that they have no cause to

complain. Monthly collections are generally reported satisfactory. Creamery and dairy butters are steady. New laid eggs are very scarce at 40 cents a dozen. Apples are being shipped here in large quantities. For fine fruit there is good demand. The hardware trade is very active, especially in the building lines. Excepting among the railway blacksmiths and news printers everything is peaceful and settled.

The new high school building contract has been let to contractor McLucky for \$72,000. Work will be started at once.

CONDITION OF PARTICULAR TRADES.

Printing and allied trades.—Job hands, 8½ hours for \$3.50 till May 1, 1904, when eight hours will constitute a day's work. News printers work eight hours per night for \$3.75; eight hours day for \$3.60. News printers ask \$4.50 for night work and \$4 for day work by October 1, 1903. The matter will be settled by arbitration. Trade generally good.

Clothing trades.—Tailors report work fair to middling, with all hands at work.

Transport.—The B. C. Electric Railway Company distributed \$7,500 equally among all its employees, from the boy to the manager. Hence they are equal sharers in the profit distribution, and received a cheque for \$25 each for 1903. Manager Buntzen is being congratulated on the success of his scheme.

Metal, engineering and shipbuilding trades.—The blacksmiths and their helpers on the Pacific division of the Canadian Pacific Railway Company quit work on Wednesday 16th inst., at 10 o'clock a.m. The trouble arose through the company not being willing to pay them 35 cents an hour, according to the terms of a schedule presented on May 1, 1903. Formerly the smiths received a minimum rate of 30 cents an hour, 56 hours a week. The Canadian Pacific Railway at that time gave them an

increase of 2 cents an hour, with the understanding that at a future date their demands would be granted. In due course the committee again met the officials, but they refused to give them two increases in one year. The helpers demanded an adjustment of rates, and asked for 2 cents an hour increase. On September 28 the men returned to work, having received a satisfactory promise from the company.

VICTORIA, B. C., AND DISTRICT.

Mr. J. D. McNiven, Correspondent, reports as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

The condition of the labour market remains about the same as during August. Trade generally is fair and employment good, except with carpenters and shipwrights. Two important matters were permanently settled during the month of especial interest to the building trades, one being the letting of the contract for the erection of the Carnegie library to cost \$50,000; the other being the ratification of the contract between the city and the Canadian Pacific Railway Company for the erection of a tourist hotel. The company agrees to erect a hotel to cost not less than \$300,000. The plans are now being prepared, and it is generally believed that they will call for an expenditure in excess of the limit prescribed. Actual operations will not be commenced before next summer. Harmony prevails between employers and employees.

CONDITION OF PARTICULAR TRADES.

Building trades.—For carpenters there is not work enough to keep all employed. Bricklayers and masons are busy. Painters and decorators are fairly well employed. Plumbers have all the work they can attend to.

Metal, engineering and shipbuilding trades.—Moulders are fully employed. For machinists work is fair. Electrical workers and

linemen are also fairly well employed. Blacksmiths, boilermakers and iron ship-builders are also well employed. With shipwrights and caulkers very little employment is offered.

Printing and allied trades.—Throughout each department of the trade employment is good. There was an extra but temporary demand for printers during the month.

Clothing trades.—Trade is slack with journeymen tailors, while garment workers are still busy.

Food and tobacco preparation.—Bakers report trade good, while cigarmakers report trade as very dull.

Leather trades.—Harness makers and saddlers are kept well employed.

Miscellaneous.—Barbers, clerks and delivery employees report satisfactory conditions and a fair amount of employment.

Transport.—Steamboat men, ship labourers, street railway men, hack drivers and teamsters, all report employment good.

Unskilled labour.—Unskilled labour is fully employed.

NANAIMO, B.C., AND DISTRICT.

Mr. A. E. H. Spencer, Correspondent, reports as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

The condition of the labour market in this district has shown very little change since last month, there being plenty of men to more than fill all demands for labour. In commercial circles business is fair, owing to the settlement of the labour troubles. There have been no changes in wages during the month. There is a generally settled feeling among the labouring men which is doing good to all enterprises and to merchants as well.

CONDITION OF LOCAL INDUSTRIES.

Fishing.—There is nothing doing in the fishing business at this time of the year.

Lumbering.—In the lumber trade the mills are still quite active, filling demands from the North-west, but business is quiet in the logging camps, owing to there being a surplus of logs on the market, and although the logging camps are working fairly steadily, there is no demand for men, there being more on hand than there is work for.

Mining.—In the mining (coal) industry business is good, there being steady work at the different collieries, though there is still a large number of men out of employment. There are indications, however, of an improvement in the near future. In the quartz mining sections of the district, the various properties that are being worked are going along steadily, although at present they are not employing a very large number of men.

CONDITIONS OF PARTICULAR TRADES.

Building trades.—In the building trades there has been very little doing, in fact this has been a very poor season for building of all kinds. Owing to the strikes in the early part of the year very little improvement was started, and it was too late when the troubles were settled to affect these trades.

Metal, engineering and shipbuilding trades.—Blacksmiths and carriage makers report business as fair, with plenty of men to fill all places.

Printing and allied trades.—Printers report business as fair at present.

Food and tobacco preparation.—Cigar makers report business as good.

Transport.—Teamsters and express men report business as poor and unsteady for the time of year.

Unskilled labour.—Unskilled labour has not found much to do in this district outside of the mines.

DISTRICT NOTES

At Ladysmith.—The smelter is running full blast and keeps increasing its capacity,

which gives employment to a good many men. On the west coast of the Island there is very little doing outside of one or two properties and in the farming sections.

During the month the union at the Cumberland mines surrendered their charter as the officers of the union were unable to procure work.

THE TRADES AND LABOUR CONGRESS OF CANADA.—NINETEENTH ANNUAL CONVENTION.

THE nineteenth annual meeting of the Trades and Labour Congress of Canada convened in Victoria Hall, Brockville, Ont., on Tuesday morning, Sept. 22, Mr. H. J. McGee, president of the Brockville Trades and Labour Council, greeting the delegates on behalf of organized labour, and the Mayor of the municipality presenting the civic welcome. The fraternal delegate from the American Federation of Labour during the formal proceedings of opening extended greetings on behalf of the organized wage-earners of the United States; the Vice-President of the Congress, Mr. Jas. B. Mack, spoke of the growth of labour organization in the Dominion; the president of the International Union of Boot and Shoe Workers referred to the fact that this was the first time that the Boot and Shoe Workers were represented at the Congress by women delegates, and Mr. A. W. Puttee, M.P., urged the need of careful deliberation in all matters which would be brought before the convention.

Address of the President.

Mr. John A. Flett, president of the Congress, replied to the addresses of welcome, after which the annual address was read as follows:—

To the Members of the Trades and Labour Congress of Canada:—

FELLOW DELEGATES—In opening this the Nineteenth Session of the Trades and Labour Congress of Canada, it gives me much pleasure to see so many of the old familiar faces, and to welcome the representatives of the various organizations of the working people, representing all branches of industry in the Dominion of Canada.

The past year has been one of unusual industrial activity, the enormous growth of our Canadian industries, coupled with a bountiful harvest, has caused

a greater demand for labour, and with it greater increase in the cost of living, yet wages have not kept pace proportionately with the enhanced cost of living or the general prosperity of the country. Many trade movements have taken place this year for better conditions, and for a share in the general prosperity to which our people were justly entitled, but denied them by the unreasonable attitude of employers' associations and their members. Owing to the active hostility on the part of the Employers and Manufacturers' Associations seeking to hamper and disrupt our movement, an unusual amount of work has been placed upon your Executive Committee in meeting this opposition, and a greater demand has been made upon their time than in any previous year in the history of the Congress. A detailed account of the work performed will be found in the report of your Executive.

An effort on the part of the above mentioned associations was made to prejudice the public against our unions and to pave the way for the introduction of legislation such as has been introduced in the Senate by Senator Loughheed and Senator Bêlique, and passed by that body. Had these measures become law, they would not have accomplished the object aimed at, but would have widened the breach between employer and employee, and engendered strife and bitterness where harmony and good-will should exist.

The action on the part of these unions of employers in attempting to destroy the unions of the working people is to be regretted. Trade unions have come to stay, and no amount of persecution, prosecution or retrograde legislation can stop their onward progress. They are the outgrowth of the requirement and economic condition of the times; while not perfect, yet they are as perfect as any other form of human society. Their mission is to protect the weak and defenceless and uplift the toilers in all lands; to take them from the quagmire of poverty and wretchedness and place them on the highlands of prosperity. That trade unions are constantly improving in their methods and organization is very apparent, and I believe that on the whole the employer and employee are coming closer together. This can be brought about more rapidly by a proper understanding of the relationship of one to another, and a due regard for the rights of each. This is being hastened by means of conciliation and arbitration. I would favour trade agreements between the representatives on each side. I think it is possible to find a common ground where employer and employee can meet with honour and satisfaction to both. This has been demonstrated by agreements made between unions of employers and workmen in many branches of industry. To be successful there must be organization with discipline in order to enforce a due observation of these agreements and all contracts religiously lived up to. Educational work among both employers and employees is necessary; it is the crying need of the hour and is very evident to those who have had experience in bringing about adjustments in industrial disputes.

The importance of the many questions that will require your attention cannot be passed over lightly, but should receive careful consideration and thought, and only matters of the most serious import should

be referred to your executives for action. From the experience of the past, I do not deem it wise to burden the various executive committees with resolutions of only secondary importance. I think better results will be accomplished by your parliamentary committees in pressing for a limited number of reforms.

I would direct your attention to the necessity of establishing a legal defence fund to protect our interests wherever necessary. Indications are to the effect that our movement will be confronted with intricate questions of law in the future, much more so than in the past, and, if means can be devised, the engagement of a permanent solicitor, one who would make a specialty of this kind of work, is necessary.

The importance of the work of this Congress also demands a thorough revision of our present constitution and laws, defining more clearly the respective duties of its officers and committees, and that a standing committee on constitution and law be appointed to whom should be referred all proposed changes and amendments.

I am of the opinion that the per capita tax of our federal unions, which are chartered direct by the Congress, should be increased to four cents per member per month, in order that more funds may be provided to carry on the work as it should be done.

This session of Parliament has been a lengthy one, yet little legislation has been enacted of a substantial character in the interest of labour. The necessity of having more labour representatives in the House of Commons was never more manifest than during the present session.

Our friends, Messrs. A. W. Puttee and R. Smith, have rendered splendid service, both to our country and the cause of labour, and demonstrate what is possible of accomplishment had we a group of such men in the House. Nor would it be right to pass over without special mention the good work performed by our friend, E. F. Clarke, M.P., of Toronto, in behalf of labour. While it is true that we have a number of friends on both sides of the House who have stood manfully for the rights of the working people, yet I am convinced that much more would be accomplished if we were to emulate the example set by our fellow trade unionists in the British Isles, in electing labour representatives to Parliament irrespective of the old political parties.

The methods followed for years by our Congress in sending deputations to wait upon the Government has not proven effective, and little or no return has been received from this expenditure of time, energy and money—no matter which party happen to be in power at Ottawa.

Every candidate for parliamentary honours should be pledged to take action for the immediate abolition of the Senate, which has proved a costly and useless appendage to our legislative machinery, composed as it is almost wholly of a class entirely opposed to our interests, and in close sympathy with our bitterest and most unreasonable opponents.

The poll tax upon Chinamen entering Canada has been increased from fifty to five hundred dollars. This will no doubt have a restraining influence upon the number entering this country. This is but tardy justice to the people of the province of British Columbia. Continuous agitation against the admission of these people will, no doubt, in time result in their entire exclusion.

The question of immigration should be dealt with, and some action taken that will prevent the inducing of people coming to this country by Government agents and others, through misrepresentation by the manufacturers' associations, whose only purpose is to secure cheap labour at the expense of the community.

During this year many instances are reported where large numbers of mechanics have been induced to come here, under gross misrepresentation concerning the rate of wages paid and certainty of permanent

employment, only to find that they were required to fill the places of citizens out on strike for better conditions. An emphatic protest should be entered against the expenditure of large sums of money by the Government which may be used for this purpose in the interest of any particular section of the community.

A more rigid medical examination should be made of all emigrants entering Canada so as to prevent those afflicted with disease from going among our people.

The decision of the Government to build a Transcontinental Railway at the public expense, and lease it to a private corporation, is one of the most important Acts passed by the present Parliament. It is very much to be regretted that the Government refused to adopt Mr. Puttee's amendment, providing that the Government should operate and control this railway in the public interest. Had the question of public ownership and operation been submitted to the people, I am of the opinion that they would have given an unmistakable pronouncement in favour of Government ownership and operation, in view of the fact that the Intercolonial Railway is now operated on that plan. Its continuation, I am sure, would have been in the interest of the whole people.

Among other matters a clause was inserted in the Railway Act by the Hon. Mr. Fitzpatrick to the effect that when any Government assistance is given to a railway, in the shape of either a subsidy or guarantee, the company shall pay such wages as prevail in the district where the work is performed, and in districts where there is no current rate of wages, the rate paid shall be fair and reasonable, to be determined by the Minister of Railways in case of disagreement.

During the discussion on this clause in the report, some doubt was expressed by several members as to how far this would prove effective. The question was raised as to whether the company could contract itself out of the obligation to pay the current rate of wages, and also as to whether the matter did not come properly within the powers of the Provincial Legislatures.

Ultimately Mr. Fitzpatrick agreed to a suggestion offered by Mr. E. F. Clarke, that a declaration be required from the contractor that he has complied with the fair wage provision. This could be provided for by regulation. With this understanding the clause was agreed to. If the Fair Wage clause adopted by the Government is to be of any benefit to the working people of this country, it should apply to all Government contracts, and its provisions strictly carried out.

Provision has also been made with reference to Safety Appliances, 'that all box and freight cars purchased or leased by Canadian railways, shall be equipped with them.'

During this Session of Parliament, the Federal Government appointed a Commission to inquire into certain industrial disputes in the province of British Columbia, the Commissioners being the Honourable Gordon Hunter, Chief Justice of British Columbia, and the Rev. Elliott S. Rowe, of Vancouver, B.C. This report has been brought down. After full inquiry into numerous disputes between the owners of coal and metalliferous mines and their employees, and between transportation companies and their employees, the report draws a sharp line of distinction between the legitimate trade union and 'a class of so-called union which is not really a trade union at all, but a secret political organization.' To the latter class are assigned the American Labour Union, the Western Federation of Miners and the United Brotherhood of Railway Employees, which are in confederation with each other and whose leaders were engaged in a conspiracy to sweep all the employees of the Canadian Pacific Railway into the United Brotherhood and all coal miners into the Western

Federation, with a view of being able to stop all transportation and all mining whenever it might appear expedient.

In connection with the foregoing it may be as well to state that the so-called United Brotherhood of Railway Employees made application to the American Federation of Labour, July, 1902, for a charter, and that the Executive Council, then in session at San Francisco, peremptorily declined to either charter that body or recognize it in any way, the A. F. of L. Executive Council regarding the formation of the U. B. of R. E. as inimical to the interests of the working people everywhere.

For the purpose of remedying the condition of affairs thus described by the Commission as existing in British Columbia, they make certain recommendations, while not expressing any opinion as to the probable effect of these recommendations in so far as the organizations directly referred to are concerned. I do not approve of many of the conclusions arrived at by the Commission, nor do I deem their application to be in the interest of the 'legitimate trade unions.' As the recommendations of the Commission will undoubtedly have weight with the Government in directing future legislation along the lines suggested in their report, the Congress should give a clear and comprehensive pronouncement of their views upon the recommendations of the Commission, for the guidance of your Executive Committees as well as our affiliated unions.

The incorporation of trade unions has been advocated in many quarters by our opponents, who, having resorted to every means at their command to destroy our unions heretofore, now propose to accomplish their purpose through the medium of incorporation and the law courts. It is not the object of corporations to incorporate to assume greater responsibility. Under existing conditions it would not be advisable for our unions to incorporate as we are not money-making institutions. While we bargain collectively for certain wages, we rarely undertake to supply labour by contract. Our agreements with employers are usually that no increase in wages will be again demanded for a given time. I know of no instance in which a trade union incorporated or unincorporated has ever recovered damages from an employer where he has violated an agreement.

Incorporation would open the door to endless litigation against our unions for the most trivial causes by our members as well as employers. Lose or win, in either case the end would be the same, resulting in our funds being frittered away in expensive law costs. We now exercise a recognized legal right to make rules to govern our unions without reference to the judiciary. As members of trade unions we are now amenable to the law for any overt act. We will never consent to incorporate until laws are enacted that will fully protect the rights we have secured by years of trade union activity.

In conclusion it would not be proper if some mention were not made of the great labour movement of the continent, as represented by the American Federation of Labour, and our friendly relationship thereto.

We have found the Executive Council of that body at all times willing to co-operate with and assist our Congress as the recognized representative legislative mouthpiece of the legitimate labour movement in Canada.

Let me again direct your attention to the serious and important nature of the task set before you, and I would again earnestly request that you bring to the consideration of the various questions your best judgment, to the end that we may find a proper solution, that will eventually work for the accomplishment of those reforms so necessary to our well-being and that of our fellow workers throughout this broad Dominion.

Report of Credential Committee.

The report of the Credential Committee, presented at the opening of Tuesday afternoon session, which was adopted without dissent, recommended the seating of 120 delegates, representing nineteen trade councils, sixty-one federal and trade unions and one fraternal delegate.

Recent Labour Legislation.

The report of the General Executive Committee, after dealing with the interview with the Dominion Government on April 4 last*, referred to the following measures brought before Parliament at the present session:—

An Act to aid in the settlement of Railway Labour Disputes.

An Act respecting and restricting Chinese Immigration.

An Act to amend the Law respecting the Department of Public Printing and Stationery.

An Act to amend the Act respecting the Safety of Ships.

An Act further to amend the Criminal Code, 1892.

An Act respecting Penny Banks.

An Act to amend and consolidate the law respecting Railways.

An Act to promote the Safety of Railway Employees.

An Act to amend the Conciliation Act, 1900.

An Act to amend the Railway Act.

An Act to amend the Steamboat Inspection Act, 1898.

An Act to amend the Act to restrict the Importation and Employment of Aliens.

Reference was also made to the Bills of Senator Loughheed and Senator Béique which passed the Senate, but which had not as yet been discussed in the House of Commons.

Trade Union Affiliations.

On the question as to whether all trades and labour councils and federal labour unions in Canada should be placed by charter under the jurisdiction of the Congress, which was submitted at the Berlin convention, the report deals with the manner in which the matter was brought before the American Federation of Labour, and gives

* A report of this meeting was published in the issue of the *Labour Gazette* for the month of May, vol. iii. No. 11, page 868.

the following as the agreement which was finally arrived at :—

1st. That the A. F. of L. will make it a qualification of issuing charters to Trade and Labour Councils in Canada that they will affiliate with the Trades and Labour Congress, and central bodies throughout the Dominion now holding A. F. of L. charters will be instructed to take similar action.

2nd. That trade affairs in the central Trades and Labour Councils in question shall be transacted along the lines of international trade unionism.

3rd. That all local unions in the Dominion of Canada affiliated through international unions, or holding charters direct from the American Federation of Labour, be notified to become affiliated with the Trades and Labour Congress of Canada for the purpose of making it a more potent factor to secure the adoption of favourable legislation for the members by the Federal and Provincial Parliaments.

Reports of Provincial Executive Committees.

Prince Edward Island.—The report from this province deals only with the breach which exists between the A. F. of L. and the Congress, and urges that steps be taken to remedy affairs.

Nova Scotia.—After dealing with the progress of the formation of labour organizations, reference is made to a number of strikes which occurred in the city of Halifax. The report also gives an account of the award of the arbitration board appointed under the Act of the provincial legislature in connection with the dispute between the master builders and the carpenters. Mention is made of the passing by the local legislature of a Conciliation Act in regard to industrial disputes, and the committee mentioned its regrets that a factory inspector under the provisions of the Factory Act had not yet been adopted.

New Brunswick.—The committee reported the formation of 14 labour organizations in the city of St. John and the amalgamation of the two longshoremen's unions, which had been separate institutions for 13 years. The Congress was thanked for the assistance given to the freight handlers and checkers in their endeavour to improve their conditions. At the last session of the provincial legislature the Workmen's Compensation Act was passed, and the committee states

that an effort was made to have a factory inspection law also enacted.

Quebec.—The labour movement in the province, and especially in the city of Montreal, has developed, according to the report, in a marked degree during the year. Reference was made to the strikes which occurred in the city of Montreal. Work had been abundant, but there was no knowledge of any industry being impaired by the lack of men. The committee reported its interview with the provincial ministers on the following subjects :—

The abolition of the lease system for the renting of houses now in vogue in the province of Quebec ; the abolition of property qualifications for election to the municipal councils ; the establishment of gratuitous and compulsory education of children ; that the law relating to the inspection of Mutual Benefit Associations be not applied to labour organizations ; the passing of an Act to protect labour unions against the jurisprudence established by the Privy Council in the Taff Vale case.

The report closed by stating that after the Legislative Assembly had voted the abolition of property qualification for municipal offices, the Legislative Council refused its consent to the measure.

Ontario.—The report gave an account of the growth of labour organization and stated that there were 51 strikes and lockouts during the year. The statement was made that the employers were using methods to congest the labour market in the centres of population by inducing European labour to come to this country through agencies of the Manufacturers' and Employers' associations. The interview with the Ontario government was recorded, the subjects discussed being as follows :—

1. The protection of street railway conductors.
2. That the Ontario factory inspectors' staff be augmented and that the operation of the Act be transferred to the Labour Bureau.
3. *Re* the retention and confiscation of wages by employers.
4. Central prison contract system.
5. Respecting a measure for the protection of public health, *re* the removal of old paper from walls.
6. Providing that no trade union shall be liable for damages for any act of omission or commission during any labour trouble, unless the union is a concurring party.

Reference was made to the withdrawal of the Bill providing for a board of conciliation

and arbitration in labour disputes, and to the passage of an Act respecting boards of education in certain cities. Attention was called to the necessity for legislation restraining the granting of injunctions, and to prevent the bringing of immigrants to Ontario under misrepresentation. In regard to factory inspection, it was stated that there was necessity for more inspectors, and the passage of the following amendment to the Factory Act was recorded :—

It shall not be lawful to have a bed-room or sleeping place on the same floor of a building as a shop, bake house or factory, nor to have a bed-room or sleeping place in the same building as a shop, bake house or factory without the written consent of the inspector.

It shall not be lawful to have a stable under the same roof as a factory, unless there is between the stable and factory sufficient brick or other partition wall approved by the inspector separating the one from the other.

Manitoba.—After mentioning the sympathetic strike of the United Brotherhood of Railway Employees on the C. P. R., the committee reported having interviewed the Provincial Government in reference to the passing of an Act to protect trade union funds, and also having urged the enforcement of the Factory Act. The tremendous proportions reached by immigration during the year is referred to, and the statement made that many branches of industry were flooded with mechanics from the old country; the methods of immigration agents were criticised, and reference made to the circular forwarded by the Winnipeg Trades and Labour Council to the trades councils and press of Great Britain. The Congress was recommended to issue a manifesto in Great Britain setting forth the condition of labour in the Dominion and to protest to the Government against the action of immigration agents in the old country.

British Columbia.—The greater part of the report was devoted to recording the series of labour disputes which occurred during the year, and the appointment of the Royal Commission to investigate the industrial disturbances and labour conditions

generally in the province was referred to as one of the important events.

An account of the dissension among the labour element was given, which shows that the Vancouver Trades and Labour Council is now opposed to the Congress.

Report of Committee on President's Address and Executive Committee's Reports.

The recommendation of the president for the establishment of a legal defence fund was approved by the committee, but defeated in the Congress. The clause favouring the appointment of a committee on constitution and by-laws was adopted, but the proposal to increase the per capita tax was not concurred in. Referring to the clauses *re* immigration, the committee submitted a resolution, which was adopted, that the Congress register with the government an emphatic protest against the action of immigration agents in the British Isles who misrepresent conditions of labour in Canada to British workmen, and also against the failure to provide necessary safeguards at Canadian ports to exclude undesirable immigrants excluded from the United States. The committee reported in favour of A. W. Puttee's amendment to the Grand Trunk Pacific Bill calling for government control and operation of the railway, and expressed dissatisfaction with the present machinery of government which fails to provide for the submission of such an important question to the people through the principle of the referendum.

On the provincial executive committee's reports the following recommendations were concurred in :

That the general executive committee ascertain the significance of the breach between the A.F. of L. and the Congress in the province of Prince Edward Island with a view to adjusting the strained relations.

That an endeavour be made to secure an increase in the number of factory inspectors for the province of Ontario.

That the Ontario legislature be asked to enact legislation for the protection of trade union funds.

Thanking the fraternal delegate for his services in securing an increase in the grant from the A.F. of L. to the Congress.

Union Label Matters.

The report of the Label Committee called attention to the action of the Senate in defeating the Bill to legalize union labels, and urged that the work be actively continued. The executive was instructed along the lines suggested, and the deficit of the Label Committee of the Toronto District Trades Council was assumed by the Congress.

A motion endorsing all legitimate trade union labels was also adopted.

Constitutional Changes.

The question of readmitting delegates from the Knights of Labour was introduced by an amendment to the constitution offered by delegates from the Toronto District Trades Council, which body had instructed its representatives in this respect, and was at the present time permitting delegates from the Knights of Labour to hold seats in the council. After a lengthy discussion the motion was defeated by a substantial majority.

A further amendment to the constitution, proposed by a committee appointed in accordance with the suggestion of the president, was to provide that delegates to the Congress might be members of international unions or national unions where no international exists. This proposition caused a lively debate, and was finally defeated by a large majority.

Two amendments providing for a reduction of officers on the general executive committee and constituting a committee on laws, as well as a few minor details, were concurred in.

Sunday Labour.

A deputation from the Lord's Day Alliance referred to the recent decision of the Imperial Privy Council declaring the Ontario Lord's Day Act *ultra vires*. The Lord's Day Act of 1845, however, it was stated, was still in force and practically covered

the whole ground. The Alliance was now considering where to go for further legislation and the assistance of the Congress in whatever course was decided on was requested. The president in reply referred to the fact that trades unions had endeavoured to discourage Sunday labour by charging time and a half and double time for work performed on the Lord's Day. In compliance with the request of the Alliance a resolution was accordingly adopted reiterating the position previously taken by the Congress on the work of the Lord's Day Alliance and expressing willingness to assist in every way possible to restrict Sunday labour.

The British Columbia Labour Commission.

On the clause in the president's address dealing with the appointment of a Commission to inquire into industrial disputes in the province of British Columbia, a special committee was appointed, and the following report of the same was received and approved :

To the Officers and Members of the Trades and Labour Congress :—

Your committee regrets that the necessity of reporting early compels it to deal generally with the report under consideration, instead of with that amount of detail that its character calls for.

We find that although the commission was formed to inquire into distinctly industrial troubles, labour interests and experience were neither directly or indirectly represented on the commission. This fact no doubt accounts for the biased and partial nature of the commission's findings in contrast to the recommendations and findings in the reports of the Crow's Nest Pass and Chinese Immigration Commission, on each of which bodies there was a representative labour man. The committee is of the opinion that the British Columbia Commission was not constituted in a fair manner.

The commission was appointed to inquire into and concerning the nature and causes of disputes in British Columbia. A report based on a full and deep inquiry of this nature would have been of great value at this time, but we cannot find that we have a report of that character before us. The ground that appears to be taken is that the organization of a trade union is the natural cause of a strike, overlooking the causes that make the trade union an absolute necessity. For instance, Mr. Dunsmuir, the owner of large coal mines on Vancouver Island, finding that a union had been organized among the coal miners immediately posted a notice closing the mines. Surely it is reasonable to say that it was the action of the employer and not of the employee that was the cause of the stoppage that ensued. Why was not the locking out company censured in this instance.

With the general conclusions of the commissioners your committee do not agree, with the exception of some of its subdivisions where some good economic doctrine is laid down. Generally speaking though it appears that the unwise actions and methods of some named organizations are relied upon to excuse some drastic recommendations which, if carried into effect, would strike a severe blow at all labour organizations.

The commissioners rightly insist that a person has the right to work for or employ whomsoever he pleases without insult, molestation, intimidation or oppression by any person or union. But then the commissioners go on to contradict their own statement by declaring that union employees have no right to interfere or to strike because of the employment of such substitute (non-union) labour. To this latter statement we emphatically object.

The commission report favours compulsory incorporation of trades unions, which evidences a desire to hedge them about with restrictions and limitations, and this without their consent. Under present conditions threatened incorporation is equal to threatened strangulation of organized labour.

In thus briefly dealing with the report of the British Columbia Labour Commission, we have no intention of excusing overt acts, extreme revolutionary methods or breach of faith or contracts by organizations, either of employers or employees. We would strongly recommend to our fellow workers in the Pacific province to adopt those methods and that form of organization that have been tried and perfected by the international trades unions, and that have in their steady operation resulted in the direct benefit and general uplifting of the workers on this continent.

Various Resolutions Submitted.

During the convention resolutions to the number of 55 were submitted for consideration, to the Committee on Standing Orders and Resolutions. The following is a brief reference to the more important of those which were concurred in :

Importation of Workmen.

On the question of importing workmen to Canada, the following resolution was passed :

Whereas, in view of the attitude of many of our manufacturers in being ever ready to resort to any means available to defeat the honest efforts of organized labour in seeking its just rights and privileges ; and whereas, one of these means has been the importation of men to replace Canadian workmen who have been forced to strike to better their conditions, therefore, be it

Resolved, that this Trades and Labour Congress of Canada go on record to use all reasonable means in its power to have enacted such laws as will make the procuring of importation of men under false pretenses a punishable offence.

Another resolution on the same subject was submitted, and, on motion, the general executive of the Congress was instructed to call the attention of the Dominion Government to the matter and ask for the passage of an anti-contract labour law.

In this connection a motion was adopted endorsing the action of the secretary of the Ontario Bureau of Labour, in placing before the British workingmen the true state of labour in Canada. The secretary of the Congress was also instructed to write to the editor of *Truth* in London, Eng., and explain fully the industrial conditions existing in the Dominion.

In further reference to the above question, the labour organizations of Canada were requested to open up communication with their sister unions in Great Britain.

The Department of Labour.

Two resolutions having direct reference to the Dominion Department of Labour were introduced and adopted without objection. The first of these dissented from the opinion of the Canadian Manufacturers' Association, as expressed at the recent meeting of that society,* that men in the labour movement should not be appointed to responsible positions in the Department of Labour, and the resolution further stated that the Congress insist that the Department be not permitted to be used as an agency to overstock the Canadian labour market. The second motion endorsed the action of the officials in the Department of Labour for their denunciation of misrepresentation of labour conditions in the Dominion, and the secretary was instructed to telegraph to Sir Wilfrid Laurier and ask him to receive a deputation empowered to make a statement on behalf of labour to the Government. In reply to the despatch sent to the Honourable the Premier, Sir Wilfrid Laurier expressed his willingness to receive the delegation from the Congress on Monday, September 28. Upon receipt of the message a delegation was appointed to present the matter to the Government.†

* For a report of the action of the Association in this connection, see another page of the present issue.
† Immediately following the report of the proceedings of the Congress will be found the full text of the resolutions above mentioned, together with the memorial presented to Sir Wilfrid Laurier, and a reference to the reply by the Hon. Minister of Labour).

Assisted Immigration.

The resolution asking for the abolition of assistance to immigration, which was adopted, stated that the system taxes the wage-earners to supply funds to flood the labour market with the cheapest labour from the poorest countries; that it subjects the wage-earners to the fiercest competition of free trade, but renders the competition more intense by the assistance given to aid immigration to slaughter the labour market, and while this compels the labourer to sell his labour at the lowest possible price in competition with the whole world, the employers are protected from foreign competition by a tariff often exceeding 50 per cent. Thus compelling labour to sell cheap and buy dear, while the employers are enabled to buy cheap and sell dear.

Against Income Tax.

The following resolution was referred to the executive committee of the province of New Brunswick :

Whereas, the city of St. John, N.B., is the only city in Canada where the toiler is called to pay taxes on his small yearly earnings; therefore, be it

Resolved, that Congress bring this matter to the attention of the provincial government, and ask for the passage of an Act freeing the toiler on small income from taxation, and at the same time grant the franchise on the payment of a poll tax.

Quebec Affairs.

The following resolutions, having direct reference to Quebec, were referred to the executive committee of that province :

To ask that the sanitary laws of the city of Montreal be approved by the Quebec legislature.

That the provincial government be urged to adopt a free and compulsory system of education.

For amendments to laws of the province in regard to mutual benefit societies so as to avoid any mistaken action being taken against labour organizations.

That the legislature be urged to substitute the present lease system of the province of Ontario for that now in force in Quebec.

On a resolution declaring against exemption from taxation, except orphanages, the Quebec executive was instructed to consider the proposition at its first meeting.

Miscellaneous Resolutions.

The following resolutions dealing with a variety of subjects were favourably considered by the delegates :

To ask the Ontario government to pass an Act making it compulsory for all stationary engineers engaged in the operation of plants having boilers of 25 h. p. or over to hold provincial certificates.

Instructing the various provincial executives to ask the provincial legislatures to enact that all open street cars be provided with passage ways, through them.

Condemning the action of musicians who are members of international unions in becoming members of national musical organizations where international musical unions exist.

Approving of the new schedule of wages as prepared by the carmen on the I.C.R., and which was endorsed by the Halifax Trades and Labour Council, and instructing the executive committee to render the carmen all possible assistance in their endeavour to have the schedule adopted, as well as to try to secure an 8-hour day for all workmen on the I.C.R.

In favour of placing independent labour candidates in the field for both parliamentary and municipal elections, and commending the action of the Berlin Trades and Labour Council in this connection.

To urge the Dominion government to pass an Act relieving the employees of the G.T.P. and I.C.R. of the system of compulsory insurance at present in operation.

In favour of a further increase of pay to letter carriers, so that \$2.25 per day would be the minimum after six years' service.

In favour of a fortnightly pay day on the I.C.R.

Approving of the speech of A. W. Puttee, M.P., on the subject of the Grand Trunk Pacific.

Urging that the Dominion government include in the contract for the construction of the G.T.P. the recommendations of the commission which inquired into the grievances of the workmen on the Crow's Nest Pass Railway.

Condemning the principle of appointing to the office of Crown attorney in Ontario men who at the same time hold retainers from corporations of which they are stockholders.

In favour of direct legislation and the initiative and referendum, and of unions affiliating with direct legislation leagues in the various provinces where they exist.

Endorsing marine engineers' request that the granting of temporary certificates to engineers on ships be discontinued.

Asking for the establishment of a government printing bureau for the province of Ontario.

Against the over-capitalization of companies, and asking that the federal and local governments pass legislation prohibiting corporations from doing so.

Authorizing the executive committee to grant a charter free of charge to the proposed trades and labour council in the city of Quebec.

Executive Session.

On Thursday afternoon the Congress went into executive session behind closed doors. The report of the proceedings as given to the press stated that the question of a legal defence fund for the Congress was reintroduced by a resolution from the Hamilton

Trades and Labour Council, and it was finally decided to refer the matter to the executive committee to formulate the basis of such a fund and submit the same to the local unions affiliated with the Congress, with the view that, if approved, the fund shall be established.

The resolution endorsing the action of the British Trades Congress in their condemnation of the fiscal policy of the Hon. Joseph Chamberlain was adopted, and the secretary instructed to inform the British Trades Congress of this action.

The Secretary-Treasurer's Report.

The secretary-treasurer submitted his annual statement, showing that the receipts were in excess of the previous year.

Summary.

| | |
|--|-------------|
| Balance from last year..... | \$ 546 84 |
| Per capita tax, charters, &c..... | 2,266 50 |
| A.F. of L. grant..... | 500 00 |
| Received from unions for legislative purposes..... | 445 90 |
| Advertising..... | 100 00 |
| Total..... | \$ 3,858 54 |
| Expenditure..... | 3,363 38 |
| Balance..... | \$ 494 96 |

Summary of gains and losses by provinces in number of unions affiliated with the Congress, number of members and revenue:—

Ontario.

| | |
|-------------------------------|----------|
| Gain in number of unions..... | 10 |
| " " members..... | 4,170 |
| " revenue..... | \$698.58 |

New Brunswick.

| | |
|-------------------------------|---------|
| Gain in number of unions..... | 8 |
| " " members..... | 365 |
| " revenue..... | \$82.36 |

Nova Scotia.

| | |
|-------------------------------|---------|
| Gain in number of unions..... | 2 |
| " " members..... | 143 |
| " revenue..... | \$20.37 |

British Columbia.

| | |
|---------------------------------|---------|
| Losses in number of unions..... | 11 |
| " " members..... | 546 |
| Gain in revenue..... | \$20.48 |

Quebec.

| | |
|---------------------------------|---------|
| Losses in number of unions..... | 10 |
| " " members..... | 1,693 |
| " revenue..... | \$32.82 |

Prince Edward Island.

| | |
|---------------------------------|--------|
| Losses in number of unions..... | 2 |
| " revenue..... | \$9.88 |
| Gain in number of members..... | 8 |

There was a loss in revenue from Quebec and Prince Edward Island, while the income from New Brunswick, Ontario, Nova Scotia, North-west Territories and British Columbia was increased.

| | |
|--------------------------------|----------|
| Total increase in members..... | 4,686 |
| " " revenue..... | \$778.99 |

Twenty-two Trades and Labour Councils now hold charters from the Congress, as follows: Toronto, Windsor, Berlin, London, Hamilton, Wallaceburg, Stratford, Ottawa, Chatham, Brockville, Guelph, Woodstock, Smith's Falls, Sarnia, Collingwood, Midland, Galt, Montreal, Victoria, Winnipeg, St. John and Halifax.

Charters were issued to 18 federal labour unions, as follows: Ontario 8, British Columbia 4, New Brunswick 3, Quebec 2, Manitoba 1.

Charters surrendered 19—14 in British Columbia, 2 in Prince Edward Island, 2 in Ontario, 1 New Brunswick.

Charters revoked, 3—1 in Ontario and 2 in Quebec.

Total charters surrendered and revoked, 22, leaving 32 federal labour unions holding charters from the Congress at the present time. Total unions affiliated with the Congress, 234.

The report stated that there was a very large number of unions unaffiliated, and the Congress was asked to devise ways and means to secure a larger affiliation.

Election of Officers for 1903-4.

The election of officers, which was conducted under the Hare-Spence System of voting, resulted as follows:—

President—John A. Flett, Hamilton (re-elected).
 Vice-president—Jas. B. Mack, Montreal (re-elected by acclamation).
 Secretary-treasurer—P. M. Draper, Ottawa (re-elected by acclamation).

Provincial Vice-presidents and Executive Committees.

Ontario—Vice-president, Joseph T. Marks, London.
Executive committee.—E. Empey, Ottawa; Jas. Wilson, Toronto; E. W. A. O'Dell, Hamilton.

Quebec—Vice-president, A. Verville, Montreal.
Executive committee—A. Mathieu, E. Berthiaume and T. Fisher, Montreal.

British Columbia—Vice-president, J. D. McNiven, Victoria.

Executive committee—J. C. Penser, Vancouver; T. H. Twigg, Victoria; Geo. Bartley, Vancouver.

Nova Scotia—Vice-president, F. W. Smith, Halifax.

Executive committee—P. Ring, D. A. Wilson and J. J. Burns, Halifax.

Manitoba—Vice-president, A. W. Puttee, M.P., Winnipeg.

Executive committee—H. Alberts, R. Thoms and A. G. Cowley, Winnipeg.

New Brunswick—Vice-president, Chas. Stevens, St. John.

Executive committee—A. J. Morrison, W. H. Coats and J. J. Donevan, St. John.

Prince Edward Island—Vice-president, Geo. W. Worthy, Charlottetown.

Executive committee—Otto W. Baird, Charlottetown.

Fraternal delegate to A. F. of L.—Jas. Simpson, Toronto, Ont.

The next place of meeting, it was decided, will be Montreal, Que.

MEMORIAL RE DEPARTMENT OF LABOUR.

The following is a copy of the memorial presented to Sir Wilfrid Laurier by the deputation, as above referred to, from the Dominion Trades and Labour Congress on Monday 28th ultimo:—

While thanking you on behalf of the Trades and Labour Congress of Canada, for your courtesy and kindness in granting its executive this interview and before referring to our mission and its urgency and importance, I desire the privilege of apologizing for troubling at a period of the session of Parliament when there are, necessarily, so many urgent calls upon your valuable time. Bearing this in mind we will be as brief as possible in a statement of the reasons for our presence now.

You are no doubt aware, Sir, that an organization known as the Canadian Manufacturers' Association, recently held its annual meeting in the city of Toronto, and that during its sessions it formulated its principles and its aims, as well as gave voice to its opinions in other directions. It is not our intention to deal with all these now. This will be done in due time, and as to which you will be kept informed later on.

What we desire to direct your kind attention to on this occasion will be best indicated by the following resolutions concurred in at the nineteenth annual meeting of the Trades and Labour Congress of Canada, held in Brockville, Ont., during last week, at which there were delegates representing organized labour from nearly every province in Canada, that is to say it was:—

1. Resolved, That this Congress emphatically dissents from the views expressed by the Manufacturers' Association that men prominent in the labour movement should not be appointed to responsible positions in the Labour Department.

That this Congress desires to place on record its approval of such appointments, when made in the public interest.

And, further, that this Congress insists that the Department of Labour be not permitted to be used by the Manufacturers' Association as a recruiting agency to overstock the industrial market of Canada.

2. That this Congress endorses the action of the labour men connected with the Dominion Department of Labour, and Mr. Phillips Thompson, correspondent of the *Labour Gazette* at Toronto, in their fearless denunciation of the misrepresentation of labour conditions in Canada, by Canadian manufacturers and immigration agents in Canada, and the secretary of the Congress is hereby authorized to telegraph the Honourable the Premier of the Dominion, asking him to kindly fix an hour on Monday next to receive a deputation which is hereby empowered to make a statement on behalf of labour to himself and the members of the government.

No doubt, Sir, yourself and the members of your government will have noted the uncalled for attack of Mr. P. W. Ellis upon the Honourable the Minister of Labour, and the query of Mr. Ransford, of Clinton, 'if there was no way to bring the official, whoever he was, to task, (Hon. Mr. Mulock) for such a statement,'—that is, that a report of the association was 'fraudulent.' Very likely the Hon. Minister of Labour is well able to take care of himself in replying to those friends, if he so determines.

It is hardly necessary to point out to the government that the Canadian Manufacturers' Association is nowise lacking in cool and arrogant assumption at all events. It will be observed that, while enjoying much already, it is ever striving for more 'protection' for its manufactured goods, to the great disadvantage of the consumer. At the same time it is most noisy and demonstrative in crying for absolute free trade in the matter of labour importation from all parts of the world. This patriotic association does not shout 'Canada for the Canadians' in the matter of labour. Not it! On the very contrary, although enjoying the full advantage of free labour from abroad and the added stimulus given to the advent thereof by the enormous sums which Canada annually expends in the encouragement of immigration (and amounting this very year to no less a sum than \$600,000), it is boldly out in violent condemnation of the government—a government to which at least 85 per cent of the membership of the Manufacturers' Association is opposed under any circumstance—because that government did not use the Department of Labour and the *Labour Gazette* in the work of securing for that association mechanics and others from Great Britain and the continent to take the places of Canadian workmen who dared to belong to labour organizations, or who sought to secure wages sufficient to meet the increased cost of living in rent, fuel, and many of the necessities of life.

And all this condemnation in face of the fact that such work was not, in any sense, the mission of either the Department of Labour or the *Labour Gazette*. On behalf of the working people of Canada, the executive of the Trades and Labour Congress of Canada protests against the unjustifiable and uncalled for attack of the Canadian Manufacturers' Association upon the Department of Labour, the *Labour Gazette* and the members of the staff of both, and trusts that the Dominion government will treat that attack with the contempt which its brazen effrontery merits.

We may add that the Canadian Manufacturers' Association is representative of only a comparatively small number of the manufacturers of the Dominion, but we recognize that it is noisy, self-important and arrogant, while it has ample financial facilities to bolster up and foster its propaganda. It may be remarked, however, that were its members as candid as they are unscrupulous in assertion there would be

little trouble between them and their employees. For example, that organization, while declaring that it disapproves of strikes and lockouts, and favours an equitable adjustment of differences between employers and employees by any amicable method which will preserve the rights of both parties, actively opposed and claimed that it was successful in having withdrawn the Arbitration and Conciliation Bill introduced in the Ontario Provincial Legislature at its last session by the Hon. F. R. Latchford, Commissioner of Public Works, although the provisions of that measure contemplated an amicable adjustment of differences between employers and employees, while preserving the rights of both parties.

This, Right Honourable Sir, is the reply of the executive of the Trades and Labour Congress of Canada to the attack of the Manufacturers upon the Honourable the Minister of Labour and the employees of the Labour Department.

(Sgd.) EDGAR EMPEY,
P. M. DRAPEY,
A. W. PUTTEE.

Reply of the Minister of Labour.

The Hon. Sir William Mulock, Minister of Labour, replied to the deputation representing the memorial, regretting that there should be any discord between Canadian employers and employees. As to the functions of the Department of Labour the Minister pointed out that they were fully set forth in the statute of 1900, which created the department; they related chiefly to the gathering and disseminating of statistical information and the giving effect to the Conciliation Act. Subsequently, further duties had been added to the department,

but no legislation had cast upon it the duty or power of interfering with immigration. The department, according to the Minister, would be acting illegally if it were to attempt to import workingmen, mechanics or others. With regard to the staff of the department and the charge that its employees were not impartial or fair-minded, the Minister referred to the difficulty of replying to a general assertion, but stated that, so far as he was aware, this charge could not be urged against any individual member. The *Labour Gazette*, he stated, like the *Labour Gazette* of England and unlike the *Bulletin* published by the Department of Labour of the United States, was a medium for the dissemination of statistical information and not of opinions. As to the position of the department, it held, said the minister, precisely the same position in relation to other departments of the Government as the Department of Trade and Commerce, and the Department of Agriculture, and had the same reasons and justification for its existence. The Minister closed his address by expressing a desire that the principle of arbitration and conciliation might receive further extension at the instance of labour organizations and others as a means of settling industrial differences.

NATIONAL TRADES AND LABOUR CONGRESS OF CANADA—FIRST ANNUAL CONVENTION.

At the convention of the Dominion Trades and Labour Congress held at Berlin, Ont., in September, 1902, a resolution was introduced and carried limiting representation in the Congress to such trades and labour organizations as had their headquarters in the United States. Purely Canadian unions were thus debarred from representation, and in order to secure a central body embracing these a new federation of Canadian labour unions was formed, to which the title 'National Trades and Labour Congress of Canada' was given. On September 18th a

constitution for the same was formulated and an executive appointed.

Constitution of the Congress.

The constitution of the Congress as thus adopted sets forth its object to be the uniting of all the labour organizations of the Dominion in the interests of labour, with more particular reference to legislation in the welfare of the working classes, and the organization of 'National Labour Unions' throughout Canada, the fee for a charter and supplies for which was placed at \$10. Re-

See
page
421

presentation was permitted in the Congress from trade councils, national trade unions, national unions and district and local assemblies of the Knights of Labour in Canada, the last named of which had been denied representation by the Dominion Congress in 1902. Provisions were also duly enacted relating to the basis of representation, credentials, annual meetings, revenue, officers, duties of officers and of the various committees. With regard to the first mentioned, National Trade Unions, assemblies of the Knights of Labour, and National Unions were allowed one delegate for each 100 members and under, and one for each additional 100 or majority fraction thereof. National Trades Councils and district assemblies of the Knights of Labour were allowed three delegates each, while two or more trade unions or Knights of Labour Assemblies, whose aggregate membership does not exceed 150, might unite and send one delegate. Proxies were not allowed, and delegates must be members of the bodies they represent.

Opening of the Convention.

The first annual convention of the Congress thus constituted was held in the city of Quebec during the past month, beginning on September 15th and concluding its business on September 18th. As will be seen from the report of the proceedings subjoined, several matters of considerable interest to labour throughout Canada came up for discussion.

Mayor Parent received the delegates, who were over forty in number, with the customary address of welcome, to which the President of the Congress replied. The meetings of the Congress were held in the council chamber of the city hall, which had been placed at the disposal of the convention by the civic authorities.

Address of the President.

The business proper of the Congress was begun at the afternoon session of the 15th

September with the annual address of the President, Mr. Omer Brunet. The President's address was as follows:—

Fellow delegates of the National Unions of Canada:—

It is with pleasure and thankfulness that I extend to you a most cordial welcome; with pleasure, because the movement inaugurated at Berlin, on the 15th September last, receives, by the fact of so large an attendance, a sanction which we had no reason to expect; and with thankfulness on account of the earnestness with which you have accepted the generous offer of His Honour the Mayor of Quebec and of the president of the Central National Trades and Labour Council of Quebec to hold your first session in the ancient city of Champlain.

If we give a glance behind us, we will be easily convinced that Canadian workmen were awaiting only a favourable opportunity to unite themselves more closely in order to obtain by way of legislation the improvement of their social and financial condition.

Indeed, if we consider that our appeal has been listened to from the Atlantic to the Pacific, we have reason to be proud of the results arrived at. The reports which will be submitted to you by the executive are so conclusive that we have every reason to believe that like ourselves you will be satisfied.

For a long time past the necessity of a National union has been felt, and in order to prove it we have only to quote here the words of an eminent man who possesses we may say, a true insight into the future and who is an ardent as well as an enlightened patriot, Mr. Ralph Smith. In his address to the delegates to the Congress of Canada during its session of 1899, he expressed himself as follows:—

‘The necessity for a national union, even for an international one, is urgent.’

Well, is not your presence here and the opening of the first session of the National Congress of Trades and Labour of Canada, the realization of that great idea expressed by our eminent and distinguished compatriot?

It should be well understood, that in refusing to accept the flag of the American Federation, we had no desire to issue an ultimatum or to make a declaration of war. What we did desire, and what we still desire was to affirm our national autonomy, not to change our allegiance, though keeping for our brother workmen on the other side of the line all the sympathies they deserve, and according to them on this side all the advantages which we consider as not prejudicial to the interests of Canada.

Do not forget it, many before us have said and repeated it: it is only by a reform of our laws, and in no other way, that we will be able to improve our condition. And in order to obtain that end, we cannot do better than unite ourselves closely under the protection of the national flag of which the motto is and must remain ‘Canada for Canadians.’

Now, gentlemen, in view of the foreign competition, continually increasing, it would be well if you would particularly turn your attention to the subject of the importation of foreign labour, restrictive legislation on the subject of which would be welcome by every class of the working people of the country.

One of the duties of this Congress will be to submit to our governments any grievances of a general character, which we may present in the interests of all.

In consequence we are leaving to your initiative the duty of submitting to the consideration of this Congress all reforms which you may deem to be useful to the working classes of this country, in order that the executive may bring them to the attention of our different governments.

I cannot take my seat without alluding to the debt of gratitude owing to our faithful and active Secre-

tary, Mr. Griffith. Neglecting no favourable circumstance to advance the national cause; taking no account of labour, trouble or travel, and always ready, when the occasion presented itself, we are proud to acknowledge that a great part of the success we have achieved is due to his energy and activity.

I desire also to thank the founders of this Congress for the high honour they bestowed upon me in electing me as their first President. Many others, more deserving and more able, would have given more impressiveness and more time to that important charge, but, at least, be assured that I will leave it with the entire conviction that I have done all I could possibly do in the measure of my power and my ability.

Several measures of the highest importance will be submitted to your consideration, and relying on your wisdom, I hope that your labours will meet with success.

I accordingly declare the first session of the National Congress of Trades and Labour of Canada opened for the despatch of business.

Status of the Congress.

The Secretary-Treasurer's report of receipts and expenditure for the past year was as follows:—

| | |
|------------------------------------|-----------|
| Received for charters granted..... | \$ 230 00 |
| " for per capita tax..... | 312 35 |
| " from sales of supplies..... | 14 50 |
| | \$ 556 85 |
| Expenditure..... | 527 53 |
| Balance in hand..... | \$ 29 32 |

The report of the executive committee showed that during the year the following charters were granted: Quebec, 14; Montreal, 5; Ottawa, 3; London, 2; Hawkesbury, 2; Vancouver, 2; St. Hyacinthe, 1; Victoria, 1. Five affiliations were also reported. The executive committee also reported on the interview had with the Federal Government on the subject of the registration of trade union labels.

Resolutions Passed.

The following resolutions were submitted to the committee on resolutions and finally adopted on the recommendation of the committee:—

That the government be asked to name a competent and experienced inspector of works where explosives are used and to grant a certificate only to a person recognized as thoroughly skilled in this branch.

That the Dominion and Provincial Governments be petitioned that public work be done by the day instead of by contract; also that nine hours shall constitute a day's work, outside, and eight hours, inside.

To authorize the National Union of Bricklayers of Quebec to change its name and to call itself the National Union of Bricklayers, Plasterers and Masons of Quebec.

That the executive committee be instructed to confer with the workmen of the maritime provinces in order to induce them to affiliate with the National Congress.

That this Congress take up the question of goods made in asylums and prisons in this country, which come into competition with goods made by free labour and this to the detriment of the latter.

To approve the movement started in Montreal for the establishment of technical schools so as to facilitate the education of workmen in their respective trades.

That a member of a national union bearing a card and changing residence may be admitted into a similar union in his new place of residence without being obliged to pay the ordinary initiation tax, the card of the national union being recognized throughout the Dominion.

That representations be made to the Government so as to induce it to recognize the label of the National Union. This label to be the same for all classes of goods manufactured by members of the national unions, and to be a guarantee that the goods were manufactured by Canadian workmen working in the establishments of this country.

That the Congress ask the Government to increase by ten per cent the duty on all foot wear imported from foreign countries. A certain number of merchants have only on hand a stock of foreign-made goods and the introduction of such a measure, it was stated, would greatly benefit the boot and shoe workers of Canada.

That the Government be petitioned to appoint inspectors of scaffolding, of bread, and of barrels that have been more than once in use. Furthermore that a duty be placed on barrels which have already been used in the United States, so as to protect the employers and employees in this trade.

That the Government be requested to bring into action again the alien labour law as it was before the last amendments.

That the Federal Government recognize only one Labour Congress, and that the same be the National Trade and Labour Congress of Canada.

That the Dominion Government be urged to make a thorough revision of the tariff,

with the object of safeguarding and forwarding Canada's interest.

That the National Longshoremen's Union of Quebec ask the endorsement of the Congress so that work in all the ports of Canada may be legalized, and to make such ports free for all workmen belonging to a national union affiliated with the Central Council and having a charter from the National Congress, such a measure having for effect the forced recognition of the National Congress of Canada by other organizations.

That prayer be made to the Government to enforce the fair wages resolution in all the departments and in all the contracts awarded by these Departments.

Recommending the registration and incorporation of all trade unions.

That juries in coroners' inquests be paid pro rata for services rendered to the coroner.

That a salary of \$15 per month be paid to the secretary-treasurer for the year just commencing, and that a sum of \$100 be paid him for the many services rendered during last year.

International Amalgamation.

A resolution which provoked a lengthy discussion was one which advocated the advisability of amalgamating with international labour unions by permitting all labour organizations to affiliate with the National Congress. The motion, however, was finally rejected, the executive committee being instructed at the same session to confer with the Knights of Labour and Workmen's Protective Unions in the maritime provinces, as above stated, with the object of consolidation.

Referred Resolutions.

The following resolutions, submitted towards the end of the sittings of the Congress, were referred to the executive committee for consideration:—

That this Congress adopt a national flag for all the unions under its control, and that such flag become later the Canadian emblem, and contain within its folds the arms of each province of the Dominion.

That this Congress approve the conduct of Sir William Mulock, Minister of Labour, in causing to be enacted a measure to aid in the settlement of railway labour disputes.

Election of Officers.

After a vote of thanks to the retiring officers, the following new officers were elected by acclamation:—

Mr. Napoleon, Houle, Montreal, President.

Mr. T. F. Benbow, Ottawa, Vice-President.

Mr. Thos. J. Griffiths, Montreal, (re-elected) Secy.-Treas. and General Organizer.

Executive Committees by Provinces.

Quebec—

Mr. Omer Brunet, Quebec, Vice-President.

Messrs. P. J. Simard, Quebec

D. Verdon, Montreal

Geo. Marois, Quebec

} Committee.

Ontario—

Mr. F. F. Lippe, Ottawa, Vice-President.

Messrs. W. Adamson, Ottawa

E. U. Labelle, Trenton

J. Mason, Ottawa

} Committee.

British Columbia—

Mr. W. H. Parmetter, Vancouver, Vice-President.

Messrs. A. L. Green, Vancouver

C. Woolbridge, Victoria

W. Clement, Vancouver

} Committee.

Ottawa was selected as the place of meeting in 1904.

Annual Banquet.

On the evening of September 17 a banquet was held at Kent House, Montmorency Falls, at which speeches were made by a number of the officers, old and new, of the Congress.

ANNUAL CONGRESS OF THE TRADE UNIONS OF THE UNITED KINGDOM.

THE Thirty-sixth Annual Congress of the Trades Unions of Great Britain was held at Leicester, England, September 7th to 12th. In view of the recent annual conventions of the two central bodies of labour organizations of Canada the following summary of the report of the meeting in England, which appears in the *Labour Gaz-*

ette of the British Department of Labour will be of general interest.

Composition of the British Congress.

The Trade Union Congress of Great Britain consists of representatives of trade unions who are actually working at their trades at the time of appointment, or are

permanent paid officials of the unions they represent. A trade union in Great Britain may send one delegate to the Congress for every two thousand of its membership. The following analysis into groups of trades, as presented by the *Labour Gazette*, shows the composition of the Congress of this year as compared with that of 1902, while offering at the same time statistics as to recent developments in the trades union situation in Great Britain:—

| GROUPS OF TRADES. | 1902. | | | 1903. | | |
|--|----------------------------|------------------------|--------------------|----------------------------|------------------------|--------------------|
| | No. of Organi- zations. | No. of Dele- gates. | No. of Members. | No. of Organi- zations. | No. of Dele- gates. | No. of Members. |
| Building..... | 12 | 32 | 195,972 | 11 | 29 | 184,721 |
| Mining and Quarrying... | 8 | 94 | 373,827 | 7 | 86 | 347,156 |
| Engineering... | 13 | 19 | 41,334 | 13 | 17 | 36,008 |
| Shipbuilding (including boilermaking) | 3 | 21 | 68,745 | 3 | 20 | 68,831 |
| Other metal trades.... | 22 | 43 | 56,922 | 22 | 38 | 60,250 |
| Textile trades.. | 15 | 93 | 157,175 | 15 | 91 | 157,579 |
| Clothing..... | 10 | 30 | 55,902 | 10 | 26 | 53,594 |
| Transport (in- cluding rail- way workers, seamen, fire- men and dock labourers).... | 18 | 42 | 135,819 | 17 | 42 | 127,583 |
| Chemical, gas and general labourers.... | 10 | 34 | 92,324 | 10 | 33 | 78,710 |
| Printing, book- binding, &c.. | 16 | 26 | 49,541 | 11 | 19 | 46,792 |
| Pottery and glass..... | 4 | 5 | 7,250 | 3 | 3 | 3,900 |
| Woodworking and furnish- ing trades, &c. | 9 | 11 | 30,480 | 10 | 12 | 31,663 |
| Baking and cigarmaking.. | 2 | 5 | 7,000 | 2 | 4 | 6,980 |
| Enginemn.... | 6 | 12 | 24,127 | 11 | 14 | 23,375 |
| Post office em- ployees..... | 4 | 7 | 36,563 | 5 | 7 | 37,722 |
| Miscellaneous.. | 11 | 13 | 30,311 | 12 | 15 | 35,878 |
| Total..... | 163 | 487 | 1,363,292 | 162 | 456 | 1,300,732 |

Although the organizations accounted for in the above table number only 162, there were in all, when allowance is made for the number of district societies included in federations, about 223 separate trade unions

sending delegates to the congress this year, out of a total of about 1,183 unions known to be in existence. The membership represented at the congress, however, comprised about 68 per cent of the total membership of the unions of Great Britain. It will be seen that while the number of organizations represented is but one less than in 1902 the total membership represented is less by 62,560, a decrease stated to be chiefly due to the disappearance from the list of the Northumberland Miners' Association and of the Federal Builders' Labourers.

Resolutions Passed.

The following were among the principal industrial subjects on which the Congress passed resolutions: Restriction of the hours of labour to 8 per day for miners and work people generally; certificates of competency for persons in charge of steam engines and boilers; industrial assurance by trade unions; reduction of naturalization fees to alien workmen; amendments to the laws affecting trade unions and industrial disputes; the appointment of a Minister of Labour; the appointment of practical men and women as inspectors for dangerous employments; reduction of fees for registrars' certificates of death when required for trade unions; old age pensions; the character note system; wages and rights of government employees; improved housing accommodation and means of transit for working people.

A resolution in favour of compulsory arbitration in trade disputes was rejected by 889,000 to 251,000 votes.

Parliamentary Committee Elected.

The voting for members of the Parliamentary Committee, the body annually appointed to watch over the political interests of labour in Great Britain, resulted in representatives of the following groups of workmen being elected: Amalgamated Brassworkers, Barge

Builders, Boot and Shoe Operatives, Miners' Federation of Great Britain, London Compositors, Amalgamated Railway Servants, Gas Workers and General Labourers, Amal-

gamated Cotton Spinners, Boiler Makers and Shipbuilders, Northern Counties Weavers, Amalgamated Carpenters and Joiners, and National Dock Labourers.

CANADIAN MANUFACTURERS' ASSOCIATION—32nd ANNUAL CONVENTION.

AN important and largely attended annual convention of the Canadian Manufacturers' Association was held at Toronto during the month just passed, commencing on Wednesday, September 16, and concluding its sessions with the annual banquet on the evening of Friday, 18th. The city of Toronto and the other leading manufacturing centres of Eastern Canada were best represented at the convention, though there were delegates present from the most distant parts of the Dominion, including ten from the Maritime Provinces. As will be seen from a reference to the report of the more important proceedings of the convention given below, considerations affecting the transportation problem, the Canadian tariff and the labour market, occupied the chief attention of the delegates, being the subjects to which the president in his annual address made particular reference, and on which resolutions involving the most definite announcements of the association's policy were passed by the convention.

The financial circumstances of the association were reported satisfactory, with the receipts for the year totalling \$18,658.60 and disbursements \$18,253.24. Receipts from fees during the year were based on a membership of 1,272, to which the association had grown from a membership of 132 in 1899, the sum of \$1,184 more than last year having been spent on executive work, largely in the formation of new branches.

Opening Proceedings.

The opening day of the convention was devoted largely to meetings held by the

different trade sections of the association for the purpose of preparing their several annual reports, the convention proper beginning with the reception to the delegates tendered on the evening of the 16th at the provincial legislative buildings, the chief feature of which was the address of the Honourable T. A. Brassey on imperial issues, with more particular reference to colonial autonomy, imperial defence and the policy of preferential trade within the Empire. Addresses of welcome were also delivered by the Honourable the Premier of the Province, the acting mayor of Toronto, and the chairman of the Toronto branch of the association, to which the president of the association replied.

Address of the President.

With the session which opened on the morning of September 18, the active business of the association was begun, the first item on the programme being the annual address of the president, Mr. C. A. Birge. Mr. Birge drew attention, in opening, to the general and unprecedented prosperity of Canadian trade and industry, and to the competition, as affecting Canada, of foreign countries for the commerce of the world. The Canadian trade preference to Great Britain was commended, and the policy of reciprocity with the United States severely criticised. Tariff revision was stated to be an urgent necessity if the prosperity of manufactures in Canada was to be increased or continued. On the subject of transportation, the need of an additional trans-continental railway service was pointed out, as well as the benefit of a fast Atlantic service

and an eastern steamship service to Australia. In reference to conditions in the labour market throughout Canada, the president stated that pleasant relations had, until recently, prevailed between employers and their employees, but that events of the past year had developed a situation which seriously threatened the continuance of business stability. The right of a free and open market for labour was enunciated, and the principle of international trade unionism disapproved of.

The Transportation Problem.

The unprecedented activity of the transportation companies in Canada during the past year was emphasized in the report of the Railway and Transportation Committee, which was presented on the first day's session of the association. The shippers of the country as well, according to the report, had experienced a year of development, more particularly in relation to the introduction of legislation providing for the better consideration of their interests. The Railway Act, as introduced at the present session of the House of Commons, in providing for the establishment of a railway commission, was characterized as a most important measure, and one that met with the full approval of the committee. The committee's report also referred to its action against the operation of Canadian joint freight classification No. 12, which, up to the present time, had been determined by the railways without reference to the interests of shippers. The committee had carried the matter before the Department of Railways and Canals at Ottawa, and had secured redress of the grievance complained of. The committee further emphasized the need of a fast Atlantic service, and of an improvement in the steamship service with South Africa. The report was adopted by the association after a discussion in which the subject of freight rates and the necessity of a careful consideration of the numerous bills relating to

transportation continually being introduced into the Dominion Parliament were referred to at some length.

Commercial Intelligence Report.

The increase in the export trade of Canada was commented upon in the report of the Commercial Intelligence Committee, which detailed the action of the committee during the year in endeavouring to secure a reduction in the postal rate on catalogues and heavy printed matter, and to secure a parcel post service between Canada and the Island of Trinidad. The question of preferential trade with South Africa was also discussed in this connection.

Technical Education.

The committee also referred to the subject of technical education, more particularly to the efforts of the Montreal branch of the association in this direction, as follows:—

We beg to commend most heartily the action taken by our Montreal branch towards establishing a technical institute in the city of Montreal. It is our desire that this movement should grow and extend to every part of our Dominion, so that within the next generation our Canadian factories and offices may be filled with young Canadians who are experts in their various lines and who may receive their training in their own land.

Preferential Trade Resolution.

The same committee also submitted the following resolution concerning imperial preferential trade:—

It is resolved, that, in the opinion of this congress the bonds of the British Empire shall be materially strengthened and the union of the various parts of His Majesty's Dominion greatly consolidated by the adoption of a commercial policy based upon the principle of mutual benefit whereby each component part of the Empire would receive a substantial advantage in trade as the result of the national relationship, due consideration being given to the fiscal and industrial needs of the component parts of the Empire;

That this congress urges upon His Majesty's Government the appointment by them of a special commission composed of representatives of Great Britain and her colonies and India, to consider the possibility of thus increasing and strengthening the trade relations between the different parts of the Empire and the trading facilities within the Empire and with foreign countries.

Canadian Copyright.

A special report on Canadian copyright was presented to the association, and a

resolution passed urging the premier of the Dominion to take up the question of copyright with the Imperial authorities, and pressing for the recognition of the right of Canada to make her own copyright laws, without which, it was stated, her rights as a self-governing colony would be incomplete.

Relations of Capital and Labour.

The special committee appointed at the annual meeting of the association in 1902, to inquire into the question of labour organizations and their effect on the manufacturing industry, next submitted its report. While expressing the belief that the labour organization which seeks to improve the condition of the workingman is performing a legitimate and praiseworthy service, the report stated that many labour unions in Canada, by departing from the true purpose of their existence, are largely responsible for the labour difficulties stated to be in existence in Canada at the present time. The unionising of shops, the exercise of control over the number of apprentices, and the endeavour on the part of labour organizations to legalize trade union labels were stated to be retarding influences to industrial progress. The general treatment of non-union labour by members of trade unions was also severely criticised, the fact that labour unions were irresponsible bodies before the law being held to be one of the chief causes of the conditions referred to. The report, however, highly recommend some labour organizations which, it was stated, were a credit to the country.

Declaration of Principle.

The committee concluded its report by recommending that the association adopt the following as a declaration of principle on the subject of trade unions :—

1. The Canadian Manufacturers' Association is not opposed to organized labour as such, but is unalterably opposed to illegal acts of interference with the personal liberty of employer or employee.

2. The Canadian Manufacturers' Association disapproves of strikes and lockouts, and favours an equit-

able adjustment of all difficulties between employers and employees, by any amicable method which will preserve the rights of both parties.

3. No person should be refused employment in Canada or in any way discriminated against on account of membership or non-membership in any labour organization, and there should be no interference with any employee who is not a member of a labour organization by members of such organization.

4. With due regard to contracts, it is the right of the employee to leave his employment whenever he desires, and it is the right of the employer to discharge any employee when he sees fit.

5. Employers must be free to employ their work people at wages mutually satisfactory without interference or dictation on the part of individuals or organizations not directly parties to such contract.

6. Employers must be unmolested and unhampered in the management of their business in determining the amount and quality of their product, and in the use of any methods or systems or factory management which are just and equitable.

7. In the interest of the employees and employers of the country no limitations should be placed upon the opportunities of any person to learn any trade to which he or she may be adapted.

8. The Canadian Manufacturers' Association believes that Canadian labour unions should be incorporated national organizations, governed by Canadian officers and free from foreign control.

In the report of the Parliamentary Committee, which was referred at some length to the activity of labour unions in Canada, more particularly in their supervision of legislation under discussion in parliament, exception was taken to the manner in which the Department of Labour at Ottawa was stated to be performing its functions. One of the first of the proper functions of the department, it was affirmed, was to secure for Canadian employers the labour necessary to maintain their industries. The department, however, it was stated, had refused to take active steps in this matter, and the following resolution was accordingly submitted :—

That, whereas, the Department of Labour at Ottawa has been fully acquainted with the need of labour which has existed throughout Canada during the past year, and in response to direct and repeated appeals has not taken, so far as we can ascertain, any action towards securing the supply of labour which is absolutely essential to the maintenance of Canadian industries ;

And, whereas, the department in its general policy and through its official organ gives constant and abundant evidence that it has regard for, and exists for, the interests of organized labour only, a body which represents only a small minority of the workmen of Canada, and whose actions during the past year have been detrimental to the interests of Canada and to the workmen themselves ;

Therefore, be it resolved, that this association in annual meeting assembled urge upon the government the necessity, if the department is to continue, of having it thoroughly re-organized, employing only

impartial and fair minded officials, and instituting throughout the department and through the official organ, a policy which will be a service alike to employer and employee, commanding the respect of both, and which will tend towards supplying the legitimate needs and building up the industries of the country.

And be it resolved, that for similar causes and with the same end in view, the Bureau of Labour of the Department of Agriculture in the Ontario Government should be similarly dealt with by the Ontario Legislature.*

Incorporation of Trades Unions.

Regarding the incorporation of labour unions, the following resolution was submitted:

That this association urge upon the Dominion Government the necessity of enforcing the incorporation of all trades unions and other such organizations whose objects and acts are calculated to affect directly or indirectly the industries or general business enterprise of the country, in order that such organization and the members thereof shall become amenable to the law, and assume responsibilities collateral with the rights and privileges which they may possess.

Alien Labour Law.

An abrogation or amendment of the Alien Labour Law, so as to permit of the importation of skilled labour where there is a scarcity in Canada, was also asked for by the parliamentary committee, which, during the year, had dealt also with such measures as legalization of the union label, the Puttee Bill, the Loughheed Bill, the Beique Bill, and the Latchford Bill.

The Tariff Resolution.

The tariff resolution of the convention, as finally carried during the session of September 19, reaffirmed the tariff resolution passed at the last annual meeting in Halifax.

Election of Officers.

The election of officers resulted as follows:—

President, George E. Drummond, Canada Iron Furnace Co., Montreal; First Vice-President, W. K. George, the Standard Silver Co., Toronto; Ontario Vice-President, H. Cockshutt, the Cockshutt Plough Co., Brantford; Quebec Vice-President, Hon. J. D. Rolland, the Rolland Paper Co., Montreal; Nova Scotia Vice-President, D. W. Robb, Robb Engineering Co., Amherst, N.S.; British Columbia Vice-President, John Hendrie, B. C. Mills, Timber and Trading Co., Vancouver; Manitoba Vice-President, E. L. Drewery, Winnipeg; New Brunswick Vice-President, W. S. Fisher, Emerson & Fisher, St. John;

Treasurer, George Booth, the Booth Copper Co., Toronto.

Toronto Executive—J. O. Thorn, W. P. Gundy, J. P. Murray, R. J. Christie, Frederic Nicholls, C. N. Candee, R. K. Osborne, William Stone, A. W. Thomas, A. F. Rutter, A. S. Rogers, Thomas Roden, J. S. King, P. H. Burton, E. C. Boeckh, S. M. Wickett, W. B. Tindall, George H. Hees, J. W. Cowan, R. A. Donald, H. Wright, W. B. Rogers.

Montreal Executive—C. Ballantyne, Fred Birks, J. P. Black, S. S. Boxer, Jas Davidson, J. S. N. Dougall, S. W. H. Ewing, J. T. Hagar, J. Horsfall, W. McMaster, D. Morrice, jun., Robt. Munro, G. W. Sadler, Geo. A. Slater, Wm. Strachan, F. W. Thompson, Howard Wilson, Jas. R. Wilson.

Quebec Executive—Geo. E. Amyot, G. A. H. Vandry, C. H. Carrier, T. B. Eddy.

Nova Scotia Executive—John F. Stairs, H. L. Hewson, C. M. Crockett, Alfred Dickie.

British Columbia Executive—D. R. Kerr, J. G. Woods.

New Brunswick Executive—Charles McDonald.

Manitoba Executive—E. F. Hutchings.

Standing Committees.

The standing committees were appointed as follows:—

Parliamentary—P. W. Ellis (Chairman), J. O. Thorn, J. F. Ellis, T. A. Russell, Edward Gurney, F. B. Polson, Robert Munro, Wm. Stone, John Adams, Geo. W. Watts.

Tariff—W. K. McNaught (Chairman), P. H. Burton, Frederic Nicholls, T. A. Russell, Hon. L. M. Jones, Jno. F. Ellis, Cyrus A. Birge, C. H. Waterous, A. S. Rogers, J. M. Taylor.

Commercial Intelligence—A. W. Thomas (Chairman), Edgar A. Wills, H. Van der Linde, J. P. Murray, J. M. Sparrow, B. A. C. Craig, Thomas Roden, T. A. Staunton, W. R. Pringle, R. A. Donald.

Industrial Canada—P. J. Smale (Chairman), S. M. Wickett, Geo. A. Howell, T. A. Russell, A. Cecil Knight.

Reception and Membership—R. Christie (Chairman), Thos. Roden, Geo. H. Hees, Maurice J. Taylor, L. V. Dussane, Robert Crean, Frank Rolph, W. A. Kemp, C. Howard Smith, Geo. C. Gale.

Railway and Transportation—J. O. Thorn, P. McMichael, B. C. Boeckh, Geo. Heintzman, F. H. Whitton, R. Hobson, J. H. Housser, S. H. Chapinan, W. A. Strowger, A. W. Allen.

Annual Banquet.

The proceedings of the meeting were brought to a close with a banquet on the evening of Friday the 18th, at which the development and expansion of industry on every hand in Canada was the key note of the various speeches delivered. Addresses were made by His Honour the Lieutenant Governor of the Province, the Honourable the Premier of the Province, the Honourable the Postmaster General, the Honourable the Minister of Customs, the new President of the Association, the retiring President of the Association, the Vice-President of the Association, the Honourable Thomas Brassey, and many others.

*For a report of the action of the Dominion Trades and Labour Congress in reference to this resolution of the association, see another page of the present issue of the GAZETTE.

UNION OF CANADIAN MUNICIPALITIES—THIRD ANNUAL CONVENTION.

THE Third Annual Convention of the Union of Canadian Municipalities was held at Ottawa during September, opening on the 16th and concluding its business on the 18th of the month. Delegates to the number of over sixty were present from different municipalities between Prince Edward Island in the east and the city of Winnipeg in the west, several cities and towns still further removed from the place of meeting being represented by proxy. As will be seen from the brief report of the proceedings of the convention given below, a number of important questions came up for discussion.

The union as at present constituted, according to the secretary's report, consists of 106 localities, of which 26 are cities, 59 towns and 21 other municipalities. The financial statement showed receipts for the year \$1,172.21, and the expenditure \$1,068. There were \$625 owing for back debts, and \$751 outstanding liabilities.

Proceedings of the Convention.

The delegates were formally welcomed by the Mayor of Ottawa, to whom the president of the union, the ex-mayor of Toronto, replied, defining the objects and progress of the union, in the absence of a formal presidential address. The chief interest of the Convention centered about the topics introduced in the address of the Secretary-Treasurer, which dealt at length with the work of the year, with particular reference to the dispute over the Toronto and Hamilton Railway bill, and the attitude of various municipalities towards the Bell Telephone Company and other holders of telephone monopolies.

Railway Legislation Opposed.

The entrance into municipalities by railways using electricity as a motor power, and taking possession of the streets without the consent of the municipalities in question, but

solely under authority of Dominion legislation, received, according to the secretary's report, much opposition from the union during the year, especially in the case of the Toronto and Hamilton Railway Company, which endeavoured to group together a number of city and suburban roads and obtain entrance into Toronto, Hamilton, St. Catharines and other municipalities. (In the United States, it is pointed out in the report, similar roads are definitely classified as ordinary railroads and not as street railways.) The principal municipalities throughout Canada were interested in opposition to this bill, and the result was the presentation of a memorial to the Dominion Government which, after a thorough discussion in the railway committee of the Privy Council and in both Houses of Parliament, led to the introduction into the Railway Act of Canada of a clause establishing the general principle that such electric roads should not be permitted to encroach on municipal control, and that the declaration that a certain road is 'for the general advantage of Canada', as now required by the Act, is in future to be hedged about with proper limitations. The clause as finally introduced into the Act provides verbatim as follows:

Notwithstanding anything contained in the Railway Act of Canada, the Company shall not construct nor operate its line of railway along any highway, street or public communication without first obtaining the consent, expressed by by-law, of the municipality having jurisdiction over such highway, street or other public communication, and upon terms to be agreed upon with such municipality.

Telephone Monopolies.

On February 6 last a deputation of the union met the Minister of Justice of the Dominion Government, for the purpose of discussing and arriving at a definition of the general rights of municipalities in connection with the franchises held by telephone companies in Canada, more particularly the Bell Telephone Company, especially in relation to street control and the granting of loca

franchises. Subsequently it was attempted, but without practical result, to frame a measure on the subject to be introduced at the session of the Dominion Parliament of 1903. 'The ideal system,' says the report, in defining the aim of the union in this connection, 'would be government control of all long distance connections, and either government or municipal control or ownership of the local franchises, the latter being either worked by the public or leased by contract. It is only by some such means that we can rid our streets of unsightly poles and obtain satisfactory rates and a fair compensation for the use of highways.'

On the question of poles on streets the principal activities of the union were in connection with the case of Fort William, Ottawa and Montreal, a movement for conduits having been successfully inaugurated in the last-named city. The report concludes its reference to this subject by quoting the following amendment to the new Railway Act, recently passed by the Senate of Canada :—

Provided that whenever any city, town or incorporated village is desirous of having lines of telegraph, telephone, or for the conveyance of light, heat or power, or electricity, placed underground, the board may, on the application or such city, town or incorporated village, require the company to thus place its lines of wires underground, and abrogate the right given by this section or by the special act, to carry lines on poles in such city, town or incorporated village, the whole on such terms and conditions as the board may prescribe.

Addresses Read.

At the first afternoon session of the convention an address on road and street improvements was delivered by the Ontario Commissioner of Highways. The creation of a good roads department under the Federal Government was also discussed. On the afternoon of the second day's session Dr. Richer, of Montreal, addressed the convention on the 'Civic Aspect of Tuberculosis Protection.'

Borrowing Power of Municipalities.

The executive recommended that the municipalities of the union combine, with

the end of being able, with the aid of suitable legislation, to borrow on united credit. The union approved of the recommendation and the executive committee was empowered to prepare a suitable scheme for presentation to the various provincial legislatures, with a view to the provision of provincial machinery for examining debentures and certifying to the same, and looking ultimately, if found practicable, to a Dominion guarantee of the whole.

Telegraphic Service on Prince Edward Island.

Complaints from the delegates from Prince Edward Island as to the high charges for telegraphic service in that province were listened to, and the union passed a resolution asking that the government use its influence to place the Province of Prince Edward Island, in the matter of telegraphic service, on the same footing as the other provinces, the present service being characterized as a combine.

Provincial Control of Corporations.

The following resolution on the subject of provincial control of corporations was carried unanimously :—

That this union views with alarm so many applications to the parliament of Canada for the incorporation of companies having for their object the construction of works which are local in their character, and would respectfully urge upon the parliament of Canada : (1) That undertakings entirely provincial and essentially for local purposes should not be removed from provincial and municipal control by the mere declaration that such works are for the general advantage of Canada; (2) that no such declaration should be made in any case until the government and parliament are satisfied by actual proof that the declaration is true; (3) that all street railways or tramways or electric railways constructed and operated wholly or in part through the streets and highways of the municipalities are essentially of a local character, and should be left under the jurisdiction of the local legislatures and the municipalities; (4) that the local legislatures have hitherto dealt with the incorporation of such railway companies, and have provided safeguards for the construction and operation of such railways, and their right so to do should not be interfered with.

The union concluded its convention with the discussion of the rules and regulations required by the Canadian Underwriters'

Association, on which the executive committee will report at next year's meeting.

Officers Elected.

The election of officers for the ensuing year resulted as follows:—

President—Mayor Cook, Ottawa.
 Vice-presidents—Ontario, Mayor Beck, London;
 Mayor Urquhart, Toronto; Mayor Rogers, Peterboro;
 Mayor Drake, Windsor; Mayor Dyke, Fort William.
 Quebec—Ald. Laporte, Montreal; Ald. Lebeuf,

Montreal; Mayor Fabien, Ste. Cunegonde; Mayor Farwell, Sherbrooke; Warden Vien, Lewis.

Nova Scotia—Mayor Crosby and Ald. Campbell, Halifax.

New Brunswick—Ald. McRae, St. John; the Mayor of Fredericton.

Manitoba—Mayor Arbuthnot and Ald. Barclay, Winnipeg.

British Columbia—Mayor Neelans, Vancouver; Mayor Keary, Victoria.

Prince Edward Island—Mayor Warburton, Councilor Paton, Charlottetown.

Secretary-treasurer—W. D. Lighthall, Montreal; assistant secretary, M. P. Cochrane, Montreal.

London, Ont., was selected as the place of meeting in 1904.

SIXTH CANADIAN CONFERENCE OF CHARITIES AND CORRECTION.

THE sixth Canadian Conference of Charities and Correction was held at Ottawa on September 29 and 30 and October 1. The proceedings of the conference were opened by the president, Sir Louis Davies, who delivered the following address:—

I do not know that I can better formulate the objects we have in view in holding our annual conferences than by quoting the words used in the official programme:—

The object of this Conference is to bring into closer relationship the many friends who are engaged in caring for the neglected and unfortunate classes in the community. It includes within the range of its discussion every phase of philanthropic work, the safe-guarding of childhood, the custodial care of the feeble-minded, the sick and the insane, the reformation of criminals, the structure and discipline of prisons and other public institutions, the relief of distress and poverty in such a way as to avoid pauperism, in fact anything that affects the welfare of those who are dependent upon their fellows for assistance or support.

As our late president pithily defined it:—‘We are met to work for the lessening of pauperism and crime, and to uplift and better humanity.’

One of our dangers lies in the very breadth and extent of our programme. We are apt to lose ourselves in vague sentimentalism and unduly subordinate the stern practical facts of our prosaic life and the best methods of meeting them.

Another danger possibly lies in the almost certain result of the specialization of work. We need to repeat and proclaim the absolute necessity there is of co-operation amongst specialists. We must seek to have, as far as possible, co-ordination of our charitable agencies.

Of necessity there must be specialization. But it will be fatal to our success if we lose sight of the necessary interdependence between our various agencies, or if the specialists lose sympathy with and appreciation of the work which their fellow labourers are engaged in.

The war against crime, pauperism and disease is one of the greatest of human struggles. The care, protection and improvement of defectives, dependents and delinquents calls for the most strenuous human

effort and this, when successfully applied, will produce results going a long way to promote human progress.

In our earliest records we find primeval man asking the question ‘Am I my brother's keeper?’ The careless, the indifferent and the selfish have been repeating it in every age since. But the inspired writers of all ages and times have united in the affirmative answer that in the best and highest sense we are. We could not escape our responsibilities in this relation if we would. The best men and women would not escape them if they could. The poor we have always with us. It seems to be an eternal law. While human nature remains as it is, while the careless, the spendthrift, the improvident, the shiftless, the drunkard and the criminal comprise such a percentage of mankind, there must of necessity be poverty with its accompanying ills.

While selfishness and greed form such controlling factors in character, there must be resulting misery and wretchedness amongst the mass. No society or aggregation of societies, however, well conducted or aided, can either prevent or entirely overcome the presence of evil, poverty, crime and wretchedness.

But does it follow that because we can neither prevent nor overcome these evils we dare sit with folded arms and cynically repeat the old question ‘Am I my brother's keeper?’ God forbid! We look around amidst the seething populations of our modern Babels in America and Europe, and see vast masses sunk to if not below the level of brute beasts. We know that while many are responsible themselves for their condition, that countless thousands are not. They are the creatures the results of their birth, their mental and physical weaknesses, their want of opportunities and their environment.

These thousands at least make calls upon our common humanity which we would be false to our better instincts and our religion if we ignored.

How best to help the poor to help themselves?

How best to extend a helping hand which will not demoralize to the submerged tenth?

How best to reach the helpless and innocent children, take them out of their environment and place them where surrounded by better influences they may have at least a chance to grow up good men and women, productive citizens of the Commonwealth?

How best to deal with the dependent classes unable from physical or mental defects to care for themselves?

How best to discriminate between the reformable criminal and the incorrigible and in what way to hold out a helping hand to the former, ‘turn his face towards the light,’ and give him a chance to start life afresh with his past forgiven, if it cannot be fully blotted out?

These are the problems we are met to discuss, the solution of which demand and deserve the best thought and consideration of our best men and women.

We may, having relation to the enormous mass of misery, and crime, and suffering, be able to do but little it is true. 'We cannot—as a great thinker has said—'relume the extinguished lamp of reason. We cannot make the deaf to hear. We cannot make the dumb to speak. It is not given to us. 'From the thick film to purge the visual ray, and on the sightless eyeballs pours the day.' But at least we can lessen the load of affliction and make life more tolerable to those who suffer."

We can inculcate the great lessons of the value of 'personal service,' and that 'gifts and alms are the expressions not the essence of true charity.'

But we thank God for the little that we can do and for what is being daily and yearly done.

The Salvation Army, the Church Army, the Social Settlements, and many kindred agencies and societies, are doing much in our great modern cities to reach the submerged masses and place them on the road along which they may regain their lost selves.

Thousands of self-denying men and women are consecrating their whole lives to the restoration and reclamation of the poverty-stricken, the degraded, the vicious, the apparently lost. Thousands of poor wretched women, more sinned against than sinning, are having opened to them ways back into the humanity from which they have been driven out.

Tens of thousands of dependent children are being yearly rescued from homes which are mere schools of vice and degradation and surrounded by influences calculated to make them good citizens of the state.

We are here assembled in convention to-day to discuss, consider and adopt the best methods of obtaining all or some of these commendable subjects. We will have the advantage of hearing from practical men, who have been personally engaged in some branch of the great work, and from experts in social science who have thought out and learned much about it, the best methods to follow, the pit-falls to avoid, the aids to seek and the influences to evoke.

More sentimentalism we must suppress, and, avoiding the emotional, try and reach the practical, even if it is prosaic. We must not antagonize, but as far as possible educate and unite all Church, State and Municipal efforts to do what we are aiming at; and, above all, we must each one of us learn to think out for ourselves what we hear, and throw our educated sympathies and energies, time and brain in the promotion of the practical good we are seeking.

In conclusion, I heartily welcome you all in this great convention in the beautiful capital of this growing commonwealth. I am proud to welcome you to a city whose citizens have not ignored their duties towards the poor, the defective, the dependent and the delinquent, but carry them out with zeal and intelligence, if not with enthusiasm.

I welcome you because your objects are meritorious, charitable, Christ-like, devoid of selfishness, and having as their only reward the proud consciousness that, if only in a feeble way, you are carrying out the wishes of Our Great Master and Teacher, the Man Christ Jesus.

Let our work, while altruistic and Christian, be alike free from sectionalism and sectarianism; let it be broad, based upon our common humanity which recognises alike the fatherhood of God and the brotherhood of man.

'In faith and hope the world will disagree,
'But all mankind's concern is charity.'

The principal subjects discussed at the Conference were 'charity organization and what it aims at accomplishing,' 'Neglected

and dependent children,' and 'Treatment of criminals.'

Charity Organization.

On the evening of Tuesday, the 29th, Mr. E. T. Devine, General Secretary of the Charity Organization Society of New York, delivered an address, chiefly dealing with important features of outdoor and other forms of charitable relief. Among these were the tramp evil, which problem, he said, had been met in New York in three different ways. First, the laws against street begging were being strictly enforced by the police. Secondly, the public were being educated to the fact that giving to street beggars does a great deal of harm in encouraging pauperism. Thirdly, the individual beggars who are arrested were given a chance to lead a more useful life whenever they showed an inclination to do so. The speaker also described the working of the Tenement House Act in New York. In accordance with it, orders to vacate unhealthy buildings until necessary repairs are made, are given by the Tenement House Department, and all new tenements erected must comply with the law which provides for sufficient light and air and for proper sanitary arrangements.

Neglected and Dependent Children.

On Wednesday morning, Mr. J. J. Kelso, Superintendent of Neglected and Dependent Children of Ontario, delivered an address with reference to the work of his department, showing the importance of rescuing children from cruel or evil parents, and the advantage of placing them in private homes rather than in institutions.

Treatment of Children.

In an address delivered at the Conference by Mr. Justice McDonald, of Brockville, the speaker declared himself in favour of the suspended sentence, and of the lash for offences against women and children and for petty thefts committed by young boys. A

number of delegates were in favour of indeterminate sentences, and a resolution was subsequently introduced for the purpose of seeking legislation with regard to this form of punishment. The resolution was, however, laid over until next year.

Other Work of the Conference.

Among other subjects discussed at the Conference were the reformation of women

and wayward girls, and the care of the feeble-minded. An account was given of the work of the Mercer Reformatory in Toronto and of a home for the feeble-minded in Utica, N.Y. It was announced that a building for the care of feeble-minded women was being erected by the Ontario Government, representations having been made of the need of an institution of this nature.

MONTREAL STREET RAILWAY MUTUAL BENEFIT ASSOCIATION.

EARLY in June last the directors of the Montreal Street Railway Company laid before their employees a communication in which it was stated that the formation of a mutual benefit association among the employees of the system was under consideration and that active investigations were being conducted with a view to determine the most suitable form for such an organization to assume. The proposition, which was not at that date a new one but had been projected in a letter published on May 23, during the continuance of a strike of the employees, was stated to have as its first and leading object the establishment on a firm footing of personal good feeling and mutual good-will between the company and its employees. To this end it was suggested that the association should have in view, first, the bringing of the men into closer touch with the management, and second, the creation of a fund for the relief of the sick or injured, the assistance of widows and children of deceased employees, and the providing of pensions for those who had grown old in the company's service:

Since the date of the above announcement the directors have devoted considerable attention to the preparation of the scheme in question, and were able to arrange, with the co-operation of their employees, an association of the kind contemplated during the month just past. The new association

will affect employees of both the Montreal Street Railway Company and the Montreal Park and Island Railway Company, and the following is a résumé of its principal rules and by-laws in the form in which it is proposed to apply for incorporation at the next session of the Quebec legislature.

Objects of the Association.

The object of the association is stated primarily to be the affording of relief to such employees of the Montreal Street Railway Company and the Montreal Park and Island Railway Company as may become its members. As to the method in which the relief is to be applied, provisions are set forth under three headings having reference to sick benefits, insurance, and the pensioning of old and disabled members.

Funds.

The funds of the association are to be derived from joint contributions of the company and of the employees, and are to be placed at the disposal of a committee of management to whom the distribution or remission of the same is entrusted.

Membership.

The regulations regarding membership provide that all permanent employees of the companies, up to January 1, 1904, shall have the privilege of becoming members

irrespective of age on passing a satisfactory medical examination. After January next, however, only such new employees are to be admitted as shall be engaged as permanent employers and are under 40 years of age and have passed a satisfactory examination by the association's medical officer. No new employee, further, may become a member of the association until after at least three months' probation in either company's service.

Permanent employees are defined as those who are engaged in the regular business of the company and are not employed merely temporarily on special work.

With regard to permanent employees already in the service of the company and of over 40 years of age, special provisions are made in reference to insurance benefits, under which those who are over 40 but not 50 years of age are to receive only one-half, and those over 50 years of age one-third of the maximum amount, though the allowance providing for funeral expenses remains undiminished.

Applications for membership accompanied by medical certificates are held subject to the approval of the committee of management. Leaving the service of the company or being discharged therefrom severs any membership, and no member is given any claim to insurance benefits or refunds if leaving within the first five years of his membership in the association. After five years' service and up to ten, members severing membership are allowed a refund of one third of the fees paid. After 10 years' membership this amount is raised to two-thirds, reductions in either case being made for any benefits that may have been received during membership.

Management.

The management of the affairs of the association is entrusted to a committee of seven members elected annually by the

members and an equal number named by the board of directors of the company. The general manager of the Montreal Street Railway Company is president of the association and an ex-officio member and chairman of the committee of management.

Power to appoint a sub-committee for executive purposes is given to the committee, together with the right of general oversight of the workings of the constitution and business of the association.

Meetings.

The general meeting of the association is to be held in June each year for the passing of accounts, election of officers, &c. Increases in contributions may only be made by a majority vote at an annual general meeting, or at a meeting specially called for the purpose, for which 14 days' clear notice is given. The committee of management must meet half yearly, or more frequently if found necessary. The executive sub-committee must meet monthly or more frequently.

Contributions.

The two companies bind themselves to contribute jointly to the funds of the association a sum annually not less than 50 per cent, or such larger amount not exceeding 100 per cent of the annual contributions of the members. The company also agrees to furnish the necessary office accommodation and to meet other expenses of management.

With regard to the members a monthly contribution of 50c. to be deducted from their wages is imposed with an admission fee of \$1 to cover the cost of medical examination.

Benefits.

Benefits in cases of incapacity caused by accidents are to be paid from the first day of the accident, and in cases of sickness from the sixth day at the rate of 60c. per day for the first 90 days, and 30c. per day thereafter during the continuance of disablement for a

period of three months. In cases of prolonged disablement the daily payment of 30c. per day, as aforesaid, may be commuted to a lump sum. No allowance is provided where the disablement is the result of quarrelling, immoral conduct or intemperance, and no member while drawing an allowance is allowed to engage in any other work or business, but must remain in his home or residence except as otherwise ordered by the attending physician. A member drawing an allowance found in a saloon or misconducting himself in any manner will forfeit all claims to further allowance on account of the existing disablement. Provisions are added as to the giving of notice of disablement and recovery. Benefits may be made payable weekly if required, and are not to be assignable, the monthly fee of membership being discontinued during disability.

Pensions.

A member leaving the company's service after the age of 65 years and having been in the service of the company for a period of 25 years, is entitled to a pension of 50 cents per diem for the remainder of his life, provided that if he returns temporarily to work or engages in any other work at a rate of wages exceeding the 50 cents per day, the payment of the pension is suspended during the continuance of such employment. The 50 cents a day rate may be commuted

for an immediate payment of a total sum, and in this case no further payment on account of insurance payable after death is charged. A pension of 50 cents a day is also allowed to any member permanently disabled while at work in the service of the company after the six first months of his disablement.

Insurance.

On the death of a member the sum of \$500 is due to his widow, children or other heirs, with an additional \$50 to cover funeral expenses, in the absence of any other assignment by the member, though an assignment on account of indebtedness is forbidden. Claims must be made within a period of 30 days, and the insurance is to be paid within 30 days of the receipt of proof of death. The committee of management is given complete power to regulate the amount of contribution to be applied to the payment of sickness or disablement allowances and pensions, and can raise or lower the same according as the financial standing of the association may require. Finally, it is expressly stated that the contributions made by the company to the funds of the association shall be held to relieve the company of any claim for damage arising from accident or disability received during service, for which under other circumstances compensation might be recovered.

WAGES AND CONCILIATION BOARDS IN GREAT BRITAIN.

THE following information relating to wages and conciliation boards in Great Britain is condensed from an article in the last annual report of the Co-operative Wholesale Societies (Limited) of England and Scotland.

Conciliation and Trade Boards.

Within the last ten years, numerous agencies have been created in Great Britain

for the purpose of settling labour disputes without recourse to strikes. These agencies are divided into two classes called trade conciliation boards, or joint committees, and district conciliation boards. The former are composed of an equal number of representatives of employers and work people, generally appointed respectively by employers' associations and trade unions, each business having its own trade board. District

conciliation boards are appointed by local chambers of commerce and trade councils, and many different industries are represented on them. District boards have not been as successful as the trade boards, chiefly because both parties to a dispute generally prefer to submit the questions at issue to arbitrators connected with the industries involved, rather than to outsiders. The powers and jurisdiction of trade boards vary widely in different localities and occupations. Some, such as the Midland Iron and Steel Wages Board, the conciliation board for the Wear shipbuilding trade, and most of the boards in the boot and shoe trade, have power to arbitrate on all questions that may arise between employers and employed, while others only deal with rates of wages. In some cases their decisions are binding, and in others merely recommendatory. In addition to joint committees and district boards there is a third class called demarcation boards, whose duties are to apportion work between trades, when any dispute on this point arises between unions of cognate industries.

Arrangement of Wages.

The greatest development of conciliation boards was between 1897 and 1902, in which period trade boards or joint committees increased from 80 to 130. In 1897, the wages of 16,000 workpeople were arranged by conciliation boards, and in 1901, the wages of 507,000, this being 54 per cent of all those whose wages were altered during that year.

Arbitration Arrangement.

As capital and labour have equal representation on trade conciliation boards, pro-

vision has had to be made for cases of deadlock. The most usual practice in this case is to appoint a standing official from the outside, who only has the power to vote at meetings of the board when an agreement cannot be reached. Sometimes the chairman, umpire, or president, as he is variously called, is appointed by the board whenever one is required. When a conciliation board cannot agree upon an umpire, an appeal is generally made to the president of the Board of Trade to appoint one. This action is taken under the Conciliation Act of 1896, which gives the Board of Trade power to mediate when any labour dispute exists or is threatened.

District conciliation boards have decreased by about ten in the last six years, there being about sixteen now, and they are very seldom appealed to.

Compulsory arbitration, as practised in Australia and New Zealand, is not popular among the British trade unionists. At the Trade Unions Congress of 1901 a motion in favour of it was defeated by 676,000 votes to 366,000 in favour of it. In 1902 a similar resolution was defeated by 961,000 to 303,000 votes.

The popularity of the present system of voluntary arbitration is indicated by statistics which show that in 1897, 53 trade boards considered 1,448 questions and settled 792, and in 1901, 56 boards considered 1,401 questions and settled 683. Between August, 1896 and June, 1901, the Board of Trade, under the Conciliation Act, dealt with 113 cases, of which 70 were settled by it, and 10 others by the parties concerned during negotiations. In 33 cases the Board of Trade either refused to intervene or proved unsuccessful.

THE IMMIGRATION AND COLONIZATION MOVEMENT.

REPORTS received during the month of September with reference to the movement of immigration into Canada were on

the whole satisfactory, and indicate a continuance of the widespread interest in the Dominion as a field for settlement which

gave so marked an impetus to immigration during the early months of the present season. In Great Britain this feature was especially pronounced, and one of the developments of the month was the discussion in the British press of the prospects held out in Canada to intending immigrants. In this connection the Department of the Interior, in view of certain adverse statements as to conditions in Canada which appeared in the English newspapers, again issued an official warning to intending emigrants in Great Britain against so-called emigration and employment agencies for whose operations and propaganda the Canadian Government is in no way responsible. The department also decided to undertake more active emigration work in France and Belgium, both of which countries possess a large agricultural population, and from which the movement to Canada for some years past has not been large.

Other features of the month were the inauguration of a pronounced movement of settlers from Australia, chiefly as a result of the long drought which has been experienced in that colony, and the continued influx of settlers from the Western United States. A number of undesirable immigrants were deported during September, bringing the total of such persons on September 8th up to 170 since the opening of navigation. The movement from Eastern Canada into the west during the month was chiefly confined to harvesters and others seeking temporary employment in connection with the marketing of the crops.

Oriental Immigration.

The sum of \$424,890 had been collected at the port of Victoria as Chinese head tax during the period from July, 1902, up to the opening of the month just passed, an amount largely in advance of any previous year's return. The result is attributed to the fact that on and after January 1 next the Dominion statute raising the tax from

\$100 as at present to \$500 per head will go into effect.

Another phase of the situation to which attention has been directed is the tendency to a better scale of wages for Chinese labour in British Columbia.

Provincial Colonization.

The exploration party sent out by the Government of Ontario early in the past summer returned during the month from the vicinity of Lake Abitibi and report satisfactorily as to the nature of the territory covered. The district explored was in the vicinity of Lake Abitibi, where, it is said, some 40 new townships will be located during the present autumn season. The excursion lasted six weeks. The following are extracts from the report presented, which will indicate to some extent the nature of the country referred to:—

The western portion of the area travelled is extremely level, but here and there are small glacial mounds of sand and gravel, which will be of great value in road making and railway building. Rolling land is characteristic of the eastern part. The whole region is intersected by numerous small rivers and lakes. The rivers are short, broad, sluggish, and have low, marshy banks. The lakes are mostly very shallow, Lake Abitibi itself being about 90 miles long, and not more than 15 feet deep at the most. It is probable that the problem of drainage will solve itself when the country is cleared.

About three-quarters of all the soil overlying the rock is clay. The clay differs in colour, composition and origin. Around Night Hawk Lake there are at least four different kinds of soil. First, glacial deposits of sand and gravel on the shores; second, heavy clay, very pure and suitable for brick making on some of the islands; third, terrace deposits on the shores; fourth, clay loam inland from the lake, both the latter soils being unexcelled for agriculture. In the Indian gardens around the lake there were on July 4 potatoes about 7 inches high. Those must have been planted about a month, and had not been injured by frost. Onions, turnips, carrots, and cabbages all thrived, even with the little care that was bestowed on them. Among the weeds in the gardens, shepherd's purse, curled dock, lamb's quarters, broad-leaved plantains, lady's thumbs, strawberry blight, and houseweed grew in great abundance, thus indicating a rich soil. A patch of common red clover on the bank of the Abitibi, crops of timothy at various Indian camping grounds, and the numerous poas—beaver hay being the commonest, and growing to a height of six feet—all foretold that some day the Abitibi region will be a great agricultural country.

The flora around Fort Metagna in the latter part of June was a few days behind that of the Abitibi region, 70 miles further north. In fact, Mr. Muller, of Fort Metagna, said he had been unable to produce a crop of oats, while at Moose Factory, on James' Bay, according to Indian reports, oats, wheat

and other cereals are grown with considerable success. However, if the earlier varieties were experimented with around Fort Metagma, successful results would doubtless be obtained. The weather there is mild in the low-lying country north of the height of land, and even considerably north of Fort Metagma.

The trees in this region are as follows: White and black spruce, balsam, white cedar, balm of Gilead, paper and yellow birch, jack pine, tamarack, black ash, white and red pine, white elm, mountain ash, pin cherry, mountain maple, several species of dwarf willow, shad bush and alder. Of these the most important from the lumberman's standpoint are white spruce, measuring from 14 to 24 inches in diameter; black spruce from 14 to 16 inches; balm of Gilead, 18 inches; white cedar, 2 feet; aspen, 14 to 20 inches. Unfortunately the white pine is not very common, and nearly all the tamarack in the country has been killed by the larch saw fly. Jack pine is found almost exclusively on the sandy areas. Large birches are extremely common.

The following is a list of the furs traded by the Indians at Fort Metagma for the year ended May, 1903: Ermine, 200; bear, 50; fisher, 15; lynx, 15; marten, 250; mink, 200; muskrat, 2,000; otter, 2,000; wolf, 1. Thanks to the wise legislation in the protection of the beaver, the animal is becoming much more common, and the danger of its extermination is warded off for some time. Moose, deer, caribou, grouse and ducks are perhaps of most interest to the sportsman, the moose being very numerous. The angler is well rewarded by large catches of pike, pickerel, black bass, perch, whitefish, speckled trout and others. Many of our common birds are found in the north country, among which are kingfisher, wood pewee, flicker, woodpecker, yellow warbler, chickadee, white-throated sparrow, sand piper, night hawk, Wilson's thrush, hawks and owls. In addition to these some distinctly northern birds were seen, e.g., Canada jay, loon, northern shrike, many warblers, nesting, and many species of duck.

Only a few fungous diseases were seen on the plants of the district. Black knot and shothole fungus on the cherry, rust on the wild raspberry, mildew on the wild gooseberry, and the poru fungus on the birch and spruces and the witches, broom on the balsam were the most common.

With regard to the country and its agricultural prospects, it has the rich clay loam of Manitoba and the North-west Territories, and is in about the same latitude as Southern Manitoba, having also the advantage of contiguity to the ocean. Again the timber will be a boon to the settler, not involving such toil in its removal as the primeval hardwood forests of old Ontario.

The exploring party sent out by the Ontario Government to search for coal in Northern Ontario also reported to the Crown Lands Department during September that soft coal of excellent quality, and sometimes of great thickness, had been discovered on both sides of the Abitibi river, which though possibly not of a kind suitable for export, would be of value for local consumption.

Favourable reports were also received by the Ontario Government during the month as to the quality of farm land in Hoyle and Murphy townships in Northern Algoma,

about fifty miles from the Timiskaming railway, the following being a quotation from a private letter received and published by the department at Toronto in relation to the subject:—

The township of Hoyle is level, almost flat, but as Porcupine river which runs through it northerly and southerly on the east side, has a good current, and its tributaries the same, it may be concluded that it will be easily drained. The soil is three or four inches of mould, then something over a foot of loam, shading off to clay loam and then any depth of clay. The banks of the Porcupine are from three to three and a half feet above the water, and show blue clay at the water surface. The timber is as shown on the map, spruce, not large, but tall; white birch, poplar and balm of Gilead, with trunks thirty to forty feet without a limb. There is a rapid on the east and west sides of the township, indicating a gravelly streak across the township, but other than this one could not find a stone big enough to throw at a squirrel. The season is somewhat shorter than here, but vegetation is more rapid. I visited an island in Night Hawk lake, east and south of Hoyle, and found potatoes with short green tops, and the hills full of good-sized potatoes and yet growing (this was on August 19). Farmers in the crew of men pronounced the soil good, and given that the G. T. P. runs near, so as to give access, Hoyle and Murphy offer great inducements for settlers.

The Present Season's Operations.

From the Timiskaming district very favourable reports of the season's agricultural operations have been received, the crops being very good, though somewhat late. The development of the country is reflected in the town of New Liskeard, which a year ago had a population of 800, and is now reported to number some 1,500 souls.

The report of the colonization agent of the C. P. R. Company, covering the six months ended July 31, shows the numbers of parties of immigrants going from Quebec and the Eastern States into New Ontario and the northern portion of Quebec during the six months covered to have been some 1,461 parties, representing about 7,000 persons, the majority having gone to the Labelle district in Quebec and to points between Mattawa and Sault Ste. Marie in Ontario. The colonists were for the most part French Canadians. The year's record is heavier than ever before, though, from the inquiries and reports on hand, 1904 is expected to show a still larger influx. It is estimated that the same number went in from the Toronto district.

Immigration Returns for August.

A total of 12,651 immigrants was reported by the Department of the Interior as arriving in Canada during August, made up of 8,837 arrivals at ocean ports, 3,316 at Winnipeg from the United States, 206 at Montreal from the United States, 213 returned Canadians, and 79 tourists. Of the arrivals at ocean ports, 3,143 were English, 596 Scotch and 318 Irish. Russians numbering 1,026, Swedish, 633, Norwegian, 396, Galicians, 395, Finnish, 388 and French 206, made up a considerable portion of the balance. There were also 5 immigrants from New Zealand, 9 from Australia, 95 from Wales, 35 from the West Indies and 161 from Newfoundland.

The statistics of returns to August 31, dating from the beginning of the year, showed in all 107,573 arrivals, of which 31,513 were English, 6,883 Scotch, 2,096 Irish, 32,119 from the United States and 949 returned Canadians. Prominent also in the list of arrivals were 7,936 Germans, 4,009 Russians, 2,801 Italians, 2,769 Swedish, 1923 Hungarians, 1933 Norwegians and 1,641 Bukowinians.

Homestead entries for August.

The following statement, published by courtesy of the Department of the Interior, shows the number of homestead entries, according to the various agencies, made during the month of August, 1903, as compared with the month of August, 1902 :

| Agency. | 1903. | 1902. | Increase. | Decrease |
|-------------------|-------|-------|-----------|----------|
| Alameda..... | 227 | 292 | | 65 |
| Battleford..... | 178 | 62 | 116 | |
| Brandon..... | 53 | 149 | | 96 |
| Calgary..... | 209 | 135 | 74 | |
| Dauphin..... | 27 | 18 | 9 | |
| Edmonton..... | 271 | 202 | 69 | |
| Kamloops..... | 10 | 4 | 6 | |
| Lethbridge..... | 109 | 110 | | 1 |
| Minnedosa..... | 34 | 38 | | 4 |
| New Westminster | 4 | 2 | 2 | |
| Prince Albert.... | 165 | 134 | 31 | |
| Regina..... | 492 | 389 | 103 | |
| Red Deer..... | 105 | 79 | 86 | |
| Winnipeg..... | 76 | 75 | 1 | |
| Yorkton..... | 328 | 213 | 115 | |
| Total .. | 2,288 | 1,904 | 550 | 166 |

It will be seen that the net increase in the number of entries during the month was 384.

The statement of entries made for the first two months of the fiscal year 1903-4 is as follows :—

| Month. | 1903. | 1902. | Increase. |
|-------------|-------|-------|-----------|
| July..... | 3,438 | 2,622 | 316 |
| August..... | 2,288 | 1,904 | 384 |
| Total..... | 5,726 | 4,526 | 1,200 |

Nationalities of Homesteaders.

The nationalities of homesteaders, as reported by the several agencies of the Department of the Interior in Manitoba, the North-west Territories and British Columbia during the month of August, 1903, were as follows :

| Nationalities. | No. of entries. |
|--|-----------------|
| Canadians from Ontario..... | 310 |
| " Quebec..... | 39 |
| " Nova Scotia..... | 10 |
| " New Brunswick..... | 10 |
| " Prince Edward Island... | 10 |
| " Manitoba..... | 68 |
| " North-west Territories.... | 48 |
| " British Columbia..... | 8 |
| Persons who had previous entry..... | 235 |
| Canadians returned from the United States | 58 |
| Americans..... | 718 |
| Newfoundlanders..... | |
| English..... | 333 |
| Scotch..... | 50 |
| Irish..... | 18 |
| French..... | 12 |
| Belgians..... | 3 |
| Swiss..... | 1 |
| Italians..... | 1 |
| Roumanians..... | 4 |
| Greeks..... | |
| Syrians..... | |
| Germans..... | 63 |
| Austro-Hungarians..... | 203 |
| Hollanders..... | 1 |
| Danes (other than Icelanders)..... | 6 |
| Icelanders..... | 10 |
| Swedo-Norwegians..... | 39 |
| Russians (other than Mennonites and Doukhobors)..... | 21 |
| Mennonites..... | 7 |
| Doukhobors..... | 2 |
| Chinese..... | |
| Total..... | 2,288 |

Representing 6,127 souls.

Of the total number of entries made during August by persons coming from the United States into Canada, 211 were from Dakota, 181 from Minnesota, 48 from Iowa, 45 from Wisconsin, 36 from Montana and 30 from Illinois.

Lands Patented in August.

The following is an abstract of letters-patent covering Dominion lands situated in Manitoba, the North-west Territories, British Columbia and the Yukon Territory, issued from the Department of the Interior during the month of August, 1903 :—

| Nature of Grant. | No. of Patents. | No. of Acres. |
|--|-----------------|---------------|
| British Columbia homesteads..... | 9 | 1,300·93 |
| British Columbia sales..... | 1 | 10·00 |
| Homesteads..... | 264 | 41,810·57 |
| Mineral rights..... | 1 | 320·00 |
| North-west Half-breed grants..... | 19 | 3,200·00 |
| Railways :— | | |
| Alberta Ry. & Coal Co..... | 1 | 21,920·00 |
| Canadian Northern Ry. Co..... | 3 | 412·00 |
| Can. Pac. Ry. grants..... | 42 | 59,792·43 |
| Man. North-western Ry..... | 13 | 5,760·00 |
| Man. South-western Col. Ry..... | 2 | 320·00 |
| Qu'Appelle, Long Lake and Sask. Ry. and Steamboat Co..... | 2 | 5 |
| Sales..... | 48 | 2,236·50 |
| School lands sales..... | 7 | 5,208·05 |
| Special grants..... | 6 | 845·00 |
| | 6 | 364·18 |
| Total..... | 421 | 143,499·68 |

CHANGES IN RATES OF WAGES AND HOURS OF LABOUR DURING THE MONTH OF SEPTEMBER.

THERE were four instances of increases in the rates of wages during the month of September,* concerning which the department was able to obtain detailed information as presented in the accompanying table. Some 721 work people in all were involved, and increases in the weekly pay-roll caused by four of the changes amounted to about \$813.

There was one instance of a reduction in wages affecting 19 work people and amounting to an aggregate decrease of \$28.50 per week.

There was one instance of a reduction in the hours of labour affecting 90 workmen and involving altogether a decrease in working time of 540 hours per week.

In the five instances of changes recorded in the table, the result, it will be seen, was obtained after either a strike or a lockout.

Other Changes.

More important in general effect perhaps than any changes noted in the table for September was the general upward tendency in wages shown in the lumbering, agricultural and railway construction industries during the month. In the first named the general prosperity of industry rendered it exceedingly difficult for employers in central and eastern Canada to secure the necessary amount of labour for work in the shanties during the coming season, with the result that wages have reached a higher level than perhaps ever before in the history of the industry. In western Canada the considerable amount of new railway lines still under construction has, in view of the approach of the close of the season for outdoor employment, rendered necessary a decided effort on the part of the companies to overtake the work in time. Extra gangs have, in many localities, been employed, and, in order to attract the necessary labour, wages were increased from the prevailing

* See also a reference to a change of the wages rate at Walkerville, Ont., in article on Trade Disputes of the month of September, in the present issue of the GAZETTE.

rate of \$2 per day by 25 cents to a rate of \$2.25 per day. Free transportation to and from the scene of operations is granted in addition, and the men are given board at the rate of \$4 per week. Farm labour throughout western Canada has also obtained a high rate of wages during the progress of harvesting. In the building trades at Winnipeg, as will be seen from the report of the *Gazette* correspondent, the press of work has led to instances of exceptionally high wages being paid.

Increases to Weavers.

A number of expert weavers in the employment of the Canadian Coloured Cotton Mills Company at Milltown, N.B. received an advance of $12\frac{1}{4}$ per cent on certain lines of fancy goods. In more detail the advances were as follows:—On looms running 140 picks per minute those who receive 43 cents for a cut of 33 yards will now receive 50 cents per cut on this style. On the Lapert and Jacquard looms with heads the weavers receive the same increase. The change, however, is not included in the table, being less in the nature of an advance in wages than because of the fact that the fancy patterns of the present season of manufacture are more difficult to weave than last season, and the company regulated the wages accordingly.

Wages of Tailors at Windsor.

In connection with the advance to pants and vest makers at Windsor, Ont., a new bill of prices throughout was agreed upon between the local union and employers. Some of the more important items of the bill were as follows:—

COATS.

| | |
|--------------------|---------|
| Dress coats..... | \$ 9 00 |
| D. B. frock..... | 8 50 |
| S. B. frock..... | 7 50 |
| Tuxedos..... | 6 50 |
| D. B. cutaway..... | 6 50 |
| S. B. cutaway..... | 6 25 |
| S. B. sacque..... | 5 25 |

| | |

| K. T. cape..... | 3 00 |
| Police D. B..... | 5 75 |
| Police S. B..... | 3 25 |
| Police blouse..... | 4 00 |
| S. B. uniform..... | 5 50 |

Silk linings to waist seam on dress or frock coats considered full length.

All extras not mentioned on this will be paid for at the rate of 25 cents per hour.

There shall be no contract work whatever.

Weekly men, new work, \$17 per week, 10 hours per day.

Bushelmen, \$12 per week.

Overtime to be paid at the rate of time and a quarter.

All work to be made in backshops established by bosses.

It is hereby agreed by and between the parties hereto that the above bill of prices and conditions shall be in full force and effect from Sept. 23, 1903 to Sept. 23, 1905.

CHANGES IN RATES OF WAGES AND

| Class of Workpeople affected. | Locality. | Approximate Number of Workpeople affected. | Date from which change took effect. | Particulars of Change. |
|-------------------------------|--|--|-------------------------------------|---|
| <i>Building Trades.</i> | | | | |
| Sheet metal roofers. | Montreal, Que. . . | 90 | Sept. 1.. | Advance from 20c. to 25c. per hour with reduction in hours from 10 to 9 per day. |
| Stone sculptors | " | 6 | " 1.. | Advance from 25-30c. per hour to 40c. per hour with a reduction in hours and Saturday half-holiday. |
| Builders' labourers. | " | 600 | " 23.. | † Advance of about 2c. an hour from a scale to 15-18 to one of 17½ to 20c. |
| <i>Woodworking Trades.</i> | | | | |
| Organ finishers. | Guelph, Ont. . . . | 19 | " 14.. | Change from piece-work system to a rate, based on day work of 18c. per hour for fillers, 19c. for stainers and shellackers, and 21c. for varnishers, rubbers and polishers. |
| <i>Clothing Trades.</i> | | | | |
| Garment makers. | Windsor, Ont. . . Walkerville, Ont. Sandwich, Ont. | 25 | " 23.. | An advance of 5 per cent to pants and vest makers. |

* Approximately.

† Labourers coming under the 17½c. per hour scale are those engaged in excavation work; the others, such as scaffolders, mortar mixers, hod carriers and derrickmen, coming under the 20c. rate per hour.

TRADE DISPUTES DURING THE MONTH OF SEPTEMBER.

THE month of September was comparatively quiet with regard to industrial disturbances, only seven new disputes having taken place, none of which had any serious effects on prevailing conditions. There were two strikes in the building trades in Montreal, which were declared by iron roofers on September 1, and by builders' labourers on September 23, but they did not greatly interfere with other branches of construction. Of the disputes which began before September 1, and were in continuance throughout the month, the most important in point of numbers was a strike of rubber workers at Port Dalhousie, where the situation remained unchanged.

Analysis of Trade Disputes during the month.

Number and magnitude.—The number of disputes reported to the department as being in existence during September was fourteen, excluding five which had apparently lapsed. This is a decrease of nine compared with the previous month, and an increase of four over those of September, 1902, omitting three minor disputes, which were included in the table for that month. Seven disputes were begun before September 1, and seven after. Of the fourteen disputes, three old and four new ones were settled during the month, two lapsed, leaving five in existence on October 1. In

HOURS OF LABOUR DURING SEPTEMBER.

| | | | | | | | | |
| | | | | | | | | " strike for an increase of 10 per cent. |

three cases the strikers were successful, in two, the employers, in two others a compromise was reached, one was referred to arbitration, and in another the men returned to work after receiving a satisfactory promise.

Trades affected by new disputes.—The trades affected by new disputes included building trades, tailoring, boilermaking, bookbinding, as well as those of blacksmiths and batteamen.

Loss of time in working days.—The approximate loss of time in working days by men directly affected by labour disputes was 14,540, a large decrease compared with the loss of 30,694 days in August.

Causes of new disputes.—The following is a classification of the causes of the new disputes reported to the department:—

Demand for increase of wages..... 3
Demand for increase of wages and shorter

hours..... 1

6

Demand for special payment..... 1
Discharge of an employee..... 1
The assigning of alleged journeymen's
work to an apprentice... .. 1

Strikes Commenced prior to the Beginning of the Month.

There are few incidents to record in connection with the disputes which commenced before September 1. The two that were settled during the month were a strike of miners at Van Anda, Texada Island, B.C., and of organ workers at Guelph, Ont. In the former case the strikers had originally demanded a nine-hour day for carpenters and blacksmiths with the same pay as for ten hours. This demand was subsequently withdrawn and recognition of their union substituted for it. The dispute began on August 12 and was declared off on September 2, the company having agreed to recognize the union and to discuss any grievances in future with a committee of the union.

| Ontario..... | Toronto..... | Bookbinders..... | Apprentice alleged to have been given journeyman's work. | 1 | 27 | | " | 28 | " |

*Considerable difficulty has been experienced by the Department of Labour in making an exact classification of existing trade disputes, particularly in cases where, after the declaration of a strike, some of the original strikers have returned to work, or have had their places filled with new hands, or where the establishments affected have found that for either of these reasons, or both, or for other causes, their business is no longer seriously affected. In such cases while, in one sense, it may be true that a strike may be regarded as still in existence because of no formal declaration by either of the parties of its termination, yet so far as the actual effect upon the business interests of the community is concerned a record of the continuance of such a dispute might be misleading. The list of trade disputes published in the present table, therefore, includes mention only of such disputes as during the month or at its termination affected to an appreciable degree the carrying on of the industrial or business operations of the firms or establishments concerned, mention, moreover, is not made of disputes involving less than six employees or of less duration than 24 hours.

+ Establishment was closed for two days, but none were indirectly affected after Sept. 29.

The strike of organ workers at Guelph began on August 29 and ended on September 14. The cause of the trouble was a readjustment of the wages of organ finishers of the Bell Organ and Piano Company, which resulted in a reduction averaging about 7½ per cent.

The company was willing to pay 16 to 18 cents per hour for filling, staining and shellacking, 18 to 20 cents for varnishing and rubbing, and 20 cents for polishing. This, they claimed, was higher than the amount paid for similar work in other factories in Guelph. The mayor of Guelph offered his services as mediator, but his offer was declined both by the company and the woodworkers' union, to which the strikers belonged. On September 14 the men accepted the following scale of wages:—17 to 19 cents per hour for fillers, 19 cents for stainers and shellackers and 21 cents for varnishers, rubbers and polishers. Before the strike they had been paid by piece-work, their earnings averaging from \$1.90 to \$2.25 per day.

No new developments occurred in any of the disputes which began prior to the beginning of the month and continued throughout September, the situation remaining practically unchanged in every case.

New Disputes.

None of the new disputes of the month were of considerable importance. There was only one involving a large number of men, which was a strike of builders' labourers at Montreal, in which about 1,000 men were concerned. As, however, they were less than two-thirds of the total number of labourers in Montreal, the work of building was not greatly impeded, and the contractors stated that they were able to secure all the men they required. The cause of the strike was a demand for payment for overtime at the rate of time and a half, and for Sunday labour at double time.

No settlement was reached at the end of the month.

Strike of Iron Roofers at Montreal.

The dispute which was of longest duration was a strike of iron roofers at Montreal, which lasted from September 1st to the 22nd. Eleven firms and 40 men were involved in it. The cause of the dispute was the refusal of employers to sign a contract presented to them by iron roofers union, which contained the following articles :

It is understood that this contract is to be in force from September 1, 1903, to September 1, 1904.

Article 1.—Nine hours (9) shall constitute a day's work, from 7 o'clock in the morning to 5 o'clock in the evening.

Article 2.—All worked performed before or after the time specified in Article No. 1 shall be paid for at the rate of time and a half until midnight, and double time from midnight to seven o'clock in the morning and also on Sundays, Christmas Day and New Year.

Article 3.—No work shall be performed on Labour Day.

Article 4.—The minimum scale of wages shall be twenty-five cents an hour, to be paid every Saturday, not later than five o'clock in the afternoon.

Article 5.—When a member of this union is discharged, he shall be paid immediately, or if he is obliged to wait, he shall be paid for the time he waits.

Article 6.—Not more than one apprentice to three (or less) journeymen shall be employed.

Article 7.—When any work has to be done outside of the city, the travelling expenses (going and coming) and the lodging of the men shall be paid by the employer so long as the work lasts.

Article 8.—Every master-plumber and roofer employing sheet-metal workers or iron roofers in the city of Montreal and suburbs, agrees to employ only members of this union in good standing.

Article 9.—No member of this union shall be allowed to take sub-contracts or do 'jobbing' or work for anybody taking such contracts, under penalty of fine or expulsion from the union, nor work for any other persons who are not master plumbers or roofers.

Article 10.—We do not agree to work on any job where there are labour troubles.

The dispute practically began on August 29, when five firms locked out their men, and three days later a general strike was declared. Ten small firms had signed the contract immediately, and the eleven firms which were involved in the dispute, acceded to the men's demands on September 22.

Minor Industrial Disturbances.

Of the minor disputes of the month, which have been omitted from the statistics, the

two most noteworthy was a strike of match makers at Walkerville. The machine hands of the Walkerville match factory had been paid at the rate of 30 cents per 100 forms. Owing to improvements in materials, &c., their earnings had greatly increased, and the company therefore announced that their wages would be cut down to 26 cents per form. For this reason the men stopped work on September 22. Negotiations were immediately begun between the company and the strikers, and an agreement was quickly reached, whereby the men were to receive 28 cents per form, and work was resumed on the following day. The men claim that their earnings will not be diminished by the new arrangement.

The table published herewith is a compilation of the trade disputes in the Dominion of Canada, which began or were in continuance during the month of September, and which have been reported to the department.

UNIONS FORMED DURING THE MONTH OF SEPTEMBER, 1903.

The department has received notice of the following organizations as having been formed during the month of September, 1903 :—

New Brunswick—

Railway freighthandlers and baggage-men.

Street railway employees.

Quebec—

Cigarmakers.

ENFORCEMENT OF FAIR WAGES RESOLUTION BY POST OFFICE DEPARTMENT, SEPTEMBER, 1903.

During the month of September the following orders were given by the Post Office Department for the supplies below mentioned. All were given subject to the regu-

lations for the suppression of the sweating system, and securing payment to the workmen and women of fair wages, and the performance of the work under proper sanitary conditions:—

| Nature of Order. | Amount of Order. | |
|--|------------------|------|
| | \$ | cts. |
| Making and repairing metal dating and other hand stamps; also type and brass crown seals..... | 325 | 60 |
| Making and repairing rubber dating and other hand stamps and type..... | 32 | 05 |
| Supplying stamping material, inclusive of making and repairing pads, also wooden boxes and postmarking and cancelling ink..... | 801 | 05 |
| Making and repairing post office scales.. | 539 | 00 |
| Supplying mail bags..... | 1,936 | 20 |
| Repairing mail bags..... | 891 | 79 |
| Repairing mail locks and supplying mail bag fittings..... | 568 | 20 |
| Making letter boxes and repairing postal letter boxes and mail clerks' tin boxes. | 171 | 73 |
| Miscellaneous orders for making and repairing postal stores..... | 13 | 50 |
| Making up and supplying articles of official uniform..... | 1,729 | 50 |

RECENT INDUSTRIAL INVENTIONS.

(The following particulars have been obtained from the latest numbers of the *Canadian Patent Office Record*, issued by the Department of Agriculture.

During the month of June 538 patents were issued in Canada. Among them were sixteen for electrical inventions, including three electrodes, four systems of telegraphy, three lamps and a composition for a storage battery. There were also eight metallurgical inventions, including an apparatus for treating ores, a process of extracting metals from ores, and a gold separator. Among the important industrial machines were a match-making machine, a pulp machine, a wood-sawing, bevelling and chamfering machine, and a glass-grinding and polishing machine. A number of new chemical processes were patented connected with the manufacture of artificial silk, starch, sulphuric anhydride, aluminum, &c. Other patents were for an acetylene gas generator, a miners' safety lamp, a harvesting machine, a printing press, three adding machines, an adding attachment for a typewriter, &c., &c.

GOVERNMENT CONTRACTS FOR THE MONTH OF SEPTEMBER.

(Information supplied by the Department of Public Works.)

The following is a list of the contracts awarded by the Department of Public Works, and which received the signatures of both parties to them, during the month of September, together with the minimum rate of wages to be paid to the labourers engaged upon the work, as set forth in the 'fair wages' schedule inserted in each contract.

Construction of a building for Post Office, Customs and Inland Revenue Offices, Valleyfield, Que.: date of contract September 14, 1903. Amount of contract, \$32,500.

FAIR WAGES SCHEDULE.

TRADE OR CLASS OF LABOUR.

RATE OF WAGES.

REPORTS OF DEPARTMENTS AND BUREAUS.

The following reports of departments and bureaux were received at the Department of Labour during June, 1903:—

CANADIAN REPORTS.

Fruit Growing in Ontario.

Thirty-fourth Annual Report of the Fruit Growers' Association of Ontario, 1902; Toronto; the King's Printer; 180 pages.

The Provincial Fruit Growers' Association's report for 1902, which is printed by the Ontario Department of Agriculture, contains a detailed statement, embodied in the secretary's report, of the various operations carried on under the auspices of the association with a view to increasing and improving the growing of fruit in Ontario. The work of organizing local fruit growers' associations and institutes for the dissemination of information in reference to the fruit industry is described, and an account given of the object lessons in pruning, spraying, thinning fruit, packing, &c., which were carried out by the association. The volume also contains a large number of papers by members of the association with reference to both fruit growing and gardening, the following being a partial list of the subjects treated:—injurious insects, fungous diseases, soil moisture, new fruits, the grading and packing of apples, markets and marketing, fancy fruits, fruit exhibits, outdoor roses, bedding geraniums, decorative shrubs and plants, Canadian maples, rose pests, notes on conifers, the care of lawns, &c., &c.

BRITISH REPORTS.

Cost of Living in Great Britain.

Report on wholesale and retail prices in the United Kingdom in 1902, with comparative statistical tables for a series of years; London, Eyre & Spottiswoode; 456 pages, price 2s. 1d.

For several years past the Labour Department of Great Britain has been engaged in an investigation of a somewhat elaborate description with regard to the course of

general prices in the United Kingdom, and though the inquiry is still incomplete with regard to several branches of the subject, it has been thought desirable to publish the results thus far arrived at without further delay, 'in view,' as a recent report of the department states, 'of the great amount of public attention now being devoted to all questions affecting prices of commodities and the cost of living of the working classes.' The department has accordingly prepared for publication a tabulation of the information at its disposal up to the end of 1902. The tables are arranged under two heads relating respectively to wholesale and retail prices. In the former class some 188 tables are included relating to coal, iron, steel, cotton, wool, corn, cattle, meat, dairy produce, fish, sugar, oils, seeds, building materials and many other articles, comparative statistics for a period of years being given in each case. The section of the volume relating to retail prices is more restricted in its scope owing to the difficulty of obtaining data, this being the first attempt ever made in an official report to compile continuous records of the retail prices of commodities in the United Kingdom. Special attention, however, is directed to the record of prices during the whole of the nineteenth century which the department was able to present. The method of index numbers has been adopted in order to reduce the oscillations of prices to a common denominator and the various changes have been very graphically depicted in a series of charts to which several pages of the volume are devoted. Though it is not attempted to comment in detail on the changes of prices shown in the tables and charts, it is stated, as regards the level of prices in 1902, that no great change took place as compared with 1901, though on the whole there was a slight reduction in the general average, there being a marked fall in the coal and metal groups and a rise in the food and drink

groups, corn and meat contributing almost entirely to the latter development. The following paragraph from the introduction to the volume may be quoted in further reference to this branch of the subject :—

If we turn to the tables of retail prices, which are hardly sufficiently complete to warrant treatment by method of index numbers in an official publication like the present, the most important changes in 1902 to be noted are the decreases in the prices of coal, sugar and butter, and the considerable rise in the price of beef. The average reduction in the price of coal as compared with 1901 was 1s. per ton. As compared with the price in 1900 the reduction was much more considerable amounting to about 4s. 3d. per ton on the average. In 1900, however, the price of coal was higher than in any year since 1873. The retail price of sugar showed a tendency to fall in price during 1902, but it was still appreciably higher than in 1900. Sugar, however, is still less than half its price thirty years ago. During the year the price of butter was on the whole less than in 1901 by about 1d. per lb. The most considerable rise in retail prices in 1902 was that of beef, British and foreign, which commenced in the month of May, and continued gradually until October, the price for all the best portions were 1½d. and 2d. per lb., in excess of the prices at the same date in 1901. The prices of British and colonial mutton and of pork were also advanced, but the rise in these cases was not nearly so great, that of mutton being about ½d. per lb., and that of pork 1d. per lb. There was a slight fall in the price of most kinds of farinaceous foods during 1902.

In the appendix to the volume full explanations are given as to the sources of information of the department and the method pursued in constructing the index numbers of prices.

The coal supply of Great Britain.

First report of the Royal Commission on coal supplies, vol. II, minutes of evidence and appendix, London, Eyre & Spottiswoode, 364 pages; price 3s.

Supplement to the first report of the Royal Commission on coal supplies, containing plans, curves and diagrams, vol. III: London, Eyre & Spottiswoode, price 7s. 9d.

Volumes II and III of the report of the Royal Commission recently appointed in Great Britain to examine into the question of coal supplies are devoted respectively to the minutes of the evidence taken and of a series of carefully executed diagrams illustrative of the same. A list of the witnesses examined and of the questions addressed to them upon, first, the limit of depth in coal mining; second, the minimum thickness of workable seams of coal, and third, waste in working, are prefixed to the evidence, and a

number of reports and papers of a more or less technical character, received from persons other than witnesses, are added in an appendix.

Labour Conditions in the Mines and Quarries of Great Britain.

Mines and Quarries; General Report and Statistics for 1902; Part II—Labour; London, Eyre & Spottiswoode, 152 pages; price 10d.

The part of the general report and statistics on mines and quarries published by the home office of Great Britain in relation more particularly to the condition of the labour employed therein, is divided into four sections, dealing with the number of persons employed, accidents, prosecutions under the Mines and Quarries Acts, and other questions of a more general nature.

Under the first heading it is stated that there were 855,603 persons employed in and about mines in Great Britain in 1902, and 97,108 in or about quarries. Of those employed at mines, 680,936 worked under ground, and 174,667, of whom 5,674 were females, above ground. Compared with the figures of 1901 there was an increase of 16,425 persons employed in mining. This is almost wholly accounted for by an increase of 18,139 persons in the number employed in coal mining, though there were 47 fewer coal mines at work in 1902 than in 1901. In iron and 'other' mines there was a decrease of 1,650 males and 164 females.

There were 1,061 fatal accidents in and about the mines and quarries of the United Kingdom in 1902, causing the loss of 1,172 lives—a decrease during the year of 14 in the number of fatal accidents and of 57 in the number of lives lost. The worst accident of the year was an explosion of fire damp at the McLaren colliery, Abertyswg, Monmouthshire, which caused a loss of 16 lives, and by which 18 were injured more or less severely. Three-fourths of the fatal accidents by explosions in coal mines were

due to naked lights, the illegal use of matches or the illegal opening of a safety lamp. There were 64 cases of rope breaking in shafts and on inclined planes, but only 12 persons were reported as killed from this cause. In quarrying, the largest number of accidents occurred through persons failing to shelter themselves properly while blasting was going on.

There were 73 prosecutions and 52 convictions of owners and managers, and 859 prosecutions and 829 convictions of workmen for offences under the Coal and Metalliferous Mines Regulation Acts. Under the Quarries Act there were 35 prosecutions and 33 convictions of owners and 6 prosecutions and 6 convictions of workmen.

Under the heading of general remarks in the report the following, among other subjects, are treated: *Explosions* in coal mines, coal cutting machinery, employment of boys at mines, ankylostomiasis, &c.

Workmen's Trains in England.

Report from the select committee on workmen's trains together with the proceedings of the committee, minutes of evidence and appendix; London, Eyre & Spottiswoode, 53 pages, price 6d.

In April last a motion was approved by the House of Commons of Great Britain favouring the appointment of a select committee to inquire into the working and administration of the Cheap Trains Act of 1883, and to report on the subject, recommending if possible amendments thereto for the purpose of improving the service of workmen's trains in the neighbourhood of London and elsewhere in Great Britain. The committee was nominated on June 24 and held two meetings for the taking of evidence, a verbatim account of which was presented in the report which the committee on July 30 addressed to Parliament. The evidence as therein set forth was that of the permanent secretary of the Board of Trade who was examined on the subject of legislation prior to the Cheap Trains Act and the present bearing of the law on the

subject. A representative of the Inland Revenue Department was also examined and furnished information in regard to the passenger duty on railways. In the appendix to the report are inserted specimens of workmen's trains clauses inserted into railway bills passed both prior and subsequent to the Cheap Trains Act of 1883, a copy of the Cheap Trains Act of 1883, a statement showing the approximate number of workmen's daily tickets issued and other documents relating to the subject. The committee recommended the appointment of a further committee to deal with the matter.

Railway Accidents in Great Britain.

General Report of the Board of Trade upon accidents that occurred on the railways of the United Kingdom during the year 1902; London, Eyre & Spottiswoode, 34 pages, price 3½d.

The report on railway accidents in Great Britain during 1902, as presented to the Board of Trade, is founded on returns made by the railway companies under the Regulation of Railways Acts, and on reports made after inquiry by officers of the Labour Department itself.

There were in all 1,096 persons killed, and 6,661 injured in railway accidents in Great Britain in 1902. Of these, 129 of the killed and 2,546 of the injured were passengers, and 447 of the killed and 3,823 of the injured were servants of railway companies. In addition to these the companies report 75 killed and 11,153 injured from accidents occurring on their premises but not connected with the movement of railway vehicles. Thus, the total number of personal accidents reported by the railway companies were 1,171 persons killed and 17,814 injured. The total number of passenger journeys made in Great Britain in 1902, exclusive of journeys by season ticket holders, was 1,188,219,269, or 15,823,369 more than in the previous year. Thus there was 1 in every 9,211,002 passengers killed during the year 1902, and 1 in every 466,700 injured.

In 1901 the proportions were 1 in 8,684,414 killed, and 1 in 546,571 injured.

The report contains full statements from the railway companies of the various accidents which occurred, classified according to cause of accident, followed by a tabular summary of the same. The table relating to accidents to railway employees is particularly exhaustive, relating as it does to some 575,834 men, of whom 435 were killed and 3,806 injured in the performance of their duty. There were 560 inquiries held into railway accidents, involving fatal and other injuries to 573 persons, nearly all of whom were servants of railway companies. It was found that want of caution or misconduct on the part of the injured persons was responsible in 213 cases, want of caution or breach of rules on the part of servants other than the persons injured in 115 cases, unsatisfactory systems of working in 51 cases, defective apparatus in 40 cases, and misadventure or accidents in 114 cases.

Hours of Labour of Railway Employees.

(Return in pursuance of section 4 of the Regulations of Railways Act, 1889. London, Eyre & Spottiswoode; 47 pages; price, 5d.)

The return required of the various railway companies of the United Kingdom under section 4 of the Regulation of Railways Act, 1889, refers in the present volume to railway servants of certain classes who, on one or more occasions during the month of December, 1902, were on duty for more than twelve hours at a time, or who, after being on duty more than twelve hours, were allowed to resume work with less than nine hours' rest. The return in question relates to passenger guards and brakemen, passenger engine drivers and firemen, goods guards and brakemen, goods engine drivers and firemen, signalmen and examiners, and shows, besides the more immediate object of the report, the total numbers of these classes of workmen in the employ of the several companies.

COLONIAL REPORTS.

Industrial and Labour Conditions in New Zealand, 1902-03.

(Twelfth Annual Report of the Department of Labour, New Zealand; Auckland, King's Printer.)

The twelfth annual report of the Department of Labour of New Zealand, covering the late financial year of that colony, namely, from the 1st of April, 1902, to the 31st of March, 1903, was received at the Department of Labour of Canada during the month just past. The subject to which attention is first directed and on which special emphasis is laid throughout the report, in relation to its effect on labour and industry, is the general prosperity of New Zealand, which, after steadily augmenting for several seasons past, reached a point in 1903 which is considered to have finally demonstrated the progressive character of the colony's industrial and commercial enterprises. Exports during the period covered by the report showed an increase of £3,000,000 over the preceding year, while the activity in the several branches of trade was such as to afford employment not only to the skilled and unskilled labour of the colony itself but to the large reinforcements of workmen which came in from abroad, the arrivals of the year numbering 12,361 in excess of the departures. This is a record largely accounted for by the drought in Australia which drove some 9,535 men into the sister colony.

STATISTICS OF FACTORIES AND SHOPS.

There has been a steady gain in the numbers of persons working in factories in New Zealand, from 29,879 in 1895 to 59,047 in 1903, an increase of practically 100 per cent. The working of the Factory Act of 1901 is stated to be eminently satisfactory. With regard to employment in shops the report recommends the adoption of a minimum age below which no child may be employed as an errand boy or otherwise and a diminution of the hours laid down under

the present Act as the weekly time of a shop assistant. The better class of shops, it is stated, does not work its assistants more than eight hours a day except for one day in the week, and there is no good reason for the working of a week of 52 hours being considered in a shop equivalent to 45 hours in a factory. It is also stated as a boon to be desired that shops now exempted from closing, being for the most part those in which perishable goods are sold, should be made to shut on an appointed half day per week.

CONCILIATION AND ARBITRATION PROCEEDINGS.

The effect of the amendment of 1901, which practically superseded conciliation boards in New Zealand and allowed a dispute to be taken direct to the arbitration court, has proved to congest the latter court with business and somewhat delay its decisions, in spite of the efforts of the court to overtake the large number of cases brought before it. It is recommended, in consequence, that some of the minor duties of the court, such as the adjudicating on cases of breach of award and in actions for the recovery of compensation under the Workmen's Compensation for Accidents Act, should be taken from it and time be thus afforded it for the larger issues involved in industrial disputes.

DECISION IN THE FURNITURE TRADE, AUCKLAND.

An explanation is given in the report of the dispute in the furniture trade in Auckland in February last, which was commonly reported in the newspaper press as having given rise to a lock-out. Considerable attention was not unnaturally attracted by this report as there had been a belief extant that strikes and lock-outs were impossible in New Zealand under the Arbitration Act. It was proven afterwards, however, that there had been no lock-out as the firms involved had dismissed some 70 employees

because of their inability to earn the new wage awarded by the court. 'Of course,' the report adds, 'to the 70 persons in question it was practically a lock-out, since they found themselves in the street through no fault of their own, as, even if they had been willing to acknowledge incompetency, the secretary of the Workers' Union refused to consider as incompetent men who were earning the minimum wage when the new award was delivered.' A decision was finally rendered in favour of the employers, the case having been carried before the arbitration court on the ground that there had been a *combined* effort to defeat the award. The president of the court made an important announcement in the course of the conduct of the case, viz :—that if combined and concerted action, such as a strike had taken place, he would consider such action as a breach of award and punish it severely. This announcement somewhat modified public opinion as to the meaning of the Act, it having been previously held by many that a strike or lock-out was only punishable if it took place while proceedings were pending. The law of New Zealand as thus interpreted, however, appears to be, in the words of the report :

'That although an individual employer is competent to dismiss his workman, or an individual workman is free to leave his employer's service, there must be no concerted action on either side in this direction, or, if so, such action will constitute a strike or lock-out, and be punishable under the Arbitration Act.'

WORK OF THE DEPARTMENT OF LABOUR.

The report closes with a brief statement from the Chief Clerk of the department on the various operations carried out during the year under his supervision. The reports of local inspectors of factories and agents of the Department of Labour, which contain a very extensive and detailed review of

general labour conditions throughout the colony, together with returns showing the number of cases dealt with by the Court of Arbitration, statistics of persons assisted by the Department of Labour, accidents reported during the year, legal decisions, statistics relating to factories, etc., etc., are appended.

UNITED STATES REPORT.

Officials of Labour Departments.

(Proceedings of the Association of Bureaus of Labour Statistics of America, held at Washington, D.C., 1903. 178 pages.)

The nineteenth annual convention of the Association of Officials of Bureaus of Labour Statistics of America was held at Washington, D.C., from April 28 to May 2 of the present year, and the proceedings of the meeting are now set forth in the form of an official report. The report proper is prefixed with a chronology of the association, a directory of bureaus of labour in America and the rules of procedure adopted by the association. In the volume proper reports of the various states and provinces as to the current work and the influence on public policy of bureaus of labour are contained. The question of co-operation and unification in statistical work as between the several bureaus was the subject of special discussion at the meeting. In the appendix devoted to a synopsis of federal and state laws and reports, tables are included giving a digest of the various laws and reports on manufactures published during the year, and on subjects other than manufactures such as mine inspection, telegraph, telephone and express business, &c., &c.

EUROPEAN REPORT.

Labour Legislation of 1902.

(Annuaire de la législation du travail publié par l'Office du Travail de Belgique, 6me année, 1902; J. Lebeque & Cie, Bruxelles; 718 pages.)

The sixth annual report on labour legislation published by the Department of

Labour of Belgium contains the full text of the various Acts affecting labour passed during 1902 in Germany, Austria-Hungary, Belgium, Denmark, Spain, France, Great Britain and her Colonies, Italy, Norway, Holland, Roumania, Russia, Sweden, Switzerland and the United States of America.

THE MOSELY INDUSTRIAL COMMISSION.

During the last three months of 1902, a commission, composed of prominent members of twenty-three leading trades unions of England, accompanied by Mr. A. Mosely, an English capitalist, at whose invitation they had come, made a tour through the United States for the purpose of investigating the industrial conditions and customs prevailing there. The reports of these commissioners, which have recently been published, contain a large amount of important information, especially with reference to rates of wages, conditions under which work is carried on, and other special features which form a basis of comparison between England and the United States.

Rates of Wages and Cost of Living.

The general opinion of the delegates was that the rates of wages paid in the United States are higher than in England, and that the cost of living is greater, but there is a difference in favour of the American compared with the British workman. Moulders are reported to earn 100 per cent more in the United States than in England, operative engineers, from 35 to 70 per cent more, ship-builders and boilermakers, from 75 to 100 per cent, cutlers about 100 per cent, tailors, 100 per cent. The cost of living was stated to be between 15 and 50 per cent higher in the United States, the difference being chiefly in rent and in the better qualities of clothing. Taking wages and living expenses together, all the reports state that American workingmen are better off than those in England.

Standard of Living.

The labouring classes in the United States possess a better general education than those in England, but with regard to technical education three representatives reported that the English youths were better equipped. The opinion of the majority was that American workmen are no better housed or clothed than Englishmen, but they are probably better fed. In their habits, they

are less addicted to gambling and intemperance.

Factory Conditions.

The chief features noticed in many of the factories which were visited were the readiness of the employer to adopt new improvements in machinery and methods, and the encouragement given to the operatives to offer suggestions on these points, and consequently a greater number of labour-saving devices.

RECENT LEGAL DECISIONS AFFECTING LABOUR.

The following synopses of cases affecting labour are taken from the latest law reports and other legal records of the different provinces of Canada :—

QUEBEC CASES.

Accident in a Lead Mine.

R. was employed in a lead mine in the County of Pontiac. The mine had only one shaft, which was about 250 feet deep. The elevator, or cage, by which the employees and the materials were taken up and down, consisted of a platform four feet square, supported on each of two sides by a perpendicular post running from the middle of the side to a crossbeam above, each of these posts being supported by an iron bar running diagonally from the corner of the platform to the crossbeam. The other two sides of the platform were open, except for a horizontal bar which ran across each of them about 3 feet above the floor; this bar could be moved for the purposes of ingress and egress.

It appeared from the evidence, that on a certain Saturday, at the close of the day's work, about 75 lbs. of dynamite, in the form of cartridges, exploded at the bottom of the mine. These cartridges contained about 60 per cent of nitro-glycerine which throws out

carbolic gas. Evidence was given to the effect that one per cent of this gas in the atmosphere renders respiration difficult—while ten per cent asphyxiates. After the blasting operation, the mine was, as usual, ventilated by artificial means; it was proved that the air compressor was used for some time on Saturday and again for a short time on Monday before the men commenced work; but the evidence, in the opinion of the court, showed that the mine had not been properly ventilated, but was still in a dangerous condition when the men went down into it to work on Monday morning.

R. was one of the men who went down in the cage on Monday. Another employee who was working near him fell down unconscious, and R. picked him up and helped him into the cage, which commenced to move up with them. On the way up, R. fell off and was killed.

R.'s widow sued his employers for \$5,000 damages, claiming that they were responsible, (1) On account of defective ventilation whereby R. was asphyxiated when going up in the cage; and (2) in not having the cage protected in such a manner that their employees could not fall out of it, if, from gas or other causes, they lost consciousness.

The Trial Court awarded \$4,500 damages. The employers appealed, but a Court of Review unanimously confirmed the judgment, being of the opinion that R. was undoubtedly overcome by gas, and also that the cage was not sufficiently protected. The court also stated that, under the circumstances, it did not regard the damages awarded at the trial as being in anyway excessive.

(*Beauvais v. British Canadian Lead Company, Ltd.* Judgment given by a Court of Review at Montreal, September 26, 1903).

Accident caused by the negligence of Employee.

M. was engaged in washing the windows of a certain factory. While on the sill the window fell on her hand and crushed it, and M. being unable to hold on, fell to the ground, sustaining severe injuries. She brought an action against her employers, claiming \$1,000 upon the ground of negligence. The employers replied that the accident was due to M.'s own imprudence, and that she had been warned not to take any such risks.

The court held that M. had not proved any responsibility on the part of her employers for the accident, and her action was therefore dismissed with costs.

(*Murphy v. The Union Card and Paper Company, Ltd.* Judgment given in the Superior Court at Montreal, September 14, 1903, by Mr. Justice Fortin).

ONTARIO CASE.

Alleged Defective Machinery.

G. was employed to work at a paper cutting machine, in the use and management of which he was instructed by his employers' foreman. The object of the machine is to cut blocks of paper, and its mode of operation (according to an extract from the judg-

ment) is as follows: 'The operator standing in front of it places upon the table of the machine the block or pad of paper intended to be cut. By a double movement of the throw-off handle by the operator, parts of the machinery are set in motion by means of which the power is communicated; a clamp descends which fastens the block firmly in position; this is followed immediately by the knife which makes the cut required. When the double movement of the handle has been completed, it is at once released by the operator, the cut is made and the clamp and knife return to their former position automatically, as the witnesses say, or in the course of the motion imparted to the shaft by the driving gear. In the upward movement, the machine is thrown out of gear or locked, ready to be again set in motion by a repetition of the double movement of the throw-off handle.

'On June 19, 1902, when plaintiff had been working at the machine for a week, he placed a block of paper on the table, cut it in the usual way, and as the knife was ascending proceeded to take out or turn round one of the parts in order to trim the edges by another cut. In doing this his hands were necessarily under or partly under the knife, which, unexpectedly and without having been set in motion by him, fell, severing one of his hands and mutilating the other. The knife had never come down in this way before, while he was working the machine, without using the handle, and from his instructions as to its use and mode of operation he had no reason to expect that it would do so.'

The action was tried with a jury which, in answer to certain questions, stated that the injury was caused by some defect in the machinery which was known to the employers' foreman, and that the latter had been negligent in not having the same remedied. In answer to another question, however, the jury stated that it was unable

to state what the defect in the machinery was. It also awarded G. \$2,500 damages.

The employers appealed, and the Court of Appeal directed that there should be a new trial, upon the ground that the findings of jury were inconsistent, since, while they stated that the accident was caused by a defect known to the employers, yet they could not say what that defect was. The Court was also of the opinion that the evi-

dence was unsatisfactory in not showing clearly the construction and operation of the machine, and suggested that on the second trial the judge and jury should see the machine itself and the operation of the several parts.

(*Glasgow vs. The Toronto Paper Manufacturing Company*. Judgment given by the Court of Appeal at Toronto, September 14, 1903.)

THE LABOUR GAZETTE

THE JOURNAL OF THE DEPARTMENT OF LABOUR

Vol. IV—No. 5.

NOVEMBER, 1903

Price Three Cents

The LABOUR GAZETTE wishes to draw the attention of its readers to the fact that, while every care will be taken to have information as complete and impartial as possible, it does not in its accounts of proceedings, abstracts of reports, legal decisions, quotations, or other records of matters of concern to labour, necessarily endorse any of the views or opinions which may be expressed therein.

DEPARTMENT OF LABOUR, CANADA,

OTTAWA, November 15, 1903.

IN the present issue of the *Gazette* attention is invited by the department to the publication for the first time of an article and table relating to industrial accidents, which it is the intention to continue henceforth from month to month as a regular feature of the *Gazette*. The table has been prepared so as to present a list of the industrial accidents of the month classified according to trade and industries and giving particulars as to the locality, date, nature and result of each accident, numbers affected, and other particulars. Only such accidents, it may be pointed out, will be taken into account as are sustained by workpeople in the performance of their duties and result in the loss of life or limb, or in other serious impairment to industrial efficiency. The information for the most part will be supplied by the correspondents of the *Gazette* and by the daily press of the country, special care being taken to secure the accuracy of the information derived from these and other sources. It is anticipated that in course of time much valuable material, by

means of this series of articles, will be made available as to the nature of employment in Canada from the point of view of the danger involved to workmen.

With this new regular article the *Labour Gazette* has now, in addition to the general monthly review of labour and industry, consisting of the 'general summary' article and the reports of local correspondents, ten standing features in each issue, relating to the following subjects— the immigration and colonization movement; change in rates of wages and hours of employment; trade disputes of the month; industrial accidents; recent industrial inventions; new trades unions formed; government contracts signed embodying fair wages clauses; instances of the enforcement of the Fair Wages Resolution by the Post Office Department; reviews of reports and blue books relating to labour, recently published; and recent legal decisions affecting labour.

The unusually protracted session of parliament which closed on Saturday, October 24th, resulted in a very considerable and important body of new legislation. Two of the new Acts, which were among those assented to during the continuance of the session, have been previously reviewed in the *Gazette*, but in the present issue occasion is taken to refer to the remaining legislation as a whole. Special attention, it will be seen, is directed in this connection to the very active developments of recent months in the transportation industry. With the article on Dominion legislation is also given a review of the acts specially relating to labour passed during the session of the

legislature of Nova Scotia in the present year, the complete volume of the new statutes having reached the department during the past month.

Publication is resumed in the present issue of the series of tables relating to the cost of living in Canada, the general nature and purport of which have been previously explained. The present instalment deals with the subject of rentals in the various provinces, and, as in the case of previous tables, is based on information secured from sources outside of the department.

Attention is also directed in particular to a brief article on labour conditions in the fruit industry in Ontario; a report of the evidence taken before the official board of arbitration in the boot and shoe industry

in Quebec in the matter of a demand for higher wages by leather cutters in that city, which contains considerable information relating to conditions in the industry affected; a copy of the award recently made by the board of arbitration in reference to the wages and hours of brass workers at Toronto; a brief reference to the interview of representatives of the National Labour Congress with the government; and to the separate report of the strike of carpenters at Winnipeg, in which the intervention of the department was solicited under the Conciliation Act. It may be added that the reviews of departments and bureaus are unusually extended this month, there being also a review of a blue book relating to mining in Ontario published under a separate heading.

INDUSTRIAL AND LABOUR CONDITIONS DURING THE MONTH OF OCTOBER.

I.—GENERAL SUMMARY.

GENERAL activity continued to be the dominant feature in labour and industrial circles in Canada during October, the reports of *Gazette* correspondents showing that instances to the contrary were either local in their application or confined within the limits of a single branch of industry. In the fishing industry alone can the record of the season be termed generally unsatisfactory. Labour in consequence has been fully employed, its extreme scarcity in almost every department of the general market being the prominent feature of the month. Wages continued on a high level, the tendency of the month being in an upward direction and indicating for the season of the year a movement of considerable strength. From the standpoint of industrial tranquillity the month was satisfactory, six new disputes being reported as against seven in September and four in October, 1902, the remaining disputes being

either in continuance at the beginning of the month or being of minor importance.

At a number of industrial centres a continuance of the upward tendency in cost of living was evident during October. The price of bread was advanced at Peterborough, Ottawa, Glenvale, Toronto, Hamilton, Ont., Hull, Que., and at a number of other points. Provisions, notably eggs and milk, ruled high in price at several Ontario points, while coal at Toronto, Montreal and other cities, manifested a similar tendency. Another element in an upward direction in cost of living was the famine in houses, particularly in workmen's dwellings, reported from Toronto, Woodstock, Galt, Berlin, Stratford and other Ontario cities, rents being in consequence very high in the localities affected. In the case of Stratford a co-operative society was organized, as a result of these conditions, to build 50 buildings to be sold to workmen on the instalment plan.

The more important features of the month's activity among the leading trades and industries were briefly as follows :—

Agriculture,

Reports as to the generally satisfactory nature of the season's yield in the various grain and other crops were received confirming in this respect the estimates of an earlier date. Instances, however, occurred, as in the case of the potato crop in Quebec and in the maritime provinces, in which the yield was somewhat better than was anticipated. The almost unprecedented abundance and fine quality of the apple crop in Ontario, New Brunswick and Nova Scotia, for which an exceptionally good market was found in Europe and in western Canada, should also be mentioned here. The root crop was generally very satisfactory. The wheat yield of the west was proving at the end of the month, if anything, above the estimates of a month ago. Farmers were chiefly engaged in the marketing of their produce, for which good prices ruled (especially for wheat owing to the prospective shortage in the world's crop), though in many localities, more particularly in western Canada, threshing still continued, being somewhat hampered by wet weather at certain points in British Columbia. Excellent weather, however, in eastern Canada has enabled good progress to be made with fall ploughing. Good reports were received from the dairying and ranching branches.

The board of examiners appointed to fix the grain standards reported the samples and standards higher than last year.

High wages and a keen demand for men prevailed throughout the industry, with a slight slackening observable in the west.

Fishing.

Among the Atlantic fishermen October, as a whole was a dull month with very disappointing returns from the Grand Banks cod fisheries, attributed very largely to the scarcity of bait, though good catches of mackerel were reported from Nova Scotia

towards the close. Stormy weather interfered with the oyster fishing on Prince Edward Island ; good prices for this product, however, prevailed. The lobster fisheries on the Atlantic have also yielded a poor harvest. On the whole the season has closed with generally unsatisfactory returns, and some hardship is anticipated among fishermen, especially in Nova Scotia, during the coming winter season. In British Columbia a fair run of humpback salmon, for which a good market was found, was reported on the Fraser River.

Lumbering.

Reports from this industry were generally of very active conditions, with a continuance of the marked scarcity of labour. Wages were high and prices firm. Saw mills in Ontario and Quebec were exceptionally active. In British Columbia likewise the mills were for the most part running to their full capacity, shipping their product chiefly to the Territories and foreign points. On Vancouver Island developments in the pulp industry are promised.

In New Brunswick a memorial was submitted to the provincial government by the Lumber and Timber Association recommending a uniform rate of stumpage with a reduction to operators in burnt districts. The appointment of permanent fire wardens, the carrying out of a system of surveys throughout the province, and an alteration in the regulations fixing the size of lumber, allowing smaller sized lumber to be cut, were also recommended.

A policy for the preservation and continuance of forest reserves was inaugurated by the provincial government of Ontario. The plan involves the establishment of forest reserves at as many points as possible, on which the timber will not be sold until it comes to maturity, the re-forestation of areas not devoted to agriculture, and the resumption of possession by the government of areas which have been under license and have been abandoned after being denuded of timber.

Mining.

From Nova Scotia reports were of continued activity in the collieries, day and night shifts being worked. The output from the Dominion Coal Company's mines for September was 260,066 tons, or an increase of 15,828 tons over the month of August. The output at Dominion No 1 was particularly heavy and was reported as increasing. In Ontario new strikes of oil were made. In British Columbia, as will be seen from the reports of the Rossland and Nanaimo correspondents of the *Gazette*, the industry continued to show the upward tendency reported in earlier months, the first shipment of refined silver being sent from Trail on October 7th.

The Granby Consolidated Mining, Smelting and Power Company, Limited, held its annual meeting at Montreal, showing a production for the year amounting to 12,551,758 pounds of refined copper, 277,574 ounces of silver, and 35,121 ounces of gold for which \$2,232,471 were received. The working expenses at the mine and smelter were \$1,136,830 and the net revenue \$295,463.

Manufacturing.

Very marked activity has characterized this industry in almost all branches and localities, such exceptions as are noted being purely local and accountable on particular rather than general grounds. New establishments in considerable numbers were reported, industrial development in this direction being especially noted at Hamilton, Brantford, Peterborough, Ont., Winnipeg, Man., Vancouver, B.C., and other cities. The opening of the manufacturing season in the beet sugar industry was announced from the different factories in operation in Ontario, the beets being reported as exceptionally clean and of excellent sugar making quality. At Berlin the season opened on October 12 with about 180 men employed, divided into two 12-hour shifts and with 1,200 tons of beets on hand. In this branch the addition of a new sugar mill at Raymond, Alberta, which will come into

operation at once, is an important development of the present season. Woollen manufactures showed improved conditions.

The industrial development of the country may be exemplified by statistics handed out during the month, of the building of new factories and the enlargement and improvement of existing ones in the city of Toronto. During the nine months preceding October 1st, the expenditure on this account was \$291,050 as compared with \$236,390 in 1902, \$277,780 in 1901 and \$209,920 in 1900. The returns for the nine months of the present year, accordingly, are higher than those for the entire season in any previous year except in 1899, when out of a total of \$416,650, \$140,000 were included in an estimate for a single factory. In the present year the largest single expenditure on a factory in Toronto was \$60,000 and the total number of permits was 45 as against 60 in 1902, 37 in 1901, 32 in 1900, 50 in 1899, 58 in 1898 and 19 in 1897.

Settlement of Wages Claims at Sault Ste. Marie, Ont.

In connection with the manufacturing and lumbering industries reference may be made to the important developments which were reported during October in connection with the situation arising out of the suspension of operations by the Consolidated Lake Superior Company at Sault Ste. Marie. As stated in the October *Gazette*, the month of September closed with some 3,500 men out of employment as a result of the shut-down, and with arrears of wages aggregating some \$200,000 owing, for which no definite prospect of payment was held out. An important measure, accordingly, was the arrangements arrived at on October 1st whereby the provincial government made provision that the pay-roll of the allied companies should be met at once and all employees paid in cash by the banks at the earliest moment. More fully stated, the arrangement was, that the banks at Sault Ste. Marie should pay the time cheques of the men, the government partially endor-

ing the cheques and giving the banks to understand that they would be met either by the then owners of the properties or by any one to whom the works might be sold. The land and pulp wood limits already earned and the general inability of any company to carry on the work without its support was held as sufficient security by the government. The announcement to the above effect immediately relieved to a degree the stringency of the situation in business and industrial circles, the men being free at once to seek employment elsewhere, and, in the case of the woodsmen, finding new work with little difficulty. As a further result the militia guarding the works of the company were immediately withdrawn, the 11 men arrested in connection with the disturbance of the final week of September being fined various sums or discharged on suspended sentence.

Reorganization of the Company.

Negotiations relating to the reorganization of the industries were in progress over the greater portion of the month with successive postponements of the forced sale contemplated by the chief creditors of the company. On the 19th of the month proceedings culminated with the withdrawal of the injunction to restrain Messrs Speyer & Company, of New York, holders of the \$5,000,000 claim against the company's properties, from securing possession. In consideration of this possession the company deferred payment of the loan until December 15. On October 22 an announcement was made of the reorganization of the Consolidated Lake Superior Company, the new company to be capitalized at \$40,000,000, with five per cent gold bonds to the amount of \$10,000,000, and five per cent income bonds to the amount of \$3,000,000 to be issued. The plan also provided for the raising of \$8,000,000 needed by the company. Towards the close of the month operations in certain of the company's properties involving the employment of several hundred men were promised, the provincial government undertaking to co-operate with the

company in the getting out of pulp-wood logs.

Conditions in the Trades.

With reference to the record for October in the trades, as apart from the industries, the building trades were exceptionally busy, and at certain points, notably at Winnipeg, Edmonton and other cities in western Canada, an almost unprecedented activity for the time of the year was in progress. In eastern Canada also out of door work was prolonged by the favourable weather which continued until the end of the month. The metal and woodworking trades were busy, the activity being generally distributed. Coopers under the latter heading were, in Ontario, perhaps the class of skilled labour for which the demand was most conspicuously in excess of the supply, the consequence being a rise in some localities of 60 per cent in apple barrels and the prospect of serious loss in the fruit industry arising out of the difficulty of obtaining them at any price. Unskilled labour also benefited by the prolongation of the open weather and by the extremely active conditions of railway construction and other outside employment in western Canada.

Transportation.

The feature of the past month in the transportation industry was the comparative slowness of grain shipments from western Canada, the movement during both September and October of the present year falling considerably short of that of the corresponding months of 1902. The wet weather, which generally delayed harvesting operations over western Canada, was held in part responsible for this diminution of traffic, and the greater demand for Canadian wheat for milling purposes this year than last is also mentioned in this connection. Officials of the Grand Trunk Railway Company expressed satisfaction, however, with the amount of grain received through ports on the great lakes, increases at Owen Sound, Meaford, Goderich, Sarnia and Montreal being reported, with decrea-

ses at Midland, Collingwood and Kingston. The increased facilities offered by the railway companies this year for the transportation of grain have removed all serious anticipation of a grain blockade.

The activity of railway construction, especially in western Canada, was continued in October, an event of the month in this connection being the announcement by the Canadian Northern Company that the company will make Emerson, three miles north of the American boundary, a terminal and divisional centre. Pembina, in the United States, has hitherto been the terminal point of this company in this territory.

The announcement of a reduction by the Canadian Pacific Railway Company in wheat freight rates by from two to three cents per hundred governing shipments from Manitoba and the North-west Territories to Lake Superior ports was made early in the month. At the same date the Canadian Northern Company, which on September 1 reduced its rates by 4 cents per hundred, made an increase of 1 cent in order that the rates charged by both companies might be similar, the compromise being carried out with the consent of the Manitoba legislature. A reduction of about 33½ per cent in general freight rates on the Calgary and Edmonton branch of the Canadian Pacific Railway was also announced in October.

Recent Traffic Returns.

The following traffic returns of the Canada Atlantic and of the Ottawa and New York railway companies for the six months ending June 30, were published on October 2, and may be regarded as representative of recent railway operations in Canada:— Upon the Canada Atlantic system the gross traffic amounted to \$868,226, an increase of \$62,161 over the preceding 12 months. There were 160,263 passengers carried, as against 158,345 the year before, whilst the receipts therefrom reached \$135,175, an increase of \$8,143. The mail payment was \$34,500 in both years alike. The freight to-

talled 1,295,620,500 pounds, as against 1,726,740,940 the year before. The freight receipts amounted to \$678,908, an increase of \$54,017. The elevator receipts, besides, were \$19,642.

The traffic returns of the Ottawa and New York Railway Company show passenger earnings of \$45,373, as against \$40,070 in the preceding year, and freight receipts of \$34,897, as against \$24,696 last year. With the mail subsidy this makes total receipts of \$83,167, as against \$64,465 last year. The number of passengers carried was 94,221, and the freight 105,049,075 pounds. The mileage of the Ottawa and New York line is 56·7 miles.

The receipts of the Toronto Railway Company for September showed an increase of \$41,399.54, or about 21 per cent over September of 1902.

Meetings of Railway Companies.

The 22nd annual meeting of the Canadian Pacific Railway was held on October 7th. Among the extensions and improvements initiated by the directors of the company and ratified at the meeting were the purchase of the Kingston and Pembroke Railway from Renfrew, on the Canadian Pacific Railway main line, to Kingston; the lease of the Calgary and Edmonton branch; the agreement to complete the Lindsay, Bobcaygeon and Pontypool Railway; the construction of a railway from Regina, on the Canadian Pacific Railway main line, to Arcola, the present terminus of the Pipestone branch; the extension of the Manitoba and Northwestern Railway; the purchase of the Elder-Dempster Company's Canadian Atlantic fleet for \$1,417,500 and the expenditure of \$9,500,000 on capital account, of which \$5,000,000 will be for rolling stock and \$4,500,000 for terminals, premises, &c.

The half-yearly meeting of the Grand Trunk Railway Company was held at London, England, on October 9th. Though a very large increase in revenue was reported the increase had been met by the higher

rate of expenditure and no addition was accordingly made to the usual dividend, it being thought advisable to continue the policy of improvement and extension.

Trans-Atlantic Shipping.

At a meeting of the Trunk Line Grain Committee at New York it was decided to extend the present grain rate until November 15th. The present rate, being a reduction of one cent per bushel on grain from Buffalo to New York, took effect on September 16th. After November 16th the rate will be advanced half a cent per bushel. The action of the American lines is of interest to Canada, as having been caused by the volume of grain shipments being made through Canadian ports.

A feature of the past month's transportation business was the heavy export of Canadian apples and cattle. At both Halifax and St. John the prospects are reported good for an exceptionally heavy winter port business. As an indication of the volume of traffic at the port of Montreal this year as compared with last, the following comparative table of customs collections is quoted :—

| | 1902. | 1903. |
|---------------------|----------------|----------------|
| May.. | \$ 824,018 87 | \$ 970,758 02 |
| June.. | 1,025,994 33 | 1,246,533 40 |
| July.. | 989,185 70 | 1,305,460 87 |
| August.. | 1,138,267 67 | 1,186,775 15 |
| September.. | 957,575 28 | 1,188,291 42 |
| | \$4,935,041 85 | \$6,897,818 86 |

During October the Dominion Line Steamship Company, with all its business affiliations, was transferred to the White Star Line, which forms a part of the Northern Atlantic Steamship Trust.

Canadian Revenue.

The official statement of revenue and expenditure for the Dominion for the month of September and for the first quarter of the present fiscal year shows the condition of the former as continuing buoyant. The total revenue on account of consolidated fund during September was \$6,312,-111.95, as compared with \$5,428,419.88 a

year ago. For the three months the revenue was \$17,833,104.39, as against \$15,187,-367.78 in 1902.

A detailed statement of the above is as follows :—

For the month of September :—

| | 1902. | 1903. |
|--|----------------|----------------|
| Customs. | \$3,149,634 73 | \$3,812,567 15 |
| Excise. | 1,055,818 54 | 1,098,299 16 |
| Post Office. | 310,000 00 | 350,000 00 |
| Public Works, including Railways. | 586,621 21 | 769,261 24 |
| Miscellaneous. | 326,345 41 | 281,984 40 |
| | \$5,428,419 88 | \$6,312,111 95 |

For the first three months of the fiscal year ending September 30 :—

| | 1902. | 1903. |
|---------------------|-----------------|-----------------|
| Customs. | \$ 9,099,085 00 | \$11,020,035 00 |
| Excise. | 2,834,455 00 | 3,131,724 00 |
| Post Office. | 890,000 00 | 1,000,000 00 |
| Public Works. | 1,750,746 00 | 2,032,246 00 |
| Miscellaneous. | 613,070 00 | 649,098 00 |
| | \$15,187,356 00 | \$17,833,104 00 |

The expenditure on capital account was \$400,707.47 in September, 1903, as against \$801,554.11 a year ago, and \$754,908.51 as compared with \$1,567,069.99, respectively, for the first quarter of the fiscal years of 1903 and 1902. Under the latter headings \$123,520 were paid in railway subsidies, \$132,361.13 in bounties on steel and iron, and \$145,571.74 on public works and railways and canals during September of this year, as compared with \$132,800, \$43,268.21 and \$585,363.70 under the same headings, respectively, in September, 1902. For the first three months of the two years the total expenditure on capital account was \$754,-908.57 in 1903 and \$1,567,069.99 in 1902.

In the House of Commons the Hon. the Minister of Finance gave out a statement showing that the revenue on consolidated fund for the fiscal year ended June 30 was \$66,034,108, and the expenditure \$51,-707,172. Capital expenditure during the year, it was further stated, included railway subsidies and bounty on metals amounting to \$10,367,163.

Foreign Trade.

Canadian foreign trade, as will be seen from the accompanying table supplied by the courtesy of the Department of Customs, showed substantial gains in both imports and exports both during the month

of September and for the first three months of the fiscal year. Under the heading of exports the most noticeable increases were in agricultural products, in mineral products and in products of the forest. The statement in detail is as follows:—

IMPORTS.

| | MONTH OF SEPTEMBER. | | THREE MONTHS ENDING SEPTEMBER. | |
|-------------------------|---------------------|------------|--------------------------------|------------|
| | 1902. | 1903. | 1902. | 1903. |
| | \$ | \$ | \$ | \$ |
| Dutiable goods..... | 12,046,243 | 14,689,764 | 33,170,528 | 39,579,910 |

| Coin and bullion..... | | 42,500 | | 61,614 | | 202,514 | | 118,212 |
| Grand total, exports..... | 20,746,731 | 1,637,220 | 21,624,582 | 1,182,168 | 57,493,585 | 3,454,697 | 61,479,884 | 5,500,615 |

A marked feature in the foreign trade of the month was the heavy shipments of Canadian apples to Great Britain, France and Germany, owing to the comparative failure of the European crops. At an early date in the month the number of barrels forwarded from the port of Halifax was re-

ported as considerably in excess of the amount forwarded at a corresponding period in any former year.

The official report of the House of Commons Committee on Agriculture makes reference to the increase in exports of Canadian farm and dairy produce during recent

years. It is pointed out that the export of cheese and butter has risen in value from \$12,700,000 in 1892 to \$25,300,000 at the end of last year, while \$3,500,000 worth of pork and bacon was exported in 1902 as compared with \$600,000 worth in 1890. The total export of farm and dairy produce has increased from \$24,000,000 in 1890 to \$80,000,000 last year. Favourable conditions of soil and climate, scientific instruction in agriculture, and the utilizing of cold storage facilities, are held responsible for these increases.

There was considerable discussion of an increased development of trade between the Dominion and Japan, prospects for an increased export of Canadian wheat, meats and dairy products being stated as especially favourable.

Imperial Trade Returns.

British imports from Canada during September were officially announced as follows:—22,338 cattle, valued at £383,897; 5,572 sheep, and lambs valued at £8,804,508; 600 cwts. wheat, value £175,902; 400,300 cwts. wheat meal and flour, value, £184,734; 3,240 cwts. peas, value, £11,345; 110,417 cwts. bacon, value, £284,838; 33,019 cwts. hams, value, £89,290; 39,152 cwts. butter, value, £180,190; 294,398 cwts. cheese, value, £737,605; 29,355 great hundreds eggs, value, £10,869; 56 horses, value, £2,639. The total value of imports in September was £3,047,330. The value of exports to Canada during September was £508,383.

According to a report to the Department of Trade and Commerce from the Canadian Trade Commissioner in South Africa a general depression in trade continues to prevail in that colony, though Canadian agricultural implements, roller desks, organs, radiators, chairs, and office furniture, are meeting with good sales.

Domestic Trade.

A good volume of wholesale and retail trade was uniformly reported throughout Canada, with payments as a rule well met. Bright, cool weather materially assisted the

movement of dry-goods, and on the whole the month's business in staples was equal to that of October, 1902, which was an exceptionally prosperous period. In western Canada, in particular, trade was active, reflecting good crops and favourable conditions of employment. In view of the general prosperity of the west during the past two years and of the increased banking facilities now available in that portion of Canada less money was reported as being needed this year in connection with the movement of the crops, and, in consequence, little or no stringency in the money markets of the east resulted. Canadian securities showed a downward tendency on many of the exchanges, and prices were on the whole on a lower level than in September.

The record of business failures in Canada during the first nine months of 1903, as mentioned in financial journals, compares very favourably with the corresponding months of 1902. The total defaults numbered 721 as compared with 840 last year and the amount involved was \$5,332,611 as against \$9,322,467 in 1902. Of the above total, manufacturers' failures numbered 167 and trade insolvents 538. In the banking class one large suspension accounted for the bulk of the sum of \$2,139,235 entered under that heading. The principal decreases in liabilities were reported in Quebec, though Ontario and British Columbia also made good comparisons. Suspensions in New Brunswick were less than one-half those of 1902, but in Nova Scotia the liabilities were higher than last year. By branches of business the most conspicuous improvement was under the heading of woollen manufactures.

The 48th annual meeting of the Molsons Bank was held at Montreal on October 19th. Profits to the amount of \$439,092.24 were shown, out of which a dividend of 7 per cent, amounting to \$235,580.95, was paid and \$150,000 added to the reserve fund. During the year branches of the bank were established at Frankford, Highgate and St. Mary's, Ont.

Notes of the Month.

Negotiations were in progress during the month looking to the municipalization of the gas works of the city of Belleville, Ont.

The semi-annual meeting of the Ontario Association of Master Plumbers, Gas, Steam, and Hot Water Fitters, was held on October 15 at Toronto, with about 30 delegates present. Trade questions and the recent industrial unrest were discussed.

Returns of the Assessment Commissioner for the city of Ottawa show that since September, 1902, the population of Ottawa has increased by 446 with an increase of \$3,201,840 in the assessment. The population is 61,597 and the total assessment for 1904 will be \$32,564,335.

The special committee of the Legislative Assembly on municipal trading held a meeting in Toronto during October when the publication was ordered of a considerable amount of information relating to municipal operation of enterprises, such as gas, electric power, water-works, street railways, &c.

Important new rules governing the transport of live stock from Canada to Europe were published in the *Canada Gazette* on October 10th, the space to be allowed animals, the providing of sufficient ventilation, the storage of food, &c., being carefully defined.

A statement made to the House of Commons by the Hon. the Postmaster General showed that a surplus of \$292,702, including the Yukon deficit, was the result of the past year's operations. It was determined to increase the minimum salary allowed to postmasters in rural districts from \$10 to \$25 per annum.

Preparations were made for the opening of the Grand Trunk Railway branch of the Y.M.C.A. building at Point St. Charles, Que. The sum of \$15,000 toward the building fund and a free site was given by the Grand Trunk Railway Company, in recognition of the fact that much of the benefit

of the building would be derived by the employees of the road.

During October a scheme for the improvement of the military defences of the Dominion was presented by the Hon. the Minister of Militia and Defence. The arrangement involved the increase of the active militia to 44,000, the augmentation of the stock of rifles from 40,000 to 100,000, the equipment of garrison and field artillery with modern armaments and the establishment of a central military camping ground of 20,000 acres for the training of the militia.

The Canadian Fire Underwriters decided on October 10th to make a material reduction in the rates of fire insurance in the city of Ottawa. As soon as the conditions of the present by-law are complied with, that is to say, as soon as the limited areas are entirely fenced and watchmen put on at night, as the by-law calls for, and as soon as all illegal lumber has been removed, a portion of the surcharge will be reduced. When the remainder of the by-law is complied with the remainder of the surcharge will be removed.

The members of the local branch of the International Barbers' Union of America at Montreal, Que., petitioned the mayor of that city asking him to see that the city by-laws forbidding the keeping open of barber shops on Sunday and after twelve o'clock on Saturday nights are strictly enforced. Employers, it was stated, generally ignored such by-laws and compelled employment during prohibited hours.

The sum of the assessment of the city of Toronto for 1904 shows a total of \$143,458,393, an increase of \$4,812,398 over the net estimate of 1903. The population of the city is fixed at 219,002 as against 211,375 last year. Referring to the general outlook of the city the commissioner says :—

The continued prosperity of the city seems assured, and with the different trade questions settled and the demand for houses existing as at present, the outlook under reasonable conditions

should during the year 1904 mark it as one of the busiest in the building trade in the history of Toronto, especially so if houses are erected that will rent from \$15 to \$20 per month. It is safe to say that at least 500 such houses in different parts of the city would find immediate tenants.

A report issued by the Provincial Board of Health of Ontario shows an increase in births and a material decrease in the death rate in 1902. There were 47,796 births, as compared with 46,051 in 1901, or an increase of 1,735. Marriages in 1902 were 18,072, an increase of 37 over 1901, and the deaths in 1902 were 27,864, a decrease of 1,744. The rate per thousand of births was 21.7 in 1902 as against 21.1 in 1901. Deaths in 1901 per thousand show a percentage of 13.6 against 12.6 in 1902. Vital statistics published by the board of health of Montreal likewise showed decreases in the number of deaths and increases in births.

In its presentment to the presiding judge the grand jury of the York county sessions during October, in reference to a case which came within its jurisdiction, made the following statement as to the need of a system of arbitration which would go to check the serious loss to the community arising out of disputes between employers and employees :

As a very important principle is here involved, embracing the relations between capital and labour, and oftentimes threatening the peace of the community and security to property, we are convinced that the time has come when parliament should enact laws in that behalf, making

arbitration or conciliation compulsory, and that the tribunal to hear such cases be constituted as to be beyond the influence of the parties to the dispute, and whose award should be final and binding upon both. In our opinion, one of the provisions of such law as we here indicate should make the award retroactive in so far as to take effect from the date of the dispute, or when the case may have been entered for hearing, and pending a decision by the Board of Arbitration, to strike on the one hand or cause a lock-out should be made a criminal offence.

The Toronto city council during October passed a by-law compelling manufacturers and others creating a smoke nuisance to use smoke consumers or similar appliances for the abatement of the same. The by-law will go into effect on July 1, 1904 and is as follows :—

All manufacturers and others in the city of Toronto using combustible material to produce heat or power and thereby creating smoke in such quantities as to foul the atmosphere, or that may be carried by the wind or otherwise to other shops, houses or premises to the inconvenience or injury of the neighbouring premises or residents therein, shall have such chimney or other apparatus as shall consume the smoke, or prevent the same from fouling the atmosphere, or being carried by the wind or otherwise to other shops, houses or premises, to the inconvenience or injury of the neighbouring premises or residents therein.

Any person convicted of a breach of the provisions of this by-law shall forfeit and pay, at the discretion of the convicting magistrate, a penalty not exceeding (exclusive of costs) the sum of \$50 for each offence, and, in default of payment of the said penalty and costs, or costs only, may be levied by distress and sale of the goods and chattels of the offender, and, in case of there being no distress found out of which such penalty can be levied, the convicting magistrate may commit the offender to the common jail of the city of Toronto, with or without hard labour, for any period not exceeding six calendar months, unless the said penalty and costs (if any), including the costs of the said distress and of the committal and conveyance of the offender to the said jail, are sooner paid.

II.—REPORTS OF LOCAL CORRESPONDENTS.

During the month of October, Mr. James Alexander Wiley was appointed correspondent to the *Labour Gazette* for St. Catharines, Ont., and district.

SYDNEY, N.S., AND DISTRICT.

Mr. John Moffat, Correspondent, reports as follows :—

GENERAL CONDITION OF THE LABOUR MARKET.

Labour conditions during October remained unchanged. Labour is plentiful in

the ruling industries, and workmen, skilled and unskilled, are kept fully employed. The Dominion Iron and Steel Co., for want of suitable work, had to discharge a few moulders, otherwise that industry is as active as last month. The Dominion Coal Company, owing to the fire in Dominion No. 1 Mine is behind in its contracts. An effort to fill up the Montreal trade was made by taking the iron ore vessels and putting them into the coal trade of the St. Lawrence, so that as much coal as possible might be de-

livered before navigation closes. The remaining two miles of the Sydney and Glace Bay Electric Tramway is almost completed. This completes the circle around the collieries and greatly helps the service of the route. Shipping is active, especially in the coal industry. Agricultural produce from Prince Edward Island is coming in by water. If anything the wholesale and retail trade of the district is better and more active than during September. No changes have been made in either the hours or wages of workers and no unrest is apparent in any of the industries. A Trades and Labour Council was formed in Sydney. Five Sydney lodges are represented. The P.W.A., the largest labour union of the province, is not represented, as, for almost twenty-five years, it has had a council, and represents nearly every trade.

CONDITION OF LOCAL INDUSTRIES.

Fishing.—Fishing was not up to its usual results in September.

Mining.—Mining is very active and the collieries are running day and night.

CONDITION OF PARTICULAR TRADES.

Building trades.—Carpenters and joiners are all well employed in the colliery districts. The Sydneys also furnish a large amount of work although not as much as in former months. Lathers and plasterers are busy. Painters get a fair amount of work. Plumbers are very busy. Steamfitters are active, and builders' labourers have lots of work.

Metal, engineering and shipbuilding trades.—Iron moulders and their helpers are fairly active. Machinists and engineers are all very busy. Steam engineers have steady employment. Electrical workers and linemen are working full time. Blacksmiths and boilermakers have abundance of work, and horseshoers are kept busy.

Woodworking and furnishing trades.—Woodworkers are very busy.

HALIFAX, N.S., AND DISTRICT.

Mr. F. W. Smith, Correspondent, reports as follows :—

GENERAL CONDITION OF THE LABOUR MARKET.

The labour market during the past month has shown a slight relaxation, and, compared to the previous month, was not quite so brisk. In the building trades this relaxation has been manifest, some bricklayers being idle, while plasterers are but fairly employed. For the season, however, the market is active, and, while some branches of the building trades have shown slight inactivity, the demand for steamfitters has been brisk, and this branch is very active. Commercial activity has been about up to the standard for the season, while a great era of activity in this branch of labour is anticipated at an early date, for, in addition to the usual large number of steamers which call at this port after navigation closes on the St. Lawrence, in November, it is now understood that two steamers, which have heretofore loaded and unloaded at St. John, N.B., will come to this port, and thus will afford extra employment. The longshoremen accordingly anticipate a splendid season. In wholesale and retail trade the past month has been well up to the standard, and for the season remarkably good. The general field is free of any unrest, and is likely to continue.

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—The harvested field crops, such as hay, oats and corn, have been very fair—corn somewhat inferior to the hay and oats. The root crop, potatoes, cabbage and turnips are very good, but squash, cucumbers and tomatoes have been poor, owing to the cold spring.

Fishing.—This branch of industry during the past month has been very quiet, and has not been up to the average for the season.

Mining.—The conditions in this branch of industry during the past month were normally active, but no unusually important development has been reported.

Railroad construction and employment.—Work on the Southwestern Shore Railway continues, and has afforded much employment for the various phases of labour concerned.

CONDITION OF PARTICULAR TRADES.

Building trades.—A slight relaxation has been manifest in this branch of labour during past month. Bricklayers and masons are only partially employed. Carpenters find conditions fairly active, mostly in jobbing. Plasterers report work fair. Painters normally active. Plumbers busy. Steamfitters very busy. Stonecutters still active. Builders' labourers report work normal.

Metal, engineering and shipbuilding trades.—Moulders fairly busy. Machinists active. Electrical workers report work normal. Blacksmiths are only partially employed. Boilermakers are busy. Shipwrights and caulkers find work normal. Horseshoers are only partially employed.

Woodworking and furnishing trades.—Upholsterers are fairly well employed. Carriage and wagon makers find work about normal. Coopers are fairly well employed.

Printing and allied trades.—Printers are only fairly well employed; some being idle. Pressmen are normally busy.

Miscellaneous.—Barbers are busy. Clerks report work fairly plenty. Delivery employees are busy.

Transport.—Railway employees report work fairly plentiful. Freight handlers are also active. Longshoremen are only partially employed, but anticipate a busy season. Teamsters are busy.

Unskilled labour.—There has been some activity among unskilled labourers.

CHARLOTTETOWN, P.E.I., AND DISTRICT.

Mr. F. J. Nash, Correspondent, reports as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

The labour market during the month of October continued in the same healthy con-

dition as during September, supply and demand being well balanced. There were no new conditions to create any unusual demands, nor lesser existing opportunities. The building trades, especially in the city, were exceptionally active, a fair number of new residences going up, and extensions and repairs being made to old buildings. The construction of the \$35,000 new market house made excellent progress, and the number of men employed at the work was greater than in September. Commercial men report a busy month. Merchants are preparing to stock up before winter, before its irregularities of communication set in. Another trade-quickenng factor was the opening this month of the produce shipping season. Prices at starting are good, and prospects for a lively fall trade are bright. There were no changes in the rates of wages or hours of labour, and the harmonious relations between employer and employee remains unchanged.

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—The shipping of produce occupied the attention of the farmer during the latter part of the month. The crops are excellent and good prices prevail.

Fishing.—Oyster fishing was in full progress, though stormy weather interfered with the catch, but the unusually high prices compensated.

Railroad construction.—Good progress was made with the construction of the Hillsborough bridge and branch railway. At the former pneumatic work was in full progress at the greatest depth of the river, 95 feet, and the compressed air workers were compelled to labour under 43 pounds pressure.

Other industries.—The Dominion Packing Co. handled a large quantity of hogs, and, this season, has gone more extensively into the cattle, poultry, canned meat, canned fruit and canned vegetable business.

CONDITION OF PARTICULAR TRADES.

Building trades.—The demand for bricklayers and masons exceeds the supply. Car-

penters and joiners, lathers and plasterers were busy. Stonecutters, plumbers and builders' labourers were well employed.

Metal, engineering and shipbuilding trades.—Iron moulders, iron workers and helpers, machinists and engineers, and blacksmiths had a satisfactory month's work.

Woodworking and furnishing trades.—Car builders had a good month.

Printing and allied trades.—Printers and bookbinders were busy.

Clothing trades.—Journeyman tailors were steadily employed. Boot and shoe workers were busy.

Food and tobacco preparation.—Bakers and confectioners, meat cutters and tobacco workers were actively employed.

Leather workers.—Tanners, curriers, leather workers and saddlers had steady employment.

Miscellaneous.—Barbers, delivery employees, and laundry workers were busy.

Transport.—Locomotive engineers, locomotive firemen, railroad telegraphers, freight-handlers, steamboatmen, steamboat firemen, ship labourers, longshoremen, teamsters and expressmen had steady employment.

Unskilled labour.—Unskilled labour found October slightly better than September.

ST. JOHN, N.B., AND DISTRICT.

Mr. W. H. Coates, Correspondent reports as follows :—

GENERAL CONDITION OF THE LABOUR MARKET.

The labour market remains active, and great preparations are being made for the opening of the winter port business. It is estimated that 120 steamers will load here during the winter, as against 99 last season. Work is rapidly progressing on the new building for the Street Railway Company and the large warehouse for John O'Regan, the new public library, the large

tea warehouse for T. H. Estabrooks, and the new building for the Canadian Drug Company are rapidly nearing completion. The Department of Public Works has decided to make large expenditures on the bridges throughout the province. Bank clearings for the four weeks ending October 22 were \$4,077,144, being \$88,588 less than during the same period in September. Wholesale and retail dealers report business brisk.

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—The potato crop turned out to be much larger than the farmers anticipated.

Fishing.—Fish are scarce, but during the early part of the month large quantities of sardines were captured in the harbour, the fishermen averaging \$20 per day for about two weeks.

Railroad construction.—The New Brunswick Coal and Railway Company has completed over three miles of extension beyond Minto, and extensive sidings are being provided for the accommodation of the Minto coal mines.

CONDITION OF PARTICULAR TRADES.

Building trades.—Bricklayers and masons, carpenters and joiners continue busy. Painters and decorators are well employed. Plumbers, gas and steam fitters are busily employed. Stonecutters and builders' labourers report work plentiful.

Metal, engineering and shipbuilding trades.—Iron moulders, iron workers and helpers report business good. Machinists and engineers are all employed. Electrical workers and linemen report that business is extra good. Boilermakers continue busy. Sheet metal workers are enjoying a harvest, having to work extra hours to catch up with the rush. Horseshoers report business good.

Woodworking and furnishing trades.—Woodworkers and shingle weavers are well employed.

Printing and allied trades.—Printers and pressmen report that work continues brisk. Bookbinders say that business is improving.

Clothing trades.—Journeymen tailors continue active.

Food and tobacco preparation.—Bakers and confectioners are busy. Cigarmakers report an improvement over last month.

Miscellaneous.—Broom and brush makers are well employed. The Bartenders' League report members nearly all employed.

Transport.—Railroad trainmen, switchmen and trackmen are busily employed. Freight handlers are busy. Ship labourers report that work remains dull. Street railway employees continue busy. Teamsters are busy.

Unskilled labour.—Unskilled labour is well employed.

DISTRICT NOTES.

Burnsville.—John Robertson's saw mill at this place was totally destroyed by fire on October 18, together with nearly one million feet of lumber. The mill was insured for \$3,000; the lumber was uninsured.

Marysville.—The Gibson cotton mill closed down on account of the shortage of raw material.

Nashwaaksis.—An old mill belonging to Henry Gill was destroyed by fire on October 11.

Sussex.—The pork packing establishment is nearing completion, and, it is expected, will be in operation by December 1.

Sackville.—The Standard Manufacturing Company and James Smith's business have been amalgamated. These firms carry on a large trade in manufacturing boots, shoes, larrigans, &c., besides running a tannery and general store. It is thought the new management will largely increase the output of the combined plants.

QUEBEC, QUE., AND DISTRICT.

Messrs. P. J. Jobin and Ed. Little, Correspondents, report as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

The month of October has been a fair one with good weather, and the demand

for labour well maintained. There have been sufficient labourers, however, to meet the demand. Exceptional activity was evident in the building trades. A fifteen per cent increase in wages was granted to certain employees, numbering 196, of the Northern Aluminum Works at Shawenegan Falls. The work of this class is continuous, the men being divided into three squads, working 8 hours each.

A request for an increase in wages by the leather cutters employed in the Quebec city shoe factories was submitted for settlement to the board of arbitration instituted some two years since for the settlement of all cases in dispute in this branch of industry in Quebec. The award had not been handed out at the close of the month.*

A special feature of the month was the exceptional activity in the coasting trade, the wharfs being crowded with schooners throughout October. There was, however, a pronounced falling off in the quantity of fish usually handled at this season of the year.

The provincial government free night schools, 15 in number, were opened on October 5 for Roman Catholics. The one for Protestants opens on the 2nd prox. The free evening classes under the direction of the school of arts and manufactures were opened on the 12th inst.

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—Farming operations were about terminated for the season, the fine weather which prevailed throughout the month tending greatly to expedite and facilitate farm work. The grain and root crops were pronounced as up to the average.

Lumbering.—Men were leaving daily throughout October for the lumber camps, the rates of wages prevailing in the Lake St. John district being \$26 per month and upward. Men were pronounced scarce, though the number who have gone into the

* A special reference to the taking of evidence is made on another page of the present issue of the *Gazette*.

woods from the parish of Sillery was exceptionally large.

CONDITION OF PARTICULAR TRADES.

Building trades.—Outside workers, including bricklayers, masons and carpenters, report a fair month's work with conditions gradually slackening. Joiners, lathers and plasterers and inside workers generally report trade active. Builders' labourers had a good month.

Metal, engineering and shipbuilding trades.—In the iron working trades the demand for men has been well maintained, but without special activity in any particular line. Electrical workers and linemen reported a fair month's work.

Printing trades.—Printers had on the whole a slack month, with a few men idle. Pressmen, however, are well employed and bookbinders had a good month.

Clothing trades.—Tailors and garment makers were well employed throughout October. In the boot and shoe trade, however, there was a falling off from September, few of the factories working full handed or on full time.

Food and tobacco preparation.—Cigar-makers had a fair month.

Transport.—Most of the railways running into Quebec have abandoned their suburban trains and adopted their winter time tables. Freight shipments, however, have not diminished during the month, although there has been a falling off in passenger traffic. Ship labourers and long-shoremen had a better month than September. Cab drivers and hackmen, owing to the gradual diminution of the tourist traffic, have not been so busy as in September, though carters and draymen are very busy in handling farm produce and shipments of winter stocks of provisions coming in from the surrounding country.

Unskilled labour.—A fair month was reported, although there has been a falling off in work for the corporation.

THREE RIVERS, QUE., AND DISTRICT.

Mr. John Ryan, Sr., Correspondent, reports as follows :—

GENERAL CONDITION OF THE LABOUR MARKET.

The month of October has shown little change from the preceding month in this locality. There have been encouraging reports from all branches of trade, and a steady demand for all kinds of labour. Merchants and banks report business ahead of the corresponding month of last year. There have been no strikes or lockouts, and no change in rates of wages during the month.

CONDITION OF LOCAL INDUSTRIES.

Lumbering.—The lumber trade is very brisk, there being a good demand for lumber in the vicinity. There has been a great deal of building done lately, and up to the present time carpenters have been fairly well employed, and will probably continue so for a few weeks longer.

Manufacturing.—The new Burrill establishment is in full operation, and employs a good number of men. In other departments of trade business has been fairly active, with steady employment for most of those employed.

CONDITION OF PARTICULAR TRADES.

Building trades.—Bricklayers and masons report trade very dull during the month. Carpenters find work plentiful, with a slight demand for good men. Painters, gas-fitters and plumbers report work satisfactory.

Metal, engineering and shipbuilding trades.—All engaged at these trades are doing a steady business.

Printing and allied trades.—The printing industry is enjoying the prosperity that is being felt by all classes, and there are very few idle printers in the city at the present time.

Clothing trades.—All employed at these trades find employment good, excepting the

journeymen tailors, who are experiencing their usual slack season, but times are improving with them as the colder weather sets in.

Food and tobacco preparation.—Bakers, confectioners and butchers are very busy. Cigarmakers and tobacco workers are well employed.

Miscellaneous.—Laundry workers report trade very good.

Transport.—Men engaged in this line are very busy.

Unskilled labour.—All in this class are well employed at good wages.

SHERBROOKE, QUE., AND DISTRICT.

Mr. H. Logie, Correspondent, reports as follows :—

GENERAL CONDITION OF THE LABOUR MARKET.

The condition of the labour market for the month of October was somewhat similar to that of the previous month. There is still a brisk demand for unskilled labour, and lumbermen are offering splendid inducements to men, but the supply is not nearly equal to the demand. All other classes of industry, with but few exceptions, are fully employed. It is seldom that trades are so fully occupied at this season of the year. The only serious setback to report during the month was the fact that, owing to the continued dry weather in this section, the Magog and St. Francis rivers are very low, and several of the industries depending upon power from these rivers have had to partially close down, and, in some cases, to close down altogether. The Dominion Cotton Co.'s mills at Magog have been running short hours for some time, and unless rain comes soon and swells Lake Memphremagog, they will be closed altogether. The Paton Company, which employs between 600 and 700 employees, at Sherbrooke, closed down on Tuesday, October 27, owing to insufficiency of power. The company is about to install a steam plant, which will be used as an auxiliary in the future. The

company is busy getting ready for its fall trade and the close down is serious. Several concerns on the St. Francis river, mostly saw mills, are closed down for the same reason.

The Crocher Screen Co., of Pittsburg, Mass., which has a small establishment here, has secured a site in Lennoxville, three miles distant, and will erect a machine shop. The company expects to increase the output very largely when once located in its new premises. The contract for the new court house in Sherbrooke has been awarded by the provincial government to Messrs. Paquette & Gadbois, St. Hyacinthe. The contract price is in the neighbourhood of \$105,000, and this does not include the excavations for the foundation, which are now being carried on. The contractors expect to get to work right away, and they will have men at work during the winter getting the stone ready for placing next spring. Local men will be given the preference on the work. Messrs. Rowell & Co., biscuit manufacturers and confectioners, have given out a contract for a large new factory, their present premises being inadequate for their business. Wholesale and retail merchants report business as being exceptionally good. The customs returns for the month of September were about \$4,000 better than for the corresponding month in 1902. There has been no change in the rates of wages. Beginning on November 1, several of the industries will change their hours so that the employees will work until five on Saturdays instead of 12, as during the summer months. The same number of hours per week will be put in.

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—Farmers in this section have been handicapped with their fall ploughing owing to the dry state of the ground. Hay is selling as high as \$15 to \$17 per ton. Potatoes are a splendid crop in this section, as are all root crops. Altogether the returns are ahead of what was anticipated.

Lumbering.—Lumbermen are now busy in the woods, but the scarcity of men is greatly felt.

Manufacturing.—The various branches of manufacture here are running on full time. The woollen and worsted mills have enough orders to keep the plant running full time for some time. The scarcity of water in the Magog river is a serious proposition to the mill owners at present.

Railroad construction.—The Canadian Pacific Railway Company has large gangs of Italians at work straightening out and making other repairs to the track between here and Megantic. Farmers in the district through which the line runs are also deriving considerable benefit, by the purchase of their products by the trackmen.

CONDITION OF PARTICULAR TRADES.

Building trades.—Bricklayers and masons have plenty of work, as also have carpenters and joiners, and the prospects for work ahead are very promising. Plumbers say that work during the month has been plentiful.

Metal and engineering trades.—Work in the Jenckes machine shops and Rand drill shops is very brisk. The former concern has sent quite a number of its men to Niagara Falls where it has a large contract for the Niagara Power Co. Considerable overtime has been put in during the month in both shops.

Woodworking and furnishing trades.—Although in some shops orders are not rushing, still all hands are employed and full time is put in.

Printing and allied trades.—These trades report business good.

Clothing trades.—Custom tailors report work plentiful and scarcity of good hands. Garment workers are also in good demand.

Food and tobacco preparation.—Bakers, confectioners and butchers report business good.

Unskilled labour.—Labourers are very scarce, and the demand continues for men.

ST. HYACINTHE, QUE., AND DISTRICT.

Mr. Napoleon Samson, Correspondent, reports as follows :—

GENERAL CONDITION OF THE LABOUR MARKET.

The general condition of the labour market has remained practically unchanged from last month. Several classes of labour have been very busy since the spring and those wishing to work have found ready employment. A new cigar factory, it is stated, will soon be established. Business has been extremely active in sash and door factories ; in fact extra time is being put in. Banks report good conditions. No changes have occurred in wages or hours and relations between employers and employees have been generally satisfactory.

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—Farmers are well satisfied with the crops, notwithstanding the unfavourable weather which prevailed for some time.

Manufacturing.—Manufacturing establishments of all kinds report plenty of business. At the beginning of the month the Penman Manufacturing Company* was obliged, during a certain time, on account of the weather, to diminish the hours of work of its employees. Owing to insufficient water power to run the dynamos generating electric light the employees were obliged to commence at 6.30 in the morning and finish at 5 o'clock in the evening. At present the electric machinery has been connected with the steam boilers and sufficient light is now procurable and the employees are working full time, ten hours and three quarters per day and on Saturdays six hours and a quarter. There is an abundance of orders on hand and a successful season is presaged for this establishment.

Building trades.—Masons and bricklayers state that work is fairly good. Carpenters

* This company was erroneously referred to as the Panman Boot and Shoe Company in the October Gazette, page 297.

and joiners are very busy, there being plenty of buildings in course of erection. Plumbers are actively engaged, there being a great demand at this season for heating apparatus. Stonecutters are also well occupied.

Metal and engineering trades.—Moulders and their helpers have had a good month. Machinists and electric workers report very good conditions. Blacksmiths are fully occupied.

Woodworking and furnishing trades.—Carriage makers are fairly busy.

Printing and allied trades.—These trades have had a successful month.

Clothing trades.—Tailors and garment workers state they have had a good month. Boot and shoe workers have been fairly well employed.

Food and tobacco preparation.—Business brisk in this line.

Leather trades.—Tanners and curriers have an abundance of work.

Miscellaneous.—The Canadian Laundry has been fully occupied.

Transport.—Teamsters and expressmen have had plenty to do.

Unskilled labour has had a good month, and all those willing to work could find employment, the wages being very fair considering the season.

DISTRICT NOTES.

St. Dominique, County of Bagot.—The men working at the stone quarries are extremely busy. The contractors for the principal public buildings, such as the Inland Revenue building at St. Hyacinthe, and for the railway companies get all the stone they require.

MONTREAL, QUE., AND DISTRICT.

Mr. Gustave Audet, Correspondent, reports as follows :—

GENERAL CONDITION OF THE LABOUR MARKET.

During October there has been no diminution in construction work on account of

this the building trades were fully as active as during the preceding month. Corporation labourers only work nine hours per day since October 15, and receive the price of ten hours, or \$1.50 per day. The strike among the builders' labourers is not over yet, although the majority of the employers have consented to the men's terms. Practically, however, the strike may be classed as finished, for, although a few employers have not signed, there is only a small number of men on strike. Commerce in general is very brisk.

CONDITION OF PARTICULAR TRADES.

Building trades.—These trades could not be busier.

Metal, engineering and shipbuilding trades.—Work has not diminished among this class of workmen.

Woodworking and furnishing trades.—These trades generally have had a very busy month. There is particularly much activity among car builders and repairers.

Printing and allied trades.—These branches have been fully occupied.

Clothing trades.—Journeyman tailors and garment makers have been very busy in the making of fall and winter clothing. Boot and shoe workers have had plenty of work.

Leather trades.—Workers report abundance of work.

Miscellaneous.—Furriers have been busier than usual during October on account of the near approach of winter. Theatre employees have entered upon their busiest time on account of the opening of the theatre season. Laundry workers in general are fully employed.

Transport.—Steamboat men, ship labourers and longshoremen are still very busy, there being plenty of work on hand. Street railway employees report very satisfactory conditions.

Unskilled labour.—This class of labour is very busy on account of street repairing and the laying of new railway tracks.

HULL, QUE., AND DISTRICT.

Mr. R. Laferrière, Correspondent, reports as follows :—

GENERAL CONDITION OF THE LABOUR MARKET.

The situation in the labour market as compared with the previous month is unchanged. There is plenty of work for any one willing to do it. Wages are generally good, with few exceptions. The supply of men is still inadequate, particularly in the saw mills. Some slight dissatisfaction exists among the machine operators in the paper factories. Runners get \$3 per day in Hull, and they allege that they command better pay elsewhere. The Matthews Pork Packing Co., in Hull, has found it necessary to further extend its buildings, owing to the increase in business. The factory will soon be employing 150 people the year round.

CONDITION OF LOCAL INDUSTRIES.

Lumbering.—Saw milling is the leading industry throughout the district, there being no less than 60 mills, large and small, in operations in the various towns, chiefly in the back country places. Several bush-rangers recently arrived for a short stay at the headquarters in Hull, and it was learned from them that mostly all the mills on the Gatineau, Lièvre and Nation rivers were in operation sawing shingle and hard wood to order. These generally employ from 4 to 10 hands each. The Fraser saw mills at Deschenes are now in full operation. They employ about 40 people. Like those employed by Gilmour's and Hughson in Hull, and at Booth's at the Chaudière, they work 10 hours a day, and get from \$1.25 to \$1.50 a day. Some 1,500 Hull people work for Mr. Booth.

Shipping lumber by water is slackening down, and navigation will close on November 14. Several barges are already laid up in Hull for the winter. Barge hands can easily secure work in the mills for another month and a half. The squad of shipwrights and caulkers of the Hull yards, thirty in number, will be kept busy during

winter ; for the seven coming months they will be paid \$1.75, and for the five subsequent months \$1.50 per day.

Manufacturing.—The axe factory (Walter Bros.) in Hull, the operation of which pretty much depends on the condition of the lumber trade, is running full blast. Twenty-five people are employed, mostly all skilled, at \$3 or \$4 per day. In this busy season the ten hour day is law.

CONDITION OF PARTICULAR TRADES.

Building trades.—These trades are pretty busy. The wages are the same as those quoted in the last month's report. About 300 people are still working on the construction of the Cement Company's buildings. Work will go on till frost affects the laying of the cement blocks, when iron construction will be proceeded with during the rest of the season.

OTTAWA, ONT., AND DISTRICT.

Mr. T. W. Quayle, Correspondent, reports as follows :—

GENERAL CONDITION OF THE LABOUR MARKET.

Considering that October is the commencement of autumn, when the work is expected to slacken, there was exceptional activity in Ottawa, and only those not anxious to work were out of employment. The activity was general for both skilled and unskilled labour.

Merchants report a fairly satisfactory month and wholesale orders placed indicate confidence in the future. Money was easy, the banks reporting the amount demanded for the movement of the western grain crop as not being up to the average.

There were no strikes during the month.

CONDITION OF LOCAL INDUSTRIES.

Lumbering.—The employing agents reported the lumber shanties as well filled. Men were hard to get early in the season, but were more plentiful in October, and as high wages were paid positions were filled with greater ease. Considerable difficulty, however, was experienced in getting 'sea-

soned' hands and that men new to the shanties were employed in large numbers was evidenced by the fact that not a few returned after a week or two experience in the bush. On the whole the lumbering trade was in good condition, and with a favourable winter season the cut should be as large, if not larger, than that of this year.

CONDITION OF PARTICULAR TRADES.

Building trades.—The building trades were fairly active. A number of buildings, such as the public library and the *Citizen* building, were delayed by difficulty in getting material and in getting sufficient help. This will tend to prolong the season. Work was also commenced on a new public school on Rideau street and on the enlargement of the Bolton street school. At the end of the month contracts were signed for the erection of a large three story office building on Sparks street for the International Harvester Company of Chicago, and also for a storehouse at the Canal basin, 250 by 50 feet. This work will be started at once. A rumour that the contractors had signed an agreement with the Builders' Labourers Union was denied by the contractors. Builders labourers, however, have been paid 20 cents an hour and given a 9 hour day with Saturday half holiday throughout the season. This was granted in May last without being asked for.

Metal and engineering trades.—All the metal trades represented in the city were busy, there being no idle men.

Woodworking and furnishing trades.—The woodworkers were fairly busy. Davidson & Thackray's big new mill was started for the first time on October 31 and will likely soon give employment to a large number of hands. The work of restoring the Eclipse Office Furniture Company building, destroyed by fire, was making rapid progress and was expected to be in full operation again in a few weeks.

KINGSTON, ONT., AND DISTRICT.

Mr. William Kelly, Correspondent, reports as follows:—

GENERAL CONDITION OF THE LABOUR MARKET

The change in the conditions of the labour market here was almost imperceptible, if any occurred, as compared with the previous month. Labour generally continued to be fully employed, and in some cases, notably among masons' helpers and those engaged in similar work, the supply is not equal to the demand. During the month the trustees of Queen's University awarded the contract in connection with the erection of the new Grant Hall. The work of building will be commenced at once. As the estimated cost is between \$35,000 and \$40,000, it is expected that much work will be afforded the various trades employed.

The item of nearly \$50,000 included in the supplementary estimates by the Dominion government for the erection of new barracks for the R.C.A. at Kingston and the restoration of Fort Henry, together with those in the Ontario estimates and those for repairs to the customs house and other public buildings will afford much employment and guarantee a continuance of the present activity in the building trades.

An item of interest to Kingston was the awarding by the Ottawa Forwarding Company of a contract for a new steel steamer to replace the steamer *Olive*. The new boat, which will be placed on the Rideau route, is to be built at the canal basin next winter. It is to cost \$25,000, and is to be built on lines especially adapted to canal traffic, and on a four and a half foot draft, will have a freight capacity of 150 tons. The boat will be 107 feet long. Accommodation will be provided for local passengers, and ten staterooms will be provided for through traffic. It is expected this addition to the Rideau river fleet will make travel on that picturesque route still more popular. This season the steamers of the

Rideau Lake Navigation Company, the *Rideau Queen* and the *Rideau King*, ran only from Smith's Falls to Kingston, but the new boat will run through from Ottawa to Kingston. Its light draft will enable it to make good headway through the canal. The contract for the new boat has been given to a Montreal firm. It will be first put together in Montreal and afterwards taken apart and rebuilt at Ottawa. The boat, with its large capacity for freight and passengers, will be ready for the opening of navigation.

The transportation business continues active, the handling of coal, various kinds of ore, and every variety of freight, affording abundance of work for longshoremen and others.

The local banks report good business for the month, and wholesale and retail trade is very active.

A deputation representing the retail boot and shoe dealers, during the month, waited on the city council complaining to the council that the by-law passed, ordering the stores to be closed early was not being properly enforced, and asking that instructions be given to see that the law was lived up to. On resolution of members of the council the city commissioner was requested to report as soon as possible to council *re* what steps were being taken to enforce the present law.

There were no strikes, or lock-outs during the month.

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—Farmers have their crops well housed and are busy with fall work.

Lumbering.—Men are being engaged here to leave for the lumber camps. Very few are available.

Manufacturing.—Manufacturing continues active. The cotton mill, hoisery mill, Canada Locomotive Works, Kingston foundry, the new cereal mill and other places are running full time.

Mining.—Mining continues active with prospects for a good fall and winter season.

Railroad construction and employment.—Considerable work is being done in railroad construction and kindred work.

Other industries.—During the month contracts were given for an extension to the plant of the McLean Pork Packing Company which carries on business near the outer Grand Trunk Railway station and in the city.

CONDITION OF PARTICULAR TRADES.

Building trades.—The building trades are very busy.

Metal, engineering and shipbuilding trades.—The metal, engineering and shipbuilding trades also continue to be fully employed.

Woodworking and furnishing trades.—Those engaged in woodworking and the furnishing trades report increased business.

Printing and allied trades.—Printers, pressmen and bookbinders are now fully employed. Electrotypers, steel and copper plate printers and photo engravers are not engaged here.

Clothing trades.—Tailors, garment workers, and boot and shoe makers are busy. Hat and glove makers are not employed.

Food and tobacco preparation.—Bakers and confectioners, butchers and cigarmakers, report good business. Cigarmakers are much in demand.

Leather trades.—Tanners and curriers report improved business.

Miscellaneous.—Barbers, broommakers, clerks, delivery employees, furriers, hotel, restaurant and laundry workers report good business.

Transport.—Those engaged in transportation and all branches of unskilled labour are fully employed.

DISTRICT NOTES.

During the month all the moulders and coremakers in Frost & Wood's shops at

Smith's Falls, went out on strike. The trouble was caused by a member of a union refusing to pay back dues. In May last two unions amalgamated. The man in question claimed not to have been a member since that time and does not want to belong to a union.

TORONTO, ONT., AND DISTRICT.

Mr. Phillips Thompson, Correspondent, reports as follows :—

GENERAL CONDITION OF THE LABOUR MARKET.

Labour, both skilled and unskilled, has been well employed during the month and the prospects for a busy winter season in most lines are encouraging. The most serious drawback to otherwise satisfactory conditions is the great scarcity of house accommodation which has been severely felt ever since the fall set in. Rents in many localities have considerably advanced and many who find it impossible to obtain house accommodation are compelled to board or live several miles out of the city. The practice of two or more families occupying one house is frequent and there is much overcrowding, especially in the poorer districts. The absence of important strikes or disputes between employers and employed is in marked contrast to the disturbed conditions prevailing in the spring. Such ill-feeling as exists is mainly on account of old difficulties which remain unsettled.

CONDITION OF LOCAL INDUSTRIES.

Manufacturing.—Activity prevails in all departments of the manufacturing industry, business having been stimulated by the good harvest and the growing demands of the North-west on account of the influx of settlers. A favourable feature is the growing tendency on the part of buyers to demand a better quality of goods which is regarded as a sure evidence of general prosperity. In some departments manufacturers find it difficult to overtake orders.

Agriculture.—The farmers have rarely enjoyed a greater measure of prosperity

than they are now experiencing. Farm labourers continue to arrive in small numbers from England and some applications for men willing to engage by the year are being filled by the new arrivals. In addition to the bountiful grain crop, the yield of apples in this neighbourhood has been unusually large and the quality as a rule good. Heavy shipments from some points have been made at remunerative prices.

CONDITION OF PARTICULAR TRADES.

Building trades.—The various branches of the building trade continue busy and the weather has been favourable for out door work. A number of contracts remain to be finished and the prospects are that work will be plentiful so long as the weather permits, while the indoor trades will have a fair winter season, although recent immigration has considerably increased the number of workmen in this industry. Painters are very busy. A slight difficulty has arisen in the marble working trade, owing to a number of the employees of Davidson & Co.—a Chicago firm having contracts in Toronto, joining the Marble Workers' Union. The firm belongs to the Marble Dealers' Association of America, which is fighting the unions in the United States, and the men, about ten in number, were locked out. Most or all of them have found employment elsewhere. No Toronto employers are involved in the dispute.

Metal, engineering and shipbuilding trades.—Work, as a rule, is abundant and matters generally are progressing smoothly, except in those lines where old-standing troubles exist. Machinists have had a fair month, though hardly as good as last month. Reports from blacksmiths and boilermakers satisfactory. Bicycle workers are not doing so well and find work slack. The moulders' strike at three establishments is still on. The brass workers have gained a substantial advance in wages as the result of the arbitration with their employers*. This

* See another page of present issue for full text of this award.

decision affects about 300 men belonging to the Brass Moulders, Brass Workers and Metal Polishers' Union. They asked a nine-hour day, with pay and a half for overtime—in addition to increased wages. The settlement is generally regarded by both sides as satisfactory.

Woodworking and furnishing trades.—These are generally busy—with prospects of an active season.

Printing and allied trades.—Printers find work a little quiet and quite a number are looking for jobs. There is a good deal of competition for work owing to the influx into the city of men from other places. A strike of the bookbinders took place in September 28 at the establishment of the Copeland-Chatterson Co., Queen street west, over the employment of an apprentice to do work which it was claimed should be done by a skilled artisan. Twenty-two bookbinders and five rulers went out. The difficulty was satisfactorily adjusted early in the month and the men returned to work.

Clothing trades.—All branches of the clothing trade are well employed.

Miscellaneous.—Bartenders are agitating against Sunday labour. Some hotels make a practice of cleaning up their barrooms on Sunday and requiring the attendance of their bartenders for several hours of the day for that purpose. The union is endeavouring to put an end to the system.

Transportation.—All classes engaged in land transportation, especially railroad men, are actively employed.

DISTRICT NOTES.

Toronto Junction.—The Canada Cycle & Motor Co. has laid off a number of men latterly, some of whom have gone to the United States. Building at the junction is being actively pushed to supply the demand for dwelling houses, which has become very urgent.

Scarborough.—The Toronto Railway Co. has almost completed arrangements for extending the Scarborough Railway from

its present terminus at the Halfway House to Highland Creek, a distance of five miles. The right of way has been secured. The already built section will be overhauled and improved.

HAMILTON, ONT., AND DISTRICT.

Mr. Samuel Landers, Correspondent, reports as follows :—

GENERAL CONDITION OF THE LABOUR MARKET.

Steady employment in all branches of trade still continues at the end of the month. Weather is exceptionally fine and all classes of construction and outdoor work are still at their height.

Canadian Bearings Company, which was organized recently, and has obtained a charter of incorporation, has decided to establish its plant in this city, and expects to be in operation by the first of next year. About 30 hands will be employed at first, but the company expects to largely increase the number. The new Canadian Westinghouse Company has already started work in connection with the factory buildings that are to be erected for the purpose of manufacturing electric appliances. There will be a machine shop, three stories high, 350 feet by 97 feet. A warehouse will be erected, three stories, 215 feet by 123 feet. A detail building, three stories, 153 feet by 63 feet, is also on the programme. The foundry will be one story high, and will be 186 feet by 113 feet. The pattern shop will be three stories high, and will be 48 feet by 63 feet. Besides these buildings there will be sheds, &c., and the factories will comprise a small village. The buildings will be of brick, steel and concrete, and will be of the latest and most convenient design. They will cost several hundred thousand dollars.

Wholesale and retail trade and business in general are very active. The customs returns for the month amounted to \$101,667.92. During the past fiscal year the imports entered here totalled in value \$8,424,394, which is larger than it ever has

been before. Of this total \$5,774,241 represent importations from the United States.

Of labour troubles there was but one—the piano makers' strike, which, at the end of the month, was still unsettled.

Nearly 50 members of the Ontario branch of the Master Horse Shoers' International Association of America, held a convention in Hamilton in the early part of the month.

CONDITION OF LOCAL INDUSTRIES.

Manufacturing.—Manufacturing in nearly all branches is very prosperous, especially so in the iron trades. Furniture workers, clothing trades, cotton mills, shoe factories, &c., are all very busy.

Railroad construction.—There is no railroad construction going on at present in the vicinity.

CONDITION OF PARTICULAR TRADES.

Building trades.—The allied building trades are still well employed. Carpenters, joiners, plasterers, plumbers, painters and builders' labourers are all well employed.

Metal, engineering and shipbuilding trades.—All of the iron trades are well in employment—moulders, stove mounters, machinists, structural iron workers and smelter men. Steam engineers, electrical and telephone men and linemen are fairly busy. Blacksmiths, boilermakers and sheet metal workers are well employed. Horse-shoers are fairly busy, their demand for a Saturday half holiday with full week's pay was granted without a strike.

Woodworking and furnishing trades.—The woodworking trades are busy—furniture workers, box makers, pattern makers, &c. The piano makers are out on strike for shorter hours and increased wages.

Printing and allied trades.—The printing trades are well employed, as are also the bookbinders.

Clothing trades.—Custom tailors have not been so very busy the latter part of the month. The vest and pant makers, in

affiliation with the Journeymen Tailors' Union, made a demand for an increase of 10 per cent in wages, giving until the 15th for an answer; after that date the union withdrew the demand and decided to push the use of their union label, thereby gaining by peaceful means what they desired. Garment workers are very busy.

Food and tobacco preparation.—Cigar-makers and tobacco workers are also enjoying a busy season.

Miscellaneous.—Broommakers, barbers and delivery employees, railway men, &c., are fairly busy. Hotel and restaurant employees and laundry workers are also well employed.

Transport.—Teamsters and longshoremen are well engaged, many of the latter doing team driving and quarry work.

Unskilled labour.—Unskilled labour is generally well employed in all branches.

LEGAL DECISIONS AFFECTING LABOUR.

There were about ten suits in the fall assizes under the Compensation for Workmen's Injuries Act and in nearly every instance were they settled out of court by the complainant accepting a proportion of the amount sued for.

DISTRICT NOTES.

Dundas is enjoying the prosperity of the district. Machinists, woodworkers, moulders, axe makers and garment workers are all well employed. All is quiet and harmonious between employer and employee. The by-law submitted to the ratepayers to bonus the proposed carpet factory carried. There were only 12 votes against it. A smash occurred at the new Burlington canning factory, a section of the two floors above the operating rooms gave way, and fell with a tremendous crash. Luckily it happened before working hours, so that no one was hurt. Considerable of the machinery was badly broken. The company's loss will be about \$2,000. Unsound foundations seem to have been the cause of the break.

NIAGARA FALLS, ONT., AND DISTRICT.

Mr. Ernest Green, Correspondent, reports as follows :—

GENERAL CONDITION OF THE LABOUR MARKET.

In this district every month of late has been a repetition of its predecessor as regards the employment of labour. There is work for every man at fair wages, and yet in no calling is there a serious scarcity of men. The works of the power companies affect the country for many miles around, and all classes of people feel the benefit of the large sums being earned and spent by the thousands of men who have flocked here during the past two years. All trades are well employed, and the same may be said of unskilled labour. The building trades are busiest, but factories of all sorts are doing well, and railways are very busy.

The quarrymen at Sherkston have struck, claiming that they are gradually being replaced by imported foreign labour, and that the Empire Limestone Co., violated an agreement with them.

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—Farmers and fruit-growers are closing a very satisfactory season. Grapes, which were a small crop, have commanded good prices.

Manufacturing.—Factories are generally well supplied with orders. Some which were shorthanded in the summer, are now supplied with full staffs. Girls for factory work are in constant demand. The wine factories have had an excellent season's business.

CONDITION OF PARTICULAR TRADES.

Building trades.—Carpenters, bricklayers, masons, plasterers, plumbers, sheet metal workers and painters are all well employed, and at times there is a slight shortage of men in the crafts.

Metal, engineering and shipbuilding trades.—There is nothing new to report in the metal, engineering and shipbuilding

trades, all being well employed and business good.

Woodworking and furnishing trades.—Coopers are having a very busy time, several new shops having been opened in the district, but most of them are temporary concerns.

Printing and allied trades.—Printers are busy, and there has been inquiry for hand compositors in some shops.

Clothing trades.—Tailors of all classes are working full or overtime, and help has been called for in these lines.

Transport.—The first sign of freight diverted from water to rail routes caused by the advancing season, is the railways putting on many extra crews in this district. Passenger traffic is much lighter. Long-shoremen and lake vessel men of all classes are beginning to find employment scarce, and many more men will be thrown out of employment for the winter in a few weeks.

DISTRICT NOTES.

Port Dalhousie.—The strike of the employees of the Maple Leaf Rubber Co., was settled after lasting over seventy days. The men were granted most of their demands, and most of them are working again under the new conditions.

Niagara on the Lake.—Fruit canneries are drawing near to the close of a busy season. Regular connection with lake ports by steamer has ceased for the season, diverting freight and passenger traffic to other routes.

St. Catharines.—The city has laid a lot of new and has re-laid considerable old pavement, employing a good many men. The Carnegie library building is being rapidly erected. Industry and employment are generally in a satisfactory condition.

Sherkston.—Eighty-four Canadian workmen employed in quarries by the Empire Limestone Company, of Buffalo, struck work on October 6, claiming that the company violated an agreement with them and

was replacing them with imported Italians. Twenty Italians were thrown out of work by the strike.

BRANTFORD, ONT., AND DISTRICT.

Mr. J. C. Watt, Correspondent, reports as follows :—

GENERAL CONDITION OF THE LABOUR MARKET.

October has been a busy month for nearly all classes of labour employed in Brantford. There has been a greater demand for men than during the preceding month, due to the extension of the sewerage system, and general outside work which must be completed before winter. In the iron trades the plough factories have been exceptionally busy, and much overtime has been worked. The wagon works have also been working two hours overtime per day during the entire month. In the building trades many new private residences were commenced, and ample employment is assured for all those engaged in these occupations. Wholesale and retail merchants have had a satisfactory month. Amicable relations between employers and employees have prevailed. The local co-operative pork factory, which has been idle for some time, has been purchased by a private company, which expects to commence operations in the near future.

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—Agriculturists have been busy with the root and apple crops—the latter being very large in this locality.

Railroad construction and employment.—Operations upon the Grand Valley Electric Railway and on the main line of the Grand Trunk Railway have given employment to a large force of men.

CONDITION OF PARTICULAR TRADES.

Building trades.—Great activity has prevailed in the building trades. Bricklayers, masons, carpenters and plasterers have had plenty of work. Painters, plumbers, gas and steamfitters have been fully employed.

Metal, engineering and shipbuilding trades.—Iron and brass moulders, and core-

makers report having steady employment. Machinists and engineers are all employed. Electrical workers have had a very busy month. Metal polishers and plough fitters have worked much overtime. Stove-mounters have had a steady month. Blacksmiths in several large factories have worked overtime considerably. Boilermakers, sheet metal workers and horseshoers have been working steadily.

Woodworking and furnishing trades.—Carriage and wagon makers, especially the latter, have worked much overtime. Patternmakers, millwrights and coopers have had plenty of work.

Printing and allied trades.—Printers and pressmen have all been fully employed.

Clothing trades.—Journeyman tailors report trade as brisk during the month.

Food and tobacco preparation.—Bakers, confectioners, cigarmakers and tobacco workers have had a full month's work.

Miscellaneous.—Barbers, clerks, delivery employees and laundry workers have had steady employment.

Transport.—Railroad trackmen and freight-handlers have worked steadily. Street railway employees, carters, draymen and teamsters have worked full time.

Unskilled labour.—Unskilled labour is all employed, and towards the end of the month was in demand.

DISTRICT NOTES.

Paris.—The building trades are very busy, and will be so for some time if favourable weather continues. All local labour has been fully employed.

St. George.—There have been no idle men during the month.

GUELPH, ONT., AND DISTRICT.

Mr. O. R. Wallace, Correspondent, reports as follows :—

GENERAL CONDITION OF THE LABOUR MARKET.

The labour market has improved since the opening of the month. All classes of

working people are well employed. A demand is noticed for a number of lines of skilled machanics but there is plenty of unskilled labour. Building operations are being pushed ahead as rapidly as possible but the supply of skilled men is hardly equal to the demand. Tenders have been called for a 100 by 42 addition to the axle works to be used for making springs. Machinery is being installed in the new carpet factory for making tapestry and other lines of carpets. This factory will have probably the most valuable machinery plant in the city. City assessor's returns show a large increase in assessment and the largest increase in population in 25 years. A site has been bought to erect a carriage supply factory upon. Printers obtained 50 cents per head per week increase under agreement made last year. Retail trade is opening out extra well for the fall season.

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—Farmers have finished their root crops which yielded very well. The high price of stockers is keeping many farmers from putting the usual number of feeding cattle in their barns.

Railroad construction and employment.—Surveyors are at work on a line to extend the Guelph Junction Railway to Goderich.

CONDITION OF PARTICULAR TRADES.

Building trades.—The building trades have had a busy month. Employment will last in all lines for some time. Most of the season's work has been on public buildings and factories, with only a moderate number of dwellings. Bricklayers and stonemasons are all steadily employed as are also carpenters and painters. Stonecutters are all steadily employed but the season is drawing to a close. Builders' labourers all find steady employment.

Metal and engineering trades.—Iron moulders have had a good month. There is no change in the shop which is on strike in this trade, the men who are on strike still walking around while the shop is running with non-union men. There will shortly

be employment for about 20 stove moulders on the completion of a shop addition under way. Machinists are well employed, and sheet metal workers are very busy.

Woodworking and furnishing trades.—Woodworkers have had a good month. Piano and organ workers have steady employment. Upholsterers are very busy, with a demand for men. Carriage workers are working on cutters and are only fairly well employed. Coopers are very busy.

Printing and allied trades.—Printers report a scarcity of men. Under agreement made a year ago an increase of 50 cents a week was granted all classes of men in this trade.

Clothing trades.—Tailors are very busy on fall work.

Food and tobacco preparation.—Bakers, butchers and cigarmakers all enjoyed a good month.

Miscellaneous.—A small strike of domestics employed at the O. A. College occurred during the month, caused by a difference on orders from the matron. A number of the girls returned to finish their month but the remainder sought other employment. Barbers, clerks and drivers were busily employed during the month.

Unskilled labour.—Unskilled labour finds steady employment but the supply is equal to the demand.

DISTRICT NOTES.

Hespeler.—Some classes of textile workers are only working six hours a day.

STRATFORD, ONT., AND DISTRICT.

Mr. Jos. T. Carlin, Correspondent, reports as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

There is but little change to note in the condition of the labour market, all classes being steadily employed, with no loss of time this month.

Owing to the busy season on the farms being over, labourers are more readily se-

cured than the previous months. A large number of mechanics and labourers are employed on civic works, paving streets and laying cement sidewalks.

The building trades are still very busy, the weather being so favourable that a number of contractors are doing work they intended leaving over until next season.

The wholesale and retail merchants report trade very good.

No change in rates of wages or hours of labour and no disturbance in the labour market were reported.

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—Throughout this district the farmers are getting a large amount of ploughing done this fine weather; also bringing grain and other produce to the market. The price of wheat (standard) is 73 cents per bushel; barley, 40 cents; oats (standard), 27 cents; live hogs, \$4.85 to \$5.10 per hundred weight.

Manufacturing.—Manufacturing has been very active in almost every line during the month.

CONDITION OF PARTICULAR TRADES.

Building trades.—The bricklayers and masons are extra busy this season. Carpenters report work plentiful. Painters are fully employed. Plumbers and tinmiths have all the work they can attend to. Builders' labourers are more plentiful than during the previous month, the supply being equal to the demand.

Woodworking and furnishing trades.—Woodworkers are steadily employed. Coopers report a steady month working on flour and apple barrels.

Printing and allied trades.—Printers report business good, being especially busy on job work.

Clothing trades.—Journeymen tailors' work is improving—preparing for the winter season. Among garment workers there is quite a demand for girls and women.

Food and tobacco preparation.—Bakers and confectioners are doing their usual trade, as also are the butchers and meat cutters. Cigarmakers report business good, with no idle men.

Miscellaneous.—Barbers, clerks, delivery employees, and laundry workers are fully employed.

Transport.—The railroad trainmen have been making good time, owing to the prevailing great activity in railway traffic. A number of trackmen and firemen have been taken on the road during this month.

Unskilled labour.—This class has had more employment and better wages this summer than ever before.

DISTRICT NOTES.

Mitchell.—All branches of trade are very active. The flour mill has been running day and night for some time.

St. Marys.—Business is fairly good; a number of men and teams are engaged macadamizing roads and laying cement walks.

LONDON, ONT., AND DISTRICT.

Mr. Alex. Woonton, Correspondent, reports as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

Labour conditions in this city during the past month have been of a most satisfactory nature, and a keen demand was felt for workmen, especially in the foundries and on outside work requiring unskilled labour. With building trades the outlook for the winter months is not so encouraging as it was a year ago. The only jobs of any importance on at present are: A new public school, a Nurses' Home at the General Hospital, a new home for the Children's Aid Society and a printing office for A. Talbot & Co.; although plans are out for a new six-story hotel, 112 by 120 after the style of the King Edward in Toronto.

A special feature of the labour market in this city was the scarcity of domestic

help and boys and girls for factories. Domestic help is now commanding from \$10 to \$12 per month and board ; and boys and girls are now receiving \$2.50 and \$3 to commence with, where they formerly got \$2.

The boilermakers' strike, which commenced at E. Leonard & Sons, last month, still continues. Several boilermakers, who stated they were sent here by an employment agent in Newcastle, arrived here, but did not go to work when they found out the situation.

CONDITION OF PARTICULAR TRADES.

Building trades.—Bricklayers and masons are beginning to slacken off, and a few are out of employment. The local union voted against an International Mortuary Fund on a sliding scale from \$100 to \$200 at death. Carpenters and lathers and plasterers are exceptionally busy and good men are in demand. Painters have plenty of work to keep them going until the snow flies. Plumbers, gas and steamfitters are very busy. Builders' labourers are still all employed.

Metal, engineering and shipbuilding trades.—Iron moulders are exceptionally busy, and at McClary's they are in demand. Ironworkers and helpers are also very busy, and at the Rolling Mills a night staff will be put on as soon as the necessary help is secured. A shut-down of four days was necessary at the mills owing to the head roller's family all being in the hospital, and his necessary absence from his work. Machinists are busy. Electrical workers and linemen report trade as fair. Metal polishers, buffers, platers, brass workers and stove mounters are very busy, and considerable night work is being done by these workers.

Woodworking and furnishing trades.—Carriage and wagon makers are very busy. Woodworkers and wood carvers are exceptionally busy. At Bennett's they have the contract for the interior furnishings of six churches in South Africa. Coopers are exceptionally active and the demand for men to make barrels and for the barrels themselves cannot be met, especially in the case of apple barrels.

Printing and allied trades.—Printers continue to be all employed. *The Farmers' Advocate*, a semi-monthly, which is printed here, and has a large circulation throughout Ontario and the North-west Territories, is to be turned into a weekly. Lawson & Jones are moving into their new premises, and are also continuing to use the old ones. Bookbinders are busy.

Clothing trades.—Journeymen tailors are now in the midst of their busy season, and considerable night work is being done. Garment workers and boot and shoe workers report trade as fair.

Food and tobacco preparation.—At the large biscuit and candy works overtime has commenced and will continue until Christmas. Cigarmakers report trade as good, with a few jobs open. A die for cutting wrappers is being operated in one of the local factories. It is the first of its kind to be used in Canada, and it simplifies the process considerably. The government report of the 23 factories in this district for the last fiscal year shows an output of between 33 and 34 million cigars, or two-thirds of the total made in Ontario.

Transport.—Railroad workers continue busy. The construction and ballast trains are soon to be taken off for the winter. Teamsters are exceptionally busy, with a good winter for them in sight.

Unskilled labour continues in demand, and is commanding better wages than ever before. Boys of 18 and 19 years of age are receiving \$1.50 and \$1.60 per day on sewers, cement walks, &c.

ST. THOMAS, ONT., AND DISTRICT.

Mr. A. Roberts, Correspondent, reports as follows :—

GENERAL CONDITION OF THE LABOUR MARKET.

There was little change in industrial conditions over the preceding month. Industrial, commercial and business activity continued in a healthy state, with plenty of employment to be had. Wages and hours of employment continued unchanged, with

the exception that in the Michigan Central Railway locomotive and car shops the hours of work have been reduced from 10 to 9 hours per day, which is the usual work day during the winter months. The change went into effect October 19.

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—The most noteworthy incident is the general good feeling as a result of favourable conditions. A much larger acreage of wheat has been sown this season than last year, prompted by better prices. Reports of auction sales show that farm stock is bringing good prices.

Manufacturing.—Local firms report a continuation of favourable conditions, with a good demand for products.

Railroad construction and employment.—In this important industry there is continued activity. The work of improving the road bed, bridges and equipment continues in progress. The Wabash Company announces that its line is about ready to accommodate the largest type of engines. The several improvements are all in the line of saving in labour.

CONDITION OF PARTICULAR TRADES.

Building trades.—The favourable weather conditions of the past month encouraged many smaller jobs, and, with the exception of bricklayers and stonecutters, building mechanics are steadily employed. Plumbers are exceptionally busy, while painters are slacker than last month.

Metal trades.—In these lines the greatest activity is in car wheel moulding and general foundry work, but all workers have steady employment.

Woodworking and furnishing trades.—Factory workers continue very busy, as during the summer.

Printing and allied trades.—For printers employment has been steady, but not so active as last month. The Typographical Union is negotiating with the employers for an increase of pay, but nothing definite has been arranged.

Clothing trades.—In this line work is brisk, both with journeymen tailors and garment workers.

Food and tobacco preparation.—Workers in this line have no change to report, steady conditions obtaining.

Miscellaneous.—Broom and brush makers are very busy at the local factory and some overtime is being worked. Laundry workers report that the season has been better than last year.

Unskilled labour on general outdoor work find employment getting scarcer, and with the setting in of bad weather there will be a surplus of labourers.

CHATHAM, ONT., AND DISTRICT.

Mr. John R. Snell, Correspondent, reports as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

During the past month the general condition of the labour market has been exceptionally active and the demand for labour greater than during the previous month. Contractors in the building trades have all the work they can handle before cold weather sets in. Advantage has been taken of the fine weather of the past few weeks by the paving contractors, who are rushing their work, employing all the available men they can get and paying from 20 cents to 25 cents an hour for labourers. All trades have had a good month, with but little lost time. The binder twine factory is putting in additional machinery. The coopering trade is exceptionally active at present, being rushed with orders. Wholesale and retail trade is brisk, and the labour market is free from unrest. There is a demand for female labour in the fruit evaporating factories.

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—Farmers report that crops in general are hardly up to the average, compared with other years.

Manufacturing.—All local industries are active, with plenty of orders on hand.

CONDITION OF PARTICULAR TRADES.

Building trades.—Bricklayers, masons, carpenters, plasterers, painters, plumbers, gasfitters and electric light men are all fully employed. Stonecutters and builders' labourers have plenty of work.

Metal and engineering trades.—Iron workers, machinists and steam engineers are all busy, many working overtime.

Woodworking and furnishing trades.—Carriage and wagon makers are working full time. Coopers are exceptionally busy, being rushed with orders.

Printing and allied trades.—Printers, pressmen and bookbinders report a very good month.

Clothing trades.—Journeyman tailors have plenty of work.

Food and tobacco preparation.—Bakers, confectioners, cigar and tobacco workers have steady work.

Miscellaneous.—Delivery men and clerks have steady work.

Transport.—Railroad and ship labourers and longshoremen are exceptionally busy.

Unskilled labour is scarce and in good demand.

WINDSOR, ONT., AND DISTRICT.

Mr. D. Mitchell, Correspondent, reports as follows :—

GENERAL CONDITION OF THE LABOUR MARKET.

Trade and labour conditions are practically unchanged from last month, the demand for labour continuing good. There is exceptional activity in the building trades, and a large number of the houses have been contracted for which will give abundance of work up to the end of the year. The board of works and paving contractors are hiring all the teams and men they can secure to allow the work to be rushed before the cold weather sets in, as it will take about six weeks yet to finish operations. The Grand Trunk Railway Company has 150 men putting its yards in order for the

winter. The public library, costing \$30,000, is finished and was opened to the public in October. The only change in wages was with the street car employees, who had their wages raised from 16 to 17 cents per hour. There is no unrest in the labour market at the present time.

The property-holders of Windsor, on October 26, 1903, carried a by-law to secure \$56,000 on 20 year debentures for laying cement sidewalks by a majority of 350 votes, and also a by-law by 200 majority to secure \$15,000 to convert the old central school into a city hall.

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—Farmers and market gardeners have had a busy month harvesting their fruit and vegetable crops. In some localities dry rot is affecting the potatoes.

Manufacturing.—Manufacturing concerns are all busy, especially the planing mills, which are running to their full capacity to keep up with the demand. A new industry started during the month, viz :—The Harris Manufacturing Co. ; employment is given to from 15 to 30 people.

CONDITION OF PARTICULAR TRADES.

Building trades.—The building trades are very busy as the weather continues to keep fine for building purposes, and houses are scarce. Bricklayers and masons, carpenters, painters and labourers are especially busy.

Metal, engineering and shipbuilding trades.—All mechanics in these lines have had a good month and the prospects are that it will continue so to the end of the year. Blacksmiths and horseshoers are very busy.

Woodworking and furnishing trades.—Woodworkers are steadily employed, particularly carriage and wagon makers. Sash and door hands and coopers are very busy making barrels for the Salt Company.

Printing and allied trades.—Printers and pressmen have had a steady month.

Clothing trades.—Journeyman tailors are very busy with the fall trade, with prospects

for a good season. They had some difficulty recently with the employers with regard to prices to govern the making of pants and vests, but secured an increase of 5 per cent.

Food and tobacco preparation.—Bakers, butchers and confectioners have enjoyed a good month. The city council passed a by-law making a 1½ pound loaf of bread the standard weight, for which the bakers receive 5 cents.

Miscellaneous.—Barbers, clerks and delivery employees report business good.

Unskilled labour.—This class of labour is still in demand.

WINNIPEG, MAN., AND DISTRICT.

Mr. John Appleton, Correspondent, reports as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

General employment conditions have been excellent during October and all classes of labour are in requisition. The same activity characteristic of last month has continued without interruption. The weather has been exceptionally favourable. Commercial and business activity continues as keen as ever, and general expansion is taking place. Rates of wages have not changed materially. The carpenters have succeeded by their strike, which is not yet officially declared off, in raising their pay from an average of about 30 cents to one of 35. Particularly good men get a higher rate. Outside of this particular strike, the relations between employers and workmen continue to be of a very satisfactory nature. Bank clearings continue to increase and, as compared with corresponding periods of last year, the advance is very marked.

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—The return of large numbers of farm labourers to Ontario is indicative of the completion of harvesting operations. Grain is beginning to move in larger quantities, and the storm in September has left its mark on the quality. Very little will grade No. 1 hard. The bulk will average Nos. 1 and 2 northern.

Following the harvest, splendid weather ensued for fall ploughing.

Lumbering.—Lumbering in districts where the land is high and accessible by road is very active. It will not, however, reach its busiest period until the 'freeze up.' The fine open weather is so favourable to outdoor work as to cause the absorption locally of any labour offering. Employment agents state that already they are in receipt of large orders for men to be in readiness for lumber camps a little later.

Railroad and construction employment.

—Railroad construction continues to proceed with a rush. Men are continuously being drafted to different parts of the west. Cessation of the harvest rush has slightly eased wages. The rate of \$2 per day so freely offered last month was not maintained during October.

CONDITION OF PARTICULAR TRADES.

Building trades.—Building operations were slightly retarded by the carpenters' strike. The latter part of the month, however, saw them all at work again. A greater obstacle to progress has been delay in getting material. For years past a desire for more substantial buildings has called for the use of more heavy stone work, and the provision of this has not been as prompt as contractors desire. When, years ago, structures were of a lighter character, such delays did not occur. It is evident, however, that enterprising quarrymen are preparing to meet in the future the demands for their product as readily as it can be used. Permits for building, it is estimated, will aggregate before the season closes approximately \$6,000,000. This is very much in excess of the total building of previous years. Plumbers and carpenters will have work in abundance during the winter in finishing such buildings as can be closed sufficiently against extremes of climate. The better class of carpenters only can expect employment on such work.

All the *metal* trades are working to their full capacity, as are also the *woodworking* trades.

Printing and allied trades.—Printers continue to be uniformly well employed, and winter prospects are encouraging.

Clothing trades.—The custom tailors are already busy outfitting for winter and no lack of business is complained of; and the same can be said of garment workers.

Food and tobacco preparation.—Food and tobacco preparation continues to offer employment to increasing numbers. One of the largest bakeries has just completed extensions on an elaborate scale, and a co-operative company is calling a meeting to take measures to increase its capacity.

Leather trades.—The leather trade is very busy in manufacturing as well as in the handling of imported foods.

Transport.—In all lines of transport conditions are prosperous. The engineers and firemen are taking joint action to secure an advance in the rates of pay. A conference is arranged to take place in Montreal on November 2 and 3 between the engineers and firemen and the Canadian Pacific Railway officials.

BRANDON, MAN., AND DISTRICT.

Mr. S. P. Stringer, Correspondent, reports as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

General activity continued in all branches, especially in the building trades. Contractors are making inquiries for men in order to complete contracts before the season closes. Carpenters, lathers and plasterers are in much demand, but no additional hands are available, although the number of skilled labourers that has come out this season far exceeds any previous year, and every man has found employment. No new industries have been started since September. The condition of local industries is very satisfactory. The corporation is carrying out considerable civic improvements. Exceptional activity is evidenced in bridge-building in this locality. Large gangs of men are busy in laying tracks, and improvements for the yard extensions

for the Canadian Pacific Railway. The number of threshing outfits sent into this district and territories for this season far exceeds that of last year. Manufacturers of agriculture implements report a good trade. Business is unusually brisk in the transportation of all kinds of merchandise westward and throughout the districts. The Kelly Milling Co. has orders for 75 car loads of flour, most of which is going to China and Japan. The Brandon Seed House has also doubled its orders compared with last year. Wholesale and retail merchants report trade very good. The unfavourable condition of the weather has delayed harvest operations and also affected business somewhat. There were no changes in the rate of wages or hours of labour. The engineers and firemen on the Canadian Pacific Railway, working on the system between Fort William and Lagan, B.C., have asked for a new schedule of wages. Failing to come to a settlement with the management at Winnipeg a committee representing both is now at Montreal endeavouring to effect an agreement.

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—Farmers are experiencing considerable difficulty in securing the crops owing to the unsettled condition of the weather since the storm on September 12. There have been very few fine days. Farmers seemed to devote the whole time to stacking, but there was considerable grain in stock up to the 15th of the month. Threshing has been done at different points in the district, but it is not general, as all the grain is not in good condition for threshing. It is estimated by competent authority that the average yield of wheat in this district will be 20 bushel to the acre, and forty per cent will grade No. 1 hard. Oats is the only grain that has suffered much from the September storm. Very encouraging reports come as to crop condition in the territories; the total wheat yield is estimated at 16,135,000 bushels, according to the territorial government report. According to the Winnipeg grain trade report the total wheat crop of Manitoba

and the territories is 60,000,000 bushels for 1903.

Lumbering.—The planing mills and saw mills are working full time with a large staff. The demand for lumber and building supplies is very heavy. Considerable lumber is coming over from the United States.

Railroad construction.—The railway companies are pushing on the construction of the various branches with all possible speed, and it is reported that they will keep the gangs at work until winter sets in. Considerable difficulty is being experienced in procuring sufficient hands to work on the construction of branch lines, owing to the high wages offered by farmers.

CONDITION OF PARTICULAR TRADES.

Building trades.—Bricklayers and masons, carpenters and joiners are active. Lathers and plasterers are also very busy, the supply not being equal to the demand, but work in this line will not last very much longer. Painters, plumbers, steamfitters and stonecutters are busily employed. Builders' labourers find work plentiful, and men are offered \$2.75 per day by contractors, who are rushing their contracts before the season closes.

Metal, engineering and shipbuilding trades.—With iron moulders trade is good, but no openings. Machinists are busy, some working overtime. Linemen are busy. Blacksmiths are satisfactorily employed. Boilermakers are actively employed, with a few openings on the railroad for good men. Horseshoers and patternmakers are fully employed.

Printing and allied trades.—Printers and pressmen are busily employed.

Clothing trades.—Journeymen tailors, garment workers and boot and shoe workers find trade brisk.

Food and tobacco preparation.—Bakers and confectioners, butchers and meat cutters find trade very good. Ice cutters and drivers are a little slack. Cigarmakers and barbers find business satisfactory. Clerks and stenographers have plenty of work, but

no opening for additional hands. Delivery employees are very busy. Furriers find trade slack. Laundry workers are busy.

Transport.—Men engaged in all branches of railway service are exceptionally busy.

Unskilled labour.—Although the amount of unskilled labour that has come into this district this season far exceeds that of any previous year, yet there is scarcely an idle man to be found. Quite a number of harvest hands from Ontario have returned home. There seems to be a scarcity of help to complete the threshing gangs operating throughout the district. Several owners of threshing machines have been in the city endeavouring to secure additional help, but have failed to secure the number required.

DISTRICT NOTES.

The splendid harvest weather is a great help to farmers throughout the district who are rushing threshing operations. The effect of this is felt in business lines, as trade is more brisk in all lines than it has been for some time. Wheat has begun to move in considerable quantities on the Canadian Northern and the Canadian Pacific. The elevator companies in Manitoba and the territories are receiving all the grain that they can handle. In this city long trains of loaded wagons are seen coming in by every road leading into the city, bound for the wheat elevator.

ROSSLAND, B.C., AND DISTRICT.

Mr. Roland A. Laird, Correspondent, reports as follows:—

DISTRICT NOTES.

The conditions in respect to labour throughout the Kootenays and Boundary districts of eastern British Columbia continue to be most satisfactory. During the month there has been no hint of labour disputes in any quarter, the demand for skilled labour has increased materially, and it is probable that at no previous period in the development of the country has there been so few men unemployed. It is safe to state that no able-bodied man desirous of working

requires to be out of employment at the present time. In fact in many lines the work is seeking men.

In *mining* there has been no radical alteration in conditions. The *Rossland* camp proper has a working force of something over 850 men and the wage rolls for September aggregated over \$86,000. The working forces in the *Slocan* have increased somewhat during the month, several mines increasing their forces. The marked activity that was expected to follow the granting of the federal bounty on Canadian lead has not set in as yet. This is explained on various grounds, but there now seems to be a decided opinion that the revival in the *Slocan* at least will be postponed till spring. *East Kootenay's* mining industry is picking up somewhat, and more men were employed this month than for a considerable period before. The collieries are especially active, and experienced coal miners remain in strong demand. The *Lardeau* district has been a centre of interest owing to the remarkable discoveries of free gold ore, and one of the reasons for the scarcity of skilled miners elsewhere in the country has been the fact that scores of this class have spent the past two months prospecting in the hills about the Bonanza camp. A vigorous boom is predicted for *Peplar Creek* next spring. *Boundary* district has been working full forces in all the mines throughout the month and the section is enjoying marked prosperity. In construction work there has been a demand for skilled labour, particularly carpenters, and for ordinary labour. At a large concentrator now under way near *Rossland* there is room for fifty carpenters and comparatively few men offering for the work.

Smelting is progressing steadily. The coke supply problem appears to have worked out satisfactorily, at least no complaints are now heard on the score of inadequate supplies. All the *Kootenay* and *Boundary* smelting works have increased their forces.

Lumbering continues to thrive. The advent of snow will expedite logging in many sections and men useful in the woods will be in exceptional demand at good wages.

During the month some men were thrown out of work by the cessation of all operations on provincial government works, but these were immediately placed in equally good positions, so that no hardship was occasioned.

NEW WESTMINSTER, B.C., AND DISTRICT.

Mr. George Hargreaves, Correspondent, reports as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

Satisfactory conditions in the labour market still continue. There is a demand for unskilled labour, and for servants and girls to work in the cigar factory. In the building trade a large amount of work is still on hand. The civic authorities are also carrying out a large amount of work at the present time. The lumbering firm of Small & Buckler has decided to erect a new saw mill here. The mill will have a capacity of 50,000 feet per day. The firm's timber limits are tributary to the Fraser river. It is expected that the erection of a proposed fruit and vegetable cannery will commence shortly, and that it will be ready for operation by next summer. The yield of hops has been exceptionally good this year. The first shipment of this product from Chilliwack arrived here, and will be shipped to England. The consignment consisted of sixty tons, and is worth about \$40,000.

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—Many of the farmers were unsuccessful in getting housed the grain crop; many on the low lands have suffered considerable owing to the wet weather after the crops were cut.

Fishing.—The fishermen on the river are doing fairly well with the run of hump-back salmon, a good market being found east. Two vessels laden with salmon have left the river for Liverpool. The loading of fleet of salmon carriers gives a large amount of work to the river steamers in transshipping from the canneries to the vessels.

Lumbering.—There is a steady stream of lumber being shipped to all points in eastern Canada. The mills are running full time, with one of the city mills working overtime to keep with its orders.

Manufacturing.—The British Columbia Company's shops have turned out two new cars for the Vancouver and Westminster line, are re-modelling several of the same company's cars, and have orders on hand for six new cars.

Railroad construction.—Good progress is being made on the new bridge, the sub-structure contractors have finished their work, and men that were employed on those works have secured employment on the new railroads now under construction.

CONDITION OF PARTICULAR TRADES.

Building trades.—Bricklayers and masons report work getting slack. Carpenters find work still plentiful with good prospects for the winter. Painters and plumbers are fully employed.

Metal, engineering and shipbuilding trades.—Employment in these trades is beginning to get slack, the season's work being about over. In the shipbuilding trades work has been dull during the month, but several new contracts have recently been signed that will keep the members of these crafts busy for some time.

Woodworking and furnishing trades.—Nearly all engaged in these trades find work satisfactory and orders ahead. Shingle weavers are working full time. At one mill, Chinese have been employed to cut shingles, owing to the scarcity of white labour.

Printing and allied trades.—Printers report work plentiful and are working full time.

VANCOUVER, B.C., AND DISTRICT.

Mr. George Bartley, Correspondent, reports as follows :—

GENERAL CONDITION OF THE LABOUR MARKET.

At the close of this month the outlook in industrial circles was uncertain. In la-

bour circles a spirit of restlessness pervails, caused in a large measure by the provincial elections. The more conservative elements in the unions were less interested. Owing to the fact that work has been generally good the seriousness of the unemployed question has not manifested itself. There has been a fair movement in general trade in Vancouver. The demand for goods in season has been good, and is showing expansion. The demand from interior places in the province has been fairly active. The lumber and other industries are very actively engaged. Business in general is in a sound and satisfactory condition, and the prospects are favourable for a good winter trade.

Current prices for the final week of October were : Potatoes, \$12 to \$14 per ton ; apples, 3 cents a pound ; flour, \$5.50 per barrel ; eggs scarce, 45 to 50 cents a dozen ; creamery butter, 35 to 40 cents a pound ; eastern eggs, 25 to 30 cents a dozen ; Manitoba creamery butter, 22½ to 25 cents a pound.

The big departmental building of Woodward, Davidson & Buchanan, is nearing completion. It is located at the corner of Abbott and Hasting streets, and will be occupied by the middle of November. This establishment it is said will be the largest of its kind west of Toronto.

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—The first large shipment of British Columbia apples, consigned to the old country, was recently shipped to Glasgow, Scotland, and consisted of a full carload. Messrs. Stirling and Pitcairn, of Kelowna, on Okanagan Lake, were the shippers, and the fruit was chiefly of the Northern Spy variety.

CONDITION OF PARTICULAR TRADES.

Building trades.—Work in the building trades is slackening off on account of the weather which, when favourable, the workmen took advantage of. Carpenters are not all employed. Lathers and plasterers are very busy. Painters are busily employed

at indoor work, but a few are unemployed. In the plumbing trade, local firms have all they can handle, and some small jobs are frequently turned away. Journeymen are all busy. Stonecutters find trade very dull.

Metal, engineering and shipbuilding trades.—Iron moulders report trade good and are working 50 hours per week. Blacksmiths are in fair demand in the contract shops. The local union has entered into the following agreement with the Canadian Pacific Railway Company :—

1. Ten hours shall constitute a day's work, the hours being from 7 o'clock to 13 o'clock, with one hour allowance for meals.

(a) On Saturdays the hours shall be from 7 o'clock to 17 o'clock from the 1st of October to 1st of April, and from 7 o'clock to 12 noon the balance of the year.

(b) When shops are worked in relays, night and day, the day staff shall work winter term hours as above. The hours for the night staff shall be from 19 o'clock to 6 o'clock; Saturdays 20 o'clock to 6 o'clock, and one hour allowance for meals. Overtime shall be allowed after the above hours.

2. Overtime shall be paid for Sundays, and the following public holidays : New Year, Good Friday, Victoria Day, Dominion Day, Labour Day, Thanksgiving Day and Christmas Day.

(a) Night crews shall receive straight time, but if worked during meal hour, or over ten hours per day shall receive overtime pay for same.

(b) Employees sent out on the road temporary to work shall be allowed straight time when travelling and the additional expense they necessarily incur, receipt to be attached to expense voucher.

(c) Men specially called out after their regular working hours shall receive not less than two and one-half hours' straight time.

3. Any boy engaging himself as an apprentice must be between the age of 14 and 18 years, must be able to read and write English, and know the first rules of arithmetic, and must serve five (5) years.

(a) The number of apprentices to blacksmiths shall not exceed the ratio of one to every three blacksmiths employed.

4. When reductions in force are made men who have others dependent on them for support shall be given preference of employment, seniority and proficiency to govern.

5. Employees who feel that they have been unfairly dealt with may appeal from the foreman to the master mechanic.

6. Leave of absence and free transportation shall be granted to members of committees of employees for adjustment of matters in dispute with the company so far as is consistent with good service, after request has been made in writing to the proper officer.

7. Employees shall be granted leave of absence and passes or reduced rates in accordance with the general regulations of the company, rates to be as follows, and will not be changed unless 30 days' notices is given :

Leading fire, Nelson, Revelstoke, and Vancouver, 35½ cents per hour.

Spring fire, Nelson, Revelstoke and Vancouver, 35 cents per hour.

Blacksmith :—North Bend, 32 cents per hour; Kamloops, 32 cents per hour; Vancouver, Revelstoke and Nelson, 33½ cents per hour.

Apprentices :—First year, 9 cents per hour; second year, 11 cents per hour; third year, 13 cents per hour; fourth year, 15 cents per hour; fifth year, 17 cents per hour.

Effective, September 27, 1903.

CHAS. J. McALLISTER,
JOSEPH TUSON,
LEWIS H. YARRELL,

Committee of blacksmiths', Pacific Division

C. H. TEMPLE,

Master Mechanic.

Printing and allied trades.—The news printers have asked their employers to grant them an increase in wages, and both parties have agreed to submit the question to arbitration. The report of the board is expected in a few days. Pressmen find work nothing extra, with one or two men out of employment. Bookbinders have satisfactory employment.

Clothing trades.—Journeymen tailors work ten hours a day, piece work is the general rule, and the demand for men is limited.

Food and tobacco preparation.—Bakers and confectioners are busy. Some of the men are only moderately employed. Butchers are busy. With cigar makers a few men are idle, having to compete with eastern manufacturers.

Miscellaneous.—Clerks and stenographers are not in demand, and many are idle. Laundry workers find trade satisfactory.

Transport.—Dominion Express Company officials have discharged several old hands. Messengers on runs between Vancouver and Calgary, work sometimes thirty-six (36) straight hours, or from seventy-two to eighty hours a week. In offices, clerks often work from ten to fifteen hours a day.

DISTRICT NOTES.

The British Columbia official *Gazette* says : 'Notice is given that a private Bill will be introduced into the legislature to construct a railway from Spence's bridge to Osoyoos Lake or Midway.'

VICTORIA, B.C., AND DISTRICT.

Mr. J. D. McNiven, Correspondent, reports as follows :—

GENERAL CONDITION OF THE LABOUR MARKET.

The condition of the labour market for the month of October was satisfactory in nearly all trades, the only ones suffering depression at the end of the month being the shipwrights and caulkers. In all others employment is fair. Premises have been secured and the necessary machinery ordered for the establishment and thorough equipment of another steam laundry, which will be operated by white labour exclusively. At present three-fourths of the laundry work of the city is done by Chinese.

A company, capitalized at \$250,000, with headquarters at Victoria, has been incorporated for the purpose of placing on the market a soap or sanitary cleanser manufactured by a newly-discovered trade process.

A deputation from the lower mainland, representing landed interests, waited upon the government on the 19th inst., to press for a more vigorous immigration policy. It also required that reliable maps and data be provided for intending settlers.

The delivery of 3,000 yards of earth or gravel at the James Bay mud flats during the month has given employment to all available teams and teamsters in the city.

CONDITION OF LOCAL INDUSTRIES.

Considerable interest is being manifested in the *pulp-wood* industry on Vancouver Island, and large tracts of land have been leased for that purpose during the year. The construction of two pulp mills is contemplated early next year, one at Swansea Bay and the other at Quatsimo Sound.

CONDITION OF PARTICULAR TRADES.

Building trades.—On the whole trade is fair, and with the exception of carpenters and joiners, each branch offers full employment to all workmen. Bricklayers and masons, lathers and plasterers, painters and

decorators, plumbers and builders' labourers are all fully employed.

Metal, engineering and shipbuilding trades.—Conditions in these trades are generally satisfactory. Iron moulders, machinists, steam engineers, blacksmiths and boilermakers are all fully employed. Electrical workers and linemen have fair employment, while shipwrights and caulkers are nearly all idle through scarcity of work. Large forces of ship joiners and painters are employed doing the finishing work on the two new steamers for the Canadian Pacific Navigation Co., the *Princess Victoria* and the *Princess Beatrice*.

Woodworking and furnishing trades.—Woodworkers, carriage and wagon makers report fair employment.

Printing and allied trades.—Employment is fair in all branches, but at present there is a slight surplus of printers.

Clothing trades.—Journeymen tailors report trade as fair, while garment workers are still busy.

Food and tobacco preparation.—Bakers and butchers are fully employed. Cigar-makers report trade as better than for last month, and all hands fully employed.

Leather trades.—Harnessmakers have enjoyed a fairly good month.

Miscellaneous.—Barbers are all working, and about the beginning of the month there was a demand for extra help. Clerks and delivery employees report conditions as satisfactory.

Transport.—Steamboat men, ship labourers, longshoremen, street railway employees, hackmen, carters and draymen are all well employed.

Unskilled labour.—On account of a scarcity of sewer pipe a large force of men working on sewer construction was laid off for a portion of the month. Otherwise conditions are favourable and will remain so until the rainy season commences.

DISTRICT NOTES.

Esquimalt.—There is much activity noticeable about naval work at Esquimalt. The new offices and other buildings being erected at the base of Signal Hill are nearing completion. A large force of mechanics from the city has found employment there during the summer.

Crofton.—A steady supply of ore, averaging about 450 tons per day, has been received at the smelter during the month. The bulk of this was received from adjacent mines, but some small shipments came from the north.

NANAIMO, B.C., AND DISTRICT.

Mr. A. E. H. Spencer, Correspondent, reports as follows :—

GENERAL CONDITION OF THE LABOUR MARKET.

There is no change of any account in the labour market in this district since last month. Outside work has been fair, but the rainy season will soon begin, when all work outside will be stopped or continued only when weather permits. There are too many men at present in the district for the work that is going on. There is no exceptional activity in any of the trades, although some of them are fairly steady. In business circles trade is fairly steady, owing to labour matters being in a fairly settled condition. There seems to be a feeling of quiet among the labour unions after the different troubles in the summer and spring, and a looking forward to a steady winter's work. There has been no change in the rates of wages during the month.

CONDITION OF LOCAL INDUSTRIES.

Fishing.—There is nothing doing in the fishing industry at present, although the season for herring will soon be here.

Lumbering.—In the lumber trade business is fair, the mills working full time to meet the demand for lumber from the North-west and foreign ports. In the

woods the camps are working fairly well, but there are plenty of men to meet all demands.

Mining.—In the coal mining industry business is fairly good, the different coal companies on the island are gradually increasing their output, and the outlook for the winter is good, there seeming to be a good demand for coal and coke from this island, but there are still a good many idle men around the mines waiting for work. In the quartz mines business is quiet, there being very little done outside of a little development work at a few of the mines. Preparations are going forward to the development of a loadstone quarry on an island close to Nanaimo, which, it is expected, will be worked on an extensive scale, giving employment to a number of men in the future.

CONDITION OF PARTICULAR TRADES.

Building trades.—In the building trades there is very little doing and very poor prospects of improvement this year.

Metal, engineering and shipbuilding trades.—Blacksmiths and carriage makers report business as fair.

Printing and allied trades.—Printers report business as fair.

Transport.—Teamsters and expressmen report business as very quiet.

Unskilled labour.—There is very little doing for unskilled labour outside of the mines as the civic work for the year is about finished.

DISTRICT NOTES.

In the district matters are about the same as in this city. There was a little trouble at Ladysmith during the month and several of the drivers at Extension mines quit work owing to the discharge of one of their number, but the matter was settled without much trouble.

DOMINION LEGISLATION AFFECTING LABOUR, 1903.

THE session of the Dominion parliament which opened on March 12 and prorogued on October 24 last, being the longest since Confederation, was, from the point of view of the volume and importance of the legislation discussed and assented to, also the most notable in the history of the Dominion, reflecting in a particular way the marked industrial and commercial progress of the country during the past several months. Some 206 Bills in all received the royal sanction at intervals, 94 being assented to on June 25, 15 on July 10, 41 on August 13 and the balance on the final prorogation of parliament. As might be anticipated, a considerable mass of legislation, directly and indirectly affecting the working classes, was included in the above. Certain of these measures, notably the Act to aid in the settlement of railway labour disputes and the Act regarding and restricting Chinese immigration, have been reviewed at length in a previous issue* of the *Labour Gazette*. The following will be found an analysis of the remaining legislation of the session according as the interests of labour were more particularly involved therein.

Legislation Relating to Transportation.

The most outstanding feature of the complete list of the new statutes is the number of measures that have to do, for the most part, directly and explicitly, with the transportation industry. A reference to the debates in the two Houses will further show that a very considerable portion of the time of the session was devoted to the discussion of the problem of transportation as affecting Canada. The Bill relating to the Grand Trunk Pacific Railway, and in definition of the attitude of the government towards the new company, was, of course, on account of the magnitude of the interests involved, the subject about which the greater portion of this discus-

sion engaged itself and concerning which perhaps the most widespread interest was manifested. In view also of the vast expenditure for labour and material, that its construction will involve, and the development of the country that is expected to follow, the passing of the measure is of great importance to the working class. There was, moreover, a very full discussion of the new Act consolidating the law respecting railways; the Act providing for the settlement of railway labour disputes* was another important measure of the session; and the appointment of a special commission on transportation† is expected to exert a widespread influence on transportation matters throughout the Dominion. By way of indicating in full the extent to which legislation relating to transportation engaged the attention of parliament and in order to show at a glance the scale on which railway development is progressing in Canada, the following list of Acts for the incorporation of new railway and other transportation companies, and otherwise relating to transportation, being 84 out of the total of 206 above mentioned, will be found of interest:—

Act to amend Chapter 8 of the Statutes of 1900, authorizing the granting of railway subsidies.

An Act respecting the Kootenay Central Railway Company.

An Act respecting the Canadian Pacific Railway Company.

An Act respecting the Quebec and New Brunswick Railway Company.

An Act respecting the British Columbia Southern Railway Company.

An Act respecting the Canadian National Railway and Transportation Company.

An Act respecting the Huron and Ontario Railway Company.

An Act respecting the Niagara Grand Island Bridge Company.

An Act respecting the Ottawa, Northern and Western Railway Company.

An Act to correct a clerical in the Act to incorporate the Edmonton and Slave Lake Railway Company.

* A review of this Act will be found at page 136 of the August issue of the *Labour Gazette*, vol. IV, No. 2. The full text of the Act was printed as an appendix to this same number.

† For a statement regarding the nature and scope of the terms under which this commission was appointed, see page 974 of the June, 1903, issue of the *Labour Gazette*, vol. III, No. 12.

* See the August, 1903, number of the *Gazette* pages 129, 139 and 169.

An Act to incorporate the Quebec, Saguenay and Gulf of St. Lawrence Railway Company.

An Act to incorporate the Coast Yukon Railway Company.

An Act to incorporate the Kootenay, Cariboo and Pacific Railway Company.

An Act to incorporate the Joliette and Lake Manuan Colonization Railway Company.

An Act respecting the Great North-west Central Railway Company.

An Act respecting the Grand Trunk Railway Company of Canada.

An Act to incorporate the Shipping Federation of Canada.

An Act respecting the Atlantic, Quebec and Western Railway Company.

An Act respecting the Hudson's Bay and Pacific Railway Company.

An Act to incorporate the Père Marquette International Bridge Company.

An Act to incorporate the Regina and Hudson's Bay Railway Company.

An Act respecting the Nipissing and James Bay Railway Company.

An Act to incorporate the Macleod, Cardston and Montana Railway Company.

An Act respecting the Lindsay, Bobcaygeon and Pontypool Railway Company.

An Act respecting the Edmonton-Yukon and Pacific Railway Company.

An Act respecting the Ottawa Electric Railway Company.

An Act to incorporate the Nipissing and Pontiac Railway Company.

An Act respecting the Calgary and Edmonton Railway Company.

An Act respecting the Canadian Northern Railway Company.

An Act respecting the Alberta Railway & Coal Company.

An Act respecting the Lake Erie and Detroit River Railway Company.

An Act respecting the Desjardins Canal.

An Act respecting the Canada Atlantic Railway Company.

An Act to incorporate the North-west Coal and Coke Railway Company.

An Act respecting the Alberta Central Railway Company.

An Act to incorporate the Hudson's Bay and Occidental Railway Company.

An Act to incorporate the Huron, Erie and Buffalo Railway Company.

An Act respecting the St. Mary's River Railway Company.

An Act to incorporate the Cardiff Railway Company.

An Act respecting the Interprovincial and James Bay Railway Company.

An Act respecting the Klondike Mines Railway Company.

An Act to incorporate the Hamilton, Galt and Berlin Railway Company.

An Act respecting the Elgin and Havelock Railway Company.

An Act respecting the Quebec Bridge Company, and to change its name to 'The Quebec Bridge and Railway Company.'

An Act respecting the Vancouver and Coast Kootenay Railway Company.

An Act respecting the London and Port Stanley Railway Company.

An Act respecting the Rocky Mountain Railway and Coal Company.

An Act to provide for further advances to the Harbour Commissioners of Montreal.

An Act respecting certain aid for the extension of the Canadian Northern Railway.

An Act to incorporate the Guelph and Georgian Bay Railway Company.

An Act respecting the encouragement of the construction of Dry Docks.

An Act respecting the Kettle River Valley Railway Company.

An Act respecting the Kingston and Pembroke Railway Company.

An Act respecting the Manitoulin and North Shore Railway Company.

An Act respecting the Canada Central Railway Company.

An Act respecting the Western Alberta Railway Company.

An Act respecting the Midway and Vernon Railway Company.

An Act respecting the Toronto, Hamilton and Buffalo Railway Company.

An Act to incorporate the Canadian Yukon Western Railway Company.

An Act respecting the Brandon and South Western Railway Company.

An Act to incorporate the Montreal-Longueuil Bridge Company.

An Act to incorporate the Niagara, Queenston and St. Catharines Railway Company.

An Act to incorporate the Chatham, Wallaceburg and Lake Erie Railway Company.

An Act to incorporate the Berlin, Waterloo, Wellesley and Lake Huron Railway Company.

An Act respecting the Medicine Hat and Northern Alberta Railway Company.

An Act to incorporate the Brandon, Saskatchewan and Hudson's Bay Railway Company.

An Act respecting the Red Deer Valley Railway and Coal Company.

An Act to incorporate the Southern Central Pacific Railway Company.

An Act to incorporate the St. Chrysostome Railway Company.

An Act to incorporate the Quebec, New Brunswick and Nova Scotia Railway Company.

An Act to incorporate the Grand Trunk Pacific Railway Company.

An Act to incorporate the Toronto and Hamilton Railway Company.

An Act to incorporate the Canadian Transportation and Storage Company.

An Act respecting the Nicola, Kamloops and Similkameen Coal and Railway Company.

An Act to incorporate the Brockville, Westport and North-western Railway Company.

An Act to amend the Act relating to Ocean Steamship Subsidies.

An Act to amend the Act respecting the Department of Railways and Canals.

An Act to incorporate the Ottawa River Railway Company.

An Act to amend the Act respecting the Harbour of North Sydney in Nova Scotia.

An Act respecting the construction of a National Transcontinental Railway.

An Act respecting the Pilotage District of Montreal, and the Port and Pilotage District of Quebec.

An Act to authorize the granting of Subsidies in aid of the construction of the Lines of Railways therein mentioned.

An Act to authorize aid to the Quebec Bridge and Railway Company towards the completion of its undertaking and to confirm an agreement between His Majesty and the said Company.

An Act to amend and consolidate the law respecting railways.

Subsidized Railways.

It may be added that in the 'Act to authorize the granting of subsidies in aid of

the construction of the lines of railway therein mentioned,' which is included in the above list, 78 lines of railway and 4 bridges are named as entitled to governmental assistance. The assistance granted is ordinarily at the rate of \$3,200 per mile, though if the construction of the line averages more than \$15,000 per mile a further subsidy of 50 per cent of the excess of the \$15,000 is allowable, though in no case may the subsidy exceed the sum of \$6,400 per mile. In the case of the bridges the aggregate assistance amounts to \$150,000. There is a section included in the Act relating to the granting of subsidies subject to conditions relating to the granting of running powers to other companies, the arrangement of reasonable traffic agreements, transportation of government mails and supplies, &c. The books of subsidized companies, showing the cost of constructing and operating the railway or bridge and the earnings thereof, are made subject to the inspection of the Minister of Railways and Canals. It is also provided that companies subsidized must lay their roads with new steel rails made in Canada, if procurable of suitable quality in Canada upon terms as favourable as other rails can be obtained. The Minister of Railways and Canals is named as the judge in regard to the latter particular; the provision, of course, has no reference to contracts already entered into.

'The Railway Act, 1903.'

Very important, from the standpoint of the transportation industry, was the consolidation of the various railway Acts on the Dominion statute-books into one new and complete whole. There are thus brought together under a single statute the various legal provisions now in force and governing the incorporation and organization of railway companies, and the construction, inspection and operation of railways, together with the measures relating to by-laws, tolls, traffic agreements, insolvencies, statistical returns, &c., &c. Especially also is

this consolidation of importance in view of the body of new legislation added thereby to the existing provisions. A brief summary of the main provisions included in this latter class is presented under the following heading:—

The Railway Commission.

The most noteworthy addition made to the Act is that which constitutes the Railway Commission, to be known as the 'Board of Railway Commissioners for Canada' consisting of three members, to hold office during good behaviour for a period of ten years, and generally taking over all the powers and duties previously exercised by the Railway Committee of the Privy Council. Complete instructions as to the constitution, duties, jurisdiction and procedure of the commission are laid down in the Act. Among the more important provisions in this connection are, briefly, the following:—

Constitution, Jurisdiction, Procedure, &c., of the Commission.

The commissioners are required to devote all their time to the performance of their duties under the Act. Their headquarters are to be in the city of Ottawa. They are not allowed to hold railway stock, or to have any financial interest, direct or indirect, in the operation of any railway. Their sittings may be conducted as may seem most convenient for the speedy despatch of business. A secretary of the board, to hold office during pleasure and to reside in Ottawa, is to be appointed, his duties being generally to obey the rules and instructions of the board and to keep a file of its regulations and orders.

The jurisdiction of the board is, generally speaking, to inquire into complaints of neglect of duties and to issue mandatory orders under the Act. The decisions of the board upon any question of fact in this connection are made binding and conclusive upon all companies and persons. The board may also of its

own motion make inquiries and determine complaints. It may also make regulations respecting the speed of trains, the use of steam whistles, the means of passing from car to car, the coupling of cars, the providing of shelter for employees, the use on engines of devices to avoid fires, the protection of property generally, and other matters. It may also impose penalties not provided for in the Act not to exceed \$50, recoverable on summary conviction.

The practice and procedure to be followed by the board is described in detail with special reference to the evidence of documents, certifying to copies of documents, the method of giving notices to companies, municipalities, firms and individuals, service of orders, reports or other documents, the duty of companies on receipt of such orders, the publication by the board of such regulations and orders, procedure in urgent cases, the continuance of regulations and orders of the Railway Committee, the changing of orders, the granting of partial relief, the making of rules governing procedure and practice, the relation of the board to other courts, the nature of an order of the board, appeals to the Supreme Court, liability of members of the board, powers regarding inquiries into accidents, witness fees, &c.

Regulation of Employment on Railways.

The section of the Act which relates to the operation of railways contains a number of new provisions expressly framed for the protection and regulation of employment. Under the heading of 'Equipment, apparatus and appliances' of trains it is provided that all trains should have efficient apparatus to permit of immediate communication between the conductor and the engine driver, brakes of a kind to permit of bringing the train to a standstill as expeditiously as possible, including a power drive-wheel brake and appliances for operating the train brake system upon the locomotive, the brake, in the case of passenger trains, to be instantaneous in action and self-applying in the event of any failure

in the continuity of its action. Automatic car couplers, capable of being uncoupled without the necessity of men going in between the ends of the cars are also ordered, the railway companies being given until January 1, 1906, to equip all trains with the brake appliances and couplers above mentioned. It is further provided that all box freight cars built in Canada in future shall be provided with outside ladders projecting below the frame of the car on two of the diagonally opposite ends and sides of each car, with hand-grips placed anglewise for the ladders on each car. Cars without these appliances, built prior to the passing of the Act, must be fitted with the attachments in question on or before December 1, 1905, unless improved attachments are recommended by the board in the meantime. The height of draw-boards is also fixed and a penalty not exceeding \$200 imposed for violation of the above provisions.

Fair Wages to be paid all Labourers on Railway Work aided by Government.

The provision compelling the payment of fair wages to workingmen engaged on work being performed under any contract for the Dominion government or being carried out under subsidy of the government has been previously a matter for insertion in the specifications and conditions relating to the contracts in question in accordance with the terms of the Fair Wages Resolution passed by the House of Commons in March, 1900. Provision, however, is now made for the universal application of the resolution in so far as railway contracts are concerned by its incorporation in the consolidated Act as part of the law of the land. This section will apply directly to the work undertaken in the construction of the Grand Trunk Pacific Railway. The section in full is as follows:—

'In every case in which the parliament of Canada votes financial aid by way of subsidy or guarantee towards the cost of railway construction, all mechanics, labourers or other persons who perform labour in

such construction shall be paid such wages as are generally accepted as current for competent workmen in the district in which the work is being performed; and if there is no current rate in the district, then a fair and reasonable rate; and in the event of a dispute arising as to what is the current or fair and reasonable rate, it shall be determined by the minister, whose decision shall be final.'

The Manitoba Grain Act.

In connection also with the legislation of the session relating to transportation, mention may be made of an amendment to the Manitoba Grain Act which is chiefly concerned with the facilities placed at the disposal of agriculturists in Western Canada for the marketing of their crops, the erection of warehouses for the storage of grain on the premises of railway companies, the construction and use of loading platforms by railway companies, and the furnishing of cars to applicants for the purpose of being loaded at such platforms being duly provided for. Important, also, are the sections added to the Act in regulation of the system of car distribution by railway companies. Order books for cars, open to the public, are to be kept at all grain shipping points, in which applicants for cars may make entries of orders, cars as ordered to be awarded to applicants in order. Applicants in turn must load cars when supplied within twenty-four hours. It is made punishable for applicants to sell their rights to any car. Full details are added as to when a car is considered as furnished, cancellation of orders, order of distribution, licenses governing the business of track buyers of grain in car lots, storage receipts, &c., &c.

Steel, Lead, and Binder Twine Bounties.

The Acts providing for payment of bounties on lead contained in lead-bearing ores mined in Canada and on certain articles manufactured from steel, have an intimate connection with the condition of labour employed in these industries. By the for-

mer the sum of 75 cents per 100 pounds on lead containing lead-bearing ores mined in Canada is to be paid to the producer or vendor of such ores, provided the total sum to be paid out in bounties does not exceed \$500,000 in any one year, and with a recommendation added to cover the possibility of a rise in the price of pig lead. If the quantity of lead produced, moreover, exceeds 33,333 tons a reduction in the rate of bounty will come into force, and if, in the opinion of the Governor in Council, the charges for transportation and treatment of lead ores in Canada are excessive, a diminution in bounty will go into effect. The bounties will cease on June 30, 1908.

In the case of steel and iron bounties, \$3 per ton is allowed on rolled iron round wire rods not over $\frac{3}{4}$ of an inch in diameter, and sold to manufacturers for use in making wire in their own factories in Canada. A bounty of \$3 per ton is granted on other rolled shapes when sold for consumption in Canada, and a bounty of \$3 per ton on rolled plates when sold for manufacturing purposes in Canada. The bounties allowed by the statute of 1899 are continued with certain amendments until June 30, 1907.

A bounty equal to the amount paid as export duty in the Philippine Islands on manilla fibre used for manufacturing binder twine in Canada is allowed to Canadian manufacturers of this product, the amount to be payable on all binder twine manufactured since September 1, 1902, and not to exceed $\frac{3}{4}$ of one cent per pound of the manilla fibre used.

Extension of Banking Facilities.

Accompanying the expansion of trade and industry a considerable extension of the banking facilities of the Dominion will be a result of legislation enacted at the late session. The following is a statement of the new banks incorporated by special Acts of parliament, with the amount of their capitalization and the location of their head offices:—

| Name of Bank. | Head Office. | Capital. |
|--|------------------|-------------|
| Bank of Winnipeg..... | Winnipeg, Man. | \$1,000,000 |
| City and County Bank of Canada..... | Ottawa, Ont.... | 1,000,000 |
| Northern Bank..... | Winnipeg, Man. | 2,000,000 |
| Pacific Bank of Canada. | Victoria, B.C.. | 2,000,000 |
| Sterling Bank of Canada. | London, Ont.... | 1,000,000 |
| Home Bank of Canada.. | Toronto, Ont.... | 1,000,000 |
| Citizen's Bank of Canada | "..... | 2,000,000 |
| Alliance Bank of Canada | Halifax, N.S.... | 5,000,000 |

In addition to the above legislation special Acts were passed respecting the Crown Bank of Canada, the Bank of Montreal and the Eastern Townships Bank.

Incorporation of Penny Banks.

An Act to be cited as 'the Penny Bank Act, 1903,' providing for the incorporation

of penny banks, may be referred to in this connection, being primarily a measure intended to encourage small savings among the people. Deposits may be received by such banks from any person of whatever age or condition of life, though the amount to the credit of any one depositor may not at any one time exceed \$300. The amount of interest allowed on deposits must never exceed the current rates of the government or post office savings banks. Penny banks are not allowed to issue notes or to discount or make loans upon the security of bills of exchange or promissory notes. Deposits are secured by a guarantee fund, concerning which full and explicit regulations are laid down.

NOVA SCOTIA LEGISLATION AFFECTING LABOUR, 1903.

DURING the month of October a volume of the statutes passed during the session of the Nova Scotia Legislature of the present year was received at the Department of Labour, Ottawa, and an analysis of the various Acts of particular interest to labour which it contains is presented herewith.

Conciliation Act.

Possibly the most important enactment of the year, from the standpoint of labour, was the Conciliation Act, which appears as chapter 37 of the collected statutes under the more extended title of 'An Act to make better provision for the prevention and settlement of trade disputes.' Nova Scotia is thus the second province to adopt legislation of this character, the Ontario Act having been passed in 1902.* The Act is in the main an adaptation of the Dominion Conciliation Act, 1900, and the section which defines the powers of the Provincial Secretary in the case of a dispute arising between employers and workmen is a verbatim copy of the provisions in the Dominion

Act which sets forth the powers of the Minister of Labour in a similar connection. The sections governing the registration of local conciliation boards is likewise practically identical with the similar section which grants the Provincial Secretary power to aid in the establishment of local boards. The provision of the Dominion Act, however, which defines the duties of an official arbitrator in general terms is omitted in the Nova Scotia Act though retained in the Ontario Conciliation Act,* while on the other hand the powers of and methods to be pursued by conciliation boards are dealt with in more minuteness. Thus it is specified that a board of conciliation must consist of three members nominated by the employers and three by workmen, each party being required to send to the other within a week from the opening of the year the names of six persons from whom the three shall be selected to act as their representatives on the board of conciliation for the current year. It is expressly stated that the number of representatives of employers and workmen on a board of conciliation always must be equal and must be so maintained during all sittings.

* For a review of the Ontario Act, see special article in the April, 1902, Gazette, Vol. II, page 611.

ings. Such a board is to have jurisdiction in all trade disputes arising from any cause whatever and including not only disputes arising between employers and workmen but also questions between different trades as regards demarcation of labour, &c., arrangements being made in the latter case that each trade may receive equal representation on the board. In case such a board cannot agree, application is to be made to the Provincial Secretary for the appointment of an arbitrator whose decision is to be final and binding on both parties. The board must be summoned within seven days and if practicable must give its decision within the next six working days.

Protection of Workmen's Wages.

An Act confirming the contract between the government of Nova Scotia and the Nova Scotia Eastern Railway Company, limited, includes a copy of the contract in question in which the specification and description of the railway referred to is set forth. In this connection it is provided as a condition governing the payment of the provincial subsidies that all wages must be paid to the workmen and all materials delivered must be paid for before any advance from the public treasury is made to the company. The company is held responsible for the payment of all labour, whether due directly by the company or by any subcontractor engaged under the company in the construction of the work, the Governor in Council being given the right to apply the subsidy to the payment of this liability in case of the failure of the company to do so. The company must also pay all wages due to its men and pay for all materials on or before the twentieth day of the month for the works performed during the previous month, the same provision being added as to the right of the Governor in Council to apply the subsidy to this purpose in case of the failure of the company to make payment. At the same time the government is not to be held liable in any way for payment of wages or for materials by parties who may trust the company, and if such

debts of the company were to exceed the amount of subsidy due only a *pro rata* division of the subsidy would be possible.

Guarantee of Employment.

Provisions not wholly dissimilar to those above described, in so far as the making conditional of public assistance is concerned, appear in various acts permitting municipalities to grant exemption of taxation to certain specified industries. Thus in chapter 76 exemption from certain taxation is allowed by the city of Halifax to the firm of Moir, Son & Co., on condition only that the manufactory which the company proposes to build in the city of Halifax is commenced within six months and at no time ceases operations for a period of two years. Almost identical provisions are inserted in chapter 80, which enables the town of Dartmouth to grant similar exemptions to the same company. In chapter 178 all taxation of the property, income and earnings of the Montreal Pipe Foundry Company, Limited, is remitted by the town of Londonderry, in the county of Colchester, for 20 years, providing that the company continues to operate its work on an average for at least nine calendar months in each year, employing at least 50 men during that period, the wages book of the company to be open at all times to inspection by the municipal authorities in order that the latter may ascertain whether or not the Act is being complied with.

Protection of Employees in Coal Mines.

Under rule 22 of section 44 of chapter 19, of the Revised Statutes of 1900, 'Of the Regulation of Coal Mines' generally provided that boys under 14 years of age should not be employed in or about mine machinery in or about mines. An examination by a board of workmen was necessary before a boy could undertake the work. The latter provision was repealed and the following substituted in its stead :—

(b) On and after the first day of May, 1904, no one shall be permitted to take charge of an engine whereby men are lowered into or hoisted from a mine; or of a fan engine used for the purpose of ventilating a mine; (or of any stationary engine for whatever purpose used in or about a mine the inefficient or unskilful handling of which might tend to injury to life or limb; unless he is at the time of coming into force of this act, and has been for a space of twelve months prior thereto, in charge of a hoisting, fan, or other engine as aforesaid, and has on application received from the Commissioner a certificate of service, which certificate shall not, however, entitle him to take charge of any engine of a greater capacity than 75 horse power, or is the holder of a certificate of competency of either of the following grades:

Of a third class certificate of competency, entitling the holder to take charge of an engine of a not greater capacity than 75 horse power;

Of a second-class certificate of competency, entitling the holder to take charge of an engine of a not greater capacity than 250 horse power;

Of a first-class certificate entitling the holder to take charge of an engine, or engine and plant, of a greater capacity than 250 horse power, granted in each case by a board of examiners appointed by the commissioner for the purpose.

Miners' Relief Societies.

The chapter of the Revised Statutes relating to miners' aid societies and the contribution allowed to the same out of the provincial treasury was amended during the recent session by the addition of a section which provides that when upon the death of a workman, who at the time of his death was a member of a relief society and whose relatives therefore were entitled to a sum of not less than \$50, an additional sum of \$50 may be paid by the provincial treasury to his widow, children or dependent relatives.

Early Closing of Shops in Halifax.

In 1902 an Act was passed regulating the closing of shops in Halifax as a general rule at 6.30 p.m. An amendment to this Act provides that the Act shall be operative during the month of December of each year.

Affecting Particular Industries.

Bills passed to regulate or certain industries within the following may be cited:—

An Act to amend the Mines Act defining the rights of mine

owners to enter upon and use private lands for mining purposes when such action is necessary for the effective working of the area.

'An Act to incorporate the Miners Society of Nova Scotia' may also be cited in this connection as affecting the mining industry inasmuch as its object is stated to be 'the mutual benefit and protection of its members by facilitating the interchange of knowledge and ideas and by taking concerted action upon all matters affecting or relating to the mining industries' of the province and generally to promote said industries by all lawful and honourable means.

The *lumbering* industry will be affected by an amendment to the Act relating 'to the conveying of timber and lumber on rivers and the removal of obstructions therefrom.' This states that in case of damages being claimed by riparian proprietors as caused by the conveying of saw logs on rivers, a detailed statement of the particulars as to the damages must be given by the proprietor within two years from the date on which the alleged damage was committed.

The *manufacturing* industry may be said to be locally affected by certain provisions which appear in chapter 81, which is an 'Act to amend the Act to consolidate the Acts relating to the town of Dartmouth' in which certain provisions are inserted governing the erection and maintenance of factories in the town named.

Encouragement to certain industries.

More specific encouragement to certain industries is given in the following Acts:—

Chapter 9, an Act to encourage deep mining in the gold fields of Nova Scotia.

Chapter 12, an Act to amend chapter 56 of the Revised Statutes of 1900 for the encouragement of agriculture.

Chapter 30, an Act to incorporate associations for the construction of mechanical salt freezers.

Chapter 32, an Act to amend chap. 5 of the Acts of 1899, entitled an Act to encourage the making of iron and steel within the province of Nova Scotia.

Chapter 65, an Act to amend chap. 62 of the Revised Statutes of 1900 for the protection of the growth of cranberries.

Charter 69, an Act to provide for defraying certain expenses of the Civil Government of the province, in which a sum of \$38,000 is voted for the encouragement of agriculture; \$55,814 in aid of the steamboats, packets and ferries; \$10,000 in aid of Miners' Relief Funds.

Chapter 88, an Act to enable the town of North Sydney to borrow money for the purpose of aiding the establishment of foundry works in said town.

Chapter 163, an Act to enable the town of Sydney to borrow \$250,000 for the purpose of encouraging a shipbuilding plant.

Industrial Companies Incorporated.

Among the private Acts of the session, not referred to in the above, the following, among others, incorporating new companies, may be cited as illustrating the trend and progress of recent industrial developments within the province:—

| Chapter. | Name of Company Incorporated. | Capital. |
|----------|---|-----------|
| 176 | The Annapolis Valley Vinegar Manufacturing Company, Ltd. | \$ 6,000 |
| 180 | The Cape Breton Coal, Iron and Railway Company, Limited. | 4,000,000 |
| 181 | The Port Hood Richmond Railway Coal Company. | 100,000 |
| 182 | To consolidate the Acts relating to the Bedford Electric Company, Limited (1) | 250,000 |
| 183 | The Dominion Linen Mills Company, Limited. | 500,000 |
| 184 | The Standard Coal and Railway Company, Limited. | 200,000 |
| 185 | The Shelburne Electric Company, Limited. | 30,000 |
| 186 | The Milton Electric Light, Power and Manufacturing Company, Limited. | 15,000 |
| 190 | The Minudie Coal and Railway Company, Limited. | 100,000 |
| 191 | The South Sea Sealing Company. | 100,000 |
| 192 | To consolidate and amend the Acts relating to the Star Manufacturing Company | 100,000 |
| 193 | The Colonial Market Company, Limited (2). | 30,000 |
| 194 | The Workmen's Store Company, Limited, (3). | 10,000 |
| 195 | The Cape Breton Milling Company, Limited. | 300,000 |
| 196 | The Nova Scotia Woollen Mills, Limited. | 100,000 |
| 197 | The American Furniture Company, Limited. | 20,000 |
| 199 | The Woodside Lumbering and Trading Company, Limited. | 40,000 |
| 200 | The Windsor Lumber Company, Limited. | 10,000 |
| 201 | The Falmouth Manufacturing Company, Limited. | 10,000 |
| 202 | The Fundy Coal Company, Ltd. | 350,000 |
| 203 | The Yarmouth Marine Railway Company, Limited. | 30,000 |
| 205 | The Kenamou River Lumber Company, Limited. | 100,000 |

| Chapter. | Name of Company Incorporated. | Capital. |
|----------|--|----------|
| | | \$ |
| 208 | The Baddeck Water Company, Limited. | 50,000 |
| 209 | The Eastern Canada Brick and Tile Company, Limited. | 25,000 |
| 210 | The Cumberland Telephone Company, Limited. | 5,000 |
| 211 | The Suburban Electric Company, Limited. | 10,000 |
| 214 | The Kinsack Power and Manufacturing Company, Limited. | 50,000 |
| 215 | The Eastern Gold Mining Company, Limited. | 30,000 |
| 216 | The St. Anthony Gold Mining Company, Limited. | 50,000 |
| 217 | The Scotia Mining and Development Company, Limited. | 100,000 |
| 218 | The Dominion Antimony Company, Limited. | 50,000 |
| 219 | The Black Bros. & Company, Limited (4). | 150,000 |
| 220 | The R. McGregor & Sons, Limited. | 50,000 |
| 221 | The W. P. McNeil Company, Ltd. | 50,000 |
| 222 | The W. H. Curry Company, Ltd. | 10,000 |
| 223 | The F. E. Harris & Company, Ltd. | 15,000 |
| 224 | The Cape Breton Printing Company, Limited. | 150,000 |
| 225 | The Glace Bay Printing and Publishing Company, Limited. | 5,000 |
| 226 | The Nova Scotia Brick Company, Limited. | 50,000 |
| 227 | The Nova Scotia Development and Chemical Company, Limited. | 100,000 |

(1) In a schedule referred to in this act it is provided that no person under the full age of 21 years shall drive any car. Conductors and motormen are required to wear a badge on a conspicuous portion of their dress.

(2) The object of this company, among other things, is stated to be the acquiring, fitting up, &c., and management of houses, offices, factories, &c., in the city of Halifax.

(3) A scheme of co-operative distribution and 'to provide a safe and profitable investment of the savings of the workman; also to promote the material advancement of its members by encouraging habits of thrift and economy.'

(4) To carry on a general hardware, outfitting, dry goods, fish curing, fishing, marine transportation, warehousing, coal, lumber, real estate, telephone, manufacturing, business, &c.

In addition to the above mentioned companies, several earlier Acts of incorporation have been amended to permit the companies in question to enlarge their fields of operations in various directions. In the case of several of the companies mentioned above, the Act of incorporation, of course, represents rather the reorganization of existing than the establishment of new industries.

Dominion Iron and Steel Companies.

Chapter 188 of the statutes refers to the agreement between the Dominion Coal Company, Limited, and the Dominion Iron and Steel Company, Limited, confirming the lease, which is quoted in *extenso* in a schedule attached, of the business of the former by the latter. In a second schedule

attached the liabilities, contracts and liquid assets of the coal company are set forth, together with a statement relating to the development and improvement of the mines, collieries, washing plant of the company, its water works, transportation, loading and unloading facilities and its demised premises, insurance and fire protection.

ARBITRATION IN THE BOOT AND SHOE INDUSTRY AT QUEBEC, QUE.

DURING the month of October a session was held of the tribunal of arbitration appointed in January, 1901, at the suggestion of His Grace Archbishop Bégin* for the settlement of disputes between employers and employees in the boot and shoe industry in the city of Quebec. The occasion of the summoning of the court was a complaint on the part of the leather cutters to the effect that the present scale of wages allowed by manufacturers was not sufficient for the support of themselves and their families, the employers averring, on the other hand, that the scale was high enough and that some of the men were enabled under its operation to put money aside.

The scale in question was that agreed upon in 1901, to remain in force until October 31, 1902, and extended on the later date until the end of October, 1903. By its provisions the wages paid by each manufacturer for the several classes of goods were fixed at a uniform rate.

The tribunal consisted of Mr. J. E. Bedard, K.C., chairman, appointed by the Chief Justice of the province, Mr. F. X. Boileau, representing the workmen, and Mr. Ludovic Brunet, representing the manufacturers. The sittings were held in the evenings in the city court house, and were attended by large numbers of those interested. Both sides were represented by counsel.

At the end of the month, in consequence largely of the delay in proceedings which occurred after the sessions of October 9, no decision had been handed out, and the following statement accordingly is limited to a brief reference to the more important points brought out in the course of the inquiry. It will be seen that the evidence, apart from the portion bearing directly upon the question at issue, elicited considerable information relating to the nature and extent of the boot and shoe industry in the city of Quebec.

The Case for the Employees.

The opening session of the court was held on October 6 when the claims of the leather cutters for a higher scale were presented, several witnesses being examined as to the rates of wages at Quebec and other centres for the industry. The demand of the workmen in the main was based upon the increased cost of living and upon the rates prevailing in the United States and in other Canadian cities as compared with Quebec. The chief difficulty, it appeared, was in connection with the wages paid for classification. It was stated by one witness that the average weekly wages of leather cutters was \$7.73, whereas the cost of living for a family of six persons in Quebec was \$9.77 per week. The witness, however, knew of a family living on \$7.50 per week. Before the establishment of the scale the average wage was \$10.65 weekly. There was no clause, according to this witness, in the rules of the men's as-

* For the full text of the award by which this tribunal was constituted see the *Labour Gazette* for February, 1901, vol. 1, page 296.

sociation which prevented a cutter from earning more than \$13 weekly. A second witness stated that an average wage was \$1.11½ per day during six months, whereas, previous to the introduction of the schedule the men received twenty cents more per case. The witness knew of a couple of instances where the men earned \$21 per week at the trade by working until 10 p.m. at night. A third witness earned \$9 before the schedule was introduced and now earns \$9.50. A fourth estimated the general scale in Quebec to be about one-third less than that paid in the United States.

Conditions in the Industry.

At the second session of the court on October 8 hearing was begun of the evidence of the employers, in reply to the above and other statements of the workmen. A prominent manufacturer who was first called gave testimony of an interesting nature in regard to present conditions in the industry in Quebec. The market for the Quebec boot and shoe trade, he stated, was chiefly in western Canada, less of the product being now exported to the maritime provinces owing to the number of factories established there. In 1898 there were thirty-two boot and shoe factories in Quebec, whereas now there are twenty-three; in 1899 there were about five factories in Ontario, and now there are about twenty-eight. The geographical position of Quebec had something to do with this falling off in trade, jobbers preferring Toronto on account of the saving in transportation charges. A few years ago there were fifteen tanneries in Quebec, whereas now there are about five.

The Wages Question.

With regard to the wages question the same witness stated that before the scale of prices was adopted he paid \$1.35 for sixty pairs of uppers, whereas for the same work now he paid \$1.75. From 1895 to 1901 leather cutters averaged from \$5 to \$9.50 per week in wages where wages now run from \$7.50 to \$12 per week. Since 1901

wages by pairs of boots had increased 6½ cents and the present demand would mean an increase of 30 per cent on that. Manufacturers this fall, moreover, had to pay twenty cents more per wooden case. In Montreal, according to the witness, leather cutters were paid less wages per hour but made better time than the Quebec cutters.

A second manufacturer stated that the average wages paid in his factory to cutters during the last six months was \$11.50 for 60 hours' work. The men, however, lost much time and consequently suffered a diminution in pay. Stress was laid by this witness upon the fact that leather cutters never drew more than \$13 per week in wages as pointing to the existence of a union regulation preventing workmen from exceeding that sum in wages.

Mention may also be made in this place of the evidence of the president of the Conciliation and Claims Committee, a gentleman with a large experience in the boot and shoe trade. Prior to the establishment of the scale in the cutting room of his factory, the cost per pair of boots was 3.1-9 cents while this year the cost represents an increase of 25 per cent in this department. Cutters were paid by the week in his factory earning from \$5 to \$9 or an average of \$7.55 per week. This year, however, the witness had paid the men from \$5 to \$10.50 or an average of \$9.14 per week. He had agreed to increase wages if the men would do more work. Wages in the United States ran from \$12 to \$18 per week, but from 30 to 50 per cent more work was done, the men making from seventy-two to one hundred pairs of men's boots daily. Piece prices, however, were not materially different from those paid in Quebec. If the present scale were raised in Quebec, the result, according to the witness, would be disastrous and he personally would have to move elsewhere. The fall was usually a slack season in the industry, but this fall has been duller than usual.

A fourth manufacturer stated that before the new scale of wages came into force

the cutting of a pair of shoes cost 3.10 cents ; since that date it was 3.85 cents or an increase of twenty-four per cent. Previous to 1900 he paid his cutters from \$6 to \$9 weekly ; under the present schedule he was paying under similar circumstances from \$8 to \$11. The increase demanded would amount to 22½ per cent. Competition in the industry was very keen and the boots and shoes which were formerly made out of Quebec leather had now to depend on the outside market owing to the demand for a finer quality. The output of the witness' factory was less this year than last. An important statement made by this witness was to the effect that Quebec manufactured boots were sometimes sold in Montreal, Toronto and elsewhere, stamped with the name of the purchaser and resold to Quebec retailers as manufactured in Montreal and Toronto. The witness knew of cases in which the Quebec retailer had refused the Quebec manufactured goods but had accepted them at an advance of five cents per pair after having been stamped as above described with the name of an outside manufacturer. Outside manufacturers also send boots and shoes to Quebec which are stamped and resold in the west and elsewhere as Quebec goods.

Another witness, who was in charge of a stock room in a local factory and who worked as a leather cutter for over five years in the United States, stated that in the latter country he was generally paid weekly, earning \$15 per week at New Bedford, Mass., and working ten hours per day, seventy-two pairs cut and marked constituting a day's work. Wages and conditions varied, however, and at Brockton, Mass., he had to make ninety pairs daily, working nine hours per day. At Boston he averaged 38 cents per dozen pairs. In Quebec, men, in the opinion of the witness, could make ninety pairs daily if they wished to do so. This would mean a wage of \$15.

Several other manufacturers gave evidence to the same general effect as the above.

Interruption to Proceedings.

An interruption to the proceedings of the court occurred during the session of October 10, when counsel for the workmen wished to file copies of the reports of commercial agencies as evidence in rebuttal of statements made by employers as to the declining nature of their business, previous witnesses having given evidence on their word of honour. This was objected to, the objection being sustained by the chairman of the court.

A further proposal that the remaining witnesses be examined under oath was also negatived. Counsel for the workmen in consequence withdrew from the case, being accompanied by Mr. Boileau, the representative of the workmen on the commission. The result was an adjournment of the investigation *sine die*. On October 22, however, the inquiry was resumed, the three unions of the city having asked their representative to reconsider his resignation.

The by-laws of the Union.

The evidence of a witness called during the resumed investigation, who was considerably interested in the Leather Cutters' Brotherhood, had special reference to the by-laws of the brotherhood relating to the scale of wages of its members. According to the witness it would be against the rules of the brotherhood for a cutter receiving a weekly salary of, say, \$10 to do more work for that amount than a cutter working by piece work who is paid according to the scale of wages. The witness stated that it was not true that men working conscientiously could earn from \$11 to \$13 weekly. No doubt the men could do more work, but the work would not be as well done. They might make from 12 to 24 pairs more daily, but it would be at the expense of considerable waste in cutting the skins which had to be cut with great discretion so as to get out as many pairs as possible. Every cutter kept a book containing the amount of work performed during the week and these books were examined by the brotherhood in

order that those working on weekly salaries might not do more than they would on piece work. The witness, however, stated that there was nothing in their rules objecting to a man earning as much as he could. There might be an individual understanding in some of the factories as to the wages to be earned. Previous to September, 1901, there was a clause in the by-laws of the brotherhood which prevented a cutter from earning more than \$13, but there is no rule now obliging them to earn under \$13.

Conclusion of Evidence.

In consequence of the interruption above referred to, proceedings were not resumed by the court until October 22, the motion

that the evidence be concluded under oath being rejected. The examination of witnesses proceeded also on the 23rd and 24th of the month, the evidence in fact relating to wages being given in substance above.

A further argument as to the precise nature of the court was introduced by a motion on the part of counsel for the workmen to receive as evidence a declaration before a justice of the peace. Two of the arbitrators, however, were of the opinion that the tribunal was not in all respects like a commissioner's court and the motion was accordingly refused.

With the arguments of counsel on the evidence adduced, the case was taken into advisement by the arbitrators.

ARBITRATION AWARD IN THE BRASS WORKING TRADES AT TORONTO, ONT.

EARLY in the past summer a demand was made by the brassworkers of the city of Toronto for improved conditions both in wages and in hours of labour, the general request being for a nine hour day, time and a half for overtime, and double pay for Sundays and legal holidays. The unions chiefly interested were the metal-polishers, brassworkers, and brass moulders, and the number of members, in round numbers, was placed at 300.

Demand Submitted to Arbitration.

When the demand was first presented the employers agreed to investigate the conditions existing in the trade in Toronto and elsewhere and to summon the union committee to a conference, after which, if the matter could not be arranged, it was to be submitted to arbitration. Conferences were held in pursuance of this agreement but without material result, and the matter was accordingly submitted to arbitration during the month of July, Messrs. A. F. Rutter, F. B. Polson and P. W. Ellis being chosen to represent the manufacturers and Messrs. J. Wilson, J. Acheson and D. A. Carey to

represent the union. It was understood that if the arbitrators failed to agree, an umpire would be called in whose decision would be final. Pending the report of this committee the men agreed to resume work.

Text of the Award.

On October 16 the award of the board, as above appointed, was submitted as follows :—

'All workmen receiving two dollars and twenty-five cents (\$2.25) per day and under shall receive an advance of ten per cent on wages paid at date set for this award going into effect.

'Overtime shall be paid for at the rate of time and one-quarter, except for legal holidays, which shall be paid for at the rate of double time.

'This award shall go into force and effect from and after the fifteenth day of June, 1903, and continue in force for one year. Any change desired at the expiration of the time set, thirty days' notice thereof shall be given by either side.'

The award was signed by the following members of the board : F. B. Polson, chairman ; James Wilson, Secretary ; A. F. Rutter, P. W. Ellis, J. Acheson and D. A. Carey.

The award is the outcome of the first arbitration brought about through the Employers' Association on the one side and the trade unions interested on the other. In submitting it the arbitrators expressed them-

selves as highly pleased with the result, making special mention of the capable handling of the evidence at the disposal of each side. General satisfaction is expressed with the award.

INTERVIEW OF THE NATIONAL TRADES AND LABOUR CONGRESS OF CANADA WITH THE DOMINION GOVERNMENT.

A deputation from the National Trades and Labour Congress of Canada waited upon the Right Hon. the Prime Minister and the Hon. the Minister of Labour, as representing the Dominion cabinet, on Tuesday, October 20, and submitted an address embodying a number of resolutions passed by the Congress at the meeting held in the city of Quebec in September last.* The deputation consisted of the president, vice-president, secretary-treasurer and other officers of the Congress, and the president of the Canadian Federation of Boot and Shoe Workers.

Address of the Congress.

The statement of the Congress which accompanied the resolutions presented was addressed to the Right Hon. the Premier and the members of the Dominion cabinet and was read by the secretary, Mr. T. J. Griffith. It requested the reception of the resolutions in question as the unanimous expression of the views of the Congress, which was stated to embrace a membership at the present time of about 7,000 men scattered between Vancouver, B.C., and the city of Quebec, Que. The Congress, it was further asserted, was thoroughly Canadian in its composition, was free from all foreign affiliations and control, and thus held itself to be the only representative of purely Canadian labour opinion. The Minister of Labour was thanked for not employing the Department of La-

bour to bring in foreign mechanics. The importation of foreign labourers as strike breakers was severely denounced and the employment of conciliatory methods as between employers and employees recommended. Special mention was made of the resolutions relating to the tariff, the union label, fair wage system, day labour system on government contracts, and dynamite and barrel inspection. In conclusion the thanks of the Congress were tendered for the interest shown by the Minister of Labour and by the Department of Labour in the welfare of the working classes.

Resolutions Presented.

The resolutions of the Congress to which the attention of the cabinet was especially invited by the deputation, were the following :—

No. 1.—To secure the appointment of a capable inspector of dynamite who might grant certificates to competent persons of recognized ability in the use of explosive materials.

No. 2.—Presenting a request of the Bricklayers' National Union of Quebec, that nine hours should constitute a day's work on exterior Government construction work.

No. 3.—Favouring a revision of the tariff.

No. 4.—To secure that all work for the Federal Government shall be performed by day labour instead of by contract.

No. 5.—Favouring the passing of a union label law.

No. 6.—Favouring the imposition of an additional tax of 10 per cent on all shoes imported into Canada.

No. 7.—To secure a rigid enforcement of the Alien Labour Law, especially when the imported labourers were intended to take the place of strikers.

No. 8.—Requesting the appointment of an inspector of old barrels to prevent their being used a second time without being cleaned.

No. 9.—To secure recognition by the Government of the National Trades and Labour Congress as the only purely Canadian Congress of workers in Canada.

* For a full statement of the resolutions passed at this meeting see *Labour Gazette* for October, 1903, page 332.

No. 10.—Requesting that the system of fair wages be put into force on all public contracts.

No. 11.—Approving the bill for the settlement of railway labour disputes recently introduced by the Hon. the Minister of Labour and passed by Parliament:

Reply of Ministers.

Both the Premier and the Minister of Labour replied briefly to the deputation, stating that its requests would receive the consideration of the government.

NATIONAL TRADES AND LABOUR CONGRESS—FIRST ANNUAL CONVENTION.

IN the issue of the *Labour Gazette* for October, at page 330, under the heading of National Trades and Labour Congress—First Annual Convention,' the following statement was made in the opening paragraph:—

At the convention of the Dominion Trades and Labour Congress, held at Berlin, Ontario, in September, 1902, a resolution was introduced and carried, limiting representation in the Congress to such trades and labour organizations as had their headquarters in the United States. Purely Canadian unions were thus debarred from representation.

The President of the Trades and Labour Congress of Canada has pointed out that the statement in this form is misleading, and the *Gazette* accordingly takes occasion to explain that the reference was to an amendment of the constitution of the Congress passed at the convention held at Berlin, in September, 1902, dealing with representation in the Congress. The clauses in question in their original form were as follows:—

It shall form organizations in localities where none at present exist, either into local unions, or assemblies of the Knights of Labour, but in no case shall any body of workmen belonging to any trade or calling at present having an International or National Union be granted a charter. In the event of the formation of an International or National Union of the trade or calling of the union so chartered being formed, it will be the duty of the proper officers of the Congress to see that the said union becomes a member of the said International or National Union.

The Congress shall be composed of delegates duly elected and accredited from Trades Councils, Central Labour Unions, Trades Unions, Federal Unions, and District and Local Assemblies of the Knights of Labour in the Dominion of Canada.

In their amended form the above clauses now read as follows:—

It shall form organizations in localities where none at present exist into local unions, but in no case shall any body of workmen belonging to any trade or calling at present having an International or National Union be granted a charter. In the event of the formation of an International or National Union of the trade or calling of the unions so chartered being formed, it shall be the duty of the proper officers of the Congress to see that the said union becomes a member of said International or National Union. Provided: That no National Union be recognized, where an International Union exists.

The Congress shall be composed of delegates duly elected and accredited from Trade Councils, Trade Unions, and Federal Labour Unions in the Dominion of Canada. But in no case shall there be more than one Central Body in any city or town, said Central Body to be chartered by the Trades and Labour Congress of Canada.

LABOUR CONDITIONS IN THE FRUIT INDUSTRY OF ONTARIO.

The information presented in the following article was supplied by Mr. W. A. McKinnon, Chief of the Fruit Division of the Commissioner's branch of the Department of Agriculture, Ottawa.

THE labour needs of the fruit industry are confined particularly to two seasons of the year, namely, May, June and part of July, at which time planting is being done, weeds being destroyed, and the soil worked. The second busy season is during the gathering of the fruit.

Spring Work.

For the early spring work, ordinary unskilled farm labour is quite satisfactory, and a very large additional number of men could be employed on the fruit farms of Ontario to advantage. A great dearth of labour among the fruit men of western Ontario prevailed during the past spring season, though they were willing to pay above the average price for men to hoe and to plant and to use teams in orchards and fruit plantations.

The Gathering Season.

But the greatest dearth of labour is usually experienced during the gathering season. Unfortunately, this season does not last long for any particularly variety of

fruit, and the hands employed on one variety of fruit can not always be used on another. In June and July, boys, girls and women are required for berry picking. This is quickly succeeded by the tree fruits, cherries, plums, peaches and, later in the season, by apples. But it is not found practicable to use girls and women for the picking of any tree fruits except cherries. For peaches and plums ordinary unskilled labour can very soon be trained to do the work successfully. But in the case of apples, where the pickers are divided into gangs of from four to six men, two or more skilled men are very much needed in each gang. The apple-picking crisis lasts about three weeks. During the present season the boss picker, that is, the man in charge of one of these gangs, usually gets from \$2.50 to \$3.50 and his expenses. The other members of the gang get from \$1.50 to \$2 and all expenses. About one-half the men who are employed in the orchards in the fall are employed for the months of December, January and February in packing houses where the winter fruit is repacked for shipment to the old country.

Labour Conditions and Outlook in the Industry.

There is an undoubted opening for a large number of men willing to work on

fruit farms in Ontario. The labour is not heavy but the hours are long and irregular. Any ordinary intelligent farm workman can soon acquire skill in the operations on a fruit farm, but there is more responsibility attached to the work and therefore it is desirable that men of higher intelligence should be induced to take up this work. Old men do not readily acquire the deftness, nor have they the patience usually to perform neatly and well the many delicate operations, and therefore by preference it is advisable that the younger men be chosen for the work, which promises better wages than ordinary farm labour and also gives an opportunity for acquiring a knowledge of the whole fruit business that will enable these labourers to take up with advantage fruit lands for themselves and become proprietors. The outlook for Canadian fruit-growers was never brighter, and, for men who are willing to work, there are thousands of openings in this work in Canada.

The *Toronto Weekly Sun* reports that \$1.75 a day and board is being paid packers in the Whitby-Oshawa district.

In an effort to secure an expert (or 'boss') packer for demonstration work at Toronto Exhibition, \$5 a day was asked, it being stated by the men that they could easily get \$3.50 and board for such work.

THE MINING INDUSTRY IN ONTARIO.

The following information relating to mining in Ontario has been obtained from the Twelfth Report of the Ontario Bureau of Mines, 1903.

Notwithstanding a falling-off in the production of gold and silver in Ontario during 1902, compared with previous years, the total mineral production of the province has steadily increased, chiefly owing to increases in the copper, nickel and iron output.

General Statistics.

There were 58 mining companies incorporated under the laws of Ontario in 1902,

with an aggregate capital of \$48,650,000, compared with 47 companies in 1901, with a capital of \$27,716,000. Eighteen new companies were formed for oil and gas, four for the manufacture of cement, and three for peat.

The total output of minerals and mineral products for the year was \$13,391,634, a gain of \$1,560,548 over 1901. There were 11,774 employees, who earned the total sum of \$4,459,226, engaged in mining or in the manufacture of mineral products. The values of the principal minerals and min-

eral substances produced during the year were as follows:—Nickel, \$2,210,961; copper, \$680,283; iron ore, \$518,445; pig iron, \$1,683,051; steel, \$1,610,031. Of non-metallic substances, the values were: building stone, \$1,020,000; lime, \$617,000; petroleum products, \$1,431,054; brick, \$1,597,171; and Portland cement, \$916,221.

The Peat Fuel Industry.

The increased cost of coal, following upon the strike of coal miners in the United States last year, gave an impetus to the manufacture of fuel from the numerous peat bogs in Ontario. An account of the methods used in its manufacture, and of its value as a substitute for coal, is given in the last report of the Ontario Bureau of Mines.

In European countries, peat is successfully used as a fuel both for domestic and industrial purposes, about two million tons being annually used in Sweden alone. Bituminous coal, however, according to the report, is probably cheaper in this country for factories, and it is in the homes that the usefulness of peat is chiefly noted.

The heating power of peat is about two-thirds that of anthracite coal. Its advantages are that it contains a much smaller percentage of sulphur than coal and is, therefore, less injurious to grate bars, &c. It makes no clinkers or soot, gives plenty of heat, and is cheap, being sold at \$3 per ton. This price is equivalent to that of anthracite at \$4.50 per ton. The chief disadvantage of peat is the large proportion of water it contains, and the difficulty of drying it.

Methods of Manufacture.

In European countries, three kinds of peat fuel are used, cut, or 'stick' peat, being simply the crude peat dried in the air:

'Machine' peat, which is ground to a pulp while wet and then moulded into blocks and dried: and peat briquettes, made by artificially drying and compressing powdered peat.

'Stick' peat is used largely by the poorer classes, but is not suitable for general consumption on account of its bulkiness and triability. Machine peat, which is the most universally used, is made either by digesting the peat with the addition of water into a liquid mud, then putting it into moulds in the open air and drying it, or by grinding it into a soft plastic mass, as it comes from the bog, and then cutting it into bricks and drying it. Only four plants are known to be making peat bricquettes in Europe at present, as machine peat is found to be acceptable, and the cost of preparing it is less.

Peat Fuel-making in Ontario.

The manufacture of peat fuel in Ontario is still largely in the experimental stage, although in recent years most of the difficulties have been overcome. Owing to the prevalent use of anthracite, which is the best fuel in the world, a far better product is demanded in Canada than in Europe, and consequently new and improved methods for the treatment of peat have had to be invented. The two places where the most extensive operations have been carried on are the Welland bog, owned by the Peat Industries, Limited, of Brantford, and the Beaverton bog, owned by Mr. Alexander Dobson, of Beaverton. Other places where factories have been or are being erected are the Perth bog, near the town of Perth, the Brunner bog, nine miles north of Stratford, the Brockville bog, near Brockville, the Rondeau bog, bordering on Rondeau harbour, Lake Erie, and the Newington bog, twenty miles north-east of Cornwall.

STRIKE OF CARPENTERS AT WINNIPEG, MAN.—INTERVENTION OF THE DEPARTMENT OF LABOUR.

ON Tuesday, the twentieth of October, a strike of carpenters was declared in the city of Winnipeg. On the Saturday of

the week previous, notices had been sent by postal card to the several carpenter contractors in the city to the effect that unless they

became parties to an agreement drawn up and approved by the local unions of the United Brotherhood of Carpenters and Joiners, the Amalgamated Society of Carpenters and Joiners, and the Western Union of Carpenters and Joiners of Winnipeg, the members of these organizations would quit work. The contractors not having complied with the demands of these organizations a general strike was declared. There were at the time over one thousand carpenters working for contractors in the city and of this number 700 came out on strike.

The time was one of exceptional activity for the building trades, and the strike threatened at the outset to very seriously embarrass building operations. A number of the contractors, however, signed agreements with the unions almost immediately after the strike took place, the men who continued at work being also an appreciable number, the suspension of work was not complete at any time. As contractors signed the agreement they were immediately supplied with men, and the result was that by the end of a week the strikers were able to place with contractors who had acceded to their demands a large percentage of the men who had come out, which, with the number who had continued at work, helped to bring about a restoration of normal conditions more speedily than at first had been anticipated.

Nature of Demands.

The agreement, as drawn up by the several organizations and signed by some of the contractors, was as follows :

AGREEMENT

This Agreement, made and entered into thisday of.....nineteen hundred and....., by and between....., party of the first part, and by Local Unions of the United Brotherhood of Carpenters and Joiners, the Amalgamated Society of Carpenters and Joiners and the Western Union of Carpenters and Joiners of Winnipeg, parties of the second part ;
Witnesseth as follows :

Whereas the party of the second part desires to have a complete and thorough understanding with the party of the first part with regards to future working arrangements, and

Whereas the party of the first part is willing to enter into an agreement with the party of

the second part, up to the.....day of.....nineteen hundred and.....

Now, Therefore, in consideration of the mutual agreements herein contained, to be kept and performed by the parties hereto respectively, it is hereby mutually agreed to abide by the following Working Rules for the period of time hereinabove specified.

Working Rules.

Rule 1.—That 9 hours shall constitute a days work, from 7 to 12 a.m., and from 1 to 5 p.m. and 8 hours on Saturday, from 7 to 12 a.m. and from 1 to 4 p.m.

Rule 2.—Minimum rate of wages shall be 35 cents per hour, and all overtime shall be paid at the rate of time and one half.

Rule 3.—That 1 hour of notice be given on either side, or 1 hour's wages paid. This notice is for the purpose of enabling the workman to get his tools in order, and his wages to be paid at termination of such notice.

Sub-section to Rule 3.—That all Carpenters be paid their wages in all cases every two weeks.

Rule 4.—That the party of the first part may employ one apprentice for every four journeymen, but that apprentice must be indentured by both parties of the first and second parts.

Rule 5.—That members be prohibited from taking any work after 5 p.m., either by the hour or by contract work.

Rule 6.—That these rules take effect within a radius of 5 miles from the City Hall.

That should either party to this agreement at the expiration thereof, wish to withdraw, add to, or otherwise change or alter one or more of the several clauses of said agreement, the party so wishing to withdraw, add or otherwise change or alter said clause or clauses, must and shall give three months' notice prior to the expiration of said agreement to party interested.

That this agreement in all its several clauses shall be in force for at least one year.

.....
Party of First Part.

.....
Witness.

.....
Party of Second Part.

While the terms of the above agreement would seem to imply that it was applicable only to members of the organizations named, the fact in reality was that these organizations represented not only their own members, but also a good number of non-union men who were desirous of securing more favourable terms of employment, and who came out on strike with the union men.

Intervention of the Department of Labour.

Immediately after the declaration of the strike the carpenters sent a communication to the Hon. Sir William Mulock, the Minister of Labour, requesting the friendly intervention of the department under the Conciliation Act. Mr. King, the Deputy Minister, left on the day following that on

which the request was received and arrived in Winnipeg on Friday, the twenty-third of the month. During the next day or two, Mr. King interviewed most of the large contractors and had frequent meetings with the committee of the strikers, and on Monday evening met the carpenters in a body at a mass meeting. On the following day the Deputy Minister gave a statement to the local press in which he reviewed the situation, both as to its causes and results, this statement may be quoted here as an official résumé.

Statement of Deputy Minister.

As already reported in the press, a large number of contractors have signed agreements with the committee acting on behalf of the several unions and men on strike which guarantee to members a minimum wage of 35 cents an hour and a maximum number of working hours of nine per day. The committee has been able, I understand, to place nearly all of the original strikers, including a large number of non-union men who came out on strike, with contractors who have signed agreements. It is true that some of the contractors who have signed are small jobbers who have work which they must complete before the season is over, but I have reason to believe that among the number who have signed are some of the most substantial firms and contractors in the city. A few contractors, including two or three of the most important in the city, have not signed agreements with the union. They contend that the strike has not embarrassed them, or that it has done so only to a slight extent. The men who are working for them are mostly men who did not come out on strike. If these contractors wish to avail themselves of the services of the men who are in the union they will have, so long as the union maintains its present attitude, to become parties, to agreements similar to such as have already been signed. Doubtless contractors themselves will know best where their interests lie in this matter.

During the course of the past few days I have had interviews with many of the contractors affected by the strike and have had several conferences with the strikers' committee. I have found the members of the committee very reasonable, both in the manner in which they have been inclined to view the action of the contractors and in their attitude towards suggestions which have been made. The contractors have also stated their position with great frank-

ness and have appeared willing to explain in some detail the conditions as viewed from their standpoint. The general feeling among them appears to be that the demands were not excessive for good men, but that there is a great difference in the quality of the labour seeking employment, and that for many to whom the agreement might apply the terms were excessive. Had the carpenter contractors during the year shown a willingness to discuss their mutual interests with the men, I don't think that the present strike would have taken place. I am inclined to believe that the action of the carpenters at this time has been rather a protest against the indifferent attitude assumed towards their organization by the contractors than an industrial struggle for better conditions, although, of course, the carpenters have been perfectly sincere in their desire to establish a standard which they believe to be a fair one to competent men in the trade.

An obstacle to joint action between the parties at the present time has been the absence of any association of carpenter contractors who could deal with the situation as a unit. I believe that such an association was in existence until recently, but, from what I can gather from interviews with the contractors, it was allowed to disappear in large part because of want of faith in the matter of allegiance by a number of its members. There are, I believe, associations of masters of this kind in practically all of the other branches of the building trades in the city, and they have either tacit or written agreements with the members of the respective trades which govern the conditions of employment over a period of time. The carpenters feel that recognition is due them similar to that accorded by their employers, to the other classes in the building trades. I believe that if an association of employing carpenter contractors, as has already existed, could be revived and action were taken in good faith by such an association to determine fair and equitable conditions of employment with workmen to be employed by its members, an arrangement could be arrived at which would satisfactorily secure the mutual interests of the parties and at the same time protect the public against the possible interruption of industrial operations from any such cause as a lockout or strike. Needless to say a step of this kind, to be taken successfully, would have to be made in all sincerity, and with a due regard to the rights of the parties, whether they be employees or employers, to have their position as independent bargaining units duly respected.

I might add that had it not been for a sense of obligation felt to be due their employers in consequence of existing written or verbal understandings under which they are at present working, other branches of the building trades would have attempted to aid the carpenters in their present dispute to the extent of a general sympathetic strike.

THE IMMIGRATION AND COLONIZATION MOVEMENT.

NO official return relating to immigration into Canada during October was obtainable at the end of the month, but from reports which appeared from time to time in the daily press and from other sources

it may be stated that the volume of the movement, as compared with the corresponding month of previous years, showed a continuance of the marked upward tendency which has characterized the present

season throughout. With the close of navigation at Montreal approaching, however, there was a considerable diminution noted in arrivals at that port as compared with earlier months, and the period of greatest activity in the movement as a whole for the season of 1903 may be said to have closed with the past month.

With regard to the outlook for the season of 1904, statements of an official nature were to the effect that a continuance of the activity of the past year was on all sides in prospect. The experience of the past year, in emphasizing the necessity on the part of intending emigrants in Great Britain of asking advice from the various government offices and from reputable booking agencies only, and in having drawn attention to the improved arrangements made by the Canadian government for the protection of immigrants on both sides of the Atlantic, is expected to have a beneficial influence in this connection. More particularly is the increase in the movement from Ireland anticipated during the coming year. Active steps were also taken by the Department of the Interior in putting into execution its policy, previously determined upon, of recruiting for suitable immigrants among the agricultural population of France, a Canadian Commissioner of Immigration to that country having recently been appointed. A proposition emanating from the international headquarters of the Salvation Army in London, Eng., looking to an extensive emigration movement under the auspices of that organization during the coming year, was discussed by the officials concerned during the month.

The movement of 'homeseekers' from eastern Canada into Manitoba and the Territories was reported as unprecedentedly heavy considering the lateness of the season. The influx of settlers from the western United States continued during October, and prospects for a continuance of the movement on extensive scale in the early spring are reported favourable.

Colonies in Western Canada.

Very favourable reports of progress were received during October from the Galician colony in north-western Manitoba, established four years ago with about 800 settlers and now numbering some 5,000. From Lloydminster also, the chief town of the Britannia colony, until lately associated with the name of the Rev. Mr. Barr, favourable reports were received. A town site is being surveyed and building operations are active, the colonists as a whole reporting a satisfactory season's work both in connection with farming and with the building of the branch line of the Canadian Northern Railway, which traverses that section of the colony. Reports from the Mormon colonies in Southern Alberta were also favourable.

The annual report of the Commissioner General of Immigration for the United States, which was published on October 24, contained the following comparative table relating to immigration into the United States by way of Montreal :—

| | | | |
|------|-----------------|--------------------|--------|
| From | July 1, 1896 to | June 30, 1897..... | 10,646 |
| " | " 1897 to " | 1898..... | 10,737 |
| " | " 1898 to " | 1899..... | 13,853 |
| " | " 1899 to " | 1900..... | 23,200 |
| " | " 1900 to " | 1901..... | 25,220 |
| " | " 1901 to " | 1902..... | 29,199 |
| " | " 1902 to " | 1903... .. | 35,920 |

Juvenile Immigration.

A feature of the present season has been the increasing number of juvenile immigrants arriving in Canada. Upwards of 1,200 English boys and girls, for example, were reported during the month as having arrived since the opening of the season in connection with the movement conducted by Dr. Barnardo. The demand for this class, in view of the scarcity of farm and domestic help, has been very active. A scheme was suggested by the City Children's Association of London, England, during the month to promote the emigration of children on an extensive scale to Canada.

Provincial Colonization.

Reports relating to colonization in New Ontario, more particularly in the Temisca-

mingue district, and the prospects offered to settlers in that region, were very favourable during October, good progress being announced in road construction and the general opening up of the country. The visit of the members of the Canadian Press Association to the Temiscamingue district had the effect of directing considerable public attention to recent developments in that locality.

At the annual meeting of the Colonization Society of Quebec, held October 7, the condition of the colonists in the newer portions of the province was discussed at length, the Hon. the Provincial Minister of Public Works stating that the sum of \$105,000 a year was now being spent on colonization by the province. Some 658 miles of colonization roads had been built, according to the same authority, 1,040 miles of roads repaired, and bridges to the aggregate length of 85,267 feet constructed over 165 miles of road. The statement of actual settlement during the year ended June 30 last, as presented by the society, was as follows :—

| | |
|--------------------------|-------|
| North of Montreal..... | 1,095 |
| Lake Temiscamingue..... | 163 |
| Matapedia and Gaspé..... | 67 |
| Lake St. John..... | 55 |
| North of Ontario..... | 82 |
| The Canadian West..... | 91 |
| Total | 1,556 |

As to the places from which these colonists came, the city of Montreal and surrounding districts furnished, as in former years, the greater number, or 1,374 persons, while 119 came from the United States and 60 from Europe.

Immigration Returns for September.

Final official returns of immigrant arrivals in Canada during September totalled 9,225, bringing the number of arrivals since the beginning of the year to October 1 up to 114,744. Of the September arrivals 2,170 were English, 735 Scotch, 250 Irish and 46 Welsh. From the colonies 3 were from

South Africa, 5 from Australia, 8 from Jamaica and the other West Indies, and 1 from New Zealand. There were 58 arrivals from Newfoundland.

From the continent of Europe 398 were Russians, 241 Galicians, 140 Swedish, 119 Hungarian and 114 Italians. There were 3,828 arrivals recorded from the United States via Winnipeg and 121 via Montreal. The number of returned Canadians totalled 175.

Of the arrivals from January 1 the United States stand first with 34,712, English second with 33,562, and Galicians third with 8,177. Scotch immigrants number 7,598, Irish 2,330, Russian 4,031, Italians 2,904, Swedish 2,419 and Hungarians 2,020.

Homestead Entries for September.

The following statement, published by courtesy of the Department of the Interior, shows the number of homestead entries, according to the various agencies, made during the month of September, 1903, as compared with the month of September, 1902 :—

| Agency. | 1903. | 1902. | Increase. | Decrease |
|-------------------|-------|-------|-----------|----------|
| Alameda..... | 162 | 146 | 16 | |
| Battleford..... | 42 | 30 | 12 | |
| Brandon..... | 41 | 105 | | 64 |
| Calgary..... | 206 | 103 | 103 | |
| Dauphin..... | 26 | 8 | 18 | |
| Edmonton..... | 252 | 183 | 69 | |
| Kamloops..... | 7 | 9 | | 2 |
| Lethbridge..... | 126 | 104 | 22 | |
| Minnedosa..... | 21 | 15 | 6 | |
| New Westminster | 1 | 6 | | 5 |
| Prince Albert.... | 124 | 85 | 39 | |
| Regina..... | 462 | 291 | 171 | |
| Red Deer..... | 99 | 118 | | 19 |
| Winnipeg..... | 62 | 41 | 21 | |
| Yorkton..... | 214 | 172 | 42 | |
| Total | 1,845 | 1,416 | 519 | 90 |

It will be seen that the net increase in the number of entries during the month was 429.

The statement of entries made for the first three months of the fiscal year 1903-4 is as follows:—

| Month. | 1903. | 1902 | Increase. |
|----------------|-------|-------|-----------|
| July..... | 3,438 | 2,622 | 816 |
| August..... | 2,288 | 1,904 | 384 |
| September..... | 1,845 | 1,416 | 429 |
| Total..... | 7,571 | 5,942 | 1,629 |

Nationalities of Homesteaders.

The nationalities of homesteaders, as reported by the several agencies of the Department of the Interior in Manitoba, the North-west Territories and British Columbia, during the month of August, 1903, were as follows:—

| Nationalities. | No. of entries. |
|--|--------------------|
| Canadians from Ontario..... | 299 |
| " Quebec..... | 35 |
| " Nova Scotia..... | 9 |
| " New Brunswick..... | 5 |
| " Prince Edward Island..... | 3 |
| " Manitoba..... | 40 |
| " North-west Territories..... | 33 |
| " British Columbia..... | 6 |
| Persons who had previous entry..... | 199 |
| Canadians returned from the United States..... | 42 |
| Americans..... | 604 |
| Newfoundlanders..... | 178 |
| English..... | 78 |
| Scotch..... | 18 |
| Irish..... | 8 |
| French..... | 5 |
| Belgians..... | 2 |
| Swiss..... | 14 |
| Italians..... | 4 |
| Roumanians..... | 72 |
| Greeks..... | 99 |
| Syrians..... | 72 |
| Germans..... | 99 |
| Austro-Hungarians..... | 6 |
| Hollanders..... | 8 |
| Danes (other than Icelanders)..... | 53 |
| Icelanders..... | 11 |
| Swedo-Norwegians..... | 9 |
| Russians (other than Mennonites and Doukhobors)..... | 3 |
| Mennonites..... | 2 |
| Doukhobors..... | 1,845 |
| Chinese..... | |
| Total..... | |

Representing 5,410 souls.

Of the total number of entries made during September by persons coming from the United States into Canada, 158 were from Minnesota, 125 from Dakota, 48 from Iowa,

48 from Wisconsin, 36 from Utah and 35 from Montana.

Lands Patented in September.

The following is an abstract of letters patent covering Dominion lands situated in Manitoba, the North-west Territories, British Columbia and the Yukon Territory, issued from the Department of the Interior during the month of September, 1903:—

| Nature of Grant. | No. of Patents. | No. of Acres. |
|--|--------------------|------------------|
| British Columbia homesteads..... | 5 | 719 97 |
| Commutation grants..... | 2 | 63 42 |
| Homesteads..... | 186 | 39,494 44 |
| Military bounty grant..... | 2 | 320 00 |
| Military homesteads..... | 1 | 320 00 |
| Mineral rights..... | 1 | 80 00 |
| North-west Half-breed grants..... | 31 | 5,790 78 |
| Railways:— | | |
| Canadian Northern Ry..... | 19 | 3,877 08 |
| Can. Pac. Ry. grants..... | 1 | 160 00 |
| Man. North-western Ry..... | 8 | 3,937 06 |
| Man. South-western Col. Ry..... | 42 | 8,242 81 |
| Qu'Appelle, Long Lake and Sask. Ry. and Steamboat Co..... | 4 | 1,722 50 |
| Sales..... | 19 | 4,071 65 |
| School lands sales..... | 12 | 1,602 00 |
| Special grants..... | 4 | 153 52 |
| Yukon Territory sales..... | 7 | 31 11 |
| Yukon Territory special..... | 1 | |
| Total..... | 345 | 59,585 44 |

UNIONS FORMED DURING THE MONTH OF OCTOBER, 1903.

The department has received notice of the following organizations as having been formed during the month of October, 1903:

Nova Scotia—

Sydney—Trades and Labour Council.

" Lodge of P.W.A.

Caledonia Mines—Lodge of P.W.A.

New Aberdeen—Lodge of P.W.A.

Quebec—

Grand Mère—Stationary Engineers and Firemen.

Quebec—Trades and Labour Council.

" International Machinists.

" National Machinists.

" National Brewery Workers.

" Telegraph Operators.

Ontario—

Kingston—Retail Clerks.

Carleton Place—Blacksmiths.

London—Musicians.

Manitoba—

Winnipeg—Railroad Trainmen.

British Columbia—

Victoria—Teamsters.

COST OF LIVING IN CANADA.—V. RENTS.

THE statistical table of rents of dwelling houses presented herewith is the fifth of the series of returns relating to cost of living in Canada, which the department has been able thus far to make in connection with the special investigation on the subject carried out during the opening months of the present year, full particulars concerning the character and scope of which have been published previously in the *Labour Gazette*.^{*} Retail prices of provisions, groceries, dry-goods and ready-made clothing have been the subjects respectively of the previous articles in the *Gazette*,[†] and with the present table the series of returns compiled from sources wholly outside of the department is brought to an end. In accordance with the method adopted in the preparation of the previous tables, blank forms were sent to the various real estate agents throughout the Dominion and to others who, it was thought, might be able to supply reliable information of the kind desired, with a request that the same be filled up and returned to the department at an early date.[‡] It is from the replies received to these requests of the department, together with schedules sent in by the correspondents to the *Labour Gazette* (the latter being set in italics in the table), that the present table has been made up.

Arrangement of the Table.

The returns, it will be seen, are arranged in the table according to provinces, running

from east to west, and by localities alphabetically under the respective provinces. With regard to the classification of the various dwelling houses of which returns of rentals were desired, two considerations were taken into account, namely, the location of the dwelling and the character of the building. Under the first of these the residential districts of the various cities and towns represented in the table were divided into three sections on the basis of desirability for purposes of residence, designated, respectively, good residential districts, poor residential districts, and suburban or outlying districts. With regard to the class of building it was thought that this would be sufficiently indicated by a division into tenements, semi-detached, and self-contained houses, with a further subdivision in each of these classes according as the building was either with or without sanitary conveniences.

There has been no attempt made to reconcile variations, however wide, as between one schedule and another, and the value of the statistics, accordingly, consists largely in the fact that they represent a wholly original body of returns as reliable as it was possible to obtain them. It was thought that the department could in this way most satisfactorily present its information on the subject, and, on the whole, best afford not only an idea of the general level of rentals in Canada but a basis of comparison between the rates prevailing in the different provinces and at various points within the provinces.

The results of the personal investigation by officers of the department, together with the analysis of the tables previously published are reserved for future treatment in the *Gazette*.

^{*} See the article on cost of living in Canada which appeared in the April, 1903, number of the *Gazette*, at page 778.

[†] See *Labour Gazette* for May, 1903, page 869; for June, page 979; for July, 1903, page 57, and for September, 1903.

[‡] See *Labour Gazette* for April, 1903, page 783, for copy of blank schedule referred to, with accompanying letter at page 785.

INDUSTRIAL ACCIDENTS DURING THE MONTH OF OCTOBER, 1903.

Account under this heading is taken of such accidents only as were sustained by workmen in the course of their employment and resulted in the loss of life or limb or other serious impairment to industrial efficiency.

THE Department of Labour has received notice, through its correspondents and from other reliable sources of 66 accidents to workmen during the month of October, in different parts of the Dominion, resulting in the loss of 49 lives and in severe injuries to other workmen to the number of 36.

By injuries or group of trades the record was as follows :—

| Trade or Industry. | Killed. | Seriously injured. |
|----------------------------------|---------|--------------------|
| Agriculture..... | 4 | 4 |
| Fishing | 2 | — |
| Mining..... | 9 | 1 |
| Building trades | 1 | 1 |
| Metal and engineering trades.... | 6 | 9 |
| Woodworking trades | 2 | 1 |
| Railway service | 15 | 13 |
| General transport | 3 | 1 |
| Miscellaneous | 7 | 7 |
| | 49 | 36 |

Analysis of Table.

By reference to the detailed tabular statement presented herewith, it will be seen that the most serious accident of the month was that by which four miners lost their lives by a blow of gas on October 14 at Morrissey, B.C. An accident whereby three workmen were killed and two injured at Niagara Falls, Ont., by the overturning of a bucket in which the men were being lowered into a wheel pit, and one by which three sectionmen on a hand-car were run over by an express train and instantly killed near Stratford, Ont., were the two accidents coming next from the point of view of loss of life. With the exception of an accident reported under the heading of fishing at Gloucester, N.S., one under the heading of mining at Dominion No. 2, N.S., and one under the heading of linemen at Montreal, Que., no other accident of the month resulted in more than one life being lost.

With reference to the classes more particularly affected under the different head-

INDUSTRIAL ACCIDENTS DURING THE MONTH OF OCTOBER.

DEPARTMENT OF LABOUR, CANADA,
STATISTICAL TABLES, SERIES F, No. 1.

| Trade or Industry. | Locality. | Date. | Killed. | Injured. | Nature of Injury. | Remarks. |
|--------------------------------------|-------------------------------------|--------------|---------|----------|-------------------------------|--|
| <i>Agriculture</i> | | | | | | |
| Thresherman..... | Wardsville, Ont..... | Oct. 10..... | 1..... | | | Workman while throwing sheaves fell into cylinder of threshing machine. |
| "..... | Gainsboro, Man..... | " 2..... | 1..... | | | Workman run over by load of sheaves. |
| "..... | Pontypool, Ont..... | " 23..... | | 1..... | Loss of foot above ankle..... | Farmer, while working about the machine, had foot caught in a cylinder. |
| "..... | Mather, Man..... | " 12..... | 1..... | | | Workman, while attempting to put on elevator belt, was drawn around cylinder. |
| Farmer..... | Woodslee, Ont..... | " 29..... | | 1..... | Loss of arm above elbow..... | Arm caught in feeder of a corn shredder. |
| "..... | Springfield, Ont..... | " 26..... | 1..... | | "..... | Clothing caught in a corn shredder. |
| "..... | Dover, Ont..... | " 30..... | 1..... | | Loss of hand..... | Hand caught in corn husker. |
| "..... | Kilbride, Ont..... | " 27..... | 1..... | | | Back broken by falling from a tree while picking apples. |
| <i>Fishing—</i> | | | | | | |
| Fishermen..... | Glorcester, N.S..... | " 8..... | 2..... | | | Members of crew of fishing schooner <i>Bohemia</i> drowned in a dory on banks of Newfoundland. |
| <i>Mining—</i> | | | | | | |
| Miner..... | Dominion No. 2, N.S..... | " 21..... | 1..... | | | Workman killed by stone falling from roof. |
| "..... | Sydney Mines, N.S..... | " 27..... | | 1..... | Severe internal injuries..... | A blow of gas in Mine No. 1 caused death by asphyxiation. |
| Miners..... | Morrissey, B.C..... | " 14..... | 1..... | | | Sixteen other miners escaped. |
| Miner..... | Fernie, B.C..... | " 1..... | 4..... | | | Result of a cave-in at No. 1 Mine at Coal Creek, caused by giving way of timbers. |
| "..... | Extension Mines, B.C..... | " 13..... | 1..... | | | Neck broken by a fall of rock. |
| Miners..... | Dominion No. 2, N.S..... | " 31..... | 2..... | | | A cage became unmanageable overturning a staging at the bank head on which the men were working, the men falling to the bottom of the shaft, a distance of 1000 ft. |
| <i>Building Trades—</i> | | | | | | |
| Carpenter..... | Sydney, N.S..... | " 28..... | | 1..... | | Workman fell from a roof on which he was working. |
| Builders' labourer..... | Montreal, Que..... | " 5..... | 1..... | | | Lost his balance while carrying a hod full of bricks and fell 60 feet. |
| <i>Metal and Engineering Trades—</i> | | | | | | |
| Lineman..... | Ste. Anne de la Pocatiere, Que..... | " 10..... | 1..... | | | Workman struck by a falling telephone pole. |
| Linemen..... | Montreal, Que..... | " 4..... | 2..... | | | Workmen in attempting to assist a fellow-workman, who had come in contact with a live trolley wire as the result of a misplaced derrick, were electrocuted. Inquest pronounced death accidental. |

| | | | | | | |
|------------------------------------|----------------------------|---------------|------|---|-------------------------------|--|
| " | " | " | 19 | 1 | | Workman fell from a pole to the sidewalk. |
| Employee in plough works. | St. Catharines, Ont. | Toronto, Ont. | " 16 | 1 | Loss of arm above elbow. | Workman while doing repairs came in contact with a live wire. |
| Stationary engineer. | Hamilton, Ont. | | " 30 | | | Workman had arm caught between cog wheels in a blacksmith's shop. |
| " | | | " 14 | | Severe scald. | A plug blew out of the boiler, endangering the workman in the steam. |
| Employee of steel works. | Peggs, Ont. | | " 9 | 1 | | Workman became entangled in driving belt. |
| " | Sydney, N.S. | | " 28 | | Back broken. | Workman injured by a weight falling on him. |
| " | " | | " 28 | | | Workmen fell into a pit at back of a furnace. |
| " | " | | " 28 | | | Workman injured at blast furnace. |
| " | " | | " 28 | | | Workman injured at blowing mill. |
| " | " | | " 28 | 3 | | Workmen were struck by an electric charge in the open hearth furnaces. |
| Woodworking Trades— | | | | | | |
| Employee of wheel works | Galt, Ont. | | " 27 | 1 | | Boy, aged 17, had right eye torn from socket by a projection on a driving belt of a machine he was working. |
| Sawmiller. | Winchester, Ont. | | " 29 | 1 | | Workman was struck in the abdomen by a piece of plank. |
| Turner. | Notre Dame de Masson, Que. | | " 23 | | | Workman lost 3 fingers in a turning lathe. |
| Railway Service— | | | | | | |
| Conductor. | Mill End, Que. | | " 29 | | Left hand crushed. | While coupling cars. |
| Engineer. | Kamistiquia, Ont. | | " 29 | | Severe scald. | Train left the track 125 miles west of Port Arthur, Ont. |
| Fireman. | St. Mary's, Ont. | | " 31 | 1 | Both legs broken. | In a collision between a double header freight train and 5 car loads of stone the fireman of the freight was killed and the engineer seriously injured. |
| Brakeman. | Reserve Mines, N.S. | | " 20 | | Loss of leg below knee. | Workman's foot was caught underneath wheel while coupling cars. |
| " | Havelock, Ont. | | " 10 | 1 | | Workman was making repairs underneath a car when car was moved. A jury found that insufficient protection was provided to secure his safety while at work, but disagreed as to whether deceased came to his death through no fault of his own. |
| " | Leaside Junction, Ont. | | " 18 | | Loss of arm above elbow. | Arm crushed while coupling. |
| " | Oshawa, Ont. | | " 18 | | Loss of foot above ankle. | Accident sustained 125 miles west of Port Arthur, Ont. |
| Yardman. | Toronto, Ont. | | " 17 | 1 | " | Workman stepped from a freight train in front of an engine. |
| Switchman. | " June, Ont. | | " 12 | 1 | " | Workman crushed while coupling cars. |
| Brakeman. | Havelock. | | " 13 | 1 | | " |
| " | Fort Erie, N. Y. | | " 29 | 1 | | Workman scalded by escaping steam in an engine collision. |
| Motorman. | Hamilton, Ont. | | " 12 | | Loss of both legs below knee. | Workman, who lived at Hamilton, Ont., was killed in rear end collision. |
| Carpenter in bridge building gang. | Niagara Falls. | | " 27 | 1 | | Accident sustained in a collision on the radial electric railway system. |
| Sectionman. | St. Catharines, Ont. | | " 5 | 1 | | Workman run over by an engine. |
| " | Paris, Ont. | | " 24 | | Loss of leg above knee. | Workman run over by a car on a siding. |
| Cook on boarding car. | Brantford, Ont. | | " 21 | 1 | | Workman killed in a collision in the station yards. A jury exonerated the company and employees from all blame. |
| Sectionmen. | Stratford, Ont. | | " 1 | 3 | | Hand car run over by express train. |
| Brakeman. | Hagersville, Ont. | | " 26 | 1 | | Workman fell from top of a car. |
| Station agent. | Fort Francis, Ont. | | " 12 | | Loss of both legs below knee. | While superintending coupling of cars was run over. |

INDUSTRIAL ACCIDENTS DURING THE MONTH OF OCTOBER—*Concluded.*

| Trade or Industry. | Locality. | Date. | Killed. | Injured. | Nature of Injury. | Remarks. |
|-----------------------------|-------------------------|---------|---------|----------|---|--|
| <i>Railway Service—</i> | | | | | | |
| Sectionmen..... | Rat Portage, Ont..... | Oct. 10 | 1 | 2 | Broken thighs..... | Hand car with 7 men run over by special express train. |
| Brakeman..... | Holland, Man..... | " 5 | 1 | | | Workman run over while coupling cars. |
| "..... | Headingley, Man..... | " 8 | | 1 | Head dangerously injured. | Workman caught between two cars attached by chains. |
| <i>General Transport—</i> | | | | | | |
| Longshoreman..... | Montreal, Que..... | " 20 | 1 | | | Workman fell into hold while loading a vessel, and died 6 days later. |
| Elevator employee..... | Goderich, Ont..... | " 19 | 1 | | | Caught in ropes operating a steam shovel. |
| "..... | Port Arthur, Ont..... | " 12 | 1 | 1 | Severe fracture of leg..... | Caught in gearing of steam shovel. |
| "..... | "..... | " 19 | 1 | | | Leg caught in a screw conveyor and injured so as to cause death. |
| <i>Miscellaneous—</i> | | | | | | |
| Janitor of post office..... | Springhill, Ont..... | " 5 | 1 | | | Accident caused by explosion of heating apparatus. |
| Workman on crib work..... | Niagara Falls, Ont..... | " 5 | 1 | | | Workman, in avoiding a derrick crane fell, into river and was swept over the falls. |
| Labourers..... | "..... | " 27 | 3 | 2 | Severe fractures and internal injuries. | Workmen, while being lowered into a wheel pit, were thrown out of the bucket and fell 50 feet. |
| Pulpmill employee..... | Shawinigan, Que..... | " 24 | | 1 | Seriously crushed..... | Caught in pulp cylinders. |
| Textile worker..... | Doon, Ont..... | " 26 | 1 | | | Boy, aged 15, while cleaning card machine was caught in cylinder and drawn into the pickers. |

Losses in the Gloucester, N.S., Fisheries.

With the close of the season's more active operations in the Atlantic fisheries, returns of a more or less complete nature are obtainable as to the number of fatalities reported among fishermen in that section of Canada. For over a century it has almost invariably happened each year that some of the vessels which follow this vocation to the Grand Bank, Labrador, or other places, have not come back, and a yearly disaster of one sort or another to the fishing fleet has come to be considered as inevitable. To such an extent is this true that a memorial service in the month of February has become an established feature of the year at Gloucester, N.S.

It is reported from that place recently that the list of lives lost is not as lengthy as it was a year ago, though there were six

vessels from that port lost, one with all her crew of 13 men and two others with a loss of 15 and 14 respectively. The six vessels represented a valuation, with outfit and cargo, of \$82,500, carrying insurance amounting to \$57,598. The loss of life totalled 75 men, leaving 20 widows and 49 children. Last year the losses in the Gloucester fisheries were 82 men and 10 vessels. It is estimated that the total number of men lost in the fisheries since 1830 has been 5,121 and the number of vessels 738. The average for the past 25 years has been in the neighbourhood of 92 lives lost per year.

Losses in the Sealing Industry.

Advices were received from Behring's Sea at Victoria, B.C., at the close of the month, to the effect that five men, all whites, had been lost this season in the sealing industry.

CHANGES IN RATES OF WAGES AND HOURS OF LABOUR DURING THE MONTH OF OCTOBER.

THERE were 16 instances of changes in the rates of wages or hours of labour during the month of October, concerning which the department was able to obtain detailed information as presented in the accompanying table.

The changes recorded were all either in the nature of an increase in wages or of a decrease in the hours of labour.

From as full details as it was possible for the department to obtain, the number of work people affected was 1,807.

Changes in Wages.*

The net result of the 14 changes in wages was an increase of \$1,712.98 in the weekly wage bill, affecting 1,554 workpeople.

The change in wages by which a large increase in the weekly wage bill was affected was that resulting from the award

of the board of arbitrators appointed some time ago to investigate wages conditions in certain branches of the brass-working trades in the city of Toronto.* By this agreement an increase of 10 per cent was granted to brass polishers, finishers, buffers and lathe hands receiving \$2.25 a day or less, to the number of 300, involving an increase of over \$300 in the aggregate weekly wages of these classes. The award was retractive in its effect, dating from June 15 last.

Second in importance to the above was the change in the scale of wages of policemen in Montreal by which some 365 men received an increase aggregating \$256.25 weekly. This increase was to go into effect on November 1 and continue until December 31. Under the present arrangement second class constables will draw as much as those of the first-class, but when next

* See also the new schedule granted to blacksmiths in the employment of the C.P.R. Co. as quoted in the report of the Vancouver correspondent of the *Gazette* in the present issue.

* A special article containing the full text of this award appears on another page of the present issue of the *Gazette*.

year's appropriations are drawn up provision will be made for increasing the first-class to \$14 a week, the second and third-class remaining as at present.

A change by which 196 metal workers and labourers employed at Shawinigan Falls obtained 15 per cent increase on October 3 involved an aggregate weekly increase of \$141.08.

As a result of the strike of carpenters which commenced in the city of Winnipeg during the month, a large number of carpenter contractors in that city were obliged to agree to a minimum rate of 35 cents an hour, and a nine hour work day. As some of the men were receiving this rate before the strike and others, rates varying from 20 cents to 35 cents per hour, it is impossible to say how many carpenters were directly affected. An average increase of five cents per hour for three hundred and fifty men would probably not be excessive as a rough approximation. This was the most important change of the month both

from the numbers affected and the amount of change involved in the weekly wage bill.

Changes in Hours.

There were two instances of a reduction in hours reported during the month, one at St. Thomas, Ont., involving a reduction of an hour a week to 231 employees in the locomotive and car shops of the Michigan Central Railway Company, and the other affecting 22 horseshoers at Hamilton to the extent of 4 hours weekly. The former of these represents a re-arrangement of work time customary at this season of the year in the establishment in question. The net result of the two changes is a diminution of 319 hours weekly.

A gratifying feature of the table is that it presents only one return indicative of cessation of employment.

The high rates of wages noted in the September *Gazette* as prevailing in the lumbering, agricultural and railroad construction industries were continued in October.

TRADE DISPUTES DURING THE MONTH OF OCTOBER.

THERE was little industrial unrest in Canada during the month of October, only two new disturbances being of much importance. Two of the largest disputes in existence before October 1 were terminated during the month, and in the case of a third one, the company which had been most seriously affected claimed to have filled all the places of the strikers. British Columbia and all the eastern maritime provinces were quite free from trade disputes, and there were only one in Quebec, one in Manitoba, and four in Ontario.

Analysis of Trade Disputes during the Month.

Number and magnitude.—The total number of disputes reported to the department as being in existence in October was eleven, a decrease of three compared with the pre-

vious month, and an increase of one compared with October, 1902. Of the eleven, five were begun before October 1, and six, after. Three old disputes and one new one came to an end in the course of the month, and of the remaining six, two were practically concluded, leaving only four in continuance in November. The number of establishments involved was approximately 150, and the number of employees directly affected was about 1,255. Of the four disputes which were settled, the strikers gained their demands with regard to three, and in the third case particulars were not given.

Loss of time in working days.—The approximate loss of time in working days by men directly affected was 14,000, a decrease of about 540 compared with September. The fact that many of the strikers returned to work either individually or in small

bodies while the disputes were still unsettled, makes of these figures merely a rough estimate. All care has been taken, however, to render them as accurate as possible.

Trades affected by new disputes.—The industries affected by new disputes included iron moulding, quarrying, building, piano making, marble working and leather working.

Causes of new disputes.—The following were the causes of the new disputes :—

| | |
|--|---|
| Objection of employers to unions..... | 2 |
| Demand for increase in wages and shorter hours | 1 |
| Demand for increase in wages, shorter hours and recognition of unions..... | 1 |
| Refusal of Company to discharge a union member in arrears of dues..... | 1 |
| Against change in method or wages payment involving reduction in wages.. . . . | 1 |

Disputes commenced prior to the Beginning of the Month.

Of the five disputes which began before October 1, the strikes of rubber workers at Port Dalhousie, Ont., builders' labourers at Montreal, and bookbinders at Toronto came to an end in the course of the month, the men in each case obtaining practically all their demands. No changes occurred in the strikes of iron moulders at Toronto and boilermakers at London, Ont. In the case of the former, only 25 strikers out of the original number of 275 remained out of work on October 1, and the Canada Foundry Co., the principal firm involved, reported that they were no longer affected by the dispute.

New Disputes.

Of the new disputes, the most important were a strike of carpenters and joiners at Winnipeg, quarrymen at Sherkston, Ont., and piano workers at Hamilton. The only other disputes were a lockout of marble workers at Toronto, a strike of harness makers at Montreal, and a strike of iron moulders at Smith's Falls.

In a special article in the present number of the *Gazette* an account is given of the strike of carpenters and joiners at Winni-

peg, in which the intervention of the department was sought. Brief particulars of the other disputes are given below.

Strike of Quarrymen at Sherkston, Ont.

On October 6, a strike was declared by employees of the Empire Limestone Co., of Buffalo, N.Y., at their quarry at Sherkston, a small village near Port Dalhousie, Ont. Eighty-four Canadians were directly concerned in the strike. The Empire Limestone Company had purchased this property about a year ago, and the strike was largely due to new regulations which they attempted to enforce. The chief grievance was the introduction of the piece-work system of payment for loading 'buckets' instead of daywork. On a complaint being made, about twelve men were discharged and were replacel it is alleged by Italians and Hungarians. The rest of the Canadians, to the number of 84, then went on strike, their action forcing the twenty foreigners employed to stop work also. Towards the close of the month, the secretary of the Ontario Labour Bureau investigated the trouble, but reported that the government could not interfere. On October 31, the Deputy Minister of Labour proceeded to Sherkston, as the friendly mediation of the Department of Labour had been sought on behalf of the strikers.

Strike of Piano Workers at Hamilton, Ont.

On October 7, the employees of the piano factory of Ennis & Co., Limited, Hamilton, Ont., presented a demand for a five per cent increase in wages and a day of 9 instead of 10 hours. They were informed that the company were willing to arrange a piece work scale, taking the best factories of Toronto as a basis. On October 17, the new scale was offered to the men, but not being satisfied with it, on the 19th, they declared a strike, twenty-one men being involved in it. A committee was immediately appointed by them to confer with the company, and frequent negotiations were carried on in an attempt to

reach an agreement. The strikers proposed to submit their differences to arbitration, and on the 28th, the company agreed to do so. No further steps, however, having been taken by the employees by the evening of the 30th, the company concluded to enforce the following order, which had been issued on the 19th: 'As you have quit your work without notice we consider your situations vacant, and would ask that your tools be removed within a reasonable time. Should you at any future time seek a position here we will entertain your proposition without malice.' The company also announced that the factory would open for business on November 2, and would henceforth be an open shop. The strikers stated that the cause of the delay in beginning arbitration proceedings was the necessity of obtaining authority to do so from the headquarters of the union in Chicago.

Lockout of Marble Workers at Toronto.

A peculiar feature of a lock-out of marble workers, which occurred in Toronto on October 22, was the fact that it had nothing to do with conditions in Canada, the whole trouble emanating from the United States. About the beginning of the month, the Marble Dealers' Association of America locked out about 1,400 workmen, members of the Marble Workers' International Association. The chief cause of the lock-out was a demand of the union for a 9 hour day, which is the time prevailing in Toronto, among the marble workers. A Chicago firm, Messrs. Davidson & Co., members of the Marble Dealers' Association, had contracts in Toronto on the King Edward Hotel and the Bank of Nova Scotia. Their employees joined the Marble Workers' International Association during the month, and were consequently immediately locked

out. The result of the lockout was that the men obtained work elsewhere. It was reported that the firm's contracts were seriously interfered with.

Strike of Harnessmakers at Montreal.

A question of trades unionism was the only one involved in a strike of harness-makers employed by Hector Lamontagne & Co., of Montreal, which took place on October 26. About a week before, the company had dismissed the local Secretary of the United Brotherhood of Leather Workers on Shoe Goods on the ground that he had been using his working hours to canvass the employees on behalf of the union. After his dismissal, a deputation from the employees requested his re-instatement, with a few others who had also been discharged. On October 25, the members of the union were notified that their services would be discontinued after eight days. In consequence of this, fifty hands stopped work on the following day. The company stated that they were willing to form a mutual benefit association among their own men, but that they objected to the International Union. On October 30 a conference was held between delegates of the men and a representative of the company, after which an announcement was made by the officers of the union, that an arrangement had been arrived at, and that all the men would return to work on Monday, November 2. No particulars of the agreement were given.

Particulars as to other disputes of the month will be found in the table published herewith, which is a compilation of the trade disputes of the Dominion, which began or were in continuance during the month of October and which have been reported to the department.

DEPARTMENT OF LABOUR, CANADA.
STATISTICAL TABLES, SERIES C, No. 36.

TRADE DISPUTES OF THE MONTH OF OCTOBER.

| Province. | Locality. | Occupation. | Alleged Cause or Object. | No of Firms or Establishments affected. | Approximate No. of Employees affected | | Date of commencement. | Date of termination. | Result. |

| Ontario | Toronto ... | Bookbinders | Apprentice alleged to have been given journeymen's work. | 1 | 27 | + 123 | " 28 Oct. | 2 | A satisfactory arrangement made. |

*Considerable difficulty has been experienced by the Department of Labour in making an exact classification of existing trade disputes, particularly in cases where, after the declaration of a strike, some of the original strikers have returned to work, or have had their places filled with new hands, or where the establishments affected have found that for either of these reasons, or both, or for other causes, their business is no longer seriously affected. In such cases while, in one sense, it may be true that a strike may be regarded as still in existence because of no formal declaration by either of the parties of its termination, yet so far as the actual effect upon the business interests of the community is concerned a record of the continuance of such a dispute might be misleading. The list of trade disputes published in the present table, therefore, includes mention only of such disputes as during the month or at its termination affected to an appreciable degree the carrying on of the industrial or business operations of the firms or establishments concerned, mention, moreover, is not made of disputes involving less than six employees or of less duration than 24 hours.

† Establishment was closed for two days, but none were indirectly affected after Sept. 29.

RECENT INDUSTRIAL INVENTIONS.

The following particulars have been obtained from the latest number of the 'Canadian Patent Office Record,' issued by the Department of Agriculture.

The number of patents issued by the Canadian Patent Office during the month of July amounted to 525. Twenty-eight were for electrical inventions, 25 for agricultural implements, 29 for industrial machines and 11 others for parts of machinery. Eighteen inventions related to mining and metallurgy, 12 to transportation and locomotion, 11 to lighting, 7 to heating, and 3 to fuel. The electrical inventions included 4 railway signals, 4 switches, 2 lamps, 2 telephones, and a wave-detecting device for wireless telegraphy. Those relating to agriculture included harvesters, cultivators, ploughs, &c. Among

the new industrial machines were some for knitting, sawing, welding and leather sewing. Six inventions were concerned with the manufacture of paper, five of them being beating engines for pulp, and one a valve for wood pulp digesters. The patents relating to the working of minerals and metals included 3 blast furnaces, a furnace for treating ores, method for amalgamating metals, recovering precious metals, and manufacturing incandescent mantles. The patents for discoveries in industrial chemistry embraced a process for obtaining alumina, an explosive composition, paint, alcohol, and artificial manure. There were three automobiles, two bicycles, three propellers, and an air-ship. Six inventions were for new industrial processes, the principal being methods of briquetting coal, weaving elastic fabrics and making pasted leather.

GOVERNMENT CONTRACTS FOR THE MONTH OF OCTOBER.

(Information supplied by the Department of Marine and Fisheries.)

Between the 1st of April and the 15th of October, 1903, the Department of Marine and Fisheries awarded the following contracts, containing a schedule of minimum rates of wages to be paid and of maximum number of hours to be worked by the different classes of labour engaged upon the works.

The fair wage schedule inserted in each of these different contracts were as follows :—

POINT AUX PINS, LAKE SUPERIOR.

The construction of two wooden range lighthouses on Point aux Pins, above Sault Ste. Marie, Ont. Date of contract, 10th April, 1903. Amount of contract, \$1,400.

FAIR WAGES SCHEDULE.

| Trade or Class of Labour. | Rate of Wages. | |
|-------------------------------------|-------------------------------|-------------------|
| | Not less than the following : | |
| Bricklayers | 0.50 per hour, | 9 hours per day. |
| Masons | 0.45 " " | 9 " " |
| Builders' labourers | 0.20 " " | 9 " " |
| Painters | 0.25 " " | 10 " " |
| Carpenters | 0.22½ " " | 10 " " |
| Ordinary labourers | 0.17½ " " | 10 " " |
| Driver, horse and cart | \$2.75 per day, | 10 hours per day. |
| Drivers, 2 horses and wagon | 4.00 " " | 10 " " |

CANNING RIVER, N.S.

The construction of two wooden lighthouse towers at Canning River, King's County, N.S. Date of contract, 2nd July, 1903. Amount of contract, \$1,190.

FAIR WAGES SCHEDULE.

| Trade or Class of Labour. | Rate of Wages. | |
|---------------------------|-------------------------------|----------------------|
| | Not less than the following : | |
| Carpenters.. | \$1.50 | per day of 10 hours. |
| Bricklayers.. | 3.00 | " 10 " |
| Blacksmiths.. | 1.50 | " 10 " |
| Labourers.. | 1.25 | " 10 " |

SAINT ANDREWS, N.B.

The construction of a wooden lighthouse tower on the bar east of Navy Island, at the entrance to St. Andrew's Harbour, N.B. Date of contract, 21st September, 1903. Amount of contract, \$2,000.

FAIR WAGES SCHEDULE.

| Trade or Class of Labour. | Rate of Wages. | |
|---------------------------|-------------------------------|----------------------|
| | Not less than the following : | |
| Carpenters.. | \$1.50 | per day of 10 hours. |
| Masons.. | 2.25 | " 10 " |
| Painters.. | 1.50 | " 10 " |
| Blacksmiths.. | 1.75 | " 10 " |
| Labourers.. | 1.25 | " 10 " |

(Information supplied by the Department of Public Works.)

The following contract awarded by the Department of Public Works, received the signature of both parties to it, during the month of September, together with a minimum rate of wages to be paid to the labourers engaged upon the work, as set forth in the 'fair wages' schedule inserted. A copy of the schedule, however, was not received at the Department of Labour until October.

RED DEER, ALTA.

Construction of a Court House at Red Deer, Alta., N.W.T.; date of contract, 7th September, 1903 ; amount of contract, \$12,500.

FAIR WAGES SCHEDULE.

| Trade or Class of Labour. | Rate of Wages. | |
|--|-------------------------------|--------------------------------|
| | Not less than the following : | |
| Mason.. | \$5.00 | per day of 10 hours. |
| Bricklayers.. | 5.00 | " 9 " |
| * Stonecutters.. | | |
| Builders' labourers.. | 1.75 | " 10 " |
| Plasterers.. | 0.50 | per hour, day of 10 hours. |
| * " labourers.. | | |
| Lathers.. | 0.04 | per yard. |
| * Ordinary labourers.. | | |
| Stair builders.. | 3.00 | per day of 10 hours. |
| Joiners.. | 3.00 | " 10 " |
| Carpenters.. | 2.75 | " 10 " |
| Blacksmiths.. | 2.50 | " 10 " |
| Shinglers (done by carpenters).. | | |
| * Plumbers.. | | |
| * Sheet metal workers.. | | |
| Painters.. | 0.25 | per hour, day of 10 hours. |
| Teamsters.. | 26.00 | to 33.00 per month with board. |

* There are no workmen of the classes of labour thus marked above at Red Deer, N.W.T., but the current rates at Calgary, N.W.T., are as follows :

| | | |
|---------------------------------|--------|----------------------------|
| Stonecutters.. | \$0.40 | per hour, day of 10 hours. |
| Plasterers' labourers.. | 2.00 | per day of 10 hours. |
| Ordinary labourers.. | 1.75 | " 10 " |
| Plumbers.. | 3.50 | " 10 " |
| Sheet metal workers.. | 2.50 | " 10 " |

ENFORCEMENT OF FAIR WAGES
RESOLUTION BY POST OFFICE
DEPT., OCTOBER, 1903.

During the month of October the following orders were given by the Post Office Department for the supplies below mentioned. All were given subject to the regulations for the suppression of the sweating system, and securing payment to the workingmen and women of fair wages, and the performance of the work under proper sanitary conditions :—

| Nature of order. | Amount of order. |
|---|------------------|
| Making and repairing metal dating and other hand stamps, also type and brass crown seals. | \$ 831 60 |
| Making and repairing rubber dating and other hand stamps and type. | 34 05 |
| Supplying stamping material, inclusive of making and repairing pads ; rubber stamping cushions, wooden boxes and post marking and cancelling ink. | 484 65 |
| Making and repairing post office scale. | 138 50 |
| Supplying mail bags. | 762 50 |
| Repairing mail bags. | 1,046 39 |
| Repairing mail locks and supplying mail bags and fittings | 861 20 |
| Repairing letter boxes, portable boxes and mail clerks' tin boxes. | 11 25 |
| Miscellaneous orders for making and repairing postal stores. | 27 85 |

REPORTS OF DEPARTMENTS AND BUREAUS.

The following reports of departments and bureaus were received by the Department of Labour, during October, 1903.

CANADIAN REPORT.

Crime in Canada.

Criminal Statistics for the year ended September 30, 1902. King's Printer, Ottawa. 1*227 pages. Price, 15 cents.

The criminal statistics of Canada for 1902, show that there was a general decrease in the number of convictions for indictable offences over 1901, in proportion to population, although the number of charges was greater by 248, and the convictions were 22 more than in 1901. The greatest improvement was in Ontario and Quebec, these two provinces showing absolute decreases in convictions of 199 and 85 respectively. With regard to sex, the males convicted during 1902 numbered 5,313, against 5,338 in 1901, and 5,430 in 1900, while the females numbered 347 against 300 in 1901, an increase of 47. For 18 years previously, however, the trend was steadily in the direction of a decreased proportion of female criminals, and 1902 may therefore be regarded as exceptional in this respect.

The statistics show that the criminal classes are becoming more and more educated, and that, as regards the use of liquor, moderate drinkers are responsible for three-fifths of all the serious crime in the country, non-drinkers constituting a very small proportion, and the number of immoderate drinkers steadily decreasing.

In the case of juvenile delinquency, there was a slight improvement in 1902, but in dividing the last sixteen years into four year-periods, the number of criminals under 16 years of age shows a steady increase from 2,301 in 1887-90, to 3,727 in 1899-1902. The number of summary convictions increased from 36,510 in 1901 to 37,876 in 1902. The greatest increases were 30.06 per cent in Nova Scotia, and 10.2 per cent in British Columbia, and the decreases were

24.7 per cent in the Yukon, 12.7 per cent in the Territories, and 3.1 per cent in Prince Edward Island.

ONTARIO REPORTS.

Live Stock Associations.

Annual Reports of the Live Stock Associations of the Province of Ontario, 1902. King's Printer, Toronto. 298 pages.

The greater portion of the volume on live stock issued by the Ontario government is taken up with addresses delivered at the Ontario Provincial Winter Fair and the Eastern Ontario Live Stock and Poultry Show. In addition to these, it contains the annual reports of the Dominion Cattle Breeders' Association, the Dominion Sheep Breeders' Association, the Dominion Swine Breeders' Association, the Western Ontario Poultry Association, and the Eastern Ontario Poultry Association. Most of the addresses are of a purely technical nature on the breeding and care of cattle, sheep, swine and poultry, and kindred topics. The following statistics were given by the Deputy Minister of Agriculture of Ontario at the Provincial Winter Fair which was held at Guelph. He stated that a capital of no less than one billion dollars was invested in agriculture in Ontario, and that from live stock, dairying and poultry-raising, a sum of nearly ninety million dollars is produced every year. During the last four years, the live stock on the farms of the province of Ontario increased in value by thirty-six million dollars, and the sales of live stock and their products increased eighteen million dollars in the same time.

Fruit-growing in Ontario.

Thirty-fourth Annual Report of the Fruit Growers' Association of Ontario, 1902. King's Printer, Toronto. 180 pages.

An important development in connection with the fruit growing industry of Ontario, in 1902, was the organization of 36 local Fruit Growers' Associations in various parts of the province in affiliation with the

Ontario Fruit Growers' Association. In the annual report of this association, an account is given by the secretary of the formation of the affiliated societies, with a list of rules and regulations suggested for their adoption. The report contains a large number of addresses delivered at the annual meeting of the association held at Walkerton, on December 1, 1902, among the most important of which were the following: 'List of Plants for Home and School,' by Arch. Gilchrist; 'Insects injurious to Fruit Trees,' by Dr. James Fletcher; 'Fungous Diseases and Insect Pests of 1902,' by Prof. W. Loxhead; 'Controlling Soil Moisture in the Orchard,' by Prof. J. B. Reynolds; 'The Grading and Packing of Apples,' by Alex. McNeil; 'Fruit Growing in Algoma,' by Chas. Young.

NORTH-WEST TERRITORIES REPORT.

Agriculture in 1902.

Annual report of the Department of Agriculture, of the North-west Territories for 1902. Government Printer, Regina. 205 pages.

In the North-west Territories of Canada, there were produced in 1902, 13,956,850 bushels of wheat, 10,661,295 bushels of barley and 158,185 bushels of flax. A special feature of the year was the appearance of flax as an export crop, but the growing of flax is still largely in the experimental stage, the yield per acre in some districts being small. The difficulty of obtaining harvest help was met by the department by the distribution of registration books throughout Assiniboia, in which farmers entered their names and the number of hands they required. Agents were also stationed at Winnipeg to send the harvesters arriving there to the places where they were needed free of charge. In this way, 742 farmers who registered were supplied with approximately 1,930 hands.

With regard to the cattle embargo in England, the report states that, in the opinion of some authorities, the final effect will be to force the Canadian farmer into grain-finishing all cattle before export, and

that it will also tend to develop the dead meat trade, and consequently may be a blessing in disguise.

The easterly portions of the districts of Saskatchewan and Assiniboia are chiefly devoted to the production of hard wheat, and western Assiniboia is rapidly becoming the centre of the ranching industry, with its exports confined to beef, wool and mutton. The chief exports of Alberta are cattle, pork, dairy products, timothy hay, oats and barley. Ranching in this district is giving way to the growing of crops, owing to the reclamation of large tracts of land by irrigation. The markets for the products of Saskatchewan and Assiniboia are found in Europe, but the natural markets for the produce of Alberta are British Columbia and the Orient. Hitherto, the two drawbacks to the development of these markets have been the mining depression in British Columbia, and the cost of freight to Vancouver. The construction of the Grand Trunk Pacific Railway and other contemplated lines will provide cheaper transportation from Calgary and Edmonton to the Pacific coast, and enable the farmers of Alberta to compete successfully in the rapidly growing markets of Japan and China. The most unsatisfactory industry of the North-west Territories has been the production of wool, owing to the fact that the wool industry is undergoing a prolonged period of depression all over the world. This condition is attributed to the substitution of cotton goods for wool and the increasing manufacture of shoddy goods.

BRITISH REPORTS.

Labour Statistics of Great Britain.

Ninth Abstract of Labour Statistics of the United Kingdom, 1901-1902. London, Eyre & Spottiswoode. 251 pages, price 1s.

A number of the tables contained in the Ninth Abstract of Labour Statistics of the United Kingdom are taken from reports that have already been reviewed in the *Gazette*. As in the previous abstracts, sta-

tistics are given for a number of years before 1902, for the purpose of comparison. A large number of subjects are treated, of which the following is a brief summary of the most important.

With regard to the state of employment, 4.4 per cent of the members of trade unions were returned as unemployed, compared with 3.8 per cent in 1901 and 2.9 per cent in 1900. The mean daily number of dock labourers in London in 1902 was 14,716, and in 1901, 16,454. There was a net decline in wages during the year of £72,701, chiefly accounted for by a fall of £73,316 in the mining industries. There was a net decrease in weekly hours of labour amounting to 1,024,868, affecting 1,057,507 individuals. The number of trade disputes was 442, being much fewer than for any previous year since 1893, which is the first year for which statistics are given, the next smaller number being 615 in 1893.

In 1901, there were 1,236 trade unions with a membership of 1,922,780, and there were 848 associations of employers in 1902. The number of cases considered by arbitration boards, in 1902, was 1,462, of which number, 678 were reported as having been settled by them. There were 1,850 workmen's co-operative societies, with a total membership of 1,865,329, and a combined capital of £31,114,424, in 1901. For the previous year the figures were 1,832 societies, with 1,775,258 members and a capital of £28,965,747.

Hours of labour of Railway Employees.

Report by the Board of Trade respecting their Proceedings under the Railway Regulation Act, 1893, 56 and 57 Vict. c. 29, during the year ended 27th July, 1903.

Under the Railway Regulation Act of 1893, railway employees in Great Britain are permitted to lodge complaints with the Board of Trade when they consider their hours of work excessive, or when sufficient intervals of rest are not provided. The Board of Trade is authorized to investigate these cases, and when the complaints are found reasonable, to compel the companies

to remedy the grievances. In 1902, only twenty-eight complaints of long hours were made, a marked decrease over the previous year. Of these 13 affected signalmen, and 9 engine drivers and firemen. The Board of Trade obtained returns from the railway Companies of the hours exceeding 12 a day of certain classes of railway servants during December, 1902. Similar returns had been received for December, 1901, and December, 1891. In comparing these returns a marked improvement is shown in the length of hours these employees are required to work.

AUSTRALIAN REPORTS.

Labour Conditions in Queensland.

Report of the Officer-in-charge, Government Labour Bureau and Relief, for 1902. Government Printer, Brisbane, Queensland. 16 pages, price 7d.

The chief duty of the Government Labour Bureau of Queensland, is to procure work for the unemployed, and to provide relief when required. The year 1902 was a very unfavourable one, owing to the continuance of the drought, and consequently a large number of men applied to the bureaux of the State for work or relief. The unemployed who registered their names in 1902, numbered 7,388, an increase of 868 over the previous year. Of these 3,375 either obtained engagements or were assisted to places where they could secure work. The number obtaining work in 1901 through the Labour Bureaus was 4,659, which indicates that there was a large decrease in the demand for labour. The effect of the drought was to drive the workmen to the coast, as only a comparatively few men could find employment in the interior, almost the only work being scrub-cutting, to provide feed for starving stock. The amount expended on government relief, during 1902, was £7,378 0s. 10d., an increase of £477 16s. 3d. over the previous year. In a supplementary report, information is given of the labour conditions prevailing about the beginning of last July. From many districts it was report-

ed that there were no unemployed, or that all who were idle expected work in August, when shearing would begin, and sugar mills would be in operation. In eight districts out of 83, more than 100 men were reported out of work, the majority of whom were agricultural and general labourers.

Factory Conditions in New South Wales.

Report on the working of the Factories and Shops Act, Early Closing Acts; Shearers' Accommodation Act, etc., during the year 1902. Government Printer, Sydney. 26 pages, price 1s. 6d.

The principal results of the Australian drought on the factories in New South Wales were an increase in the number of smaller establishments, employing from 4 to 10 persons, and a large increase in the number of women and children employed. In 1901, there were 2,195 factories in the Metropolitan district, and in 1902, there were 2,393, over 50 per cent of the increase being in small workshops, consisting for the most part of family groups, slackness of trade having driven the workers from the larger establishments. With regard to special industries, a change in the manufacture of clothing is noticed, the custom of having garments made by skilled workmen on the premises of the tailor, having in recent years been replaced by the practice of sending them to factories or giving out the work to family groups or small workshops. More than double the number of men were employed in 1902 than in 1901 in the manufacture of soap and candles, a result attributed to the import duty on these articles. The total increase of hands employed in all classes of factories amounted to 1,557. Of this number 1,515 were under the age of 18 years.

NEW LEGISLATION RECOMMENDED.

During the present year a Bill was introduced in the parliament of New South Wales, to amend the Factory Act, and a hope is expressed in the report that it will be made law in the next session. The new Bill contains the following provisions

among others. The term factory is extended to constitute every laundry and bakehouse, and every place in which one or more Chinese is employed at a handicraft. The powers of the department are enlarged to include the inspection and regulation of premises connected with a factory in which employees may be lodged. The minister is empowered to prohibit the use of insanitary premises as bakeshops. Males under 18 years of age and women are prohibited from having charge of any boiler in a factory.

UNITED STATES REPORTS.

Industrial Conditions in Massachusetts.

Thirty-third Annual Report of the Bureau of Statistics of Labour of Massachusetts, 1903. 269 pages. State Printers, Boston.

Annual Statistics of Manufactures, 1902. Seventeenth Report. 122 pages. State Printers, Boston, Massachusetts.

The Thirty-third Annual Report of the Bureau of Statistics of Labour of Massachusetts is divided into four parts, two of which, dealing with labour chronology for the year ending September 30, 1902, and with sex in industry, have already been reviewed in previous numbers of the *Gazette*. The other parts are entitled 'Annual Report of the Chief to the Legislature,' and 'Mercantile Wages and Salaries.' In compiling statistics on mercantile wages and salaries, the investigation of the bureau was limited to the congested business section of Boston. The number of establishments visited was 455, employing 9,454 persons, of whom 5,124 were males and 4,330 females. Interesting comparisons are made between the earnings of men and women in the retail shops visited. In several cases those of females are less than one-half the weekly amounts paid to men on an average for the same class of work, in other cases they are the same, and in five instances higher salaries are paid to women, these last being assistant buyers, floor girls, entry clerks, mail order clerks, and superintendents. Women stenographers receive from \$4 to \$20 per week, and men from \$8 to \$16. The highest paid men receive \$125 per week, and the highest paid woman, \$81.

The Seventeenth Report of Statistics of Manufactures of Massachusetts is divided into two parts, the first of which, Industrial Chronology for the year ending September 30, 1902, was reviewed in a previous number of the *Gazette*. Part II contains comparative statistics of manufacturing industries of Massachusetts for 1901 and 1902, with regard to establishments and their management; investment, materials used, and product; labour and its compensation; working time and proportion of business done; general summary of industrial conditions.

Chemical Industries and Minerals in Kansas.

Oil, Gas and Glass, Chemical Industries, and Minerals in Kansas. Being a reprint of Chap-

ter XIV in the first Biennial Report of the Kansas Bureau of Labour and Industry, for 1901-1902. State Printer, Topeka. 32 pages.

In the chapter of the First Biennial Report of the Kansas Bureau of Labour and Industry dealing with chemical industries and minerals, a brief account is given of gas and oil industries in Kansas. The principal theories as to the origin of these natural products are outlined, and some statistics are given with regard to the number of wells in existence and the average production of the principal companies in operation. The report contains descriptions of the three chemical and six glass works in Kansas. The latter industry is of recent growth, but it is reported to give promise of future development.

RECENT LEGAL DECISIONS AFFECTING LABOUR.

The following synopses of cases affecting labour are taken from the latest law reports and other legal records of the different provinces of Canada:—

QUEBEC CASES.

Action under Alien Labour Law.

As a result of some trouble between the Slater Shoe Company and certain of its employees, C. J. Dionne brought six actions against the company, alleging a number of infractions of the Alien Labour Law. The penalty in such cases, if the charge is sustained, is a fine of from \$50 to \$1,000.

At the trial the actions were all dismissed. An interesting point raised in one was whether bringing from the United States a British subject to work in Canada was an infringement of the law. In the case of Olivier Dubois—it appeared that he had been engaged in the United States. It was also proved, however, that he was born in the United States—his parents being British subjects, and that he himself had never taken out any naturalization papers. The court held that he was a British subject, and that, therefore, the making of a contract with him in the United States

to come to Canada for the purpose of working there was not an act which came under the Alien Labour Law. The charge was therefore dismissed.

(Judgment given by Judge Sicotte, at Montreal, October, 1903.)

QUEBEC CASES.

Accident caused by Nature of Work.

M. was employed by F. to assist in unloading a barge. In the course of this work, a bag of oilcake fell on his leg, breaking it. He brought an action against his employers for \$600 damages.

At the trial no negligence on the part of the employers was proved, and the court held that the accident was due to the danger necessarily inherent in the work undertaken by M., and that therefore, as he had accepted the employment of his own free will, he could not recover any damages.

The action was, therefore, dismissed with costs.

(Messier vs. Ferns.—Judgment given by Mr. Justice Archibald, at Montreal, October, 1903.)

ONTARIO CASES.

Withdrawal from a Jury.

G., a minor, together with another person, who was working for an Electric Company, was directed to clear up and remove the rubbish caused by their cutting a trench in a concrete floor of an alleyway in a power-house. The alleyway was crossed at right angles with others, and on each side were electric machines and live wires, all of which were at arm's length of any one working in the trench. One of the live wires was ruptured, probably by its having been constantly bent. The person working with G. went into a cross alley way where the live wires were, although there had been a slat nailed across it when the two were put to work; and was sweeping towards the trench the litter that had been scattered about, when he suddenly became unconscious from an electric shock. The bodies of both men were found near a switchboard, plaintiff's son being dead. It was shown that there was a rupture in the insulation of a loose loop or cable hanging from the switch-board directly over where the survivor was lying, and that the insulation of the wires was, with respect to the voltage passing, insufficient for the safety of any one working among them, and that the hanging loop might easily have been guarded better than it was.

G.'s father brought an action against the Electric Company, alleging that the accident was caused by negligence or which it was responsible.

At the trial, the judge withdrew the case from the jury upon the ground that there was no definite evidence to show what had caused the accident. An appeal was taken and it was held that there was evidence which could not properly be withdrawn from the Jury. A new trial was therefore ordered.

(Griffith vs. The Hamilton Electric & Cataract Power Co. Judgment given by Mr. Justice Falconbridge at Toronto.)

Service of Proceedings on a Union.

In an action brought by the Metallic Roofing Company of Canada against Local Union No. 30 of the Amalgamated Sheet Metallic Workers' International Association, an important decision was given last month on a point of procedure. The Local Union, which is being sued, holds its charter from the association which has its Head Office in Kansas City, U.S.A. The persons served with the Writ of Summons and other proceedings were the officers of the Local Union and the members of a committee which it had appointed.

The court held that service on these persons constituted service on the other members of the Local Union.

It was held, however, that such service was not service on the association, which was a foreign body.

(Judgment given by Mr. Justice McMahon, at Toronto, October 5, 1903.)

BRITISH COLUMBIA CASE.

Chinese Working Underground.

An application was recently made in Victoria by the Attorney General of British Columbia for an injunction to restrain the Wellington Colliery Company from employing Chinese underground, alleging that it was contrary to a statute recently passed, and that it endangered lives of white miners.

Mr. Justice Irving held that though lives were endangered, yet it was not established that the matter affected the general public sufficiently to enable such an application to be properly made on its behalf, and that therefore the injunction applied for by the Attorney General could not be granted.

(Judgment given at Victoria, British Columbia, by Mr. Justice Irving, September 16, 1903.)

THE LABOUR GAZETTE

THE JOURNAL OF THE DEPARTMENT OF LABOUR

Vol. IV—No. 6.

DECEMBER, 1903

Price Three Cents

The LABOUR GAZETTE wishes to draw the attention of its readers to the fact that, while every care will be taken to have information as complete and impartial as possible, it does not in its accounts of proceedings, abstracts of reports, legal decisions, quotations, or other records of matters of concern to labour, necessarily endorse any of the views or opinions which may be expressed therein.

DEPARTMENT OF LABOUR, CANADA,
OTTAWA, DECEMBER 15, 1903.

THE first of a series of articles dealing with the hours of labour throughout Canada is a leading feature of the present issue of the *Gazette*. The scope and the purpose of the series is fully explained, together with a resumé of the legislation of the several provinces affecting the length of the working day. The subject of the hours of employment wholly disassociated from other considerations has never before been dealt with in the *Gazette*, and the more importance may therefore be attached to the special statistical tables which have been prepared in this connection, and which will be printed in accordance with a systematic plan at as early a date as possible.

The first also of two articles on the law of Canada with regard to aliens is published herewith, being a resumption of the series of articles on Canadian labour legislation which was one of the first of the fields which the *Gazette* undertook to cover after its establishment. For the purpose of the present articles, the laws regarding alien labour have been dealt with from two points of view, according

as the class of labour referred to might be considered as being present in the country with the primary intention of entering into *bona fide* citizenship or as having entered for the performance of a specific service while remaining to all intents and purposes within the citizenship of a foreign country. The laws relating to immigration make up the majority of enactments under the first heading, while in the second the legislation regulating the hiring of foreign labour under contract will be chiefly considered. It is with the former that the article in the present issue deals.

The tables relating to prices of provisions, groceries, dry goods, clothing, and to rents are in continuance of those on the cost of living in Canada, which were begun in the April, 1903, number of the *Gazette*. Inasmuch as they represent the result of personal investigations on the part of officers of the department in the various localities mentioned (the previous tables having been based on information received from sources wholly outside of the department) special importance may be attached to them as representing an accurate statement of conditions prevailing in the spring months of the present year. The series will be completed with a reference to the comparative prices in the United States, together with some references of a general nature to the series as a whole.

In connection with the usual 'general summary' of industrial and labour conditions of the month, an attempt has been made in the present issue to render material collected by the department each month more available to readers of the *Gazette* in

summarized form by the publication of a table, which will be found embodied in the article in question, in which by an arrangement of terms, conditions in the several trades and industries throughout Canada may be learned at a glance, as well as the general state of employment at any of the points mentioned.

The issue contains the usual articles on the immigration and colonization move-

ment; trade disputes of the month; industrial accidents of the month; changes in wages and hours; industrial inventions; government contracts, embodying fair wages schedules, signed; recent legal decisions; reviews of reports of departments and bureaus (a review of a bulletin of the Census Department dealing with agriculture in Ontario being published under a separate heading); new unions formed, &c.

INDUSTRIAL AND LABOUR CONDITIONS DURING THE MONTH OF NOVEMBER.

I.—GENERAL SUMMARY.

THE labour market in Canada showed a decline during November in the amount of employment available. This was largely owing to the advent of the winter season which, by practically closing navigation and by terminating operations in the agricultural industry, in railway construction, in the outside building trades, and in out-of-door work generally, threw a considerable number of men out of immediate employment. Though western Canada was particularly affected, the condition may be said to have been more or less general, the number of hours being decreased in several trades, representing a shortening of the day both because of decreasing daylight and of a lessening in the amount of work to be done. In a few cases, notably at Sydney N.S., and in the car-shops of the Canadian Pacific Railway and Michigan Central Railway at various points, as well as in a lesser degree at Toronto, Brantford, Brandon and other cities, small reductions were made in the working staffs of various establishments. In several other cities, however, the activity characteristic of the earlier months of the present season was maintained, and the record of new industrial concerns incorporated has shown no tendency to diminution. Thus, of the localities from which reports by correspondents of the *Gazette* were received, the following only reported anything approaching general dullness:—Sydney,

Quebec, Three Rivers, Hull, Brantford, St. Thomas, Victoria and Nanaimo.

Wages may be said to have remained stationary, the reductions reported in certain quarters being off-set by increases in others. The month, from the standpoint of industrial unrest, was also satisfactory.

Cost of living continued to show an upward tendency with increases in the prices of milk, eggs and coal oil at several points. At Winnipeg also fuel prices ruled high, hard coal being \$11 per ton, though comparing favourably with the prices prevailing at the same time last year on account of the strike in Pennsylvania. The increase in the price of illuminating oil in Ontario is traced directly to the high price of the crude product. The early closing of the Yukon River caused a sharp advance in food stuffs at Dawson.

Industrial and Trade Conditions.

Conditions of employment in the several trades and industries of the Dominion, as shown by the November reports of the correspondents of the *Gazette*, and by information collected by the Department from other sources, may be summarized as follows:—

Agriculture.—With the exception of certain districts in the province of Quebec where continued dry weather prevailed, con-

ditions for fall ploughing were generally favourable during the first half of the month, and in western Canada in particular prospects in this respect for next year's wheat crop were very favourable. This work, and the marketing of the crops, which was delayed until an exceptionally late date this year, for the most part engaged the attention of farmers, though advantage of the fine weather was also taken to continue threshing operations. With the advent of winter weather in the closing weeks of the month, the season of comparative inactivity may be said to have begun, and the extra labour engaged during the summer months was in consequence thrown in considerable quantities upon the market. The final crop bulletin of the Ontario government for the year 1903, is authority for the statement that the area of fall wheat sown in the province was increased. It comments also on the scarcity of farm labour and domestic servants, the exodus of farmers to the North-west Territories being still in continuance. Improved machinery and the devoting of more land to pasture, however, are stated to be operating as off-sets to the high wages obtaining. The fall wheat crop in Ontario is about 4,000,000 bushels behind that of last year, but oats were exceptionally good, and the general yield is considerably above that of the last twenty-two years. Potato rot at the time of digging seriously diminished this crop in some localities of the province. Taking values into account crop returns for Ontario are little short of those of the exceptional harvest of last year. Cheese and poultry also recorded an exceptionally prosperous season. In Nova Scotia the grain crops are described in the official returns as excellent, though the hay crop was poor. There has been, as in the case of Ontario, a very heavy yield of apples for which a good market was found. In this connection reference may be made to the action of the New Brunswick Department of Agriculture in undertaking to operate a number of orchards of from 50 to 100 trees for the encouragement of the fruit industry, the government fur-

nishing the trees and planting them, and the owners signing an agreement for ten years that they will attend to the cultivation of the orchards according to directions, receiving the product in return. The North-west Grain Dealers' Association issued the following estimate of the wheat and grain crop of 1903, for Manitoba and the North-west Territories:—

| Grain. | Acres. | Ave. Yield per Acre. | Yield. Bush. |
|--------------|-----------|----------------------|--------------|
| Wheat | 3,123,663 | 16.1 | 50,290,974 |
| Oats | 1,101,333 | 36.5 | 40,198,654 |
| Barley | 381,135 | 29.7 | 11,319,709 |
| Flax | 64,639 | 9.0 | 581,751 |
| | 4,670,770 | | 102,401,088 |

Though the above represents a considerably falling off in the size of the crop as compared with last year, when there were over 61,000,000 bushels of wheat, 45,000,000 of oats, 12,000,000 of barley, and 720,000 of flax, the enhanced price prevailing, it is expected, will make the cash returns of this year's harvest all but equal to those of last.

Fishing.—Conditions are dull, the active season in the more important branches having closed. In the Atlantic fisheries large catches of mackerel were reported early in the month off the Nova Scotia coasts, and the oyster fishing season in Prince Edward Island closed satisfactorily. The mackerel catch, it is expected, will largely compensate for the shortage in cod and haddock, and thus render the year an average one. The total value of the Nova Scotia fisheries last year, from estimates arrived at during the month, was \$7,989,548 or \$180,395 better than the previous year. There were paid in bounties to vessels and crews, \$69,091 and \$86,850 to boats and boat fishermen. Nova Scotia paid \$7,344 in claims, of which 1,513 were from Halifax county. Fishermen making claims must have caught at least 2,500 pounds of fish. The total capital invested in the fisheries of Nova Scotia is estimated at \$3,319,334, and 5,607

TABLE SHOWING STATE OF EMPLOYMENT IN CANADA

[This table is based largely on the reports of the correspondents of the *Gazette* as published in the present employment in the several trades and industries throughout the Dominion. This table has reference to kindred phenomena treated under separate headings in the *Gazette*. In tabulating the information conditions are favourable or unfavourable, as follows: (1) active, busy, very busy; (2) quiet, dull, very dull.]

| City and District of Correspondent. | Agricultural Operations. | Fishing. | Lumbering (including Saw-milling). | Mining. | Manufacturing. | Railway Construction. | Building Trades. |
|-------------------------------------|--------------------------|----------------------|------------------------------------|-----------|---------------------|-----------------------|------------------|

busy. ⁵ Plumbers and lathers busy. ⁶ Moulders busy. ⁷ Organ workers dull. ⁸ Shoe workers fa

men are employed in fishing vessels, 18,367 in boats, and 5,555 in lobster factories. At Gloucester several vessels of the Newfoundland salt herring fleet arrived and preparations are already under way for the winter fishing season. On the great lakes conditions were fair for the season. The government has abolished the close season for pickerel in Lake Huron and St. Clair river, bordering on the county of Lambton, similar action having been taken in regard to whitefish in Lakes Erie and St. Clair, bordering on the county of Kent. In British Columbia the fishermen following the small catch of salmon, are dull. The sealing fleet, however, returning to Victoria in the first half of the month, reported an increase in the catch of over 3,500 skins. There are now also some eleven Canadian vessels engaged in the sealing fisheries off Cape Horn and the Falkland Islands.

Lumbering.—General activity prevails. The saw-mills in the Ottawa district closed at an early date in spite of the high prices and good demand for the manufactured article. There was a falling-off in the total cut amounting, according to some authorities, of about 10 per cent. Some difficulty was also reported between British lumber dealers and the Ottawa manufacturers of deals, an advance in price in view of the high rates of wages and increased cost of supplies being asked by the latter. The closing of the mills referred to released a number of men for the woods, and the number added to the shanty gangs was exceptional for the season. The weather was also favourable for the getting in of supplies. The cut of lumber on the Georgian bay is expected to be considerably less than last year, and although about 8,000 men are in the bush in this region, the scarcity of labour as well as the apprehension of a limiting of the market in the United States, is held to account for the shortage in the cut. In British Columbia the unfavourable conditions prevailing in the Manitoba and North-west Territories trade have caused a marked slackening in the industry.

Mining.—Reports from the Nova Scotia collieries are of increased outputs at nearly

all of the mines, though the total shipments by the Dominion Coal Company for the 10 months ending October, show a decrease over last year, accounted for by the fire at Dominion No. 1. Large extensions in the near future are promised by this company. In British Columbia coal mining on Vancouver Island has been quiet. The metalliferous mines have had a good month, both in British Columbia and in Western Ontario. An important event of the month was the action of the Ontario government in withdrawing from sale a belt ten miles wide on each side of the Temiskaming and Northern Railway, from New Liskeard, the present terminus, southward to the border of the township of Widdifield, owing to the important discoveries of nickel, cobalt, silver and arsenic, recently made in this district, the discovery being thought about the most valuable ever made in the province.

Manufacturing.—The record for November is that of a busy month, with only local exceptions such as the depression in the steel industry at Sydney, the disturbance in the boot and shoe manufacturing industry at Quebec, Que., and other instances due to particular causes. In the majority of industrial centres, including the most important in the Dominion, active and satisfactory conditions prevailed. At Sault Ste. Marie the saw-mill and pulp-mill, employing altogether about 240 men, were reopened; the reorganization committee has extended the time for making deposits and joining the underwriting until December 1, while reporting generally satisfactory progress. From the beet sugar industry reports indicating an improvement in the saccharine test for beets in Ontario was reported, together with a satisfactory initiation of the factory at Raymond, Alta., on the 9th of the month, there being 5,000 tons of beets in the sheds and 150 men employed.

Railway construction and transportation. The season of activity in railway construction is closed and in certain districts a considerable number of men are in consequence

out of employment. Work on the Temiskaming and Northern Railway, however, will be continued during the winter, and at points in western Canada an attempt will be made to continue tracklaying. An event in this connection was the completion and opening for traffic after five years' work of the double track of the Grand Trunk Railway between Toronto and Montreal. It was also reported that the surveys of the line of the Grand Trunk Pacific from Abitibi to Winnipeg, a stretch of 1,100 miles, had been completed. With regard to transportation proper, a shortage of cars and consequent congestion of traffic at several points in Canada was reported, though grain shipments in view of the largely increased elevator capacity and rolling stock of the railways was larger than last year. The laying-off of a number of men in several car-shops of the Canadian Pacific Railway was a feature unfavourably affecting employment. General traffic employment, however, was normal, though the weekly earnings of the Canadian Pacific Railway for the first time in a long period were less during November than the earnings of the corresponding period of the year previous. For October, however, the earnings of the company showed an increase of about \$350,000. The gains on the Canada Atlantic during the eight months ending November 8, were \$15,213. The closing of navigation on the St. Lawrence in the last week of the month enabled a résumé of the business of the port of Montreal for the season of 1903 to be made, showing a very heavy increase in traffic as indicated by an increase of \$1,241,975 in customs receipts and of about \$25,000 in the revenue of the port. Ship labourers and longshoremen, accordingly, are generally short of employment throughout Canada. The Sault Ste. Marie canals carried 3,623,304 tons of freight during October, an increase over September but a decrease from October of last year. The decrease was altogether in the business of the United States canal, the Canadian canal having an increase of 80,149 tons.

Building trades.—Weather conditions brought outside operations to a close at several points, and masons, bricklayers and stonecutters in consequence reported a falling off in employment. This, however, was not universal, and as the inside trades with very few exceptions have been actively employed, the month may be considered satisfactory. The records of the season's building operations at many points, notably at Winnipeg, Man., at Calgary, N.W.T., and at Guelph, Ont., are much in excess of previous years.

Metal, engineering and shipbuilding trades.—Conditions have varied according to locality though activity, except in a few instances has been the rule. Sydney, N.S., and Victoria, B.C., alone report depressed conditions.

Woodworking trades.—Fair conditions of employment are generally reported, with quietness prevailing at Sydney, N.S., Brandon, Man., and Vancouver, B.C.

Printing trades.—A very active month was almost universally reported by the correspondents of the *Gazette*.

Food and tobacco preparation.—A good month was experienced.

Leather trades.—The lockout at Quebec and consequent cessation of employment on a large scale injuriously affected returns for the month in this branch of trade. At several other points in the Dominion, however, fair conditions were reported.

Miscellaneous.—The groups of trade included under this heading were for the most part well employed.

Unskilled labour.—Though the beginning of winter threw large numbers of unskilled labourers upon the market in consequence of the cessation of railway construction, farm employment, &c., the conditions of this class was fair at several points. At the various ports affected by the close of navigation, however, and at Winnipeg and Brandon, Man., there were considerable numbers of unemployed.

Meetings of Associations, &c.

The 23rd Convention of the American Federation of Labour was held in Faneuil Hall, Boston, from November 10 to 24. Many resolutions of importance to labour were adopted, notably that in opposition to the adoption of the principles of socialism, which was carried by a vote representing 11,282 for and 3,185 against. Resolutions favouring woman suffrage, against the 'open shop,' condemning the employment of young children, and refusing to charter associations of insurance agents as affiliated bodies, were also passed. On November 14 a resolution instructing the executive to insist on local unions in Canada affiliating with the Trades and Labour Congress of Canada with the least possible delay, was carried. The annual address of the president contained an extended reference to the status of the Federation in Canada, there being reported a gain during the past year of 4,686 in Canadian membership, while the total new unions added to the entire federation were 1,333, and the average membership upon which the per capita tax was paid amounted to 1,465,800. The amount expended for organization in Canada, viz., \$12,682.13, was stated to represent payment of officers, organizers and other representatives in Canada to the number of 362. From replies to a circular issued to International Trade Unions it was shown that the membership in Canada was 19,710. The President also referred to the report of the Royal Commission on labour disputes in British Columbia and to the action of the Federation in opposition to certain legislation introduced into the Dominion Parliament. At the session of November 21, President Gompers was re-elected with Mr. Frank Morrison of Chicago as secretary. San Francisco was chosen as the place of meeting for the next convention.

A conference of Canadian dairy experts was held at Ottawa on November 4, 5, and 6. Among the subjects dealt with were, co-operation among farmers; the export trade; transportation of products; defects in cheese and butter-making; sanitation of

dairies (in which connection it was stated that sixty per cent of the factories in eastern Ontario were unsanitary); milk testing, &c. Resolutions were also passed urging that the price of cheese and butter be quoted in fractions of tenths of a cent instead of in halves, quarters, eighths and sixteenths, as at present; that a third grade of cheese and butter be adopted; that cheese and butter makers before being allowed to conduct tests of milk, should be required to pass a prescribed examination; that butter and cheese be made only in factories free from sanitary defects and duly licensed by the province; defining the duties of dairy inspectors; that means be taken to secure a uniform curing of cheese at a cool temperature; and recommending a close study by dairy men of bacteriology and chemistry.

The 28th annual meeting of the Ontario Fruit Growers' Association was held at Leamington, Ont., opening on November 24, with delegates present from all parts of the province. Among the topics discussed were: transportation rates; the market in Western Canada; fruit experiments; new varieties; co-operative purchases of boxes, spraying material, &c.; co-operative packing and marketing; fruit exhibition, &c. The association recommended that the commercial apple box for Canada should be 10 in. x 11 in. x 20 in., and the pear box half the depth and capacity of the apple box. It was also decided to hold a winter fruit fair in Toronto, and to hold the next meeting of the association in the same city.

A convention of Ontario Sugar Beet Growers and Grocers was held at Berlin, Ont., on November 24-27, the object being to demonstrate to those attending the process and methods by which pure granulated sugar may be manufactured from home-grown beets. Addresses by the Deputy Minister of Agriculture for the province, the principal of the Ontario Agricultural College, and by other experts were delivered. The general opinion expressed by the farmers present was that the raising of sugar beets was profitable. The manager of the

Ontario Sugar Company stated that the company would continue to pay the rate authorized by the government, namely, 12 per cent for 12 per cent beets, and 12 cents for every per cent over twelve instead of a rate of \$4.50 per ton as petitioned by a number of farmers.

Canadian Revenue.

A statement issued by the Department of Finance shows that the revenue of the Dominion for October reached \$5,902,610.68, a total of \$23,735,715.07 for the first four months of the current fiscal year. The receipts, as will be seen from the accompanying table, show increases under the heading of customs, excise and post office for the month, and for all departments except miscellaneous for the four months. The betterment for the four months amounts altogether to \$2,790,982, while the expenditure is upwards of two millions less than in the same months of 1902. The table, however, takes no account of certain obligations due by the country, the settlement of which has not yet been sanctioned by the Auditor General.

The statement of revenue and expenditure in full is as follows :—

For the month of October :—

| | 1902. | 1903. |
|--------------------|----------------|----------------|
| Customs..... | \$3,207,720 72 | \$3,398,137 64 |
| Excise..... | 1,112,901 12 | 1,173,560 65 |
| Post Office..... | 300,000 00 | 350,000 00 |
| Public Works..... | 810,844 42 | 736,269 09 |
| Miscellaneous..... | 325,899 44 | 244,643 30 |
| | \$5,757,365 70 | \$5,902,610 68 |

For the four months of the fiscal year ending October 31 :—

| | 1902. | 1903. |
|--------------------|-----------------|-----------------|
| Customs..... | \$12,306,806 52 | \$14,418,173 36 |
| Excise..... | 3,947,357 11 | 4,306,284 84 |
| Post Office..... | 1,190,000 00 | 1,350,000 00 |
| Public Works..... | 2,561,590 94 | 2,768,515 26 |
| Miscellaneous..... | 938,978 91 | 893,741 61 |
| | \$20,944,733 48 | \$23,735,715 07 |

The expenditure on capital account was \$471,854.93 for October and \$1,226,763.50 for the four months, whereas the totals for last year were respectively \$1,413,237.30 and \$2,989,307.29. During October, \$265,265.31 was spent on public works, including railways and canals, and \$35,872 in railway subsidies.

The Post Office Department was advised during November of the adhesion of the colonial administration of British North Borneo to the arrangement initiated by the Honourable the Postmaster General for imperial rate on newspapers.

Foreign Trade.

An increase of about twenty-two millions in the aggregate foreign trade of Canada for the four months ending October 31, as compared with the same period of last year is the most prominent feature of the accompanying tables, supplied by courtesy of the Department of Customs. Of this total the increase in imports amounted to \$15,918,713. The falling off in exports is chiefly accounted for by the fact that very little wheat was exported, whereas October, 1902, was a heavy wheat month.

IMPORTS.

| | Month of October. | | Four Months ending October. | |
|------------------------|-------------------|------------|-----------------------------|------------|
| | 1902. | 1903. | 1902. | 1903. |

Heavy shipments of Canadian apples, especially from the maritime provinces was a notable feature of the export trade of the month. Cattle shipments were also exceptionally heavy, the total at the beginning of the month being 134,738, whereas the total for the entire season has never before passed one hundred thousand.

A commercial agent for the Dominion in Japan was appointed in view of the prospect of an increase in trade between the two countries.

Imperial Trade.

The following is an official statement of imports to Great Britain from Canada during the month of October :—

| | | |
|-------------------------------|---------|----------|
| Cattle, head..... | 20,695 | £355,746 |
| Sheep and lambs..... | 9,648 | 14,383 |
| Wheat, cwts..... | 758,800 | 266,265 |
| Wheat, meal and flour, cwts.. | 260,200 | 175,552 |
| Peas, cwts..... | 19,240 | 9,165 |
| Bacon, cwts..... | 55,041 | 142,495 |
| Hams, cwts..... | 10,526 | 27,425 |
| Butter, cwts..... | 47,289 | 221,919 |
| Cheese, cwts..... | 291,270 | 783,910 |
| Eggs, great hundreds..... | 142,274 | 50,451 |
| Horses, head..... | 13 | 460 |

The heavy importation of Canadian iron and steel into Great Britain from Canada was a subject of discussion in the former. Canadian bacon, it was reported, was also growing in favour in England.

The publication of the report of the special commissioner appointed by the Board of Trade of Great Britain on the position and prospects of British and foreign trade in South Africa showed that South African imports had increased by 250 per cent in the last ten years, excluding war stores. It is thought probable that fully \$250,000,000 will be spent in the Witwatersrand on new machinery plants within the next few years.

A good opening for increased trade in Canadian dead poultry with South Africa was announced, of which product the imports into South Africa during the past nine months have amounted to \$259,000. The winter sailing schedule of the two steamships engaged in the carrying trade between Canada and South Africa has been arranged with one departure booked each way every month.

The Canadian trade agent in Australia reported an improved demand for Canadian bread-stuffs.

The growing importance of Canadian trade with the West Indies in hay, oats and dairy products, as well as the increase in imports of sugar from the West Indies, was noted. The chief lines of Canadian manufactures which have found a market there are boots and shoes, brooms and

brushes, rubber goods, ready-made clothing, biscuits, furniture and soap. The increase in the Canadian cheese and butter trade was notable.

Domestic Trade.

Trade, wholesale and retail, was satisfactory during October, being favoured especially in the latter half of the month by the setting in of winter weather throughout the Dominion. Sales of dry goods in particular were stimulated. Paper maturing early in the month, however, was also well met. The absence of over-production and supply in the domestic market generally is regarded as of particularly good omen for the continuation of prosperous conditions. The money market was on the whole easy, the demand for the moving of the crops being less than was expected, though grain deliveries were on an increased scale, the delay in marketing being considered an additional proof of the prosperity of the farming community. The lateness of the grain movement probably accounted for the fact that bank clearings showed an increase over the corresponding month of last year amounting to \$4,975,432. Canadian securities continued to rule on a low basis, though extensive liquidation was not a feature of the month. The commercial depression which is stated to be threatened in the United States cannot, accordingly, from the record of October, be regarded as imminent in Canada.

October insolvencies numbered 75 as compared with 88 last year, and 118 two years ago. Defaulted liabilities, however, were higher than last year, being \$747,312 as against \$502,183. Manufacturing losses numbered 20 and trading losses 52. Liabilities were largest in general stores and miscellaneous. The suspension of some large saw-mills and one mining failure swelled the aggregate of manufacturing defaults.

The chartered bank statements for October showed a very heavy note circulation, the extension for the month being \$6,739,341, against an increase of \$4,963,172 in October of last year. Deposits in Cana-

dian banks also continued to grow. Call loans showed a contraction and current loans increased \$7,000,000. The Bank of Montreal's statement for the half year ending October 31, shows net profits of \$917,156 as against \$869,842 a year ago.

The trade of the city of Vancouver with the Canadian Yukon during the six months ending October 31, showed a large increase over the corresponding period of 1902, total shipments by the upper and lower river routes being 30,675 tons of freight, as compared with 24,469 a year ago.

Notes of the Month.

The assessors' figures for London, Ont., show a total of \$18,989,622, an increase of \$472,513 over last year.

The Canadian Manufacturers' Association established a railway bureau during the month, and made the appointment of a railway expert to take it in charge.

The closing of barber shops on Sundays in the city of Montreal was discussed, the local international union publishing an open letter in the press in favour of the same.

The amount of coal shipped from the lower ports to Montreal this season has exceeded that of any previous year, the amount received from the opening of navigation to November 1 being 959,098 tons.

At the first annual banquet of the Calgary Board of Trade held on November 19, it was announced that the total receipts from freight and passenger traffic in Calgary for the past year amounted to \$1,032,467, whereas in 1899 the total was \$437,892.

The number of transatlantic passengers sailing from Montreal during the past year was far in excess of any previous year. The Allan Line, for example, had a total of 38,864 passengers as compared with 29,033 last year.

At a meeting of the executive committee of the Provincial Mining Association of British Columbia, at Kamloops, on November 23, a number of important amendments

to the existing Mining Act were drafted and adopted by the committee, for presentation to the legislature.

In connection with municipal ownership, the city of Belleville will submit a by-law to the electors in January to authorize the council to acquire the local gas works and conduct them as a municipal concern. The city of Winnipeg will also submit a by-law for the starting of a municipal gas plant.

A number of mill owners and users of steam power in the counties of Drummond, Bagot and Yamaska, Que., were recently brought before the courts and fined for refusing to allow boiler inspection and neglecting to report certificates of inspection to the Department.

The Employers' Association of Toronto addressed a circular letter to its members during the month asking them to forward weekly to the secretary a full report regarding any additional labour they might require according to a special report card to be kept on file at the office of the association. It is stated as the intention of the association to place this information at the disposal of workmen seeking employment.

The lectures and classes established by the Grand Trunk Railway Literary and Scientific Institute of Point St. Charles were begun on November 27. The classes will be continued throughout the winter months on subjects covering a variety of technical knowledge. The library of the institute has now about 8,000 volumes, the annual circulation among the members being about 11,000.

In connection with the arbitration of trade disputes, the Hamilton Trades and Labour Council made a proposition to the Board of Trade to form a conciliation and arbitration board for the prevention and settlement of industrial disputes. The

Building Trades Council of Toronto also made request of the Toronto Chapter of the Ontario Association of Architects that the members of that body should co-operate with the council in securing the submission to arbitrators of matters in dispute between workmen and their employers in the construction of buildings. The council proposes that clauses should be inserted in all contracts between owners and contractors providing for the arbitration of all disputes.

The Provincial Board of Health of Ontario on November 19 adopted a number of hygienic regulations for barber shops and recommended that they be put into practice. The principal recommendations are as follows :—

No person suffering from any disease of the skin, scalp, or hair should be allowed to act as a barber.

If any contagious disease exists in a barber's family, he should temporarily change his residence.

A person suffering from any disease of the skin, hair or scalp, or who has recently recovered from any contagious disease, should not go into a barber shop.

The floor of a barber shop should be of hardwood or else covered with sound oilcloth, or some other impermeable material.

Customers should be encouraged to have their own razors, brushes, &c., and in the case of one having any disease this should be compulsory.

All razors, scissors, clippers, &c., should be disinfected by being boiled 10 minutes in soapy water or in water containing a little carbonate of potassium, or they may be held in a stream of boiling water for 30 seconds and then put in cold water for a short time and carefully dried. They may also be disinfected by being exposed for 15 minutes to the action of Lebra's solution, which consists of two parts of soft soap, one part of alcohol and a little perfume.

Brushes, combs, and strops may be disinfected by washing in sodium carbonate and then placing them in an air-tight case.

Shaving brushes may be disinfected by being placed in boiling water for five minutes.

The powder puff should be replaced by the powder blower, and a piece of alum once used to stop the flow of blood should be thrown away. An astringent pencil should be disinfected every time it is used.

Sponges should not be used at all and each customer should have his own toilet wax. Vaseline in collapsible tubes should be used.

II.—REPORTS OF LOCAL CORRESPONDENTS.

SYDNEY, N.S., AND DISTRICT.

Mr. John Moffat, Correspondent, reports as follows :—

GENERAL CONDITION OF THE LABOUR MARKET.

Except in Sydney labour has been well employed throughout the month. There is

abundance of work in the unskilled lines, but the trades are getting gradually dull. The Dominion Iron and Steel Co. discharged 250 men during November, consisting of machinists, blacksmiths, boilermakers, riggers, carpenters, locomotive engineers, electrical workers, blast furnacemen, moulders, foundrymen, steamfitters, pipe-fitters, riggers, patternmakers. Helpers in these trades have also been discharged. The remaining workmen have been notified that a reduction of wages will take effect on December 1, 1903. Labourers' wages are to be reduced 10 per cent; machinists, 15 per cent; blast-furnacemen, 20 per cent; and salaried men 33½ per cent. A delegation of the Provincial Workmen's Association, with the Grand Secretary, and Grand Officer J. J. Fraser, met Mr. Plumber, of the steel works in the presence of the Finance Minister of Canada, Premier H. H. Murray of Nova Scotia, Alex. Johnston and D. D. McKenzie, of Cape Breton county. The reduction was debated, the representatives of the Provincial Workmen's Association showing the difficulty for a labourer of Sydney, with its high rents, of living on the reduced pay. Mr. Plumber replied that the Sydney Steel Co. could pay no more. An attempt was made to have Mr. Plumber meet the employees of the steel Company, but no meeting took place.

CONDITION OF LOCAL INDUSTRIES.

Manufacturing.—Steel manufacturing is dull and probably will be until the new rail and rod mills are completed. The Sydney foundry which employs about 15 men is entering into keen competition with the few Glasgow foundries, and securing orders which formerly went out of the island. A large foundry, known as the A. C. Thompson foundry, has been running since October 24, and giving splendid results. The foundry and machine shops occupy a long two-story building, 350 by 70 feet. A milling room, moulding flour, nickeling and plating rooms, as also a dynamo, form part of the plant, and place the foundry among the best in the province of Nova Scotia. Sixteen new cottages have been built by

the company for the use of its men. About 40 men are now employed, but when the foundry gets in full running order 100 will find employment.

CONDITION OF PARTICULAR TRADES.

Building trades.—Bricklayers are not so active as last month. Carpenters and joiners find work falling off with approach of winter. Lathers and plasterers are fairly well employed. Plumbers are busy. Gas and steamfitters are experiencing a scarcity of work. Builders' labourers are busily employed.

Metal, engineering and shipbuilding trades.—Iron moulders are very dull, numbers having been discharged during the month from the Sydney steel plant. Numbers of machinists and engineers are out of employment owing to the depression in the steel trade, and the inability of the Dominion Iron and Steel Co. to proceed with the construction of its mills. Electrical workers and linemen are all very busy. With blacksmiths and boilermakers trade is dull.

Woodworking and furnishing trades.—Woodworkers are fairly well employed. Patternmakers are not steadily employed.

Printing and allied trades.—All engaged in these trades are busily employed.

Miscellaneous.—Barbers are very busy. Clerks and stenographers are fairly employed.

Transport.—Railroad conductors are all very busy. Locomotive engineers and locomotive firemen on the Intercolonial Railway are very busy, and on the Short Line actively employed. Railroad trainmen, railroad switchmen and railroad trackmen are all working full time.

Unskilled labour.—Unskilled labour is satisfactorily employed.

HALIFAX, N.S., AND DISTRICT.

Mr. F. W. Smith, Correspondent, reports as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

The labour market during the past month has been, on the whole, very active, and

while in a few cases relaxation has been manifest, it has been fully as busy as the previous month, and remarkably good for the season. A new industry, for the manufacture of biscuit and confectionery, operated by G. J. Hamilton & Sons, and employing a large number of hands, was one of the industrial features of the month; while Moir, Son & Co., whose premises were consumed by fire in February of last year, have rebuilt, and will open their new baking establishment about Christmas, when another large force will be employed. Particular activity prevails in the plumbing and pipe-fitting trade, while commercial activity is marked by the arrival of the *Pretorean*, the first boat of the winter service. The grain elevator is busily engaged with grain from the West, which is being shipped to England. Wholesale and retail trade has enjoyed a good month, and with the Christmas season is expected a particularly busy era. The quiet of the labour field is pronounced, and no movement in wages is immediately anticipated.

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—The arrival of potatoes, turnips, cabbage, &c., from Prince Edward Island, marks the only stir in this branch of industry, potatoes selling from vessel at 39 cents and 40 cents per bushel.

Fishing.—During the early part of the present month there were quite a few mackerel taken along the coast, but other branches were only about normal.

Manufacturing.—The new industry of Messrs. G. J. Hamilton & Sons, manufacturers of biscuit, confectionery, &c., which was started up this month, and that of Moir, Son & Co., who have rebuilt, were the features of manufacturing activity worthy of note this month.

Mining.—This branch of industry continues remarkably brisk, and promises to maintain its activity.

Railroad construction.—The Southwestern Shore Railway is making rapid progress, and affords much employment.

CONDITION OF PARTICULAR TRADES.

Building Trades.—The various branches of labour connected with the building trades have been fairly active during the past month, but in some cases relaxation has set in.

Metal, engineering and shipbuilding trades.—Iron moulders continue busy. Iron workers and helpers are also busy. Machinists are well employed. Boiler makers are very busy. Shipwrights and caulkers are enjoying a good season. Horse-shoers are busy.

Woodworking and furnishing trades.—Woodworkers, upholsterers, carriage and wagon builders are fairly busy. Coopers are enjoying normal activity.

Printing and allied trades.—Printers have had a fairly good month, the latter part particularly so. Pressmen are busy.

Miscellaneous.—Clerks and delivery waggon employees are busy, while hotel and laundry workers are also active.

Transport.—All branches of transport employment have been busy, especially freight handlers, longshoremen, teamsters &c.

Unskilled labour has been much employed.

CHARLOTTETOWN, P.E.I., AND DISTRICT.

Mr. F. J. Nash, Correspondent, reports as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

The general condition of the labour market during November showed little change from that of October, but the unusual prevalence of rainy and stormy weather has its natural effect on outdoor work in the present month. The building trades continued active, and the construction of new market house, and repairs and alterations to the post office gave employment about ninety men. The completion of the pneumatic work on the Hillsborough bridge, at the latter part of the month, moved a source of employment for eight

compressed air workers, twenty of whom belonged to the province, and the remainder to Quebec and New York. The men earned each about \$220 during their two months strenuous toil at this difficult and dangerous calling. There were five cases of paralysis and a large number of cases of the 'bends' while the men were engaged at the caisson, where they had to work under a maximum pressure of 44 pounds to the square inch and at a depth of 98½ feet, the greatest depth of water in any pneumatic work in America.

Work on the city streets had to be abandoned before the month was out, owing to wet weather. Commercial men report business better in November than October. Shipments of produce were heavier, and there was more money in circulation with collections easier at the banks. Trade, wholesale and retail was good.

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—With ploughing generally completed before the middle of the month farmers were enabled to devote their attention to shipping their large surplus stock of produce. Prices remained good.

Fishing.—Oyster fishing was over for the season in the third week of the month. The fishermen report a good season, with high prices prevalent.

Railroad construction.—It is expected that the first week in December will see the completion of the track-laying on the Murray Harbour branch railway from Murray River to Southport, a distance of 45 miles. Ballasting has yet to be done over the greater portion of the road.

Other industries.—Large quantities of hogs were handled at the two packing houses in the city. Prices were lower than the same month of last year, but a larger number were handled.

CONDITION OF PARTICULAR TRADES.

Building trades.—The demand for bricklayers and masons exceeded the supply. Carpenters and joiners were in great demand. Lathers and plasterers were busy.

Stonecutters, plumbers and builders' labourers had steady employment.

Metal, engineering and shipbuilding trades.—Iron moulders, iron workers and helpers, machinists engineers linemen and blacksmiths, were busy.

Woodworking and furnishing trades.—Car builders and coopers had a busy month.

Printing and allied trades.—Printers and bookbinders were busy.

Clothing trades.—Journeyman tailors and boot and shoe workers were steadily employed.

Food and tobacco preparation.—Bakers, confectioners and tobacco workers were busy.

Leather trades.—Tanners, curriers, leather workers and saddlers had a good month.

Miscellaneous.—Barbers, delivery employees and laundry workers were steadily employed.

Transport.—Locomotive engineers, locomotive firemen, railroad telegraphers, freight handlers, steamboat men, ship labourers, longshoremen, teamster and expressmen were busy.

Unskilled labour.—Unskilled labourers found November slightly quieter than October.

ST. JOHN, N.B., AND DISTRICT.

Mr. W. H. Coates, Correspondent, reports as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

The month of November continued active among several of the building trades, notably bricklayers and carpenters. The winter port business opened on November 21 with the arrival of two steamers, the Donaldson liner *Concordia* and the Canadian Pacific Railway steamer *Lake Champlain*; on the 22nd the *St. John City*, of the Furness line, and the *Manchester Trader*, of the Manchester line, also arrived. The shiplabourers report business as good in consequence. The street railway company is installing new machinery in its

power house, which will double the capacity of the plant. The York cotton mill recently added a warp-dyer to its plant. The Union Foundry, West St. John, is placing new machinery in its establishment. At the Portland Rolling Mills, the twelve and eighteen-inch mills resumed work on November 9, after being closed down for some time; and a new building, 120 x 50 feet is in course of construction for the manufacture of spikes, &c. Two buildings are in course of erection for the Maritime Nail Works—one will be 140 x 70 feet, two stories high, and the other will be 90 x 30 feet, one story high. Work on Murray & Gregory's new mill is being pushed along rapidly, and will be in running order before next season's operations begin. Several of the saw mills will shortly close down for the season, but it is thought Cushing's mill will be run all winter, as it is the only mill which has a supply of logs. The transportation companies are doing an extensive business, and the Dominion Atlantic Railway is compelled to run extra trips of the steamer *Prince Rupert* on account of the heavy local and through freight. Bank clearings for the four weeks ending November 26 amounted to \$4,131,253, against \$3,635,216 for the corresponding period last year, and \$54,109 greater than October of the current year. Closing of navigation on the St. John river has given an impetus to wholesale and retail trade, and merchants report business as active. Representatives of the several steamship lines and the ship-labourers' association, held a conference on November 5, and fixed the rate of wages for the winter at 30 cents per hour, day and night; half time will be charged for all hours lost after the men are called out for night work; 40 cents per hour for trimming grain, and double time for Sundays and holidays; ten hours will constitute a day. The city labourers will receive the summer rate of pay during the winter months—\$1.10 and \$1.40 per day. The Intercolonial Railway conductors have received an increase of 50 cents per day, and the trainmen 40 cents per day, to date from July 1, 1903.

CONDITION OF LOCAL INDUSTRIES.

Lumbering.—Prospects for lumbering this season are good. About 200 men and many horses are at work in the vicinity of Sugar Brook, ten miles above McAdam, on the Canadian Pacific Railway, and it is estimated that 3,000,000 feet of lumber will be cut. It is expected that the cut on the St. Croix will exceed 40,000,000, and that about one quarter of the total cut will be used for pulp. In the vicinity of Skin lake and Eel river about 2,000,000 feet will be cut.

Mining.—During the months of October and November six oil wells have been struck—four at St. Joseph's and two at Dover. The average depth is 350 feet.

Railroad construction.—The St. Martin's railway has recently been put in good working condition, about \$4,000 having been spent to complete this line.

CONDITION OF PARTICULAR TRADES.

Building trades.—Bricklayers, carpenters, joiners, painters, plumbers, gas and steamfitters, stonecutters and builders' labourers are enjoying an unprecedented briskness for this season of the year.

Metal, engineering and shipbuilding trades.—Iron moulders, iron workers and helpers, machinists and engineers, steam engineers, electrical workers and linemen report business as flourishing. Blacksmiths, boilermakers and sheet metal workers continue busy. Horseshoers report work plentiful.

Woodworking and furnishing trades.—Woodworkers are doing a rushing business. Shingle weavers report work dull.

Printing and allied trades.—Printers, pressmen and bookbinders state that business is improving.

Clothing trades.—Journeyman tailors are all well employed.

Food and tobacco preparation.—Bakers and confectioners are busy. Cigarmakers report work as fair.

Miscellaneous.—Broom and brushmakers say that work is good.

Transport.—Railroad trainmen, switchmen, trackmen and freight handlers are extra busy. Shiplabourers are busy. Street railway employees, teamsters and expressmen report business good.

Unskilled labour.—Unskilled labour is well employed.

DISTRICT NOTES.

Bathurst.—A new opera house was opened here on November 10. The hall will seat 700 persons, is heated with hot air and lighted by acetylene gas. It is 110 feet long and 40 feet wide.

Hampton.—A new butter factory started operations on November 18, when ninety-one pounds of butter were turned out.

Hillsboro.—A company has been organized by J. L. Peck, H. O. Steeves, Walter B. Steeves, Beecher C. Steeves and Harvey L. Steeves, with a capital of \$5,000, to establish a wood working factory.

Marysville.—The output of manufactured cotton from the Gibson mill since June last amounted to the sum of \$500,000.

Clarendon.—John A. Adams, John Bidington, Alfred Clark, and others, are entering into shingle manufacturing on a large scale this fall in the vicinity of Clarendon. A portable plant, with a capacity of 90,000 shingles per day, is being installed, and fully forty men will be employed.

Moncton.—A new hospital was opened on November 11. The main structure is 46 x 46, and the two wings each 31½ x 80 feet.

Richibucto.—Electric lights have been installed on the streets and in the stores and dwellings.

Salem.—The wood-working establishment operated by Eugene Burke is to discard its steam boiler and use the town water in running its machinery.

QUEBEC, QUE., AND DISTRICT.

Messrs. Edward Little and P. J. Jobin, Correspondents, report as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

Labour conditions cannot be regarded as having been satisfactory during October.

The closing of navigation necessitated the laying up of vessels for the winter and threw a number of crews out of employment, while the continuance of the lockout in the shoe manufacturing industry, also exercised an injurious effect on the situation. It is estimated that over two hundred of the men have left the city.

Amongst the resolutions passed by the Federated Trades and Labour Council at its meeting on the 18th inst., was one recommending the taking of steps to have a representative of the council upon the Board of Trade in order that when labour questions come up they might also be discussed and dealt with from the point of view of the workingman.

CONDITION OF PARTICULAR TRADES.

Building trades.—A number of buildings are still under construction, but not enough to provide employment for the entire body of bricklayers and masons. Carpenters and plasterers had a full month, as have also builders' labourers.

Metal, engineering and shipbuilding trades.—Iron moulders, machinists, boiler-makers and iron shipbuilders had a very good month, but the prospects for next month are not bright. Electrical workers and linemen have had a full month's work.

Printing and allied trades.—Depression continues among printers, and although a few men have left the city, there are still a number in idleness.

Clothing trades.—Boot and shoe workers had a slack month owing to the lockout in twenty factories by which about 3,800 employees are directly effected, as well as a large number of others in the leather trades, and the making of card board boxes, packing cases, &c.

Food and tobacco preparation.—Cigar-makers and tobacco workers have had a good month.

Miscellaneous.—The closing of the tourist season has caused a dullness among hotel employees.

Transport.—Railways are running on their winter time schedules, and the only

boats now running on the river are the winter boats. Ship labourers and long-shoremen have had a dull month and a number have left for American ports for the winter season.

Eight steamers of the Manchester line took general cargoes from Quebec during the summer, lifting an aggregate cargo as follows :—368,184 bushels of grain, 21,794 tons of general cargo, 1,899 cattle, 76 sheep, 1,768 standards of deals, 5,225 loads of timber. Direct steamers of the Leyland line from London lifted 770,291 bushels of grain, 28,348 tons of general cargo, 6,258 cattle, 2,940 sheep, 3,897 standards of deals, and 825 loads of timber. These figures show a large addition to the original trade secured by this line.

THREE RIVERS, QUE., AND DISTRICT.

Mr. John Ryan, Sr., Correspondent, reports as follows :—

GENERAL CONDITION OF THE LABOUR MARKET.

A slight change has taken place in the labour market, conditions being not quite so favourable as for the preceding month. Work has fallen off in the building trades. The trade has been active during the season, which fact has attracted a number of outsiders to the city. In some lines, however, men are in demand, namely, plumbers and tinsmiths. Wholesale and retail merchants report trade excellent and several firms have found it necessary to increase their staffs. There have been no changes in wages. All factories are in active operation: Harmony prevails between employers and employees.

CONDITION OF LOCAL INDUSTRIES.

Lumbering.—Lumbermen have since a couple of months made preparation for a good season, and there are altogether now on the St. Maurice nearly 6,000 men working making logs and no doubt if weather is favourable more logs than last winter will be made.

Agriculture.—Crops have been very favourable as a general rule. The fall season has been very dry and ploughing has not

been satisfactory. In fact in this district generally the farmers have great difficulty in obtaining a sufficient supply of water for their animals.

CONDITION OF PARTICULAR TRADES.

Building trades.—Only a few bricklayers and masons are working. Carpenters are a little better employed than bricklayers and masons. Plumbers are doing very well and have more than they can do. Gas and steamfitters are doing well.

Metal, engineering and shipbuilding trades.—Machinists and engineers report steady employment. Electrical workers have had a good working month. Stove muncnters are very busy. Blacksmiths have had plenty of work. Bicycle workers are very dull. Horseshoers are very busy. Jewellers and watch case makers are better employed than last month.

Woodworking and furnishing trades.—Woodworkers are quite busy. Carriage and wagon makers are very busy.

Printing and allied trades.—Printers are doing well.

Clothing trades.—Journeymen tailors and garment workers have work enough. Glove makers have plenty of work. Boot and shoe workers are well employed.

Food and tobacco preparation.—Cigar-makers and tobacco workers report conditions about the same as last month.

Miscellaneous.—Hotel, restaurant and theatre employees are quiet.

Transport.—Carters have been well employed during the month.

SHERBROOKE, QUE., AND DISTRICT.

Mr. H. Logie, Correspondent, reports as follows :—

GENERAL CONDITION OF THE LABOUR MARKET.

The condition of labour during the month has been very good. The weather conditions were very good also, and the building trades have not suffered from broken time through wet weather. The only setback to labour has been caused by the continued

dry weather and the low condition of the Magog river, on the waters of which the woollen mills depend for power. For the past two months the mills have suffered considerable inconvenience in this respect, but the situation has been more acute during the latter part of the month. Even with steam power, the Paton mills have only been able to run a portion of their plant in the day time, and a portion at night, and on several occasions they have had to close down for days at a time. The A. Lomas & Son's mill and the Magog Woollen Mills are worse off, as they have no steam power, and have been closed down for nearly a week. The lighting system is also seriously interfered with, and on several occasions the Rand drill shops and other smaller industries had to close in the afternoons for want of light. Unless rain comes soon, and plenty of it, the mills will be seriously handicapped throughout the winter. The Paton Woollen Mills are greatly inconvenienced, because while other mills in Canada are reported to be running on short time for want of orders, this company has sufficient orders booked to keep the mill running at its full capacity for several months to come. It is stated that the directors of the company are considering the advisability of installing a steam plant, and thus be independent of water. An agreement with the city council and owners of the water power on the Magog river, whereby the channel at the outlet of Lake Memphremagog will be deepened, and a foot more of the lake be secured. This arrangement would give the full power for at least 60 days, it is estimated. The cost will be borne by all the interested parties.

All classes of labour have been fully employed, and the building trades have had an uninterrupted summer and autumn. There are several business blocks and dwelling houses which are being rushed, and preparations made on other proposed buildings for the spring. The work of excavating for a foundation for the court house has taken longer than expected, and a large number of men have been employed.

The contract calls for Argenteuil granite, and the stone will be dressed during the winter months so that there will be no delay in the spring.

The machine shops are still very busy, and overtime is the rule in the Jenckes machine shops and the Rand drill works. There is a demand for good machinists. Men for the lumber camps are still in demand, but the high wages offered is not sufficient to induce men to leave the work in the city.

Wholesale and retail men report business very good, and the latter are making arrangements for a big Christmas trade.

The Customs returns for October were \$300 over the corresponding month last year.

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—Farmers have finished their ploughing, but are suffering greatly from want of water. They have to carry water for their stock long distances in many cases. Those who attend the market here meet with a ready sale for their produce at good prices.

Lumbering.—The lumbermen are busy in the woods, but complain of the scarcity of help. The swamps are frozen over, and in some instances there is sufficient snow for hauling purposes.

Manufacturing.—All lines of manufacture are fully employed. The Modern Bedstead Factory Company, which started here some months ago, is looking for larger quarters, as the present premises are inadequate for its growing business. Geo. Long & Co. will erect a large sash and door factory on the Lennoxville Road this winter, their present quarters being too limited. C. B. W. Bryant is also erecting a sash and door factory in the same locality, his business having outgrown the quarters which he rented in the city.

Railroad construction and employment.—The Canadian Pacific Railway Company has finished work on the track between Sherbrooke and Birtchton. During the summer a large gang of men were employed

who have been transferred to another portion of the system.

CONDITION OF PARTICULAR TRADES.

Building trades.—The building trades are still well employed.

Metal, engineering and shipbuilding trades.—The demand for men in these trades has been well maintained, and no competent man need be out of work: Horse-shoers report work as being plentiful, and electrical and telephone linemen have been in demand during the month.

Woodworking and furnishing trades.—These trades report work as being plentiful during the month.

Printing and allied trades.—These trades have had a good month.

Clothing trades.—Journeyman tailors have been scarce, and custom tailors cannot find a sufficient number of hands to get out their orders in time.

Food and tobacco preparation.—Bakers and confectioners are busy, and cigarmakers are well employed.

Miscellaneous.—Laundry workers report work as being but fairly plentiful.

Unskilled Labour.—This class is in good demand at good wages.

DISTRICT NOTES.

Work of construction of the new bridge at *Bromptonville*, which was to have begun during November, has again been deferred to a later date on account of the scarcity of workmen.

The men working in the Johnson Co.'s asbestos mines at *Black Lake*, went on strike, but met defeat, as the company was about to close down for the winter. As there is plenty of employment at present, the men are not in fear of idleness.

ST. HYACINTHE, QUE., AND DISTRICT.

Mr. Napoleon Samson, Correspondent, reports as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

There has been little change noticeable in the labour market. The building trades

have continued active, the construction of several dwellings having been commenced since the beginning of November. Woodworkers, iron workers and masons have had a very busy month especially in the sash and door factories, where extra work is being performed. The *Côté* boot and shoe factory was able to resume operations towards November 15, with a staff of about 75 men. This number has been increased to 90 owing to a large number of orders for spring. The managers of the *Eastern Clothing Company*, the large manufacturers of ready-made clothing, have rented for ten years the upper stories of the building at present being erected by Messrs. L. Bourgeois & Co. Wholesale and retail merchants report a fairly satisfactory month, but appearances for the month of December are more favourable. There have been no changes in hours, except those who do outside work and who work only eight and nine hours per day. Amicable relations have existed between employers and employees.

CONDITION OF LOCAL INDUSTRIES.

Manufacturing.—All local industries are fully employed and several of them have a large number of advance orders.

CONDITION OF PARTICULAR TRADES.

Building trades.—Bricklayers and masons have had a fairly good month in spite of the weather conditions. Carpenters and joiners working on buildings have been very busy. Plumbers and steam and gas fitters report full employment with promising appearances.

Metal, engineering and shipbuilding trades.—Iron moulders and machinists have been very busy.

Woodworking and furnishing trades.—Woodworkers, upholsterers and carriage makers report satisfactory conditions.

Printing and allied trades.—These trades have had a busy month.

Clothing trades.—Journeyman tailors have been busily engaged. Merchant tailors state trade has been better with them

than last year. Boot and shoe workers say that just now things are going along well.

Food and tobacco preparation.—Cigar-makers have had a busy month.

Leather trades.—Tanners and curriers state that they have experienced extremely active conditions.

Miscellaneous.—Barbers have done a good business. Furriers are very actively engaged preparing for the winter season.

MONTREAL, QUE., AND DISTRICT.

Mr. Gustave Audet, Correspondent, reports as follows :—

GENERAL CONDITION OF THE LABOUR MARKET.

The condition of the labour market has undergone but little change during the month. The building trades have had no reason to complain this year ; carpenters, joiners, bricklayers, masons, plumbers, roofers, plasterers, electricians have had an abundance of work and ordinary labour has been scarce in certain cases. The Canadian Pacific Railway Company has recommenced repairing cars and work has thus been given to hundreds of men who were laid off during the summer. The short days only allow of eight and one-half hours in outdoor work instead of nine hours as during summer. General commerce has been good. Navigation is nearly closed for the season, the passenger boats plying between Montreal and Quebec having gone into winter quarters. The steamboats *Quebec, Canada, Terrebonne, Berthier, Chambly, &c.*, have ceased their regular trips. In so far as ocean steamships are concerned several have made their last trips, which will throw a number of men out of employment until the snow falls. There have been practically no strikes during the month. In the builders' labourers strike, though some of the employers have not as yet acceded to the demands of the strikers, the men are all working as usual. An era of prosperity reigns in the city of Montreal and district owing to the abundance of work and the good salaries paid on account of the scarcity of ordinary labour.

CONDITION OF PARTICULAR TRADES.

Building trades.—At the present time all of the building trades are well occupied owing to the abundance of work. Painters are in much demand for decorating the shops in view of the Christmas and New Year's trade. Stonecutters and carpenters are scarce.

Metal, engineering and shipbuilding trades.—Iron workers, machinists and electricians have a plethora of work. Blacksmiths are also well satisfied with conditions in their line.

Woodworking and furnishing trades.—Woodworkers and cabinet makers and upholsterers do not complain. Carriage makers and polishers are extremely busy, this being their best season, as well as for the pattern makers and wood carvers.

Printing and allied trades.—All are working in these crafts and are well satisfied.

Clothing trades.—These trades have plenty to do on account of the approaching holiday season.

Food and tobacco preparation.—Cigar-makers are pressed with work.

Miscellaneous.—Barbers are fully occupied. Hotel, restaurant, theatre employees, laundry workers, &c., as usual are very busy.

Transport.—Steamboat men, ship labourers, longshoremen have little to do owing to the close of navigation and the approach of winter. Cab drivers, hackmen, carters and draymen have sufficient to do.

Unskilled labour.—There is much work for this class.

HULL, QUE., AND DISTRICT.

Mr. Rodolphe Laferrière, Correspondent, reports as follows :—

GENERAL CONDITION OF THE LABOUR MARKET.

There was a marked drop in the labour market here in the month just passed. The supply of work fell short, and there are in the city in consequence a considerable number of idle men. The cause was the suspension in part of construction opera-

tions at the cement factory. About five hundred men were employed, and half were discharged, those remaining to be further reduced shortly to about one hundred and twenty-five. It is stated, however, that this lull is temporary only, and that idle labourers will get employment in the bush. However, fifty stone masons and cutters who were deprived of work will find some difficulty in securing employment as there is practically no construction work going on. Other work, mostly in factories, is steady. What contributed, also, to the fall in the labour market during November was the closing down of saw mills in Hull, Deschênes and Aylmer. On the other hand the staff of boat builders and caulkers was slightly increased, and they will be busy till late in the spring. Grocers say that their fall business has been better than ever before. The usual credit system is still prevailing, but was better met by buyers than usual. Banking affairs were for some time in a dull condition, but are gradually improving with the fall of snow and approach of winter weather. Paper, generally speaking, is being promptly met. The supply of coal and wood is very good, at a considerable reduction in price over that of last winter's figures.

The Cement Co., of Hull, is paying its labour from \$1.50 up to \$2 per day. It is the best wages ever paid for common labour in this vicinity. Teamsters are also extra well paid.

CONDITION OF PARTICULAR TRADES.

Building trades.—As previously stated, the building trades will not be busy for some time. Stonemasons and stonecutters, for instance, may possibly be idle till next spring. The few employed get union rates of wages. Carpenters at the cement factory are getting \$2.50 a day, whilst those employed in the city are receiving \$1.75 and \$2. The schedule of wages remains the same as last month.

OTTAWA, ONT., AND DISTRICT.

Mr. T. W. Quayle, Correspondent, reports as follows :—

GENERAL CONDITION OF THE LABOUR MARKET.

The advent of winter caused some change in labour conditions, but not nearly so much as has been experienced in other years. There was a slackening in outdoor employment, but the most reliable information went to show that the trades were all active. The usual number of railway employees were laid off in connection with the reduction of staffs for the winter, and the closing of the mills threw a considerable number out of work. A goodly percentage of the millmen were sent to the shanties, thereby reducing the number out of work to a minimum.

The comparatively mild weather for the first two or three weeks of November had a weakening influence on trade, but the winter conditions which set in towards the end of the month had a reviving effect and business was considerably brisker.

CONDITION OF LOCAL INDUSTRIES.

Lumbering.—The severe winter conditions of the latter part of the month were highly favourable to the lumber trade, greatly facilitating the transport of supplies to the camps. There was a dead-lock for some time between the Ottawa lumbermen and the large English buyers over the former advancing prices for next season's cut by ten to twenty per cent. This was done on the plea that the increased cost of labour and supplies justified it. The English buyers claimed that the prices asked made the trade unprofitable to them. It was understood, however, that at the end of the month the dead-lock was broken, and some very large sales were made at an advance, averaging ten per cent. The deals and high grade lumber only is bought for the British market, the ordinary quality finding an outlet in the American markets.

CONDITION OF PARTICULAR TRADES.

Building trades.—The building trades naturally slackened with the approach of winter, but a lot of unfinished work prolonged the season somewhat.

Metal and engineering trades.—The metal trades were busy, machinists particu-

larly so. One foundry reported orders sufficient to keep the men busy until April. More machinists were needed, first-class men finding ready employment.

Woodworking and furnishing trades.—The woodworking trades were fairly active.

Printing and allied trades.—The printing trades were busy.

Clothing trades.—Tailors complained of the mild weather during the early part of the month, but later on there was no cause for complaint.

Transport.—A considerable number of railway men were laid off during the month.

KINGSTON, ONT., AND DISTRICT.

Mr. William Kelly, Correspondent, reports as follows :—

GENERAL CONDITION OF THE LABOUR MARKET.

Labour continued fully employed during the month of November without diminution in the demand for both skilled and unskilled labour. While no new industries or public works were instituted, extensive repairs, alterations and improvements are being made to public and private places. Queen's University finance committee has decided to install electric lighting into the old arts' building and other buildings which to date have had only gas fixtures. The city council by resolution, during the month, decided to allow the board of works to exceed its appropriation by the sum of \$500 in order to place street-crossings, &c., in proper condition. Mariners are busily engaged in getting their craft into winter quarters and laying them up for the season. The transportation and shipping business is extremely brisk. Clearings at local banks were in excess of last month and the corresponding period of last year. The approach of Christmas has given an impetus to the wholesale and retail trade. There were no changes in the rates of wages, hours of labour, nor important strikes, or lockouts during the month.

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—Farmers are busy making preparation for winter, hauling hay and

other produce to market, &c. Many cheese and butter factories are still working. A number will continue to work all winter in this locality.

Fishing and lumbering are not extensive enterprises here, but there is more going on than has been in some years past. *Manufacturing* continues to go on actively. *Mining* is also brisk.

Railroad construction and employment.—Considerable railroad construction is going on.

A staff of expert linemen from the east have been employed for some time past in making repairs and extensions for the *Bell Telephone Co.*, who recently acquired property here to be used for storage purposes, &c.

CONDITION OF PARTICULAR TRADES.

Building trades.—Inquiry show all lines in the building trades to be still fully employed.

Metal, engineering and shipbuilding trades.—As yet there has not been any falling off in the opportunities for employment in connection with the metal, engineering and shipbuilding trades. A few temporary delays occurred from unexpected causes during the month.

Woodworking and furnishing trades.—All branches of the woodworking and furnishing trades are fully employed.

Printing and allied trades.—Printers are busy. One of the job printing houses was moved into larger and more convenient premises during the month, the manager having acquired the same by purchase.

Clothing trades.—Clothiers report an excellent fall trade.

Food and tobacco preparation.—Those engaged in the preparation of foods, cigars, &c., continue busy.

Leather trades.—The leather trades are still rather quiet.

Miscellaneous.—Barbers, hotels, furriers, laundrymen and other miscellaneous trades report good business.

Transport.—All lines of transport workers are well employed.

Unskilled labour.—Unskilled labourers are still much in demand.

BELLEVILLE, ONT., AND DISTRICT.

Mr. Herbert MacDiarmid, Correspondent, reports as follows :—

GENERAL CONDITION OF THE LABOUR MARKET.

The labour conditions during the month of November were excellent, and there are but few idle men in the city. In fact, it has been a repetition of the previous months of this year. Everything took favourable for a continuance of these conditions. A large number of men from this city are employed at the Belleville Cement Company's Works at Point Ann, situated about five miles from the city, where work is being rapidly pushed ahead. The spur line of railway from the main line of the Grand Trunk has all been laid with the exception of about half a mile over a small bay, and as soon as it freezes this work will be completed. Five of the large kilns have been completed, as well as several other buildings, and if good weather conditions prevail it is expected that the works will be in good running order in the spring.

The only important change in the hours of working has been the order which came the second week in November, notifying the men employed in the shops and yards of the Grand Trunk that hereafter nine hours would constitute a day's work with Saturday afternoons off, making the week's work five days. As this city is a divisional point, quite a large number of men are affected, and as these men receive large salaries, the decrease in the pay roll will be considerable. It is said this arrangement is only for the winter months.

This city will vote on a by-law on January 4, as to whether the city will purchase the local gas plant, and run it as a municipal concern.

The recent purchase of the Belleville Iron and Steel Company by the Carbonneau Company has been the means of bring-

ing in a large number of skilled mechanics to the city, principally from Montreal. The new company have made extensive improvements to the plant, and it is expected that the works will be in full running order some time in December, when about 200 men will be employed. They have now about 1,000 tons of scrap iron on hand, and more arriving every day. They received one vessel load from France.

The death of Mr. E. W. Rathbun, of Deseronto, on November 24, removed the largest individual employer of labour in this district. His son, E. Walter, succeeds in the business.

There have been no strikes, lockouts or trouble of any kind reported between employer or employees during the month.

DISTRICT NOTES.

The closing down of the Cordova mines, near *Marmora*, during the month, has cast a gloom over that district, but it is reported upon reliable authority that the 250 employees will soon be at work again. The directors in England, it is said, were dissatisfied with the management, and decided to close down the mines until new arrangements were made.

The Canada Corundum Company, at *Craigmont*, now employs about 300 hands, and requires even more. They have just erected a new mill of seven stories. The Armstrong property also have a new mill, and are treating the ore before shipment.

At the 'Wolf' lead mine, at *Bannockburn, Ont.*, which was originally owned by the Meyer Syndicate, of New York, but which has within the last year been bought up by the present owners, the Ontario Mining and Smelting Company, for the past two months the miners have been working through a solid galena ore 30 inches wide, and running 85 per cent lead, the smelted or pig lead of this mine having run by assay of Messrs. I. D. Dewar & Sons, of Toronto, 90.955 pure, a very close second to the best refined lead of the finest properties on this continent or Europe. The buildings at the mine are

just about completed, the company having decided to put in a specially adapted plant.

TORONTO, ONT., AND DISTRICT.

Mr. Phillips Thompson, Correspondent, reports as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

While skilled labour is, generally speaking, in good demand in most lines, with a comparatively small proportion of old residents out of employment, there is a decided surplus of unskilled labourers, many of whom are in destitute circumstances. These are mainly recent immigrants, many of whom have come to Toronto from other parts of the country since the close of the harvest season. In some departments of skilled labour there are also more men looking for work than can obtain it at present.

A considerable number of the immigrants who arrived this season, have returned to England; others are looking for assistance from the city or the charitable societies. The condition of the labour market is distinctively less favourable than earlier in the season, and to all appearance the upward tendency of wages has been checked, and any changes in that direction in the near future are likely to be of an exceptional character. The approach of the holiday season has given a stimulus to many lines of trade and industry, buying having set in somewhat earlier than usual.

CONDITION OF LOCAL INDUSTRIES.

Manufacturing in nearly all lines continues brisk and profitable, though in some establishments there has been a slackening of production, and men have been laid off, at least temporarily. So far as staples of general consumption are concerned, however, the situation continues satisfactory, and many houses are working hard to fill orders, while the increased demand for goods, owing to the general prosperity of the country and the rapid development of the west, appears to foreshadow a continuance of steady employment for some time to come.

Agriculture.—Threshing has taken place earlier than customary in many localities, and deliveries of grain during November were heavy. The farmers have enjoyed a highly prosperous season. The chronic difficulty of obtaining the help needed during the busy season remains unsolved.

CONDITION OF PARTICULAR TRADES.

Building trades.—These report conditions very good considering the season; the weather until the last week or so of the month was favourable for out-door operations. The new contracts which have been started on recently are mostly small, however, and there will hardly be as much opportunity for indoor work throughout the winter as was the case last season. Meanwhile, all departments have been busy, plumbers and steamfitters especially. Warned by the experience of the disastrous strikes of this year, the Building Trades Council have set on foot a movement to secure arbitration in case of future disputes. It is proposed to have a clause inserted in all building contracts providing for the submission of all difficulties between contractors and employees to arbitration. The Council are endeavouring to secure the co-operation of the architects in carrying the proposal into effect. The Granite Cutters' Union will present a new scale of wages to the employers early in the new year. The present agreement expires May 1.

Metal, engineering and shipbuilding trades.—The workers in these lines are generally well employed, though the equilibrium has been not a little disturbed by continuous disputes, affecting some large establishments and an extensive influx of immigrants. A large number of union moulders are still out of employment. Machinists find trade a little quiet, and some of that trade are looking for work. Boiler-makers and blacksmiths are generally busy; the marine trade having been brisk since the close of navigation.

The Canada Foundry Company have laid off a large number of men. Jewellers and silversmiths have had a very good

month, and some of the factories are working overtime to overtake orders.

Woodworking and furnishing trades.—Trade in these branches is generally good, and the men, as a rule, well employed.

Printing and allied trades.—Reports as to the condition of the printing trade continue to be unsatisfactory. There is a considerable amount of surplus labour, largely owing to immigration, and a number of members of the union are unemployed. Bookbinders find trade a little slack at present, and have also had to compete with an influx of labour from abroad in excess of nominal requirements. The agreement of the bookbinders' union with their employers expires in June next, in view of which a movement has been set on foot to demand an increase in wages and a reduction in the hours of labour. The precise details of the changes to be asked for have not yet been agreed to.

Clothing trades.—The custom tailors have had a good month, and are well employed. The request of the city authorities in requiring the union label on clothing for firement has been declared illegal by the courts at the suit of the Crown Tailoring Company. Garment workers and boot and shoe operatives are busy. Female help in particular is in demand.

Food and tobacco preparation.—The approach of the Christmas holidays has stimulated business considerably, and there is at present abundant employment.

Miscellaneous.—Laundry workers find trade a little dull. There are continued complaints of the scarcity of domestic servants, and a project is being canvassed for the introduction of girls from Britain to fill situations as domestics and also to work in factories. The pavers and labourers employed on the construction of concrete and asphalt pavements were laid off for the season early in the month. A number of the labourers have found work in connection with railway grading. Another attempt is to be made by the city firemen to organize as a trade union.

Transportation.—Railway workers, teamsters and expressmen are all busy and will have abundant work for some time to come.

HAMILTON, ONT., AND DISTRICT.

Mr. S. Landers, Correspondent, reports as follows :—

GENERAL CONDITION OF THE LABOUR MARKET.

The cold weather having set in, the building trades and outdoor construction have abated some. Many of the unskilled workers will likely secure employment at the harvester works which now employs over 800 men. The Westinghouse Company is pushing the construction work of its new plant in spite of the weather. During the month letters patent were granted to a local company to manufacture and sell specialties in woodenware, hardware, and wire work, &c. The share capital is \$25,000 of \$100 each. The Hamilton Brass Manufacturing Company's plant was burned out, at a loss of \$40,000 and a large number of men thrown out of employment. The company has already started to rebuild.

The piano and organ workers' strike is all settled and an agreement has been signed by both parties, and those who desired have returned to work. The local Trades and Labour Council has submitted a plan to the Board of Trade asking that a joint committee be appointed to act as a conciliation board in times of labour troubles so as to avoid strikes ; it is expected that the Board of Trade will act favourably, and that the committee will be formed.

CONDITION OF LOCAL INDUSTRIES.

Manufacturing continues to be fairly busy, the iron trades, clothing, broom manufacturing, tobacco and cigars, &c., are doing favourably.

The local retail markets have secured fair prices during the month, although pork, per cwt., reached 6 cents per pound, the lowest price in four years. Some of the quotations the last of the month were as follows :—

| | Cts. | Cts. |
|-------------------------------------|------|---------|
| Butter, farmers, per lb. | 23 | to .. |
| Butter, creamery, per lb. | 25 | to .. |
| Cheese, per lb. | 12 | to 12½ |
| Chickens, per pair. | 60 | to 1 10 |
| Ducks, per pair. | 80 | to 1 25 |
| Eggs, new laid, per doz. | .. | to 25 |
| Geese, each. | 75 | to 1 00 |
| Turkeys, per pound. | 13 | to 15 |
| Beef, choice steer, per lb. | 06 | to .. |
| Beef, cow, per lb. | 04 | to 05 |
| Beef, bull, per lb. | 03½ | to 04 |
| Live hogs lean. | 4 50 | to .. |
| Live hogs, fat. | 5 10 | to .. |
| Dressed hogs, per cwt. | 06 | to 06½ |
| Mutton, per lb. | 05 | to .. |
| Yearling lamb, per lb. | 05 | to 07 |
| Spring lamb, per lb. | 06½ | to 07½ |
| Veal, per lb. | 06 | to 08½ |
| Barley, per bushel. | 45 | to 48 |
| Oats, new, per bushel. | 27 | to 30 |
| Rye, per bushel. | 49 | to 50 |
| Wheat, new, per bushel. | 75 | to .. |
| Goose wheat. | 65 | to .. |

CONDITION OF PARTICULAR TRADES.

Building trades.—The building trades were fairly well employed, including painters, plasterers, plumbers, carpenters, &c.

Metal, engineering and shipbuilding trades.—Most of the metal trades are fairly busy for this time of the year. Moulders, both stove plate and machinery, stove mounters, machinists, metal workers and horseshoers are in fair employment. Jewelers are fairly busy for the holiday trade.

Woodworking and furnishing trades.—The woodworking trades are also fairly well employed. The strike of piano and organ workers is over and was settled on the following basis :—Each side had an arbitrator and the two chose a third, all points were considered and the award was as follows :—The men get an increase in every department of from 3 to 5½ cents per hour, and to the piece workers about 15 per cent over the old prices. Formerly the men worked 60 hours a week ; this has been reduced to 55 hours. Part of the men have returned to work but others were dissatisfied with the small wages and secured situations elsewhere.

Printing and allied trades.—All printing trades are well employed.

Clothing trades.—Journeymen tailors are a little past season and are not very busy. Garment workers are very busy and all hands are well employed. Boot and shoe workers are also enjoying plenty of work.

Food and tobacco preparation.—Cigar and tobacco workers are fairly busy.

Miscellaneous.—Broom makers are very busy and one new firm has adopted the union label, making now three firms using the same in the city.

Transport.—Delivery drivers are very busy and have recently formed a local union in affiliation with the International Team and General Delivery Drivers' Union. Transport workers are fairly busy, including street railway employees. Shiplabourers and longshoremen are doing very little at present as work is slack.

Unskilled labour.—Unskilled labour is not in so great a demand as last month.

DISTRICT NOTES.

Dundas.—All manufactories here are fairly busy and workers well employed. The glove workers has been re-organized ; the moulders, machinists, woodworkers, garment workers and axe workers are fairly engaged. At a recent meeting of the town council a letter was received from Cullen & Johnson, of Toronto, asking what inducements the town would give to a concern to locate here and manufacture plumbers' brass goods, the company to guarantee to employ twenty-five men within three months, thirty-five men within a year and fifty men within two years. The company has just been incorporated with a capital stock of \$40,000. The mayor will look into this proposition.

NIAGARA FALLS, ONT., AND DISTRICT.

Mr. Ernest Green, Correspondent, reports as follows :—

GENERAL CONDITION OF THE LABOUR MARKET.

Labouring men of all classes, without exception, are well employed and a remarkably satisfactory balance exists between supply and demand. Occasionally there is a slight unsatisfied demand for men but it is never of pressing nature or of long duration. Every branch of industry continues active and in this respect there is nothing

of importance to report since last month. Wholesale and retail trade is active and healthy. Railway business shows the usual autumn activity. With the exception of the cut in wages of labourers on the power works there are no changes in wages or hours; this reduction was from $17\frac{1}{2}$ cents to 15 cents per hour.

The most serious strike in the history of the place began on November 2 as a result of the above cut in wages. The strikers proper numbered about 200 but they were joined by hundreds of men who were forced to quit work till the total number affected by the cut who quit working numbered fully 850. The entire power development works were tied up for three or four days by the strikers' violence. A few days after work was resumed full gangs were again at work. Over two hundred men went away but were quickly replaced. The strikers were Poles, Hungarians and Italians. No unions were involved.

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—Farmers experienced a shortage of labour through the season now closing. The end of the busy period diminishes this demand for the present but it is likely to be evident again in the spring.

Manufacturing.—Factories generally report business satisfactory.

Railroad construction and employment.—The number of men employed in all departments of railway work is rapidly increasing on account of the winter rush of freight. The several large wine manufacturing concerns in this district have closed a successful season and fruit canneries and evaporators report having handled large quantities of fruit and vegetables.

CONDITION OF PARTICULAR TRADES.

Building trades.—The constant rush of business in the building line would seem to indicate a shortage of labour in these trades but the fact that all work is completed without unusual delay shows that there is a sufficient force of men to handle it.

Metal, engineering and shipbuilding trades.—Supply and demand for labour are

nicely balanced and conditions are very satisfactory.

Woodworking and furnishing trades.—Coopers have had a remarkably busy season; there has been a most unusual shortage of apple barrels.

Printing and allied trades.—Printers are all employed at satisfactory wages. All shops are working with full staffs.

Clothing trades.—The clothing trades are busy. Coat, pants and vest makers have been advertised for recently.

Food and tobacco preparation.—Bakers, butchers and cigarmakers find steady employment.

Transport.—At this time of the year the Wabash, Michigan Central and Grand Trunk railways always take on large additional forces of train, engine and yard men of all classes to handle the great volume of freight diverted to rail routes by the close of lake navigation.

Unskilled labour.—Local unskilled labour was not affected by the labourers' strike on the power works. The strikers who left the place and the men who took their places were foreigners and the effect on local men was not noticeable.

ST. CATHARINES, ONT., AND DISTRICT.

Mr. Jas. A. Wiley, Correspondent, reports as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

During the month of November the general condition of the labour market has been very satisfactory, comparing very favourably with last month, and the corresponding month of last year. Great activity has prevailed in all branches of the building trades. Contractors have all the work they can handle before cold weather sets in. Freight traffic has been unusually heavy, almost in a congested condition, taxing the railways to their fullest capacity. Business men report business very good. Bankers state that business in their line was never better, deposits being larger, and more numerous than in years past. The money market, locally speaking, is in

a very healthy condition. The manufacturers are busy, with full complement of hands, and working full time, to fill orders, with one exception, viz., the Whitman & Barnes, manufacturers of farm implements; in this case it is only a temporary reduction of hours of labour. In the farming community, crops of fruit and grain have been heavy, with good prices, in fact in many instances high, while labour has been scarce, not equalling the demand, even though greatly increased wages were offered. There have been no strikes or lockouts during the month. One or two minor differences have been settled by a conference of employers and employees.

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—Heavy crops and fine weather have favoured the farmer, and with the exception of a scarcity of farm labour, general prosperity is reported.

Manufacturing.—Manufacturers, as a rule, are working full or overtime to fill orders. The canning factories have been very busy giving employment to a large number of hands. They are working principally on apples, which have been a heavy crop here this year.

Railroad construction and employment.—The Niagara, St. Catharines and Toronto Railway Company has completed the construction of the line along Ontario street, connecting the two lines of their service.

CONDITION OF PARTICULAR TRADES.

Building trades.—All branches of the building trades are well employed at fair wages (union) and prospects are good.

Metal, engineering and shipbuilding trades.—These trades report trade as good. Machinists and linemen are very busy.

Printing and allied trades.—Printers, pressmen, electrotypers, and bookbinders, have been fully employed.

Clothing trades.—Journeyman tailors are very busy, and report trade as brisk this month.

Food and tobacco preparation.—Bakers and confectioners, cigarmakers and tobacco workers report a good month's work.

Miscellaneous.—Barbers, clerks, delivery employees, and laundry workers report steady employment for the month.

Transport.—Railroad trackmen and freight handlers have been extra busy. Street railway employees, carters and teamsters, have been fairly well employed.

Unskilled labour.—Unskilled labour has found steady employment, with a slight demand for more labour.

DISTRICT NOTES.

Port Dalhousie.—A number of buildings in the course of construction is giving plenty of work to the building trades. Nearly all the old hands are back in the rubber factory and are working full time.

Merritton.—All labour has been well employed for the month.

Thorold.—The local labour market is in a very healthy and prosperous state.

BRANTFORD, ONT., AND DISTRICT.

Mr. J. C. Watt, Correspondent, reports as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

The past month in some respects does not compare favourably with the preceding month, or the corresponding month of last year. The Bailey Cutlery Co., capitalized at \$90,000 and employing 50 men, has closed down and may not resume, and the Massey-Harris Co. is working 9 hours a day. During the entire month much skilled and unskilled labour, from the United States, and different parts of Canada, reached the city. A few found employment. In the building trades much work is little more than commenced, and men in those vocations will have steady employment for some time if the weather is favourable. The Waterous Engine Works shut down three days for stock-taking. The plough factories continue to be busy and much overtime has been worked. Large shipments have been made during the month. Colder weather

would increase the trade of merchants, although the month has been satisfactory. There have been no trade disputes during the month.

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—Fall work in the rural districts is practically completed. The dry fall made it very difficult to plough the clay land and rain toward the latter part of the month was welcomed. The root crop, much of which was harvested during the first week of the month was an average crop, suffering less from rot than was at first expected.

CONDITION OF PARTICULAR TRADES.

Building trades.—Bricklayers and masons have still a great amount of unfinished work to complete, inclement weather interfered during the latter part of the month. Platers, plasterers, carpenters and painters, have all been steadily employed. Plumbers, gas and steam fitters have had a full month.

Metal and engineering trades.—Iron and brass moulders, coremakers and machinists, have worked full time, but there is no demand for men. Electrical workers have had a brisk month. Metal polishers and stove mounters, blacksmiths and boilermakers have all worked a full month. Sheet metal workers have had an exceptionally busy month.

Woodworking and furnishing trades.—Carriage and wagon makers have been busy; some have worked overtime. Pattern makers and millwrights have had an average month. All local coopers have been employed.

Printing and allied trades.—Printers and pressmen have had steady employment. A linotype composing machine has been added to the equipment of the Brantford *Expositor* Printing Co. The working force will not be reduced.

Clothing trades.—Journeyman tailors have had a remarkably good trade for such a mild month.

Food and tobacco preparation.—Bakers and confectioners report steady employment. The price of bread has advanced 1

cent per loaf, 2-pound loaves now selling at 6 cents or 18 loaves for \$1; 1½-pound loaves at 5 cents or 22 loaves for \$1. Cigarmakers and tobacco workers report an average month and all local men employed.

Miscellaneous.—Barbers, clerks, delivery employees, have had steady employment. Furriers report a brisk fall trade. Hotel and restaurant employees have had steady employment. Waitresses are in demand. Laundry workers have all had steady work.

Transport.—Freight handlers have been working overtime. Street railway employees have been fully employed. Trackmen, especially on the Grand Trunk Railway, have been very busy. Carters and draymen, teamsters and expressmen have had a full month.

Unskilled labour.—There is no demand for more men.

DISTRICT NOTES.

Paris.—The building trades have been active. The new public library will be completed next month. Labour generally has been well employed.

Blue Lake.—The plant of the Portland Cement Co. is nearly ready for operations and will afford employment to a number of men.

St. George.—Local labour is pretty fully employed. The agricultural factory has been running overtime.

GUELPH, ONT., AND DISTRICT.

Mr. O. R. Wallace, Correspondent, reports as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

Labour has been steadily employed during the month. The only time lost by any number of men was occasioned by bad weather affecting the building trades and one large shop shutting down for a week to take stock. Quite a number of men who have done outdoor work during the summer have found factory employment, which has tended to meet any slight scarcity of unskilled workers which has existed during the summer. A feature of the month has been the departure of a large number

of the Italians employed on sewerage work and at the tube mills. Their places have been taken by local labourers. A number of Scotchmen have also arrived to work on tapestry carpet in an addition to the carpet works, and are the first of their trade in Canada. The season's erection of buildings will amount to over \$400,000, the largest in many years. Retail trade of all kinds is extra good. There have been no changes in wage rates during the month and there is also no unrest among any class of workers over wage matters or conditions.

CONDITION OF LOCAL INDUSTRIES.

Manufacturing in all lines has been good. In some shops where there has been a scarcity of unskilled help men who have been at outdoor work have been given employment.

CONDITION OF PARTICULAR TRADES.

Building trades.—The building trades have been affected during the month by the severity of the early winter. There is still a large amount of finishing to do. Bricklayers and masons have worked all the time it was possible to set brick and stone during the month. Carpenters have had a good month with a lot of work yet ahead. Painters and paperhangers had only a fair month. Stonecutters have worked as the frost permitted, but will soon be under shelter.

Metal and engineering trades.—Iron moulders have had a good month. There is a demand for both union and non-union men in this trade. Ten cents over the rate (\$2.60) is being paid to some men in one shop. Machinists and machinists' helpers have had a good month, with the exception of one large shop where stock-taking was in progress for a week.

Woodworking and furnishing trades.—Woodworkers report a steady month's work. Upholsterers are extra busy. Carriage workers and trimmers are fairly well employed on cutters. Piano workers are busy and new men have been taken on. Organ workers are slack and are temporarily working nine hours a day. Coopers are all

steadily employed on flour and beer barrels. One staff of woodworking machine-men are working during the hours of natural light only, owing to their power plant being incapable of supplying power for heavy machinery and lighting purposes at the same time. It has been found impossible to get a new boiler plant for some time back, and the present conditions are expected to continue until spring.

Printing and allied trades.—Printers have worked considerable overtime in the job branches of the trade.

Clothing.—Tailors have had an extra good month.

Food and tobacco preparation.—Cigar-makers are fully employed.

Miscellaneous.—Barbers, clerks, hotel employees, delivery employees and bakers, have all had a steady month, the winter being the best season for these trades here. Textile workers have had a steady month. Carpet weavers are busy and a large number of skilled workmen have recently come out from the old country to work in the addition to the factory here.

Unskilled labour.—The demand for unskilled labour for outdoor work is about over for the season, with the exception of some sewerage work yet to be done.

STRATFORD, ONT., AND DISTRICT.

Mr. J. T. Carlin, Correspondent, reports as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

All classes of labour were well employed during the month and a busy winter season in most lines is expected, with the exception of the building trades whose work has slackened. The new Kalbfleisch factory which has been in course of erection for some time is at a standstill waiting for material, also the Young Men's Christian Association's new building, owing to a scarcity of pressed brick. The same activity prevails in the local industries as during October, with no change in the working hours or rate of wages. A particular feature of the labour market in this

city is the scarcity of domestic help on account of so many being employed in the factories. Domestics are getting from \$8 to \$12 dollars a month.

CONDITION OF LOCAL INDUSTRIES.

Manufacturing.—All manufacturing establishments are running to their full capacity, this month, to keep up with the demand as they are well supplied with orders.

Railroad construction.—There is no railroad construction at present in this locality.

CONDITION OF PARTICULAR TRADES.

Building trades.—The building trades on outdoor work are not so active, while painters, plasterers, paperhangers and plumbers are fairly well employed.

Metal and engineering trades.—Iron trades are well employed, machinists especially. Electrical workers, blacksmiths, boilermakers, sheet metal workers and horseshoers have had plenty of work.

Woodworking and furnishing trades.—Factory workers are steadily employed this month and prospects are for a busy winter.

Printing and allied trades.—Printers and pressmen are busily employed, especially 'ad.' and job printers.

Clothing trades.—Journeymen tailors and garment workers report trade as good; no idle hands during the month.

Food and tobacco preparation.—Bakers and confectioners and butchers have their usual amount of work in this month, while cigarmakers report trade good.

Leather trades.—Harnessmakers report having plenty of work.

Miscellaneous.—Barbers, clerks, delivery employees and laundry workers had steady work with satisfactory condition.

Transport.—Railroad men report work plentiful, especially trainmen had a very busy month. Cabmen, draymen and teamsters have had plenty to do.

Unskilled labour.—Unskilled labour is generally well employed in all branches.

DISTRICT NOTES.

St. Mary's.—The flax mill resumed operations after being closed down for some

time owing to the men going out on strike. They refused to work for lower wages than they are at present getting. The Maxwell works, which is undergoing repairs, will resume work about December 15, or as soon as the new engine is set up.

LONDON, ONT., AND DISTRICT.

Mr. A. Woonton, Correspondent, reports as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

With the advent of winter, outside work has eased up to a considerable extent, and somewhat earlier than the two preceding years; but it has given an impetus to retail business generally, and more especially to the clothing trades. There has been about twelve miles of new cement sidewalks laid here this year, but this work has been discontinued owing to the cold weather setting in. A favourable feature however, has been that the majority of those laid off from outside work have secured work inside. The foundries and factories continue to experience extra busy conditions. On the railroads traffic is about normal. Four of the striking machinists and boilermakers of E. Leonard & Sons were arraigned in the police court for picketing, but at the end of the month the case was still unsettled, although the magistrate stated that he would send a number of the cases to a higher court. The boilermakers at Leonard's continue their strike, and no new men have yet been engaged.

The price of coal oil has risen from 18 cents to 20 cents, and the milk dealers increased the price of milk from 5 cents to 6 cents per quart; eggs have risen from 20 to 26 cents a dozen.

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—The farmers of this district have experienced considerable difficulty in securing apple barrels in which to ship the apples; and the price of barrels has risen to 60 cents each. They could be bought two years ago for 25 cents. North-corn Spies are bringing from \$1 to \$1.50 per barrel on the local market. Turkeys are

scarce, and are selling at 10 cents a pound for live birds.

Railroad construction.—The Grand Trunk Railway Company has completed the double tracking of their line between Sarnia and Wyoming, and trains are now running over it.

CONDITION OF PARTICULAR TRADES.

Building trades.—Bricklayers and masons are not as busy as they were at this time the last two years, and they expect a long idle winter; a call has been issued for the second provincial conference of the Bricklayers and Masons' International Union, Ontario branches, at Brantford, December 1. H. Rymill and W. Toll are to represent London. Carpenters continue to be well employed. Lathers, plasterers and painters are becoming slack, and a number of them are idle. Plumbers, gas and steamfitters are very busy. Builders' labourers are all working, although they expect soon to be idle. Wm. Burleigh, secretary of the local builders' labourers' union, has been elected secretary of the Builders' Labourers' International Union of America.

Metal, engineering and shipbuilding trades.—Moulders are exceptionally busy. McClary's moulders expect all to get into their new foundry at the beginning of the year, as the power house there, is completed. Machinists are very busy. Metal polishers and stove mounters have been working overtime some.

Woodworking and furnishing trades.—Carriage and wagon makers are doing a rushing business. Car builders are busy. Coopers are in demand, and have more work than they can do.

Printing and allied trades.—All workers in the printing trades are exceptionally busy, and during the month the different job offices have been adding to the staffs, and overtime is the rule in almost every office. A number of printers who arrived in the city have secured work, and there is no person connected with these trades idle in this city.

Clothing trades.—Journeyman tailors are exceptionally busy; the early coming of cold weather has caused an extra demand for overcoats and winter clothing; they are working overtime. Garment workers and boot and shoe workers report trade as fair.

Food and tobacco preparations.—At the two local biscuit and confectionery factories the employees are working until 10 o'clock five nights and enough hands cannot be secured to get out the orders for Christmas, although \$4 per week and extra for overtime is being offered to girls and boys for this work.

Cigarmakers continue busy, and there are still some situations open in the city.

Transport.—Railway train hands report traffic as about normal. A number of section hands have been laid off all through this district, on the Canadian Pacific Railway, and the construction train has discontinued for the winter.

ST. THOMAS, ONT., AND DISTRICT.

Mr. A. Roberts, Correspondent, reports as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

The past month while showing a general activity in industry has nevertheless been marked by signs of a decreased demand for labour. General outside work has been curtailed. On November 18 the Michigan Central Railway Company laid off 48 men employed in the mechanical department of the local car and locomotive shops. The reduction represents 10 per cent of the staff and the occurrence is usual during winter for economic reasons. Transportation of through freight is brisk and traffic hands are making good time. In financial circles several changes occurred during the month. An agreement for the amalgamation of the Southern, Star, and South-western Loan Companies of this city has been consummated, and went into effect on November 25. The Dominion Bank of Canada announce the opening of a branch in this city about December 1, and it is also announced that negotiations are about com-

pleted for the establishing of a branch of the Huron and Erie Loan Company of London. It is probable that the city will receive an impetus in industrial activity by the locating of the Père Marquette Railway Companies' repair shops at this point. An agreement has been arrived at whereby in consideration of a \$20,000 bonus, with exemption from taxation for ten years, excepting for school purposes and water supply at six cents per 100 cubic feet, the company agrees to erect repair shops at a cost of \$125,000 for buildings and equipment, and employ not less than 100 hands. A by-law to this effect will be submitted to a vote of the ratepayers at the time of the municipal elections, and if ratified, the company agrees to have the shops completed within nine months from April 1st, 1904.

In the matter of wages and hours, the Typographical Union has effected an agreement with their employers to take effect November 16th and last for at least one year. The agreement was largely a compromise, terms, and the concessions granted were mainly in the line of adjustments. About 15 men have their work day reduced from 9 to 8½ hours. And about 10 men receive an increase of pay averaging in the aggregate to about \$1.50 a week. Machine operators who formerly worked by the piece are changed to weekly wages system.

CONDITION OF LOCAL INDUSTRIES.

Manufacturing.—Manufacturing industries continue to enjoy favourable conditions, all local concerns are busy. The Erie Flour Mills have been running 24 hours per day during the past month. The local broom, brush and woodware factory report a better supply of labour than during the summer when the output was curtailed for lack of labour in the factory line of work.

Railroad construction and employment.—Railroad construction in track work is more lax than during the summer, the usual reduction of staff has been made.

CONDITION OF PARTICULAR TRADES.

Building trades.—The building trades are fairly well employed for this season of the year. Bricklayers have little or no work. Carpenters have a considerable amount of inside work. Plumbers are busy while painters and decorators are quite slack.

Metal and engineering trades.—These trades are quite busy. Moulders, machinists and boilermakers report plenty of work.

Woodworking and furnishing trades.—The Woodworking and furnishing trades report steady employment. Wood benders and turners are very busy at the local factories.

Printing and allied trades.—Printers are busy, job work is brisk. As mentioned before the printers' union has revised their scale of prices, the principal points of their new agreement are as follows :—

Hand scale.—Job printers and compositors, ad-men, make-up, &c., shall receive \$9 per week and overtime at rate of 25 cents per hour. Foremen of job rooms and news rooms, \$12 per week with a raise to \$13 per week at the end of six months from date of agreement.

Machine scale.—Monoline and typograph operators not less than \$12 per week, overtime at rate of 30 cents per hour. Operator-machinists, \$13 per week, overtime 30 cents per hour for composition. Hours of work on all typesetting machines and for ad-men, make-up, &c., in news rooms shall be between 7 a.m. and 6 p.m., eight and one-half hours to constitute a day's work. Hours of work in job rooms, between 7 a.m. and 6 p.m., nine hours to constitute a day's work. On all Sundays and statutory holidays, work to be paid double time and on municipal holidays, overtime. Other minor arrangements regarding regulation of apprentices, measuring type, &c., are contained in the agreement.

Clothing trades.—In this line work has been plentiful during the past month.

Food and tobacco preparation.—There are no changes to report in these industries. Trade is normal.

CHATHAM, ONT., AND DISTRICT.

Mr. John R. Snell, Correspondent, reports as follows :—

GENERAL CONDITION OF THE LABOUR MARKET.

There is little change to note in industrial conditions over the preceding month. The labour market has been quite as active and the demand for labour quite as great, nearly all classes of workmen being fully employed. At present it is almost impossible to get carpenters to do the work required, and throughout the building trades the prospects are good for steady employment for some time. Most of the paving, sidewalk and sewer contracts will have been finished this month, so there will not be so much demand for labour of this class in the near future. Transportation continues active both by rail and water; lumber dealers are getting their yards filled up before the close of navigation; train loads of sugar beets are being shipped from here to the beet sugar factories in Wallaceburg and Dresden. Wholesale and retail trade continues active. The hours of labour in the building trade have been shortened from ten hours to eight and one-half hours, the rate of wages per hour, viz., 20 cents per hour. The coopering trade continues exceptionally brisk. The labour market is free from unrest.

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—Farming operations are about over for the season; farmers are busy marketing their crops.

Manufacturing.—Activity prevails in all departments of the manufacturing industry; in some shops men are working overtime.

CONDITION OF PARTICULAR TRADES.

Building trades.—Bricklayers and masons report work fairly good. Carpenters and joiners have plenty of work. Painters and decorators are fairly well employed. Plumbers, gasfitters and stonecutters are very busy.

Metal and engineering trades.—Iron moulders, iron workers, machinists, engi-

neers and electrical workers have all the work they can do.

Woodworking trades.—Carriage and wagon makers have plenty of work. Coopers are exceptionally busy.

Printing and allied trades.—Printers and bookbinders have steady employment.

Clothing trades.—Journymen tailors report trade exceptionally good.

Food and tobacco preparation.—Bakers, confectioners and cigarmakers have steady employment.

Transport.—All men employed in transport work are busy.

Unskilled labour is not quite so much in demand as last month.

WINDSOR, ONT., AND DISTRICT.

Mr. D. Mitchell, Correspondent, reports as follows :—

GENERAL CONDITION OF THE LABOUR MARKET.

The labour market continues in about the same general condition noted for some months back. There is no lack of employment for all lines of trade. Owing to the fine weather the outside trades are working full time and there are as many buildings going up at the present time as there were at any time this summer. All connected with the building trade are fully employed. The city council has plans ready for remodelling the central school and making a city hall out of it; they expect to let the contract this week, amounting to \$15,000. Commercial operations continue active. Wholesale and retail trade is good and merchants are looking forward to an unusually large Christmas trade. There was a change of wages in the Windsor Turned Goods Company. The company has reduced the wages from 5 to 10 per cent. There are from 60 to 70 hands employed outside of this firm. There were no other changes to note in the rates of wages or hours of labour.

CONDITION OF PARTICULAR TRADES.

Building trades.—Bricklayers and masons are fully employed and have plenty of

work on hand for the present. Carpenters, joiners, lathers and plasterers are all very busy. Painters and paperhangers report plenty of work. Plumbers, gas and steam fitters and builders' labourers have all the work they can do.

Metal, engineering and shipbuilding trades.—Machinists are well employed. Electrical workers, linemen, iron workers and blacksmiths have had a good month.

Woodworking and furnishing trades.—Woodworkers, carriage and wagon makers and coopers are all fully employed.

Printing and allied trades.—Printers are busy with no idle men.

Clothing trades.—Tailors have had a good month's work.

Food and tobacco preparation.—Bakers, confectioners, butchers and meat cutters report a splendid month. Cigar and tobacco workers are very busy and in some cases are working overtime.

Miscellaneous.—Barbers report plenty of work; two new shops have started this month.

Transport.—Business in connection with the various railways is very active.

Unskilled labour.—The demand for unskilled labour is not so brisk, owing to the approaching completion of the street paving and the cement sidewalks for the year, but there are very few idle men.

WINNIPEG, MAN., AND DISTRICT.

Mr. John Appleton, Correspondent, reports as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

November has witnessed a very extensive labour movement in Western Canada. From the railroad construction camps, and from the farm, thousands of workmen have migrated to the city. The early advent of winter, a few weeks earlier than usual, put a stop to railroad construction, and outside work on the farms. This movement usually extends from the beginning of November to the early part of December, but the third week of the former month this year saw the

completion of the movement. Large numbers of the workmen are crowding the employment offices making their winter engagements for work in the woods. This is the principal source of employment for the winter months, and the district between Rat Portage and the Rocky Mountains will absorb approximately ten thousand men.

Building operations have been practically suspended, except such as can be carried on in new buildings, the roofs of which were put on before the sudden advent of winter. This occurred about the third week in November. With the exception of deep sewer work all civic undertakings are now being operated by small winter staffs. Several hundred workmen being discharged during November. The quarry operated by the city usually employs about 150 men during summer, but in winter the staff is reduced to approximately 30. Street paving and the asphalt plant is entirely suspended.

No new manufacturing enterprises have actually commenced during the month, but many are pending. Their materializing largely depends upon the supply of power at a price that will be practicable. A project to supply this is under way at the Winnipeg river, near Lac du Bonnet, about 60 miles from the city. Already some \$300,000 has been expended in developing this source of hydraulic power. Next summer an additional outlay of \$1,200,000 will be made, and in all probability electric energy will be supplied at a very much lower cost than at present. In addition to this probable power supply the city council are submitting a by-law to the ratepayers to authorize the issuance of debentures, the proceeds of which will be applied to the development of power on the Assiniboine river. The cost of such undertaking is estimated by the city engineer to be \$500,000. With the exception of those compelled by climatic conditions to cease operations in the winter, all other trades are busy. Commercial activity, measured by bank clearings and the transportation returns, shows no material signs of abating. The annual grain blockade, or failure to carry the staple product of the west to the market as rapidly

as delivered to elevator and directly to cars by the farmers themselves, has interfered with collections, but has not affected trade. At the time of writing the total wheat shipments are about 2,500,000 bushels less than last year for the corresponding period, and with the elevators filled and the closing of navigation a somewhat serious position was created, and this is causing some anxiety in commercial circles. Ordinary retail trade is exceptionally good. Circumstances combining to stimulate retail trade in the city are the sudden advent of winter weather and the consequent migration to the city of thousands of labourers with the summer's earnings in their pockets.

October and November were characterized by one or two strikes, none of which seriously interfered with business.

Wages in skilled work have been maintained and in some cases advanced, but the number of men offering for bush work has had the effect of slightly weakening the price of such. What ordinary manual labour is required to be done in winter, is keenly sought for by men anxious for work.

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—Early in November the farmers took advantage of favourable weather for ploughing, and a large acreage was prepared for crop in the spring.

Lumbering.—Work in the woods commenced earlier than usual this year, and a larger number of men are employed than usual. The wages for the largest classes of such workmen are as follows: Axemen, \$26 to \$35 per month; hewers, \$35 to \$40; logging, \$26 to \$35. For chopping, \$1 per cord is the price generally being paid.

CONDITION OF PARTICULAR TRADES.

Building trades.—Bricklayers and masons are out of work until spring. Carpenters are well employed, especially on inside work. Other trades will only get intermittent work until spring. Plumbers, gas and steamfitters are busy and will be during the whole of the winter.

Metal, engineering and shipbuilding trades.—Iron moulders, machinists, &c.,

continue to be fully employed, and prospects in their particular trades are excellent.

Woodworking and furnishing trades.—Sash and door factories have a lot of work ahead of them, and the winter will not interfere with their work.

Printing and allied trades.—Printing and allied trades continue to enjoy good business and their prospects are excellent.

Clothing trades.—Garment workers and tailors are busy and enjoy continued good demands on them.

Food and tobacco preparation.—Bakers and tobacco workers, as last month, are satisfied with conditions of trade.

Leather trades.—Saddlers and leather trades have all the work they can cope with.

Miscellaneous.—Miscellaneous occupations are made precarious to some extent by the pressure of immigrants who shelter in the city during winter. Where skill, however, is necessary, and experience, the competition from such a source is not material.

Transport.—Some of the transport staffs have been reduced in numbers. This takes place every fall. In view of the large amount of work that is necessary, the workmen laid off do not take it very kindly.

BRANDON, MAN., AND DISTRICT.

Mr. S. P. Stringer, Correspondent, reports as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

The favourable conditions of the weather during the first week of November, kept all men employed in the building trade busy. Those engaged in thrashing operations in this district have also been busy up to that time. Threshing operations throughout this province have since been completed. A large number of men who came from the eastern provinces have returned home. There has been quite a number of men coming into this city, and the towns throughout the district, looking for work.

A citizen of Brandon advertized in the *Winnipeg Press* for a man to look after cat-

tle on his ranch for the winter months, and had one hundred and fifty applications inside of two days. At present there are quite a few idle men in the city. Owing to the change to winter weather at the end of the month, all outdoor building operations have stopped, but there is a large number of carpenters working on buildings that were roofed before the weather changed. With the exception of a new mill, there has been no new industry started. The Hanbury saw-mill has closed down for the winter months. From a commercial point of view and from the extent of trade in transportation and shipments, trade seems to be very active at present. Wholesale and retail merchants report trade very good. Some firms say that the present trade exceeds that of any previous year. There has been no change in rates of wages or in hours of labour.

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—The reports from this district show that although the yield of grain has not been as heavy as that of last year, yet farmers are well pleased with the result of the year's crop.

There was considerable difficulty felt during the taking off of the crop, owing to the unfavourable conditions of the weather. But the bettered condition of the weather set everything to rights during the month of October.

No delay was made in threshing, and the amount of acreage ploughed will exceed any previous year. The movement of grain has not been very extensive, owing, it is thought, to a slight drop in prices and also owing to the majority of farmers taking advantage of the splendid weather for fall ploughing. It is estimated that there has been more wheat moved out from the branch lines this year than there has been any previous year. All the elevators throughout the district are reported to be full, and there is a steady shipment of grain into the Brandon elevators, particularly into the one attached to the flour mill, which is doing a very heavy business.

Lumber.—The lumber trade is a little slack at present, owing to the close of the building season.

Manufacturing.—Sash and door factory and planing mills, are a little slack; machine shops are reducing the staff. The binder twine factory has reorganized and is asking for letters patent to establish warehouses throughout the district and other points in Manitoba, under the name of the Consumers Co-operative Company, Limited, for the manufacture of rope, sacks, and such articles as may from time to time be deemed advantageous to the company. There were six hundred shareholders represented at the last meeting.

Railroad construction and employment.—Railroad construction is about completed for the season, owing to the winter having set in. A very bad accident occurred on the Kirkella branch, owing to an open switch. A work-train ran into a boarding car and killed three men, two Galatians and one Englishman.

Other industries.—The Cruithers Tanning Company has increased its staff of men. The company is now carrying on an extensive trade in furs and skins. The work done by this firm is by a special process. The firm is continually increasing its staff so as to keep up with the demand for the many tons of goods that they manufacture.

CONDITION OF PARTICULAR TRADES.

Building trades.—Bricklayers and masons are through for the season. Carpenters and joiners are steadily employed. Lathers and plasterers are still employed finishing contracts. Painters'—trade good. Plumbers'—trade very good. Stonecutters are working overtime.

Metal and engineering trades.—Iron moulders report trade slack. Machinists in contract shops are slack; in railway shops they are working overtime. There are no openings in this line. Linemen find trade somewhat slack. Blacksmiths and boiler-makers report trade good, with no openings. Jewellers and watchmakers are well employed.

Woodworking and furnishing trades.—Varnishers and polishers are dull.

Printing and allied trades.—Printers are busy.

Clothing trades.—Journeyman tailors report trade very good. With boot and shoe workers' trade also is good.

Food and tobacco preparation.—Bakers and confectioners are very busy. Butchers and meat cutters are busy.

Miscellaneous.—Ice-cutters and drivers are very busy, with clerks and stenographers' trade is good, but without openings. Furriers report trade very good. Steam and hand laundry workers are very busy.

Transport.—Men engaged in the various departments of railroad are fully employed, particularly those running on regular trains. Delivery employees are very busy.

Unskilled labour.—There is a large number of men out of work in this city and district, and no doubt will continue so till spring opens.

DISTRICT NOTES.

Reports from all parts of the district go to show that industrial conditions are very satisfactory. The best evidence of the prosperity, not only of this district, but of the province generally, is shown in the erection of places of business, new dwelling houses and additional elevator capacity in every town and shipping point. The town of *Arcola*, which is only a few years settled, has now six elevators and is getting to be an important business centre. The business done by land companies in this district exceeds that of any previous year. There has been a steady advance in land values. This also applies to the territories.

ROSSLAND, B.C., AND DISTRICT.

Mr. R. A. Laird, Correspondent, reports as follows:—

DISTRICT NOTES.

The month of November witnessed no radical change in conditions affecting labour. The entire interior of British Columbia has been absolutely free from any disturbing influences, the tendency has

been in the direction of increased employment of labour, with the possible exception of the lumbering industry in which slight curtailment is reported; and the outlook for the winter now fairly commenced is for gradual but steady improvement in all that appertains to the welfare of workingmen.

In the *Rossland* district some slight increases in the actual working forces of the principal employing mines is reported, but the changes in this respect are not of special importance. It is a fact daily becoming more apparent that the tendency in the big mines is to curtail working forces although no diminution of activity is thereby entailed owing to the perfecting of mining practice enabling mining companies to accomplish similar results with reduced crews. During the past month practically a new branch of the mining industry has been introduced in the *Rossland* camp, *i.e.*, the employment of workingmen as millmen in the concentrators handling the gold-copper ores of the camp. Heretofore, there has been no such industry here, and the workingmen engaged have required special education and training that places them in an entirely new class. The success attending the initial enterprise in milling has been so marked that similar undertakings will be carried out by other mining companies, so that in the next year or two this branch of the mining industry will have attained important dimensions and the demand for men trained in the work will grow in the same ratio as new mills are constructed. The work does not require any special expenditure of muscle, but it does necessitate close attention to details, constant watchfulness and an aptitude for mechanical details that enables the intelligent workman to excel his less intelligent or industrious fellow-workmen. As new plants are instituted the bright men now in the trade will find ample room for preferment.

In *Trail* there is marked activity. The Canadian Smelting Works has approximately 400 men on its pay-roll, the Canadian Pacific railway has nearly 100 men at

work in the immediate vicinity of the city and the Rossland Power Company, subsidiary to the War Eagle and Centre Star Mining Companies of Rossland, employs about 75 men at the concentrating works now well under way.

Reports from the *Slocan* silver-lead mining sections indicate that the expected increase of activity in silver-lead mining is now likely to materialize at an early date. The advent of winter has stimulated the operation of the smaller mines dependant in large measure upon teaming and raw-hiding for the transport of ore between mines and railways. Some disappointment has been expressed as to the lack of enterprise in taking advantage of the Federal bounty on lead, but one of the explanations for this undoubtedly is the exceptionally low price to which lead has recently dropped. This winter and next spring is certain to see a marked change for the better throughout to the *Slocan* according to authorities on the ground.

In *East Kootenay* some slight curtailment is reported in connection with the lumbering industry and one of the reasons given for this is an alleged demoralization of greater or less magnitude in the Northwest Territories market whence all *Kootenay* lumber is exported. It does not appear as yet that the situation in *East Kootenay* has been seriously complicated. Mining in *East Kootenay* would seem to be looking up. The big *St. Eugène* mine is reported on the eve of a resumption of activity, but this report has cropped up so frequently in the last two years as to be received now with more or less doubt. In other sections—*Kimberley* and *Windermere*—metalliferous mining is progressing while the coal mining industry of *Fernie* and district is growing constantly.

Boundary gold-copper mines are producing an enormous weekly tonnage and, despite the serious drawbacks early in the year, the twelve months now drawing to a close will be the banner year in the annals of *Boundary* country.

NEW WESTMINSTER AND DISTRICT.

Mr. Geo. Hargreaves, Correspondent, reports as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

There is little change in labour conditions since October. A demand is still made for unskilled labour, and considerable work is being carried on in the building trade.

Exceptional activity prevails in railway construction at the present time; a large force of men being steadily employed.

The British ship *Forteriot*, of Liverpool, has arrived with 4,800 tons of steel rails for the Vancouver, Westminster and Yukon Railway.

A new cigar factory has been opened by Mr. F. Lynch, formerly of the British Columbia Cigar Factory. Six or seven hands will be employed at the start. The local grocers have formed an association for their mutual protection and benefit. This move does not necessarily mean an advance in prices, though it is likely to result in a slight advance in a couple of lines upon which at present there is a loss at current rates. The main object is stated to be to protect themselves and their customers against abuses of the credit system.

CONDITION OF LOCAL INDUSTRIES.

Following are the imports and exports at the Port of New Westminster during the month of October:

| | |
|---------------------------------|----------------|
| Imports, dutiable goods.. . . . | \$ 67,198 00 |
| Imports free goods.. . . . | 35,723 00 |
| Total imports.... . | \$ 102,926 00 |
| Duty collected.. . . . | \$ 19,312 19 |
| Other revenues.. . . . | 28 20 |
| Total revenue.. . . . | \$ 19,340 39 |
| Increase, 1903.. . . . | \$ 9,111 24 |
| Exports.. . . . | \$1,267,134 00 |

A list of market prices as furnished by market clerk, is as follows:—

| | |
|----------------------------|-------------|
| Beef, hindquarters.. . . . | 8c. to 8½c. |
| Beef, forequarters.. . . . | 5c. to 6c. |
| Mutton, whole.. . . . | 8c. |
| Veal, small.. . . . | 8c. to 9c. |
| Veal, large.. . . . | 6c. to 7c. |
| Pork, small.. . . . | 8c. to 8½c. |

| | |
|------------------|-------------------------------------|
| Potatoes.. . . . | 90c. to \$1 per sack, \$15 per ton. |
| Carrots.. . . . | 60c. per sack. |
| Onions.. . . . | \$1.25 " " |
| Beets.. . . . | 75c. per sack. |
| Parsnips.. . . . | 75c. " " |
| Turnips.. . . . | 50c. " " |
| Cabbage.. . . . | 60c. " " |
| Eggs.. . . . | 50c. to 55c. per doz. |
| Butter.. . . . | 25c. to 30c. per lb. |
| Chickens.. . . . | \$4 to \$5 per doz. |
| Ducks.. . . . | \$7 to \$8 per doz. |
| Fowls.. . . . | \$5.50 to \$6.50 per doz. |
| Apples.. . . . | 50c. to 90c. per box. |
| Pears.. . . . | 70c. to 75c. per box. |

Fishing.—A mass meeting under the auspices of the British Columbia Fishermen's Union was held to consider several proposed changes to the new fishery regulation, which it is intended to ask the Dominion Government to grant. The trade with the east for frozen fish remains good, large shipments being made of both salmon and halibut.

CONDITION OF PARTICULAR TRADES.

Building trades.—Members of these lines are doing well, considering the late season.

Metal, engineering and shipbuilding trades.—Work is plentiful in shipbuilding; two new tugs are under construction.

Woodworking and furnishing trades.—The factories in connection with the mills are running full time, with orders ahead. Car builders report work steady, with prospects good for the winter.

Printing and allied trades.—Printers' work very brisk, with overtime to keep up with orders.

Food and tobacco preparation.—With cigarmakers, work is steady at present and prospects are good.

VANCOUVER, B.C., AND DISTRICT.

Mr. Geo. Bartley, Correspondent, reports as follows :—

GENERAL CONDITION OF THE LABOUR MARKET.

The demand for labour and business in general during the month of November was above the average, and the prospects for the holiday trade were never brighter, it having already started. As usual, at this time of the year, there is a large amount of employment offering. This is due to the fact that a large number of workmen arrive from outside districts and the min-
